7. Application of L. A. Smith for concession privileges at Sunset Bay Park, Coos County: In the discussion of this matter the Chief Counsel advised that Mr. Smith uses the state's property for the landing of his watercraft and for taking on and discharging passengers, but he does not own the water nor the land. Further, there is a question as to who has jurisdiction of the situation, the State Highway Commission or the State Land Board, the question being whether or not the point of the landing is a part of the shore of the ocean. The Commission expressed the desire that this question be definitely decided and accordingly instructed the Chief Counsel to clarify the situation by ascertaining just what rights and control the State Highway Commission has in the matter, and also those of the State Land Board.

The Chief Counsel requested authority to institute condemnation proceedings to acquire certain properties that are needed in connection with state highway improvements. He submitted a list of such properties, together with the offers that he recommended for each in condemnation, as follows:

			Recommended Offer
South Commercial Street-South Liberty Street Section of the Pacific Highway East			
R 15890	Alice H. Page Estate (Right of Way)		
	1 Lot (50 x 100)	$2,000.00	
	2 Lots (50 x 100) at $1,500.00	3,000.00	
	1,000 sq.ft. at 40¢ per sq.ft.	400.00	
	Allowance for access restrictions	600.00	$6,000.00
		$6,000.00	

			Recommended Offer
Pumping Plant Hill-Ontario Section of the Old Oregon Trail Highway			
R 15813	John Mosso (Right of Way)		
	3.4 acres ground at $500.00 per acre	$1,700.00	
	177 peach trees	3,000.00	
	Damage to house by reason of right of way line being 13 feet in front of house	500.00	
	Construct new septic tank (present septic tank on right of way)	200.00	
	Construct new roadway to house	900.00	
	Severance damage	1,000.00	
	Construct fence 306 rods at $3.00 rod	900.00	
		$8,200.00	$8,500.00
Halsey-Crawfordsville Section of the Halsey-Sweet Home Highway			
R 15973	Verdis Burke and Francis R. Wright (Right of Way)		
	0.61 acre at $400.00 per acre	$ 244.00	
	145 rods fence to be moved at $4 rod	580.00	
		$ 824.00	$ 850.00
Unit #2 Section of Sullivan Gulch Highway			
R 15765	Dan and Myrtle Noren (Right of Way)		
	Land: 5000 sq.ft. at $0.30 sq.ft.	$1,500.00	
	House: 782 sq.ft. at $6.00 sq.ft.	4,368.00	
	Garage: 180 sq.ft. at $1.50 sq.ft.	270.00	
	Basement: Approximately 586 sq.ft. at $1.00 sq.ft.	586.00	
	Vacant house in rear: 768 sq.ft. at $2.00 sq.ft.	1,536.00	
	Yard fence: Approximately 150 ft. at $1.00 per foot	150.00	
		$8,410.00	$8,500.00
Gardiner Ranch-Berger Ranch Section of the Sunset Highway			
R 6507-A	Carl G. Bechen, et al. (Right of Way for Connection between Cornelius Pass Road and Sunset Highway)		
	Land 3.86 acres at $400.00 per acre	$1,544.00	
	Cash allowance for fencing 75 rods at $3.00 per rod	225.00	
	Damage to remaining land adjacent to Parcel #2	750.00	
		$2,519.00	$2,600.00

After careful consideration, the Commission authorized condemnation of the several tracts at the recommended offers. The attached resolutions relative thereto, marked EXHIBITS "B-1," "B-2" "B-3," "B-4," and "B-5," which resolutions by this reference are made a part hereof with like effect as though extended in full herein, were thereupon adopted by the Commission by unanimous vote.

In connection with the above listed condemnation actions, particular attention was given to the acquisition of the John Mosso property, Item R-15813. It appears that in addition to right of way, the state needs a quarry site situate on Mr. Mosso's property, for which an option has been obtained. Mr. Mosso demands the sum of $11,000 for the right of way and has declared that he will not sell the quarry site at the price mentioned in the option unless he secures such sum. The Commission unanimously authorized the Chief Counsel to condemn the quarry site as well as the right of way, if absolutely necessary. The attached resolution relative thereto, marked EXHIBIT "B-6," which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Chief Counsel was also authorized to settle all of the condemnation cases mentioned in his report for the amounts approved by the Commission, without resorting to condemnation if he can do so.

The Chief Counsel brought up for discussion a settlement with Mrs. Victoria Ford, for property needed as right of way for the Columbia River Highway at Dodson. He said that Mrs. Ford operates a small store at this place and because of the fact that she has a monopoly on this kind of business, the other stores having been purchased by the state, she does not now care to sell her property for the consideration shown in the option heretofore obtained from her, and is insisting on more money for her property. He recommended that either suit be brought against Mrs. Ford for specific performance of the terms of the option, or that the property be acquired by condemnation. He indicated a preference for condemnation, which would make it possible to take immediate possession of the property. The Commission authorized the Chief Counsel to condemn the property, if necessary.

The Commission had under discussion the matter of granting to Mrs. Kathryn Huling a permanent easement for a roadway 30 feet wide across state property on the Coos Bay-Roseburg Highway near Myrtle Point, Coos County. Details of the situation were explained by the Right of Way Engineer, who advised that the granting of this easement is merely completion of a previous commitment and recommended that the easement be granted. The Commission approved the recommendation unanimously. (The easement was signed on the following day.)

The Chief Counsel brought up for discussion the provisions of an easement agreement with the Southern Pacific Company with respect to right of way needed in connection with the improvement of the Barkley Springs-Algoma Section of The Dalles-California Highway, Klamath County, bids for which were received by the Commission at this meeting; also a proposed agreement with the Western Union Telegraph Company covering the temporary removal,

and reinstallation, of its facilities along this section. He pointed out that the Railroad Company estimates its expense in connection with this job at $33,920, and that the Western Union Company estimates its expense at $11,420, which amounts are recollectible from the state. He questioned certain items of expense included in the Railroad Company's estimate. In the discussion of this matter, the Engineer advised that he has carefully checked the costs as listed by the Company, and in his estimation they are satisfactory. He recommended award of the contract for the highway work and approval of the agreement with the Railroad Company on the basis of its cost estimate. The Commission unanimously approved the recommendation.

The Right of Way Engineer presented for the Commission's consideration a list of options obtained for real property that is needed in connection with highway improvements throughout the state, and requested authority to close them in the amounts mentioned therein. After careful consideration of each item, the Commission unanimously approved the request by the adoption of the attached resolution relative thereto, marked EXHIBIT "A," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In the discussion of right of way matters, the question arose as to the status of acquisition of right of way needed for the Ladd Canyon Section of the Old Oregon Trail. The Right of Way Engineer advised that good progress is being made and that he anticipates early completion of the negotiations, so, insofar as right of way is concerned, the project can be advertised for bids to be received at the next meeting of the Commission. He was instructed by the Commission to rush this project.

The Right of Way Engineer reported on the request of Mr. G. C Knodell of Albany to purchase certain state-owned property located near the north end of the Albany overpass, on US99E, which property consists of one-half of the vacated portion of Lafayette Street. He said that Mr. Knodell has offered to pay $300 for this property, which property he states is needed in connection with the construction of an office building for the Secretary of State, but an appraisal of the property indicates that it is worth at least $2,000. He further stated that Mr. Knodell when advised of this fact requested the privilege of leasing the property at the rate of $5 per month, the payments to apply on the purchase price should he decide to buy it. He pointed out that the taxes on the property would be about $55 annually, and recommended, if the Commission wants to dispose of the property, that it be advertised for sale and sold to the highest bidder therefor without access to the highway. The State Highway Engineer advised that the property is not needed for highway purposes, and he expressed his concurrence in the recommendation. The Commission unanimously approved the recommendation.

The Right of Way Engineer reported the results of receiving bids in Salem on February 1, 1950, for the purchase of two buildings on highway right of way at Dodson, as follows:

1. Building on Lot 8, Block 1, Bonnie Park

1. Otto A. Spicuzza, Bonneville	$ 150.00
2. C. B. Burt, Portland	115.00

(Cont.)

2. Building on Lot 1, Block 2, Bonnie Park

1.	Otto A. Spicuzza, Bonneville	$ 130.00
2.	C. B. Burt, Portland	115.00

He estimated the value of the buildings at $200 each, and recommended acceptance of the offers of Mr. Spicuzza. The State Highway Engineer and the Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Chief Counsel reported receipt of a request from Anderson, Sloan and Anderson, Attorneys, of Astoria, that the State Highway Commission consent to the vacation of that portion of Elmore Avenue which lies between 24th Street and 26th Street in Hustler's Addition to the City of Astoria. He stated that the request does not disclose the purpose of the vacation; also, that the street has not been constructed and that the vacation of the same would mean future requests for curb cuts and for direct access to the Nehalem State Highway. He recommended that the request be denied. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously.

The Commission discussed a letter from the Hon. J. H. Sturgis, County Judge of Umatilla County, urging that serious consideration be given to a request from the Pendleton Developing Company for the purchase of certain state-owned property adjacent to the Old Oregon Trail and the Umatilla River near the west highway approach into Pendleton. Judge Sturgis advised that the Pendleton Developing Company desires this property as the site for a field office for the Secretary of State. The Engineer explained that the tract in question is a long strip along the highway, containing about four acres of land, which property was acquired from the City of Pendleton with the restriction that it be landscaped. Federal funds in excess of $4,000 have been spent in connection with the landscaping work, he said, and if the property is now sold for the purpose intended it would be necessary to reimburse the federal government for the full amount of the federal funds involved. He also said that use of the property as intended would require traffic to cross the highway, since there is no street available to make turning movements, and would create a considerable hazard to highway traffic. He recommended that the property not be sold. The Chief Counsel stated that the property has been appraised at $18,000 to $20,000, and gave as his thought that if the Commission decides to dispose of the property it should be sold as a result of competitive bidding therefor. The Commission decided unanimously not to sell the property.

The Commission also discussed an offer from the Pendleton City Council to pay $135 per acre for a 7.2 acre tract of state highway property abutting the Pendleton Airport Road. The Chief Counsel advised that he has been negotiating the sale of this property not only with the city but also with the Mr. Smith of Pendleton who owns adjoining land. Mr. Smith, however, has gone east and is not expected to return until February 6. It was the Counsel's feeling that Mr. Smith would pay considerably more for the property than the city has offered. In the discussion of this matter it was brought out that previous discussions concerned not only the sale of this property, but other state-owned property in the same vicinity, and the abandonment of

the Airport Road as a State Secondary Highway. The Commission instructed the Chief Counsel to render a complete report on the entire matter at its next meeting so it can be definitely disposed of at that time.

The Engineer brought up for discussion matters pertaining to the re-establishment of the Southern Pacific Company's spur track adjacent to the Weyerhaeuser Timber Company's mill between North Bend and Coos Bay. The railroad company's final plans, he said, indicate that the right of way acquired by the Weyerhaeuser Timber Company for the new railroad alignment is insufficient. They have requested that the state grant them an easement to encroach upon a four-foot strip of highway right of way for a distance of about 1,000 feet to provide necessary impaired clearance limits; and that additional slope easement be granted as may be necessary for their cut-bank slopes, it being understood that in no place will the easement extend nearer than five feet outside of the curb along the easterly side of the highway. The company agrees, he said, if granted this privilege, to landscape and maintain the new slopes after their work is completed. He advised that the encroachment will not interfere in any way with future usage of the highway, and he recommended that the request be approved on the condition that the company will landscape and maintain the area. The Commission approved the recommendation unanimously and ordered that the matter be covered by appropriate easement agreement.

The Engineer reported the results of investigations for a maintenance site in the City of Fossil. He recalled that at the previous meeting of the Commission the Right of Way Engineer reported an option to purchase a site containing 1.67 acres from Mr. McConnel for the sum of $1,500; that the Commission did not approve the option and ordered further search for a suitable tract that would be less expensive. Such a search has been made, he said, and a number of alternate sites reviewed, but the concensus of opinion is that the McConnel site is the best and most suitable, considered from all standpoints. He recommended purchase of the McConnel property at the price stipulated, $1,500. The Commission approved the recommendation unanimously.

The Chief Counsel presented for the Commission's approval a form of agreement with the Port of Newport providing for the construction, maintenance and use of a temporary road across state park property at Depoe Bay, extending from the highway to a point near the mouth of the Bay where the U. S. Army Engineers plan to construct a breakwater. He also presented a form of easement granting to the Port of Newport the authority to construct and forever maintain a breakwater upon land owned by the State Highway Commission at this place. He explained that these papers have been prepared in conformity with the ideas of the Commission as expressed at the previous meeting, and he pointed out that both of them have been accepted and signed by the Port of Newport. He recommended approval of the same by the Commission. The Commission unanimously approved the permit agreement and the easement. (Both papers were signed by the Commission on the following day.)

The Chief Counsel also presented a form of resolution for adoption by the Commission, formally approving the form of application and permit which was adopted by the Commission at the previous meeting for use in connection with the issuance of permits covering construction of approach roads to state highways. The Commission unanimously adopted the resolution, a copy of which,

marked EXHIBIT "C," is attached hereto and by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed briefly, but took no action on the written report of the Chief Counsel, dated January 4, 1950, with respect to the legal obligation of the State Highway Commission to use state highway funds to match federal funds for the benefit of counties in the acquisition of right of way.

The Chief Counsel brought to the Commission's attention certain restrictions contained in a form of deed that has been submitted by the Union Pacific Railroad Company in connection with the state's purchase of a forty acre tract of railroad company land needed in connection with the improvement of the upper Columbia River Highway near Bonneville. He read aloud the restrictions, particularly pointing out that the Company reserves forever all minerals and all mineral rights of any form and character now existing, or hereafter to exist, including gas, and all rights thereto, and coupled with such reservation is reserved to the Company the sole, exclusive and perpetual right to explore for, remove and dispose of said materials by any means or method it may deem advisable. He also mentioned other reservations. (For complete list, see Chief Counsel's letter directed to the members of the State Highway Commission, dated January 9, 1950, in general files.) The State Highway Engineer expressed concern about the reservation that permits the Company to go upon the property and make excavations that might result in damage to the highway. He suggested an amendment to clarify the situation and to protect the highway from such activities. The Commission approved the suggestion and instructed the Chief Counsel to endeavor to get the Company to revise its form of deed accordingly.

The Chief Counsel reported negotiated settlements of certain condemnation cases, as follows:

1. State Highway Commission vs Mary Andree, File L-1540:
   He explained that this case involves the acquisition of 0.18 acre of land near New Era, for use in connection with the Pacific Highway. This owner, he said, originally demanded $1,000 for the property, and later demanded $3,000, but has finally agreed to settle for $500. The Commission approved the settlement.

2. The State Highway Commission vs Arthur C. Wright, File L-1556:
   This case involves the acquisition of 1.76 acres of land for use in connection with the Tolo Overcrossing Section in Jackson County. The Chief Counsel advised that the Defendants demanded the sum of $2,500 for their property, but he has been able to settle the case for $600, the amount of the original offer. The Commission approved the settlement.

3. State Highway Commission vs Letha O. Jacques, File L-1450:
   The Chief Counsel advised that this case involves acquisition of 22.53 acres of land needed for right of way in connection with the construction of the Glendale County Road No. 12 and necessary approaches, in Douglas County. The owners in this case, he said,

demanded $1,250. The case was settled, however, for $685 after the acreage was reduced to 13.69 acres. The Commission approved the settlement.

4. State Highway Commission vs Letha O. Jacques, File L-1529:
The Chief Counsel advised that this property consists of 7.4 acres, which is needed for gravel pit purposes in Douglas County. He stated that he originally offered $750 for the property, which the owner refused, so the property was reappraised by personnel in his office, who gave consideration to prices paid for similar properties in the same vicinity, and concluded that a compromise offer of $1 110 would constitute a fair settlement, which compromise offer has been accepted by the owner. The Commission approved the settlement unanimously.

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. with the same persons present and participating.

The following persons, representing the Federal Government, were present and discussed with the Commission the programming of fiscal year 1951 Forest Highway Funds: Messrs. W. H. Lynch, Division Engineer, T. M. Davis, District Engineer, and R. N. Kellogg, Senior Highway Engineer, all of the Bureau of Public Roads; H. J. Andrews, Regional Forester, and W. L. McDonald, Assistant Regional Engineer, both of the U. S. Forest Service.

Mr. Lynch advised that there are available for allocation for construction purposes a total of $3,700,000 of Forest Highway Funds, including cooperative funds amounting to $211,000 from the State and $90,000 from the War Department. A list of the projects that are eligible for the proposed program was presented. After careful consideration of the list, it was mutually agreed by all concerned to recommend the projects listed in the following letter directed to the Chief, Forest Service, and Commissioner of Public Roads, Washington, D. C., which letter was signed by the Commission on the following day.

February 7, 1950

Chief, Forest Service
Commissioner of Public Roads
Washington, D. C.

Gentlemen:

In accordance with the Rules and Regulations for Administering Forest Highways, the State of Oregon, on December 27, 1949, submitted a list of projects, with an accompanying map showing their locations, proposed for construction out of Fiscal Year 1951 funds, and on February 6, 1950, a joint conference between representatives of the State Highway Commission, the Forest Service and the Bureau of Public Roads was held for the purpose of agreement on projects to be recommended for the construction program for the Fiscal Year 1951.

(Cont.)

Chief, Forest Service (Cont.)
Commissioner of Public Roads

The following is a statement of Forest Highway and other funds available and a list of projects as agreed upon in conference for recommendation for approval:

Funds Available

Apportionment of Forest Highway Funds for Fiscal Year 1951		$2,753,489.00
Available State Contingent and Indicated Project Surpluses		1,029,401.90
Total Funds Available		$3,782,890.90

Deductions

Washington Office Reserve for Bureau of Public Roads and Forest Service	$275,349.00	
Reserved for State Contingent	108,541.90	383,890.90
Allocation to Projects		$3,399,000.00

Cooperative Funds Available

Surplus State Funds from previous Project 15-A1,B2	136,000.00
Additional State Funds proffered for Project 15-A2	75,000.00
Cooperation by Corps of Engineers on Project 24-C4, Unit 2	90,000.00
Total Funds Available for Allocation	$3,700,000.00

Project Description and Comment

ALSEA HIGHWAY, PROJECT 6-A2, B2, F2, E9, UNITS 1 AND 2

Under Project 6-A1, E8, 4.06 miles were graded, partially surfaced and a bituminous treatment applied. Under Project 6-A2, B2, F2, E9, Unit 1, an additional 6.38 miles to the east of Project 6-A1, E8, is now under contract for grading and subgrade stabilization. Unit 2 of the project contemplates additional surfacing over Project 6-A1, E8, the surfacing of the 6.38 miles graded under Unit 1 and the bituminous surfacing of the entire 10.46 miles at an estimated cost of $300,000. This project completes the improvement over the last remaining unstable and unoiled section of the route. The $400,000 as allocated under the 1950 Fiscal Year program was insufficient to finance both the going grading contract, estimated to cost $224,000, and the proposed surfacing and bituminous surfacing project, estimated to cost $300,000, and the proposed additional allocation of $124,000 is to increase the previous allotment to a total of $524,000.

PACIFIC HIGHWAY, PROJECT 15-A2

Project 15-A1, B2, programmed from 1950 Fiscal Year funds, will complete the grading, surfacing and bituminous surfacing of 6.47 miles of an 11 mile section at the north end of the route which is now substandard for this Interstate route. This proposed project will continue a similar improvement northerly for a distance of approximately 2.4 miles. Favorable bids on Project 15-A1, B2 effected a savings of $204,000 Forest Highway funds, which were returned to the State contingent, and $136,000 State funds, which latter the State agrees to apply to Project 15-A2 together with an additional $75,000. These State funds plus the $800,000 Forest Highway funds provide a total of $1,011,000 to finance the new project. There remains, to complete the reconstruction of the Forest Highway section, approximately 2.2 at the north end which the State contemplates to construct as a Federal-aid project.

NORTH SANTIAM HIGHWAY, PROJECT 24-C4, UNIT 2

Construction of the Detroit Dam necessitated the reconstruction of 15.6 miles of this route from Niagara, at the west end of the route, easterly to Idanha, Oregon. Under previous projects 12.7 miles have been graded and partial surfacing is underway. The proposed project is to complete the grading of the remaining 2.88 miles at the easterly end. Under agreement for reconstruction the Corps of Engineers is obligated to finance the cost of construction required solely for protection against "draw-down" stresses created by the reservoir, estimated to cost approximately $90,000. The balance of the cost, $335,000, is to be financed from Forest Highway funds. Surfacing of this section and additional surfacing, if required, of the 12.7 miles and the bituminous surfacing of the entire reconstructed portion is considered for future recommendation.

(Cont.)

OCHOCO HIGHWAY, PROJECT 27-A3, B4

This project completes the surfacing and bituminous surfacing of the entire 18.23 miles graded under previous projects. This project completes the reconstruction contemplated for the project at present. It connects on either end with improvements by the State and eliminates a section of very low standard road.

PENDLETON-JOHN DAY HIGHWAY, PROJECT 34-B4, C

The section proposed for improvement was originally constructed in 1928 and 1930 and has deteriorated to such extent that considerable failure occurs each spring. It is also below standard as to alignment and grade in comparison with other sections of the route. The project extends from previous Project 34-A3, B3 southerly 3.56 miles to the north end of an improvement by the State which is adequate for the time being.

JOHN DAY-BURNS HIGHWAY, PROJECT 35-B4, C3

Under previous Project 35-B3, C2, 8.4 miles at the southerly end of the so-called Poison Creek Section was graded and subgrade stabilization placed. There remains at the north, 3.9 miles yet to be reconstructed to connect with recent State reconstruction and this proposed construction contemplates the grading of the 3.9 miles and the surfacing and bituminous surfacing of the full 12.3 miles. This will complete reconstruction of that portion of the route south of the Grant-Harney County line.

CASCADE LAKES HIGHWAY, PROJECT 46-D2, E1

Under previous Project 46-C3, D1, E, 4.0 miles are now being graded and advance clearing and grubbing are being performed on an additional 8 miles. Under Project 46-D2, E1 it is contemplated to continue the grading for 3.2 miles of the 8 miles now being cleared and grubbed and construction of two bridges.

NORTH UMPQUA HIGHWAY, PROJECTS 47-B4 and B5

These two projects continue the grading easterly 6.5 miles from Project 47-B3. The Forest Service urges that reconstruction be advanced to Steamboat Creek, which is at the easterly end of the proposed projects, and which is a focal point for future timber operations which cannot be initiated effectively until the road is improved to that point. The work is divided into two projects to enable wider competition.

(Cont.)

Chief, Forest Service (Cont.)
Commissioner of Public Roads

LOCATION SURVEYS

An additional $75,000 is required to continue location surveys on projects approved in this and previous programs and on the following which are proposed for approval.

Oregon Coast Highway, Route 9. This section and the adjoining State highway sections are of very low standard as to curvature and gradients and are developing considerable maintenance costs to maintain stability under heavy logging traffic. The State Highway Department contemplates relocation both north and south of the Forest Highway section and it is desirable that the entire Forest Highway section be surveyed for relocation.

Oregon Coast Highway Route 10. Additional study and field survey is required to obtain information for further reconstruction south from Project 10-D3,E1.

North Umpqua Highway, Route 47. Construction under this program will complete the grading of the route to Steamboat Creek beyond which point location survey is required for future construction. It is proposed to advance the survey eastward toward the easterly terminus of the route.

Redwood Highway, Route 12. This route is subjected to heavy logging and tourist traffic and is now inadequate as to alignment, grades, width and stability. Reconstruction of the route is being urged and relocation survey over the entire route, 2 miles, will be required.

Mt. Hood Highway, Route 25. Additional study and survey is required of portions of this route which have developed to be substandard and hazardous. Completion of the Warm Springs Highway and the Timberline Highway is anticipated to so increase the traffic on this route that reconstruction of these sections will be imperative.

Mt. Hood Highway, Route 49. Portions of this route are so narrow and crooked that increased logging and tourist traffic have developed extreme hazard and the Forest Service has urged reconstruction of those sections. Survey of an aggregate of approximately 8 miles is necessary to prepare plans for reconstruction.

Wapinitia Highway, Route 26. With the completion of the Warm Springs cut-off travel over the Wapinitia Highway is anticipated to increase considerably and improvement to present standards is necessary for a short section westerly from its junction with the Warm Springs. Field survey was completed some time ago, but further study will now be required and P. S. and E. prepared.

Klamath Lake-West Side, Route 48. The Forest Service has requested this route be considered for improvement to serve the logging industry and to facilitate Forest Administration as well as provide a higher standard highway for the increased travel. Field survey was accomplished several years ago and review

(Cont.)

Chief, Forest Service (Cont.)
Commissioner of Public Roads

of this will be required with probably some additional field survey in addition to preparation of P. S. and E.

In addition to the above the Forest Service has requested that reconnaissance and such location survey be made on the following as is necessary to determine their eligibility for addition to the Forest Highway System.

Belknap-Clear Lake Cut-off - 19 Miles

This proposed route extends northerly from the McKenzie Highway, Forest Highway Route 22, near Belknap Springs, via Clear Lake, to a connection with the Santiam Highway, Forest Highway Route 23. The route will total approximately 19 miles and will serve as an alternate route to McKenzie Pass; is of importance for logging and will be of benefit in administering that portion of the Willamette National Forest. Field location survey has been completed with Forest Development Road Funds, for approximately 8 miles on the south end. Addition to the Forest Highway System has been urged by the Forest Service and local bodies and the contemplated further survey is primarily to determine eligibility of the route for inclusion into the system.

Ukiah-Starkey Highway, 33 Miles

This proposed route extends from Ukiah, Oregon, on the Pendleton-John Day Forest Highway Route 33, northeasterly, through Lehman to Starkey, Oregon, a point which is 17 miles from Hilgard on Federal Route 30, approximately 8 miles west of La Grande, Oregon. It extends through the Umatilla National Forest in Umatilla and Union Counties. It will improve the existing substandard forest development road, will facilitate logging and serve as an important cut-off between Federal Routes 395 and 30. The Forest Service has requested that such survey be made as will determine its eligibility for adoption into the Forest Highway System.

MAINTENANCE

With the completion of projects approved under the 1950 Fiscal Year program, the obligations for maintenance by the Bureau of Public Roads will be considerably increased and the $75,000 herein recommended, together with the unexpended balance, is to finance this work.

Very truly yours,
/s/ W. H. Lynch
W. H. LYNCH, Division Engineer

O. K.
/s/ R. H. Baldock

OREGON STATE HIGHWAY COMMISSION

/s/ T. H. Banfield
Chairman

/s/ Ben R. Chandler
Commissioner

/s/ Chas. H. Reynolds
Commissioner

U. S. FOREST SERVICE

/s/ H. J. Andrews
Regional Forester

At the conclusion of the conference for programming the Forest Highway funds, Mr. McDonald mentioned the following projects as desirable for future Forest Highway Programs: 1) Widening Mt. Hood Loop; 2) Survey for future re-alignment of the Mt. Hood Highway to by-pass Government Camp; 3) Survey with respect to proposed extension of the Starkey Secondary Highway in Union County to a connection with the Pendleton-John Day Highway near Ukiah, Umatilla County; 4) Re-alignment of the Hayes Hill Section of the Redwood Highway to eliminate excessive curvature.

Mr. Andrews suggested that the state take over the operation of Timberline Lodge. He was requested to present his suggestion in writing.

The Chief Counsel reported the status of the proposed highway-railroad grade separation project on the Oregon Coast Highway at Gardiner, involving a spur track of the Southern Pacific Company. He advised that he presented to the Railroad Company the Commission's offer to contribute $30,000 of state funds toward the cost of the structure, but was informed that the Railroad Company is not financing the project, that feature being the obligation of the lumber company which is to be served. Further, that the lumber company is of the feeling that the state should contribute $45,000 toward this expense, 50 percent of the estimated total cost. He further stated that a rehearing of the subject before the Public Utilities Commissioner has been requested, but the case will not be reopened unless mutual agreement can be reached by the parties concerned; and if such agreement cannot be reached, then the Railroad Company will probably proceed to construct its facilities across the highway at grade, pursuant to the original order of the Public Utilities Commission. As a result of discussion, the Commission ordered that the Company be informed that $30,000 is the maximum amount that the state will pay for the elimination of this grade crossing, and if such contribution is not acceptable, then the Commission will withdraw its offer entirely. In this connection the Engineer reported on the number of grade crossings that are in existence on state highways throughout the state. Careful investigation, he said, reveals that there are 252 such crossings. Action in this matter was deferred, pending a further report from the Commission's Chief Counsel

The Commission discussed a report from the Engineer concerning the need to control the parking of automobiles along the shoulders of the Pacific Highway in the southern part of Cottage Grove, particularly along the section in front of the Lorane Valley Lumber Company sawmill. He said that employes of the lumber company park their cars on the shoulders of the highway, which creates a traffic hazard to highway travel and interferes with proper maintenance of the highway shoulders. He gave as his belief that the lumber company should provide off-street parking for its employes, and he recommended the adoption of an order by the Commission establishing a "No Parking on Highway Shoulders" zone for a distance of about one-quarter mile, extending from the south city limits of Cottage Grove, (M.P. 145.51), to a point near the bridge over the Coast Fork, Willamette River, (M.P. 146.03). The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "D-1," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In this connection the Chief Counsel reported that the City of Cottage Grove desires to prohibit the parking of vehicles on the easterly side of North Ninth Street (Route of the Pacific Highway) from the north line of Gibbs Avenue northerly to the south line of Thayer Avenue, in order to eliminate traffic hazards that now exist along this section by reason of the parking of vehicles along both sides of the street. The City Council has already prepared an appropriate ordinance covering the matter, which it will adopt if the Highway Commission will approve such restriction. He recommended approval of the city's request. The Engineer concurred therein. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "D-2," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered and upon recommendation of the Chief Counsel, approved certain minor changes in its agreement with the Union Pacific Railroad Company relating to the construction of the Tillamook Street-Broadway Bridge Section of the Pacific Highway West, in Portland.

The Chief Counsel brought up for the Commission's approval a form of resolution amending a previous resolution adopted by the Commission on June 28, 1949, with respect to the signing of permits that are issued by the State Highway Department covering movements over state highways of material having a weight and/or dimension in excess of that specified by statute. He said that after studying the previous resolution he reached the conclusion that the language of the permits should follow more strictly the language of the statutes, because a violation of the regulations contained in the permits would constitute a criminal offense. He recommended adoption of the amendatory resolution. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "E," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission had under discussion a controversy with the Southern Pacific Company arising out of the reestablishment of the Southern Pacific Company's tracks in connection with the improvement of the Oregon Coast Highway in the City of Coos Bay. The Engineer explained that this controversy arises out of the replacement of certain facilities -- the Company proposes to install new creosoted ties, which are estimated to cost $10,170; heavier type rails, costing $9,894; and a heavier type of switches costing $8,687, which three items total $28,751. He also said that the Company estimates the salvage value of the existing ties, rails and switches at $3,640, and wants the state to pay the difference amounting to $25,111. He gave as his feeling that this expense should be shared equally by the state and the Company, or $12,555.50 each, and on that basis the state would then agree to assume the balance of the cost of the project, which is estimated at $62,360. The total cost to the state in that event would amount to $49,804.50, and the total cost to the railroad company would be only $12,555.50. He gave as his feeling that the state's offer is fair, but it appears that the railroad company will not accept it, so if the project is to go forward the state will have to assume the extra $12,555.50. He recommended further negotiations with the railroad company and that the state assume payment of the entire cost in the event the railroad

company refuses to contribute. The Commission approved the recommendation unanimously and authorized the Engineer to advertise this project for bids to be received at the next meeting of the Commission, subject to clearance by the Chief Counsel, who requested more time to carry on the negotiations.

The Commission discussed and unanimously approved a form of agreement with the U. S. Bureau of Reclamation concerning the construction and operation of a highway on lands owned by the United States of America in Malheur County, particularly land needed as right of way for the construction of the Garrison Corner Section of the Nyssa-Adrian Secondary Highway. (The agreement was signed by the Commission on the following day.)

The Commission discussed with the Engineer the bids received at the morning session for highway construction projects, and at 3:00 p.m. Chairman Banfield publicly announced the Commission's decision with respect to each project, as follows, the Commission's action being by unanimous vote:

"Spruce Street (Myrtle Point) Bridge Section of the Coquille-Myrtle Point County Road in Coos County, involving construction of reinforced concrete and steel bridge over South Fork Coquille River, and roadway approaches thereto. The low bid for this work was submitted by VaDare Construction Company, Portland, at $154,182 based on the use of precast concrete beams, and $154,182 based on the construction of beams in place. There were five higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to VaDare Construction Company based on Alternate "B" when certain conditions have been satisfied.

"Grading, surfacing and bituminous macadam construction on the Barkley Springs-Algoma Section of The Dalles-California Highway. The low bid for this work was submitted by Peter Kiewit Sons' Co., Longview, Washington, at $853,882. There were eight higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Surfacing and bituminous macadam construction on the Thomas Creek-Lyons Section of the Albany-Lyons Secondary Highway, Linn County. E. C. Swaggart, Eugene, submitted the low bid for this work at $118,[illegible]5.25 based on the use of asphalt. He submitted no bid based on the use of tar. There were thirteen higher bids. The Commission has awarded this contract to the low bidder, E. C. Swaggart, at his bid price.

"Grading, surfacing and oiling on the Garrison Corner Section of the Nyssa-Adrian Secondary Highway in Malheur County. The low bid for this work was submitted by N. A. Toole Construction Co., Ontario, at $24,912.50. There was one higher bid. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Installation of traffic signals at two intersections on the Pacific Highway East in the City of Salem, Marion County. The low bid for this work was submitted by W. R. Grasle Company, Portland, at $5,652. Mill Electric Co., Salem, was the only other bidder, at $5,937.25. The Commission has awarded the contract to the low bidder, W. R. Grasle Co., at its bid price.

"Furnishing crushed rock in stockpile on the Heppner Junction-Lena Section of the Heppner Highway in Morrow and Gilliam Counties. Rush Construction Company, Enterprise, submitted the low bid for this work at $45,240. There were five higher bids. The Commission has awarded the contract to the low bidder, Rush Construction Company, at their bid price.

"Furnishing of crushed rock or crushed gravel in stockpile on the Biggs Section of the Columbia River and Sherman Highways in Sherman and Wasco Counties. Vernie Jarl, Gresham, submitted the low bid for this work at $29,220. There were six higher bids. This contract has been awarded to the low bidder, Vernie Jarl, at his bid price.

"Furnishing of crushed rock or crushed gravel in stockpile on the Boardman-Cold Springs Section of the Columbia River, Hermiston Secondary and Pendleton-Cold Springs Highways in Umatilla County. The low bid for this work was submitted by Newport Construction Co. and Kern & Kibbe, Portland, at $30,492. There were three higher bids. The Commission has awarded this contract to the low bidders at their bid price."

The Engineer reported on the status of the proposed traffic interchange between the Sunset Highway and the Hillsboro-Cornelius Pass County Road (Federal Aid Secondary Highway) west of Portland. He said that the plans for this improvement have been ready for several months, but the project is being held up because of right of way difficulties, the owner of the land that is needed for this improvement being unwilling to sell, so it appears necessary to condemn it. He was instructed to advertise the project for bids to be received at the next meeting of the Commission if the right of way matter is cleared by that time.

The Commission discussed a report from the Engineer on engineering survey parties that are now working on location surveys throughout the state. (See copy of Engineer's written report dated January 27, 1950, in general files.) The Engineer pointed out that under the present schedule of operations, practically all surveys, with the exception of the five that were authorized by the Commission at its last meeting, will be completed by early summer, insofar as field work is concerned, so it will be necessary for the Commission to authorize additional surveys if the survey crews, which are engaged full time on such work, are to be kept intact and busy. He suggested that the Commission authorize the making of surveys for three construction projects which he believed would be given early priority by the Commission in its construction program, as follows:

Section of Highway and Location	Length	Estimated Construction Cost	Estimated Survey Cost
1. Nyssa-Adrian Section of Nyssa-Adrian Secondary Highway, Malheur County	11 miles	$ 300,000.00	$ 11,000.00

(Cont.)

Surveys of construction projects (Cont.)

Section of Highway and Location	Length	Estimated Construction Cost	Estimated Survey Cost
2. Bend-Tumalo Section of US20 (McKenzie-Bend Hwy.), Deschutes County	5 miles	$ 450,000.00	$ 10,000.00
3. Woodburn-Mt. Angel Section incl. Mt. Angel City Section of Hillsboro-Silverton Secdy. Hwy., Marion County		170,000.00	8,000.00
Total cost of the three surveys			$ 29,000.00

As a result of discussion, the Commission unanimously authorized the Engineer to conduct such additional surveys.

The Engineer reported, as previously instructed by the Commission, on the cost to operate the Astoria-Megler Ferry, such report containing a comparison between the estimated traffic revenues and expense and the actual figures covering each of these items. The matter was discussed briefly, but no action was taken thereon. (See copy of Engineer's written report, dated February 3, 1950, for details.)

In this connection the Engineer advised that the present contract with Babbidge and Holt, Inc. for the operation of this ferry will expire on May 31, 1950. He requested authority to advertise for bids at the next meeting of the Commission for furnishing similar service for a two-year period, with an option on the part of the Highway Commission to extend the contract for an additional period of one year under the same terms and conditions if it so desires. He explained that he asked permission to receive bids at the next meeting in order to have time to readvertise the project before the present contract expires, in case a satisfactory bid is not received, and to allow time for the contractor to make his arrangements to start the service on June 1, 1950. The Commission unanimously approved the request.

Pursuant to previous instructions of the Commission, the Engineer presented his recommendation with respect to permitting log hauling on the upper Columbia River Highway between Dodson and the Cascade Locks Lumber Company mill about two miles east of Cascade Locks. The Engineer advised that the route over which it is proposed to haul logs, and the prospective entrances to and exits from the highway, have been carefully inspected and it has been found that the sight distance along the highway is adequate from both entrances, and the alignment of the highway is satisfactory. He recommended, in view thereof, that permits be granted for the transportation of logs over this section of highway, subject only to standard restrictions. The Commission unanimously approved the recommendation.

In this connection the Commission also considered the application of Mr. Harold Leach, Portland, for permission to transport logs over the Columbia River Highway (old route) from Springdale to Corbett, thence over county roads to the new Columbia River Highway, thence easterly to the Cascade

Locks Lumber Company mill. The Engineer recommended that the request be denied because of the hazards that would be created were logging trucks to enter the new highway at Corbett Junction, which intersection has been the subject of considerable discussion. The natural market for the timber from Mr. Leach's tracts, he said, is Portland, and he gave as his feeling that Mr. Leach should be required to deliver his logs to such place rather than Cascade Locks. The Commission approved the recommendation by unanimous vote.

Mr. August Uehlinger, President, Cascade Locks Lumber Company, appeared before the Commission regarding Mr. Leach's application. He stated that he discussed this matter with the State Highway Engineer, who pointed out to him the hazards that would be created were logging trucks permitted to enter the highway at Corbett Junction, so he is making a further investigation with the view in mind that possibly the logs could be delivered to Troutdale through Springdale, and will report his findings later.

The Commission discussed a report from the Engineer on the claim of the Northwest Cities Gas Company for reimbursement for the reestablishment of its gas pipes on the High Street-Walnut Street section of the Pacific Highway in Eugene, necessitated by reason of the construction of this section of highway. He recommended payment to the Gas Company of the sum of $5,781.24 as satisfaction in full of its claim, a careful review of the facts revealing that payment of such sum is a fair settlement of the claim. He explained the details. The Chief Counsel concurred in the recommendation, with the understanding, however, that $350 of such amount shall be deducted and paid direct to Del R. Beebe Construction Company as payment for certain structural excavation work that they performed for the Gas Company, which amount was included in the Gas Company's claim. The Commission approved the recommendation unanimously. (For details see Engineer's written report to the State Highway Commission dated February 1, 1950, in general files.)

The Engineer rendered a brief report on the drainage matter in Corvallis heretofore presented by a delegation from that city which appeared before the Commission at its December meeting. He said that consultation with the city officials revealed that plans are being made for a sewer system, including a disposal plant, in connection with which certain information is needed with respect to the proposed highway improvement north of the city limits so they can proceed without interfering with the development of the highway. The City Manager, he said, has been furnished with necessary highway plans and will design the sewer layout in conformity therewith, so there will be no conflict. The Commission approved the report.

The Commission discussed a status report from the Engineer on the proposed improvement of the Santiam Highway through the town of Sweet Home. He estimated the total cost of the improvement at $186,000, of which amount $69,000 is the estimated cost of right of way, including $18,000 for the purchase of land and $51,000 for the remodeling of certain buildings or payment of damages in lieu thereof. The City of Sweet Home, he said, is of the opinion that the land for the right of way can be acquired for $14,000, and has advised that it does not have such sum available to finance it. He suggested that the state might underwrite the land that is needed for right of way to a maximum of $14,000, otherwise it does not seem possible to proceed with the improvement.

As a result of discussion of this matter, the Commission decided unanimously that if the city will assure the Highway Commission that the right of way can be purchased for $14,000, and will obtain options within that limit, then the Commission will take up the options and will proceed to construct the project.

Pursuant to instructions previously given him by the Commission, the Engineer reported the results of a state-wide investigation to determine a solution for the control of noxious weeds on state highway rights of way. The investigation, he said, revealed that 23 of the 36 counties of the state have weed control districts, and 19 of these 23 have weed control inspectors, but the remaining 13 counties have no provisions for any manner of weed control. He further stated that during the past year requests were received from 16 counties for state control of noxious weeds on highway rights of way, and in each instance, the request was honored and the work performed either by state highway forces or by the counties on a reimbursable basis, the total expenditure for such purpose being $18,224. He recommended continuance of this practice during the year 1950, pointing out, however, that the estimated cost to perform such work this year is $37,000, since the demands for control of noxious weeds are becoming more numerous. The Commission approved the recommendation unanimously.

In this connection the Engineer advised that the State College is interested in noxious weed control to such an extent that the college officials have indicated a willingness to cooperate in a program of that nature by conducting a two-day seminar to give information to the highway maintenance superintendents about the whole problem, and to acquaint them with the values and methods of weed control. He recommended that authority be granted the district maintenance superintendents to attend such seminar at state expense. The Commission approved the recommendation.

The matter of transferring the sum of $40,000 heretofore budgeted to finance a landscaping project on the Denver-Union Avenue intersection of the Pacific Highway in Portland, from such project to a landscaping project on the Troutdale-Dodson Section of the Columbia River Highway, had the attention of the Commission. The Engineer advised that the Denver-Union Avenue landscaping project is not justified, due to lack of water for proper irrigation and the excessive cost to furnish it. He recommended in view thereof that the $40,000 set up for this work be used to augment a $10,000 landscaping project on the Columbia River Highway, inasmuch as the amount authorized for that work is far insufficient to complete it. He said the money would be used for seeding slopes on the section constructed by the Bureau of Public Roads between Multnomah Falls and Dodson; for completing the Multnomah Falls parking area, including water system and walks, and a pedestrian bridge on the old highway at Multnomah Falls; for developing a parking area at Crown Point; for constructing a parking area at Sand Island, and other minor plantings at bridge ends, et cetera, making up the total amount of $50,000. As a result of discussion, the Commission unanimously approved the transfer of funds to finance the work as outlined by the Engineer.

The Engineer reported the results of taking bids in Salem on January 23, 1950, for the sale of an accumulation of used equipment and scrap materials. He presented a tabulation showing the high bid for each item and

recommended acceptance of the high bid for all items except that received for the purchase of a Studebaker sedan, Department No. 40-177. He pointed out that identical high bids were submitted for the purchase of scrap heavy bronze, one being that of Sam Kline Junk Company, Salem, and the other being that of Morris Elbert, Portland. He stated that these bidders have expressed a willingness to accept the results of a flip of a coin to determine the successful bidder for this item, and he suggested that the coin be tossed in the presence of the Commission. The Commission approved the suggestion, whereupon the coin was tossed by the Secretary, resulting in sale of this material to Morris Elbert. The Commission unanimously approved the Engineer's recommendation with respect to this item and the remaining items. (For details see tabulation of bids in general files.)

A letter was presented from the City of Empire requesting reconsideration by the Commission of the City's request for the installation of traffic lights on Newmark Avenue (Cape Arago Secondary State Highway) at that avenue's intersection with Commercial Street and with Broadway Street. The Engineer recalled that this matter previously had the attention of the Commission and was denied. Further investigation has been made, he said, which reveals that the installation at the Broadway Street intersection is justified because it is at a point where the highway makes a 90 degree turn, and where intersectional traffic is heavy. He recommended that a flashing beacon be installed at this intersection at an estimated cost of $500 and that the request for the signal at the Commercial Street intersection be denied. The Commission approved the recommendation unanimously.

Pursuant to instructions from the Commission at the previous meeting, the Engineer rendered a supplemental report on the petition of residents of the Rasmussen Village Apartments, Portland, for some means of traffic control on Barbur Boulevard to safeguard pedestrians and vehicular movements crossing this thoroughfare in going to and from the apartment area. He advised that both the Traffic Engineer for the Highway Department and the Traffic Engineer for the City of Portland are of the opinion that a light at this intersection would seriously interfere with traffic on Barbur Boulevard and would create more of a hazard than now exists. Further, it has been ascertained that this condition was realized when a building permit was issued for the apartments in 1939, at which time a Portland City Planning Commission recommended the granting of the permit subject to the condition that access to the apartment units would be provided only from Southwest Slavin Road, and that a barrier would be placed in the center of Barbur Boulevard to prevent left turn movements from Barbur Boulevard into the apartment area. The Portland City Council, he said, passed an ordinance on September 20, 1939, it being ordinance No. 72922, to the effect that no building shall be erected on the apartment house site unless vehicular access to the property from S. W. Slavin Road is provided. This ordinance did not mention construction of a barrier on Barbur Boulevard. He recommended, in view of the circumstances, that the request for traffic signal on Barbur Boulevard at this point be denied and that the owners of the apartments be required to provide access to the apartments from Slavin Road as originally intended. In the discussion of this matter, Chairman Banfield suggested that the matter could be satisfactorily disposed of by construction of a traffic barrier which would prevent lefthand turns from Barbur Boulevard into the apartment area, but would allow vehicles to enter the highway at this

point. The Commission approved the Engineer's recommendation and also ordered the installation of a traffic barrier on Barbur Boulevard as suggested by Chairman Banfield.

The Engineer brought up for discussion matters pertaining to the improvement of Union Avenue in Portland, northerly from Columbia Boulevard to Gertz Road. He recalled that an amount of $450,000 was included in the Second Post War Program to finance the north unit of this section, extending from Columbia Slough northward to a point sufficiently beyond Gertz Road to permit traffic interchanges for Schmeer Road, Gertz Road and the outdoor theater and the midget race tract area, but no provision has been made for construction of the section from Columbia Slough southward to Columbia Boulevard, including a bridge, estimated to cost $275,000. The Bureau of Public Roads, he said, is concerned with the widening of the Columbia Slough Bridge and the construction of the south unit, and would like to be assured that the Highway Commission will make provision for this $275,000 improvement in its next program. He recommended a definite commitment by the Commission to that end, and advised that unless such commitment is made, the probabilities are that the Bureau of Public Roads will not approve construction of the north unit. Mr. T. M. Davis, District Engineer of the Bureau of Public Roads, was present and stated that their primary concern is the hazard of going from a four-lane highway to a two-lane highway. The Commission deferred a decision in this matter until its next meeting. In the meantime, the project is to be inspected by Chairman Banfield and Mr. Davis of the Bureau of Public Roads.

The Commission discussed briefly but took no action on a written report from the Engineer, dated January 20, 1950, on the results of a survey of signs on 1020 miles of representative Oregon Highways, which survey was made by two representatives of the Outdoor Advertising Association of America, Inc., accompanied by the Traffic Engineer and the Landscape Engineer of the Oregon State Highway Department.

The Engineer rendered a status report on the North Santiam Highway between Salem and Detroit, pointing out the following: that the distance from Salem to Mehama is 19.15 miles, for which no detailed survey has as yet been made, although a reconnaisance survey, made before the war and corrected to current prices, indicates that it will cost about $1,750,000 to build the highway on a permanent alignment. The existing highway between these points, he said, would probably be satisfactory to handle traffic for several years. The distance from Mehama to Gates is 9.02 miles, along a location on the north side of the Santiam River. The existing highway between Mehama and Gates, he said, is on the south side of the Santiam River and consists of an old county road which is being maintained as a State Secondary Highway. This road, he said, is not adequate for existing traffic and it would be quite desirable to construct the new highway on permanent alignment north of the river, which is estimated to cost $906,000. He pointed out that there are unprogrammed funds in the 1950-51 program amounting to $350,000, and he suggested the allocation of such sum to grade a portion of this section, particularly from Mill City westerly to the Little North Fork of the Santiam River, a distance of about six miles, which would leave for future construction the balance of the grading which is estimated to cost $187,000; a bridge over the Little North Fork, estimated to cost $140,000; and surfacing and bituminous macadam construction estimated at $229,000; a total of $556,000. The Engineer also

mentioned that the highway between Mill City and Niagara, a distance of 7.17 miles, has already been constructed to modern standards; that the section between Niagara and Detroit is now under contract as a Forest Highway Project under the jurisdiction of the Bureau of Public Roads; that the Bureau of Public Roads also has a tentative project in its 1950-51 program to construct a bituminous macadam wearing surface on the 2.42 mile section east from the town of Detroit. (For further details, see copy of Engineer's letter dated January 30, 1950, directed to the Oregon State Highway Commission, in general files.) In the discussion of this matter, it was brought out that the material and heavy equipment to be used in the construction of the Detroit Dam are to be delivered to the Dam by railroad, so the highway will be relieved of taking care of this heavy hauling, and costly repairs thereto avoided. As a result of this discussion, the Commission voted unanimously to proceed with the grading of the six-mile section extending westerly from Mill City to the Little North Fork of the Santiam River on the new alignment on the north side of the North Santiam River. The Engineer was authorized to advertise this project for bids as soon as plans can be prepared and right of way matters cleared.

In this connection, the Engineer pointed out that there is an unprogrammed reserve of $505,000 of Federal Aid Secondary Highway Funds in Division II, and in addition thereto a saving of approximately $170,000 of like funds realized on the Salem-Silverton Federal Aid Secondary Highway Project by reason of using the existing right of way and alignment, making a total reserve of funds in this district of $675,000. He suggested the early programming of these funds so approval of the Bureau of Public Roads may be obtained and the contracts awarded. He recommended that these funds be allocated to the following projects:

1. $160,000 for resurfacing with asphaltic concrete an eight mile section of the Alsea Highway extending from M.P.40.45 to a point eight miles east of the town of Alsea, M.P.48.45;

2. $165,000 for grading, surfacing and oiling a 3.52 mile section of the Albany-Lyons State Secondary Highway between Scio and Thomas Creek, which would provide an all-oiled road the entire distance from Albany to Lyons;

3. $350,000 for grading a six-mile section of the North Santiam Highway between Mill City and the Little North Fork, which project has just been approved by the Commission in this discussion.

The Commission unanimously approved the allocations as recommended by the Engineer and authorized him to advertise the projects for bids as soon as the plans can be prepared and necessary right of way acquired.

The Engineer reported the need to replace, at the earliest possible time, two bridges that are in extremely poor condition, and are in danger of total failure. One of the bridges is over the Umpqua River on the Pacific Highway at North Dillard, the replacement of which is estimated to cost $280,000. The other bridge is over the second crossing of the Wilson River on the Wilson River Highway, 11.53 miles east of the City of Tillamook, the replacement of which is estimated to cost $90,000, making a total of $370,000 for the replace-

ment of both bridges. He requested authority from the Commission to place these bridges under contract at the earliest possible time, and suggested that they could be financed with a portion of the savings which already have accrued in connection with the contracting of work in the Second Post War Construction Program, which underruns to date aggregate nearly $1,000 000. He also recommended the further allocation of $200,000 of such funds for surfacing and oiling a 15.91 mile section of the Baker-Unity Highway over Dooley Mountain in Baker County. As a result of discussion, the Commission unanimously approved the construction of both bridges and the Dooley Mountain oiling work as recommended by the Engineer, and the method suggested by him for financing the same.

The Engineer reported the results of his investigation of conditions at the intersection of the old Canyon Road with the Tualatin Valley Highway, near the Sunset Highway Junction, Portland, as previously ordered by the Commission.. He stated that the investigation reveals that the sight distance at this intersection is not sufficient to provide a safe entrance to the highway, it being on a curve where a highway cut-bank obstructs the view of approaching traffic. Due to the fact that traffic on the highway travels at a comparatively high speed along this highway, he said, a dangerous condition exists, which could be eliminated were the cut-bank on the west side of the intersection widened out to provide a sight distance of about 350 feet. He estimated the cost of such widening work at $1,360, and the cost of necessary right of way at about $2,000. or a total of $3,360, and recommended approval of the expenditure, the work to be done as a Minor Betterment Reserve Project in the 1950 program. The Commission approved the recommendation unanimously.

The Commission discussed a report from the Engineer dated February 1, 1950, on what is being done and what could be done to prevent motor vehicle traffic accidents and industrial accidents. He recalled his report rendered at the previous meeting, outlining an accident prevention program wherein he recommended the appointment of a safety director or a safety engineer. He also recalled that the Commission was not in favor of creating such a new position or a new sub-department, and that it ordered that the matter be worked out with present employes. Everything that was recommended by the committee, he said, is being done, insofar as possible, through the District Maintenance Superintendents under the general supervision of the Maintenance Engineer, Mr. E. A. Collier. There followed a general discussion and as a result thereof the Commission instructed the Engineer to render an additional report in about two months.

Pursuant to instructions from the Commission at the previous meeting, the Engineer reported on weight violation citations that are pending in various Justice Courts throughout the state. He said that there are 1038 such cases and he gave as his feeling that it would not be practical for the Commission to cancel the permits of the operators involved, and that about the only available method for disposing of the cases is through an appeal to the Attorney General to exercise the power and authority that he has over the District Attorneys. The Commission deferred a decision in the matter pending discussion with a delegation that was scheduled to appear on the following day concerning the commission's order with respect to hauling restrictions during inclement weather. (The matter was not discussed further

because the delegation did not appear; for details concerning the violations, see copy of Engineer's written report to the Commission dated February 1, 1950, in general files.)

The Engineer reported that pursuant to authority previously granted him by the Commission, he has posted a number of highways and highway sections for 50 percent reduced load limits in order to eliminate danger to road surfaces while frost is leaving the ground. He presented a list of the highways so posted and asked the Commission to confirm the postings. The Commission approved the action of the Engineer in this matter by the adoption of the attached resolution relative thereto, marked EXHIBIT "N," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In this connection, the Engineer also reported that additional highways and highway sections were posted for reduced loads, but the signs subsequently were taken down and legal weights restored when conditions improved. (For a list of highways in this category, see records of the Maintenance Department.) He asked the Commission to confirm the postings. The Commission by unanimous vote approved the action of the Engineer in this matter.

The Commission discussed a request from the City of Garibaldi for the widening of the pavement full width between curbs on the Oregon Coast Highway through Garibaldi. The Engineer estimated the cost of the widening work, including construction of curbs, at $60,000. He recommended that the request be denied because of lack of funds to finance the improvement, and because there is need of the funds to finance more important improvements throughout the state. The Commission approved the recommendation.

A petition was presented from residents of Twin Rocks, Oregon, requesting the widening of the Oregon Coast Highway from Twin Rocks into the center of the Town of Rockaway, a distance of about one mile. The Engineer estimated the cost of this improvement at $75,000, and recommended that the request be denied for immediate undertaking. The Commission approved the recommendation.

The Commission discussed a resolution from the Lane County Court requesting an allotment of Federal Aid Funds to finance the reconstruction of the Marcola County Road (Federal Aid Secondary Highway No. 228). The Engineer stated that no survey has been made of this road, but its length is about 16 miles and in his estimation it would cost at least $500,000 to improve it as requested. He pointed out that there are no funds available to finance the project and he accordingly recommended that the request be denied. The Commission approved the recommendation and so ordered.

The Engineer brought up for discussion the matter of constructing guard fence along the new section of the Oregon Coast Highway between Coos Bay and Coquille. He stated that a recent inspection reveals that about 1640 lineal feet of guard fence is needed to protect traffic properly on high fills adjacent to the Southern Pacific Railroad tracks. He estimated the cost of such guard fence at $4,100 and recommended approval of the expenditure. The Commission approved the recommendation unanimously.

The Commission discussed requests from the Hood River County Court and John P. Litchfield, President of the Pacific Northwest Ski Association, for snow removal on the Cloud Cap Inn Road, Hood River County, for the benefit of winter sports enthusiasts. The Engineer estimated the cost of such operations at four to five thousand dollars annually, and recommended that the requests be denied because the State Highway Department does not have equipment available to assign to the project without handicapping other operations. The Commission approved the recommendation.

The Engineer requested authority to advertise for bids for the construction of six equipment storage buildings located at the following headquarters: Veneta; Parkdale; Brogan; Jewell; Milwaukie and Eugene. He stated that the plans for the buildings have been completed and that the total cost of all six buildings is estimated at $105,750. He further stated that provision has been made in the 1950 approved budget for this expenditure. Following discussion, the Commission unanimously approved the taking of bids for all six buildings.

There was presented for the Commission's consideration a letter from Frank B. Folsom, Assistant Regional Forester, U. S. Forest Service, urging improvements, including the installation of restrooms, at the site of a drinking fountain heretofore erected by the state on the Willamette Highway about 19 miles east of Oak Ridge. Mr. Folsom offers the assistance of his Department in the selection of sites for the restrooms and states a willingness to issue a special use permit covering their use in this national forest area. The Engineer advised that the drinking fountain mentioned by Mr. Folsom is a very popular one with the traveling public, and that the Highway Department Landscape Engineer, who has investigated the conditions at this point, concurs in Mr. Folsom's recommendation that restrooms, as well as tables, benches, garbage barrels, et cetera, should be provided. He estimated the cost to furnish these facilities at $500, and recommended approval of the expenditure. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion matters pertaining to the proposed improvement of the Oregon Coast Highway in the City of Port Orford. He stated that pursuant to the instructions given him by the Commission at the previous meeting, he personally investigated this project and discussed with the city officials their request for a modification of the city's agreement with the state to eliminate the closing of certain streets as a prerequisite for the project's going forward. The original agreement, he said, called for the closing of 7th Street, 15th Street, 17th Street and 18th Street on both sides of the highway, and the closing of 16th Street on the west side only. The city has been able to obtain waivers for the closing of only 7th Street on both sides of the highway, and of 15th Street and 17th Street on the east side only. He said that he has given this matter very careful attention, and that it is his considered opinion that the non-closure of 15th and 17th Streets on the west side of the highway, and 16th Street and 18th Street on both sides, will create no particular hazard or congestion to highway traffic. He recommended, in view thereof, approval of the city's request for modification of the original agreement in this respect so that this project, which has been held up for considerable length of time pending action by the city on the closing of the streets, can go forward. The Commission approved the recommendation by unanimous vote, on the condition that the city will adopt appropriate ordinances with respect to the closure of 7th, 15th and 17th Streets.

The Engineer requested instructions relative to the proposed surfacing of the Wasco-Heppner Secondary Highway from the John Day River westward toward the town of Wasco, for which an amount of $80,000 was considered in the preparation of the 1950-51 construction program. He said the project proposed at that time included the placing of fine crushed rock on a 3.2 mile section of this highway that was cleared and surfaced with base rock in 1948, and widening the grade and surfacing an additional two miles to a point where the road divides, one branch going to Wasco and the other to Moro; and were such projects carried through, it would result in a facility satisfactory for existing traffic for the entire section between the John Day River and Wasco. He suggested approval of the $80,000 allocation so the matter may be taken up with the Bureau of Public Roads, if it is the desire of the Commission to undertake the improvement this year. The Commission took the matter under advisement.

The Engineer reported that the Towns of Scotts Mills and Yamhill have complied with the statutory requirements with respect to the expenditure of 1948 State Tax Street Funds, which they received in 1949, and that the plans for the projects proposed to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "F," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In this connection, the Engineer also reported that the following cities and towns have fulfilled the legal requirements with respect to the expenditure of State Tax Street Funds accruing to them during the first six months of 1949, and that the plans for the several improvements proposed to be financed with such funds have been examined and found satisfactory:

Arlington	Dayton	Island City	Phoenix
Athena	Donald	Jefferson	Port Orford
Aumsville	Florence	John Day	Richland
Aurora	Fossil	Joseph	Riddle
Banks	Gaston	Juntura	Rogue River
Bay City	Gearhart	Lexington	Scappoose
Boardman	Gold Beach	Lonerock	Scio
Bonanza	Gold Hill	Lostine	Scotts Mills
Brownsville	Granite	Malin	Sherwood
Canyon City	Grass Valley	Manzanita	Siletz
Cascade Locks	Halsey	Merrill	Sisters
Cave Junction	Hammond	Monroe	Sumpter
Clatskanie	Helix	Monument	Talent
Coburg	Hines	Myrtle Creek	Troutdale
Condon	Hubbard	Oakland	Wallowa
Creswell	Huntington	Philomath	Yamhill
			Yoncalla

He recommended approval of the plans by the Commission. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "G,", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission had under discussion the distribution of highway revenues accruing to the cities and towns of the state during the last six months of the year 1949. The Engineer presented a tabulation showing the proposed distribution, which he stated is correct and meets the legal requirements. He recommended approval of the apportionment to the cities and towns as disclosed by the list. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "H," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a proposed project in the City of Salem, for the widening and flattening of two right-angle turns at street intersections on the route of the North Santiam and Silver Creek Falls Secondary Highways (ORE.222), such route being also the truck by-pass route through Salem. The Engineer explained that this highway makes two right-angle turns, one at the intersection of Capitol Street and Court Street, and the other at the intersection of Court Street and 12th Street; that both turns present a hazard, considering the large number of trucks and the heavy traffic which uses this route. To cut back the two corners and permit satisfactory movement of traffic, he said, is estimated to cost $1,100, of which amount the City of Salem has indicated a willingness to assume 50 percent. He recommended approval of the work as a Minor Betterment Project in 1950, provided the city will agree in writing to pay fifty percent of the cost, the work to be done by the city, and the state to reimburse the city for its share of the expense when the job is completed. The Commission approved the recommendation.

The Engineer reported that the actual cost to construct the parking area for state cars between the State Office Building and the Supreme Court Building in Salem exceeded the amount authorized for the work by $1,654.43, the overrun being due to the necessity to install new drain pipes, one new catch basin, and one new manhole; and to extra expense for engineering. He requested authority for an additional project authorization in the amount of the overrun, $1,654.43. The Commission approved the request unanimously and so ordered.

The Engineer also reported an overrun of $2,336.15 in connection with the contract for the construction of the South Myrtle Point Section of the Coos Bay-Roseburg Highway, State Highway Contract 3171, which overrun was occasioned by engineering costs on the project. He explained that the job was of a type that required a great amount of staking and engineering detail for the low cost of the construction work, and that the engineering costs were increased by reason of the fact that the engineering crew in charge was stationed in North Bend, taking care of other work, and had to drive long distances in order to handle the Myrtle Point Project. He requested approval of an additional authorization for this project in the amount stated. The Commission approved the recommendation unanimously.

The Engineer reported on the request of the City of Corvallis for the installation of traffic signals at several street intersections on the newly installed one-way traffic system on the route of US99W through Corvallis. He said that this matter has been investigated by the Traffic Engineer, who

recommends the installation of signals both on Third Street and on Fourth Street at the following intersections: "A" Street; Jefferson Street; Monroe Street, and Van Buren Street. He estimated the cost of the eight signals at $24,000 and recommended the installation in order to make the one-way street system function properly and to provide safety for cross traffic, on the condition that the City of Corvallis will pay fifty percent of the expense. The Commission approved the recommendation.

The Commission discussed and upon recommendation of the Engineer denied a request from John Selling, owner of the Red and White Store in the city of Gresham, for the installation of a flashing beacon in front of his store building, which fronts on the Mt. Hood Highway.

The Commission also discussed, and upon recommendation of the Engineer, denied the request of the City of Fairview for the installation of a traffic signal at the intersection of Fairview Road and Sandy Boulevard (Columbia River Highway) in Fairview.

A petition was presented from business and professional residents of Beaverton, Oregon, requesting the installation of an amber "blinker" light at the intersection of the Tualatin Valley Highway with Broadway Street in Beaverton. The Engineer advised that this matter has been investigated by the Traffic Engineer, who recommends against the installation because in would serve no useful purpose, particularly in view of the fact that a Benjamin light unit is now being maintained at this point, and in addition, the highway is zoned for a speed of 35 miles per hour. He pointed out that the new highway was completed only last summer, and since that time only one accident has occurred at this intersection, a rear-end collision of a minor nature. He recommended that the request be denied. The Commission approved the recommendation.

The Commission discussed a letter from Mr. Thomas Boeke, Redmond, attorney for the Powell Butte School District, requesting the installation of an overhead warning light on the Ochoco Highway at Powell Butte School. Mr. Boeke requests that if the Highway Commission cannot see its way clear to install this light at state expense the residents of the school district be permitted to install the signal at their personal expense. The Engineer advised that a number of requests have been received for this installation and an investigation of the conditions has been made by the Traffic Engineer, who gives as his opinion that the signal is no more warranted at this location than at any other country school located in an isolated section along a state highway, and who considers that the oversize "SCHOOL ZONE-BE CAREFUL" signs now in place are sufficient. The people of Powell Butte, he said, were so informed, but were not satisfied and now request permission to install the signal at their own expense. He recommended that the request for the signal at state expense be denied; also that the people of Powell Butte not be permitted to install their own signal. The Commission approved the recommendations.

A request was presented from the City of Oregon City for the installation of traffic signals at the following locations on the route of the Cascade Highway in Oregon City: intersection of 7th Street and Molalla

Avenue; intersection of 7th Street and Washington Street; intersection of Washington Street and 14th Street. The Engineer advised that this matter has been investigated by the Traffic Engineer, who recommends approval of the signal installations at 7th Street and Washington Street, and 14th Street and Washington Street; and that the request for the signal at 7th Street and Molalla Avenue be denied. He estimated the total cost of these two signals at $850 and recommended approval of the expenditure on the condition that the city will furnish electrical energy to operate them and will maintain the signals after the installations are complete. The Commission approved the recommendation.

The Commission considered a request from people of West Portland who use the Capitol Highway (Bertha-Beaverton Highway) for the installation of a traffic signal at the intersection of this highway with Terwilliger Boulevard. It is alleged that a serious highway hazard exists at this intersection, referred to by them as the corner of S. W. Terwilliger Boulevard and S. W. Slavin Road. The Engineer advised that an extensive investigation has been made by the Traffic Engineer of conditions at this intersection, and it has been determined that a traffic light is not practical because the intersection is on a steep grade, and the stopping of heavy trucks at that point would create a worse hazard than now exists; however, the investigation does reveal that considerable improvement can be made by widening Capitol Highway west of Terwilliger Boulevard, which will give more traffic lane capacity, and better sight distance, and by sloping the cut bank between Capitol Highway and Terwilliger Boulevard west of the intersection. He estimated the cost of such improvement at $2,500, and recommended approval of the work as a 1950 Minor Betterment Project. The Commission approved the recommendation unanimously.

The Commission discussed a letter from the City of Scio requesting the installation of a flashing beacon on the Albany-Lyons Secondary Highway at the intersection of Main and Water Streets in this city. The Engineer advised that the highway makes a right angle turn at this intersection, and an investigation by the Traffic Engineer indicates that a flashing beacon is needed, both for the purpose of marking the angle point on the highway and as a supplement to the existing stop signs on the approaching streets. He recommended approval of the installation, which is estimated to cost $350, on the condition that the city of Scio will furnish electrical energy to operate the signal and will maintain it after the installation is complete. The Commission approved the recommendation.

A communication was presented from City Attorney Herbert Swift of the City of Newberg, requesting in behalf of the City Council the installation of traffic signals on the route of US99W at its intersections with College Street and Howard Street in Newberg. The Engineer advised that the Traffic Engineer's investigation of this matter reveals that a traffic signal is not warranted at either of these intersections, inasmuch as traffic counts show that the volume of traffic that enters the highway from the side streets is somewhat below the accepted standards for installations of this kind. He recommended that the request be denied. The Commission approved the recommendation.

The Engineer reported on the suggestion offered by the State Speed Control Board that a traffic signal be installed on US99E at its intersection with Arlington Street in the City of Gladstone. He advised that this intersection is situate immediately north of the bridge over the Clackamas River, where an existing flashing beacon is now functioning. An investigation of conditions, he said, indicates that there is an average of 14,247 vehicles that enter this intersection daily, and that traffic passes this point at relatively high speed, in view of which a signal is warranted. He recommended the installation of a traffic signal at an estimated cost of $4,000 on the condition that the City of Gladstone will contribute 50 percent of the expense involved. The Commission approved the recommendation.

A letter from the City Recorder of the Town of Rainier requesting the installation of a "blinker light" on the lower Columbia River Highway in the wye approach to the Longview Bridge over the Columbia River had the attention of the Commission. The Engineer advised that this matter has been investigated by the Traffic Engineer, who states that the conditions at this intersection do not warrant a signal, the average daily traffic at the intersection being only 2,130 vehicles. Moreover, traffic at this junction is protected by traffic signs reading "LONGVIEW JUNCTION AHEAD," and by the section's being within the limits of a designated 25 mile per hour speed zone. He recommended that the request be denied. The Commission approved the recommendation.

The Commission discussed a request from the City of Hood River by its City Attorney, Mr. John N. Mohr, requesting the following projects:

1. Installation of a traffic light or flashing beacon at junction of US30 with 13th Street,

2. Sidewalk construction along Hood River Secondary Highway between Oak Street and 12th Street

3. Designation of a school crossing lane at intersection of 13th Street and Oak Street.

The Engineer advised that these requests have been investigated by the Traffic Engineer, who recommends the installation of a flashing beacon at the intersection of US30 with 13th Street, at an estimated cost of $400, and who also recommends that the request for sidewalk construction be denied, because this street is within the city limits, it being contrary to the established policy of the Commission to construct sidewalks within the corporate limits of any city or town. He further stated that the Traffic Engineer recommends approval of the request for the school crossing on the condition that the school authorities will monitor the crossing with schoolboy patrols, otherwise that it be denied. The Engineer advised that he concurs in the recommendations. The Commission approved the recommendations unanimously.

The Commission discussed a request from School District 91C, Charleston, Coos County, for footpath construction along the Cape Arago Secondary Highway in Charleston, where this highway passes through a narrow cut and forces school children to walk on the paved roadway where they are subject to the hazards of vehicular traffic. The Engineer advised that the location of the proposed footpath is through a deep cut, which would have to

be widened for a distance of about 800 feet to provide room for the footpath, and would cost about $3,000. Investigation also reveals, he said, that a footpath could be built over the top of the cut on a steeper grade for about $930. He pointed out that a traffic count reveals that there are approximately 106 pedestrians, most of them school children, who walk through this cut daily, which is justification for the expense of constructing the path. The Commission deferred action in this matter pending further investigation by the Engineer to ascertain if possible whether or not the school children would use the footpath if it were constructed in the location over the top of the cut.

The Engineer reported the results of discussion with the city officials of the City of Milwaukie with respect to the construction of a service road on the east side of the Pacific Highway East between Milwaukie and Portland. He said that pursuant to previous instructions from the Commission, he has consulted with the city officials, who now agree that if the state will grade and pave such service road, extending from the roadway entrance to the Kellogg Housing Project, about midway between Milwaukie and Portland, to the northerly boundary line of the Scott Estate property in Milwaukie, it will forego its previous demand that such roadway be constructed to a connection with Main Street in their city, and they also will agree to the closing of the temporary access to McLoughlin Boulevard (Pacific Highway East) at the plant of the International Harvester Company. Moreover, the city will agree to furnish necessary right of way for this service road, and will maintain it after it is completed by the state. He estimated the cost for such an improvement at $27,300, and recommended approval of the expenditure as a satisfactory solution of this problem.

In this connection, the Engineer pointed out the need to provide some safe means for southbound traffic to enter the road leading to the Kellogg Housing Project at the north end of the proposed service road. He suggested a turn-off lane on the west side of the highway, which would permit utilization of the traffic signals at this intersection by traffic which is to enter the housing project at this point. He estimated the cost of such facility at $3,700, making a total cost of $31,000 for the entire improvement. He recommended approval of this project in connection with the service road construction. The Commission unanimously approved construction of the service road and the turnout as outlined and recommended by the Engineer, and ordered that the matter be covered by an appropriate agreement between the city and the state.

A letter was presented from the City of Hermiston, requesting state assistance in widening certain streets that are designated state highway routes in this town. The Engineer advised that one of the streets that the city wants to widen is First Street, route of the Old Oregon Trail, which street now has a minimum width of 38 feet through the area. He gave as his considered opinion that the widening would be of no particular benefit to the highway inasmuch as the present width is sufficient for two moving lanes of traffic, and to provide for curb parking.

The other street, he said, is Gladys Avenue, route of the Hermiston Secondary Highway, on which the request for widening is unmerited as the volume of traffic is very light. He estimated the cost of the improvements at $3,000, and recommended that the request be denied. The Commission approved the recommendation.

The Commission had under consideration a proposal from J. C. Denton, one of the partners in the contracting firm known as D & R Construction Company, to whom the Commission awarded state highway contract No. 3244 for the construction of guard rail fence on the Ashland-Klamath Falls Highway, to assign and release unto J. N. Rice and Son, the other partner in the firm, all of his right, title and interest in that contract. The Chief Counsel recommended disapproval of the assignment. The Commission approved the recommendation.

The Engineer reported that in conformity with authority previously granted him by the Commission, he has awarded contracts, as follows, bids for which were received at the meeting on December 19 and 20, 1949, the conditions of the awards having been satisfied:

Construction of Pumping Plant Hill-Ontario Section of Old Oregon Trail, Malheur County. Bids received December 20, contract awarded January 16, to C. E. Leseberg, low bidder.

Construction of Scott Canyon Section of the Scott Canyon County Road, Sherman County. Bids received December 20, contract awarded January 6, 1950, to George E. Corliss, low bidder.

The Commission by unanimous vote confirmed the contract awards as reported by the Engineer.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

1. J. S. Crepeau, Contract No. 3235, for construction of an office building on state highway property in Eugene, Lane County, requested an extension of time of 58 days from December 15, 1949, to February 11, 1950 within which to complete this job. Mr. Crepeau alleged that his failure to complete the project within the specified time limit was due to contingencies involved in relocating the building after he had commenced construction. The Engineer advised that after the contract was awarded, the City of Eugene requested that the location be changed to conform to the city's plans for the south entrance to the city, and in complying therewith, it was necessary to reverse the arrangement of the building, causing delays to the contractor. He recommended in view thereof that the extension of time requested be granted without penalty. The Commission approved the recommendation.

2. J. F. Johnston, Contract No. 3073, for the construction of the Flynn Bridge over Marys River on the Alsea Highway, Benton County, requested an additional extension of time from October 31, 1949 to November 19, 1949, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that the date specified for the completion of this job was July 31, 1949, but it was later extended to October 31, 1949, subject to the condition that the contractor would reimburse the state for engineering expenses incurred in connection with the job, subsequent to July 31. He recommended that the additional extension of time now requested be granted subject to the same penalty. The Commission approved the recommendation.

3. Knight Pearcy, Contract No. 3075, for roadside improvement on the North Bend-Coos Bay Section of the Oregon Coast Highway, Coos County, requested an extension of time of five days, from November 30, 1949 to December 5, 1949, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to cancellation of a part of the work and later the re-authorization of the same. The Engineer advised that because of inability to obtain certain plants needed in connection with the project, it was decided to cancel that part of the contract, but later on these particular plants became available and the contractor was requested to incorporate them in the improvement in conformity with the original plan. He said that the delay was through no fault of the contractor, and in view thereof, he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

4. Babler Bros., Contract No. 3174, for grading and oil mat surfacing on the Terrebonne-Crook County Line Section of the Smith Rock Market Road, Deschutes County, requested an extension of time of 57 days from August 31, 1949 to October 27, 1949, within which to complete this job. They gave the following reasons for failure to complete the project within the specified time limit:

> 1. Delays caused by the raising of the tracks of the Oregon Trunk Railroad Company that was involved, which work was not completed by the Company until September 12, 1949.
>
> 2. Oiling operations on this project were ordered suspended temporarily to allow the contractor to perform oiling work on the Warm Springs Highway while suitable weather obtained.

The Engineer advised that the raising of the tracks of the Oregon Trunk Railroad Company was performed by the Railroad Company's crews, and due to the fact that they failed to complete their work as soon as anticipated, the contractor was unable to complete the oiling operations within the specified time. He recommended, in view thereof, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

5. Leslie W. Stoker, Contract No. 3188, for construction of a bridge over the John Day River, and grading work on the Prairie City (Bridge Street) Section in the town of Prairie City, requested an extension of time of 151 days, from November 30, 1949, to April 30, 1950, within which to complete this job. Mr. Stoker stated that all work in connection with this job was completed within the specified time, except the surface finish of the concrete, and that weather conditions were such that an acceptable job of finishing could not be completed until weather conditions are satisfactory in the spring. The Engineer stated that the statements given by the contractor for overrunning the specified time limit are correct. He also said that the bridge is open to traffic. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

6. R. A. Heintz Construction Co., Contract No. 2938, for grading, macadam surfacing, and structures on the Pleasant Hill-Lost Creek Section of the Willamette Highway, Lane County, requested an additional extension of time of five days, from September 30, 1949 to October 5, 1949, within which to complete this job. The contractor stated that he purchased the old bridge and did not consider that it was necessary to remove it within the time limit specified for the completion of the main project. The Engineer advised that the old bridge was sold to the contractor under a price agreement and that the additional time now requested is simply to enable the contractor to tear down the old structure and remove it from the right of way. Failure of the contractor to remove this old structure within the previously extended time limit, he said, has caused no inconvenience to the traveling public, neither has it increased the state's expense for engineering supervision. He recommended, in view thereof, that the additional extension of time now requested, be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

7. Frank M. Parsons, Contract No. 2960, for grading and oil mat surfacing on the Carlton-Chehalem Creek Section of the Carlton-Chehalem Creek County Road in Yamhill County, requested an additional extension of time of 13 days, from July 31, 1949 to August 13, 1949, within which to complete this project. Mr. Parsons alleged that due to the moisture content in the ground, it was not until the latter part of May, 1949, that grading operations could start, which did not allow time enough to complete the surfacing and oiling during the period of the previously extended time limit. The Engineer advised that the contract specified that this job should be completed by October 31, 1948, but the work was not done according to schedule, which necessitated an extension of time. On January 24, 1949, he said, the Commission granted an extension of time from October 31, 1948 to July 31, 1949, subject to assessment of engineering costs incurred by the state from November 1, 1948, until the job is done. He recommended that the extension of time now requested be granted, subject to the same penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

8. Colonial Construction Company, Contract No. 3111, for rock production on the Mt. Hood and Wapinitia Highways, requested an additional extention of time of 176 days from December 20, 1949 to June 15, 1950, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to snow conditions which made it impossible to transport necessary materials. The Engineer advised that this contractor had another contract with the Bureau of Public Roads for surfacing the north section of the Warm Springs Highway, and in order to assure completion of the Warm Springs project at the earliest possible time, priority was given to that work. Subsequent to the completion of the Warm Springs Highway Project, he said, the contractor was unable to complete the rock production project before winter halted his operations. He recommended in view of the circumstances, and for the further reason that the rock materials being produced will not be needed until the summer oiling season, that the additional extension of time as now requested be granted without penalty. The Commission approved the recommendation.

9. T. W. Thomas, Contract No. 2955, for grading the Clear Creek-Forest Boundary Section of the Warm Springs Highway, Wasco County, requested an additional extension of time of ten days, from August 31, 1949 to September 10, 1949, within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to the programming of cleanup work so as not to interfere with the surfacing operations that were being conducted by the Colonial Construction Company under another contract. The Engineer advised that the work on the roadbed was completed by August 31, 1949, but due to the fact that the Colonial Construction Company was surfacing the project at the same time, Mr. Thomas was forced to take additional time to clean up the shoulders and the slopes under his contract, so as not to interfere with the surfacing operations. He recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

10. Rogers Construction Company, Contract No. 2936, for regrading and oil mat surfacing on the Forest Boundary-Agency Section of the Warm Springs Highway in Jefferson and Wasco Counties, requested an additional extension of time of twenty-five days from September 30, 1949 to October 25, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions in the fall of 1948, which necessitated closing down of operations for the winter season earlier than was anticipated, and delay in resumption of the work in the spring of 1949. The Engineer advised that the additional time requested by the contractor was required simply to perform cleanup work. He further stated that the overrun in time has not inconvenienced the public, because the road could not be used until the bridge over Mill Creek was completed. He recommended that the additional extension of time now requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

11. City Electric, Inc., Contract No. 3209, for installation of traffic signals at Main and Esplanade Streets, Klamath Falls, Klamath County, requested an extension of time of 60 days, from January 15, 1950, to March 15, 1950, within which to complete this job. They alleged that the overrun in time limit was caused by non-delivery of certain control equipment which was required for the project. The Engineer advised that this project was entirely completed with the exception of the installation of the control equipment mentioned by the contractor, which equipment was ordered shortly after the contract was awarded, but has not been delivered to date. Due to the fact that the delay was through no fault of the contractor, he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

12. Roy L. Houck, Jr., Contract No. 3034, for grading and bituminous macadam surfacing on the Lost Creek-Lowell Section of the Willamette Highway, Lane County, requested an extension of time of 334 days, from

September 30, 1949 to August 30, 1950, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit:

1. Critical labor shortage during 1948.
2. Right of way on one portion of contract not obtained until March, 1949.
3. Adverse weather conditions which severely shortened the construction period in 1948.
4. Delays in securing delivery of new equipment.

The Engineer advised that this project is approximately 90 percent complete, and that the contractor has only about 30 days' work left. Due to the fact that the subgrade in this locality dries out very slowly in the Spring, he said, a much better job of surfacing with bituminous macadam will be obtained if that work is not done until the subgrade is completely stable. He stated that the project was further delayed because of right of way difficulties and to some extent by inability to prosecute work pending a decision by the U. S. Army Engineers as to whether or not they intended to construct their dam at Dexter so as to inundate portions of the highway. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. The Commission approved the recommendation unanimously.

The Commission in discussing the requests for extensions of time as listed above considered but did not necessarily adopt the recommendations of the Engineer, and/or the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that Contracts Nos. 2859, 2936, 2938, 2955, 2960, 3057, 3064, 3073, 3075, 3134, 3173, 3174, 3190, 3217, 3218 and 3237, for construction of state highway projects, have been completed according to the requirements of the contracts, or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "I," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that pursuant to instructions from the Commission at its November meeting, he has contacted the cities and towns of the state relative to projects that they wish financed with Special State Tax Street Funds during 1950. To date, he said, thirty requests have been received, fourteen of which were received within the last thirty days when weather conditions were such that a satisfactory inspection of the projects could not be made. Of the remaining sixteen requests, he said, six were for amounts in excess of $15,000, and have therefore been referred back to the cities to ascertain if they will contribute city funds to pay the costs over and above $15,000 which is the maximum amount of state funds that can be allocated to any city, according to the Commission's present policy. He submitted a list of the ten remaining requests, together with his recommendation in respect to each, as follows:

1950 SPECIAL CITY ALLOTMENT PROJECTS

No.	City	Previous Projects 1948	Previous Projects 1949	Estimated Cost of 1950 Proposed Projects State	City	Total	Recommended for Approval
Division I							
1	Brownsville	Yes	None	$15,000	$ 9,500	$24,500	Yes
2	Sherwood	None	None	$11,600	$ - - -	$11,600	Yes
3	Yamhill	None	None	$ 5,500	$ - - -	$ 5,500	Yes
Division II							
4	Dallas	Yes	Yes	$13,500	$ - - -	$13,500	Deferred
5	Harrisburg	None	Yes	$ 8,000	$ - - -	$ 8,000	Yes
Division III							
6	Junction City	None	None	$14,500	$ - - -	$14,500	No
7	Myrtle Point	Yes	None	$13,500	$ - - -	$13,500	Yes
Division IV							
Division V							
8	Enterprise	None	None	$14,500	$ - - -	$14,500	Yes
9	Helix	None	None	$14,500	$ - - -	$14,500	Yes
10	Nyssa	None	None	$15,000	$ - - -	$15,000	Yes

As a result of discussion, the Commission unanimously approved the Engineer's recommendation with respect to each of these ten projects.

The Engineer reported receipt of several requests for the improvement of the connection between N. E. Columbia Boulevard and N. E. Portland Secondary Highway, (Killingsworth Street - US30 by-pass) in N. E. Portland, so as to facilitate right-turn vehicular movements from Columbia Boulevard to Killingsworth Street. The main request, he said, was received from Mr. Ernest F. Huber, Principal of Whitaker School, who is fearful that accidents will occur because the school bus cannot make this turn without encroaching on the opposing traffic lane. This matter, he said, has been investigated and the findings reveal that vehicles cannot make this turn without traveling in the opposing traffic lane, which is particularly hazardous because of the large volume of traffic. He suggested that the condition can be corrected by constructing an additional turning lane which will cost about $750. He recommended approval of the expenditure, if an easement can be obtained for the use of a small parcel of land owned by the Union Pacific Railroad Company The Commission approved the recommendation, and authorized the Engineer to negotiate with the railroad company officials for the easement.

The Engineer brought up for discussion the matter of safeguarding the underground transcontinental cables of The Pacific Telephone and Telegraph Company during the construction of the Viento-Wygant Park Section of the upper Columbia River Highway, which work it is expected will be placed under contract

early in the spring of 1950. He said that a considerable portion of this cable occupies private right of way, which right of way has been purchased by the state for the new highway location, so re-establishment of that portion will have to be paid for by the state. The engineers for the Telephone Company and the Highway Commission have been studying this matter for several months, and have determined that the best manner for handling the cables is to place them temporarily along the Union Pacific Railroad, and then to re-lay the cables along the new highway after it is constructed. The state's share of the estimated cost, he said, is $15,000. He recommended approval of the expenditure and that he be authorized to arrange with the Telephone Company to start the work at once to assure its completion before the highway work gets underway. The Commission unanimously approved the expenditure, the actual amount of the state's participation to be determined when the work is completed, and authorized the Engineer to tell the Telephone Company to proceed with the re-establishment of its facilities.

The Commission discussed a request from the Timber Carnival Association, Albany, for permission to use Waverly Lake State Park and Waverly Lake for its Timber Festival which is to be held on July 2, 3 and 4, 1950. The Engineer advised that the Association has had the use of this property for its festival for several years under permit. He recommended approval of the request again this year, under the following conditions:

1) That the Association post a cash bond in the amount of $1,000 to guarantee that all state highway property used will be cleaned up to the satisfaction of the State Highway Engineer.

2) That the section of highway from Cox Creek Bridge northerly to the junction of the Albany Airport Secondary Highway, all of which is adjacent to the carnival activities, be posted with "No Parking on Shoulders" signs, at the expense of the Association.

3) That sufficient parking attendants be employed to keep the highway clear of all parked vehicles.

4) That pedestrians be permitted to cross the highway at a minimum number of adequately marked and police-patrolled crossings; that such crossings be temporarily fenced for a distance of 100 yards north and 100 yards south to confine pedestrians to the designated crossings.

5) That all cars be routed and directed to and from the car-parking area used in conjunction with this permit by means of side streets or back roads and not directly to and from the highway.

6) That, as a safety-precaution measure, the Association cut or burn all dried grass on the car-parking area immediately prior to the beginning of the festival.

The Commission approved the recommendation.

A letter was presented from Weyerhaeuser Timber Company requesting permission to deposit on state highway right of way beneath McCullough Bridge, Coos Bay, certain dredged materials which they must remove from the Bay in

connection with construction of a temporary bulkhead. The Engineer advised that the depositing of this material underneath the bridge will not in any manner affect the use of the state's property, but, on the other hand, would better its general appearance. He recommended approval of the request. The Commission approved the recommendation and ordered that the matter be covered by a written agreement between the company and the state, which agreement shall be prepared by the Commission's Chief Counsel and shall provide proper protection of the state's interests.

The Engineer reported receipt of a request from the Willamette National Lumber Company that "NO PARKING" signs be maintained along the Santiam Highway adjacent to the company's plant at Foster, Oregon, so that company employees will be forced to park their cars in a parking area that has been provided by the company, thus eliminating hazards that are now created by reason of employees' parking their cars on the highway shoulders. The Engineer advised that this matter has been investigated by the Traffic Engineer, who recommends that shoulder parking of cars on the highway right of way at this point be prohibited, particularly along the section between M.P. 30.70 and M.P. 31.31, because there is a great deal of truck movement into and out of the mill, and these vehicles need all possible maneuvering area. The Engineer stated his concurrence in the recommendation. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "J," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that in order to permit construction of the Coos Bay Section of US101, it will be necessary to relocate a considerable number of water mains owned by the Coos Bay-North Bend Water Board. He recalled the policy of the Commission in cases of this kind, particularly where water systems are municipally owned, to pay labor charges for such relocations as are necessary, and for the water boards to furnish necessary materials. In the present instance, he said, the Coos Bay-North Bend Water Board has agreed to furnish materials at an estimated cost of $5,502 if the state will pay the labor charges, estimated at $4,945. He recommended, in conformity with that policy, approval of the arrangement, the state's contribution to be approximately $4,945. The Commission approved the recommendation.

A letter was presented from Pine Forest Grange #632, Bend, Oregon, requesting the designation of a 35-mile-per-hour speed zone on The Dalles-California Highway, for a distance of 0.27 mile immediately south of the south city limits of Bend. The Engineer advised that an investigation of this matter reveals that there has been a substantial increase in roadside culture along this section -- in fact, there is almost a continuous line of roadside business establishments. The accident record during the past three years, he said, is not good and the investigation indicates that a speed zone is warranted. He pointed out that a 35-mile-per-hour speed zone now is in effect northerly from the city limits, and he recommended that this 35-mile-per-hour zone be extended southerly a distance of 0.27 mile to Hayes Avenue (M.P. 143.59). The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "K," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A request from the Lincoln Parent-Teacher Association, Corvallis, for the designation of a reduced speed zone along US99W, in the vicinity of Lincoln School, south of Corvallis, had the attention of the Commission. The Engineer advised that the Traffic Engineer has investigated this matter and recommends the designation of a 40-mile-per-hour speed zone extending from the south city limits of Corvallis, M.P. 86.26, southerly to the Junction with Kiger Island Road, M.P. 88.57. The accident record on this section, he said, is very high, the record revealing that during the past three-year period there have been 126 accidents resulting in injuries to 33 persons. Also there is considerable roadside culture, consisting of a large number of residences and business establishments. He recommended approval of the request. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "L," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer asked the Commission to confirm the oral authority heretofore given him to permit the U. S. Army Engineers to construct a temporary building on the right of way of the North Santiam Highway near Detroit Dam site, which building is to be used as a lookout for the public in observing progress of construction of the Detroit Dam. He recalled that the Commission's approval of this permit was given subject to the condition that the building shall not remain on the right of way for a period longer than five years, or until completion of the dam should the dam be completed before that time. The Commission unanimously confirmed the granting of the permit.

The Engineer brought up for discussion the question of paying a sewer assessment amounting to $1,002.65 against certain state highway property in the city of Baker, described as Lots 6, 7, 8, 9 and 10 of Block 15, Mix' Addition to the city of Baker. He advised that this property was acquired by the Commission in 1942 as a stockpile site for the total consideration of $75 and that no taxes have been paid on the property since that time. The westerly half of the block, he said, has been, and now is in use as a stockpile site, but the easterly half, consisting of Lots 6 to 10 inclusive, which property is now being assessed, is not required and could be sold if the Commission so desires. He added that the value of this property as recently appraised by the Right of Way Engineer, is $1,500. The Engineer further explained that the Highway Department also owns adjacent property described as Blocks 10 and 11, which were acquired in 1932, as gravel pits, but are now entirely exhausted. The value of these two blocks, as recently appraised by the Right of Way Engineer, he said, is $750. He recommended approval of the payment of the sewer assessment in the amount of $1,002.65, and that the easterly half of Block 15, and all of Blocks 10 and 11, which are of no value for state purposes and which are appraised at a total value of $2,250, be advertised for sale. The Chief Counsel concurred in the recommendation, suggesting, however, that the payment of the sewer assessment be deferred until the properties have been advertised and the high bidder therefor given an opportunity to pay the assessments. The Commission approved the recommendation unanimously, subject to the suggestion offered by the Chief Counsel.

The Engineer reported a proposed arrangement with the Bureau of Public Roads for a tentative exchange of maintenance on two highway sections, one being the Elk Creek-Jackson County Line Section of the Tiller-Trail

Highway in Douglas County, 6.48 miles in length, a state obligation, and the other being the North Unit of the Soda Mountain-Silvies Section of the John Day-Burns Highway, 4.13 miles in length, a federal obligation. He said that the state has no maintenance crew in the immediate vicinity of the Tiller-Trail Section, and the Bureau of Public Roads has no maintenance crew in the vicinity of the Soda Mountain-Silvies Section. The proposal, he said, is to let the Bureau of Public Roads maintain the Tiller-Trail Project where it has a maintenance crew available, the state to maintain the other where it has a maintenance crew available. He recommended approval of such arrangement in the interests of economy for both the Bureau of Public Roads and the state. The Commission approved the arrangement by unanimous vote. (An agreement covering the matter was signed by the Commission on the following day.)

The Commission considered and upon recommendation of the Engineer and Chief Counsel unanimously approved a form of contract with the Idaho Power Company providing for the lighting of the Ontario and Nyssa underpasses and the furnishing of electrical power to operate a sump pump at the Nyssa Underpass. (The contract agreement was signed by the Commission on the following day.)

The Commission had under discussion adoption of a resolution with respect to the relocation of the Old Oregon Trail through Ladd Canyon between La Grande and North Powder, including the redesignation of the present route of this highway between the same points, as a state secondary highway when the Ladd Canyon route has been constructed. This matter was discussed at some length and as a result thereof, the Commission decided to designate the present highway between La Grande and North Powder a state secondary highway when the new highway through Ladd Canyon has been completed. The attached resolution relative thereto, marked EXHIBIT "N," which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote

The Commission discussed a letter from Mr. Stuart B. Mockford, Secretary of the Community Improvement League, Oak Grove, Oregon, suggesting that US99E between Portland and Oregon City be officially named "McLoughlin Boulevard." The Chief Counsel advised that the Commission is without legal authority to adopt this suggestion because this highway already has been designated by number and by name. He read aloud the provisions of the statute pertaining thereto. In view of this information, the Commission denied the request and ordered that Mr. Mockford be informed accordingly.

There was presented to the Commission a resolution from the Master Pomona Grange No. 2, Wasco County, protesting the installation of "stop and go" lights at the Mosier Tunnel on the upper Columbia River Highway, and requesting the installation of "caution" lights until the hazardous condition at the west approach to the tunnel, caused by rocks falling from the adjacent cliff, has been taken care of in a safe manner. The Engineer advised that a rather difficult situation exists at this point, in that the tunnel is wide enough for the safe passage of two ordinary vehicles, but is not wide enough for the passage of two wide vehicles. He further stated that an attempt was made to control the situation by installation of a "caution" light and the designation of a 20-mile-per-hour speed limit, but that did not prove satisfactory. It was then decided to permit one-way travel only through the tunnel and appropriate signals were installed, and in order to provide additional protection, a wire netting was placed along

the adjacent steep hillside to prevent rocks' falling on the highway and endangering people who might be waiting there for the lights to change. Due to the protest that has now been filed by the Grange, he said, arrangements are being made to stop eastbound traffic about 800 feet west of the tunnel entrance, which is entirely beyond the point where there is danger of rocks' falling on the highway. To widen the tunnel sufficiently to allow traffic to pass through it continuously without interruption, he said, would cost a considerable sum of money, which eventually would have to be wasted because the plan is to locate the highway near the river at some future time, entirely away from the mountainside where the tunnel is situated. He further stated that the arrangements now being put into effect will be tried out to determine whether or not they will serve the purpose. The Commission approved the report and instructed the Engineer to render an additional report on the subject in about two months.

A letter was presented from John J. Besson, M. D., Portland, calling attention to a hazardous condition which he alleges exists at a grade crossing of the Milwaukie-Estacada Secondary Highway with the Southern Pacific Company's tracks near the town of Clackamas. Dr. Besson suggests the construction of an overpass to eliminate the dangers. The Engineer advised that a grade separation at this point would be desirable, but it would cost about $150,000 and there are no funds available to finance it; moreover, if funds were available there is greater need for them to finance highway improvements elsewhere. He recommended that the request be denied. The Commission approved the recommendation.

The Commission discussed a report from the Engineer on traffic violations committed by F. H. Wolfenbarger, log hauler, McMinnville, in connection with his operations over state highways in the Grants Pass area. It appears that Mr. Wolfenbarger's log hauling permit was cancelled by the Public Utilities Commission on July 6, 1949, on which date his insurance was also cancelled, notwithstanding which, he continued the truck-hauling of logs without a valid permit, using his 1948 P.U.C. plates, which he did not surrender when his permit was previously cancelled in October, 1948. A careful review of the record indicated to the Commission that Mr. Wolfenbarger has been engaged in the truck-hauling of logs over state highways a sufficient length of time to familiarize himself with the requirements covering his operations, and for that reason and for the further fact that his violations are considerably in excess of the average, the Commission ordered that the Public Utilities Commissioner be requested to deny any request from Mr. Wolfenbarger for the reinstatement of his permit until such time as he appears before the Highway Commission with a written statement to the effect that he will abide by the Oregon Motor Vehicle Laws, the Motor Transportation Code, and the rules and regulations of any permit that may be issued to him, and that he will further agree to keep the weight of his loads within the limits of the legal weight requirements.

The Engineer brought up for discussion his written report of February 1, 1950, on the subject of minimum amounts of property damage and public liability insurance that the Public Utilities Commissioner requires in connection with the issuance of permits to "contractor carriers," which classification includes carriers of logs, poles and piling on public highways. It appears that the amount of insurance presently required by the Public Utilities Commissioner is the minimum amount which is required by law, viz: $5,000

bodily injury for each person; $10,000 liability for each accident; and $5,000 property damage liability for each accident. The Engineer gave as his feeling that such amount of insurance is entirely too low, and accordingly, he recommended that the Public Utilities Commissioner be advised that the Commission considers that the protection now offered to the highway users is inadequate and that the minimum amounts of such insurance should be increased to amounts at least double the present amounts. The Chief Counsel concurred in the recommendation. The Commission unanimously adopted the recommendation and thereupon approved a form of letter directed to the Public Utilities Commissioner, covering the subject, as prepared by the Chief Counsel. (The letter was signed by the Commission on the following day.)

The meeting adjourned at 5:00 p.m. to reconvene on the following morning in the same room.

Portland, Oregon
February 7, 1950

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room in the Imperial Hotel with the same persons present and participating. Bids as follows for highway construction projects were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

BAKER COUNTY

Black Bridge-Halfway Section of the Baker-Homestead and Halfway Highways. State Project. Rock Production. Requires approximately 8,900 cu.yds. crushed rock in stockpile.

Rush Constr. Co., Enterprise	$ 26,255.50
Barney B. Helser, Molalla	28,480.00
N. A. Toole Constr. Co., Ontario	32,485.00

COLUMBIA COUNTY

Wilson Creek-Spitzenberg Section of the Pittsburg-Scappoose County Road. Federal Project No. S-77(2). 6.91 miles surfacing and oiling. Requires approximately 30,100 cu.yds. crushed rock or crushed gravel, 120 tons RC-3 asphalt or 140 tons RT-4 tar, and 360 tons 151-200 asphalt or 438 tons RT-9 tar.

	Using Asphalt	Using Tar
O. C. Yocom Co., McMinnville	$ 82,196.50	$ - - -
Rogers Constr. Co., Portland	83,221.50	- - -
Oregon Asphaltic Paving Co., Portland	87,020.00	- - -
J. N. & M. J. Conley, Portland	87,218.75	- - -
Vernie Jarl, Gresham	88,202.75	88,670.00
P. B. Doherty & Son, Portland	88,524.00	92,755.25
A. H. Saxton & Sons, Corvallis	92,947.25	94,687.00
E. C. Hall Co., Portland	94,541.00	- - -
Parker-Schram Co., Portland	98,649.25	

GILLIAM AND WHEELER COUNTIES

Rock Creek-Condon-Service Creek Section of the Wasco-Heppner Secondary and John Day Highways. State Project. Rock Production. Requires approximately 11,510 cu.yds. crushed rock in stockpile.

Oscar E. Joelson, Eugene	$ 28,079.50
Barney B. Helser, Molalla	31,307.20
Rush Constr. Co., Enterprise	31,652.50
E. H. Itchner, Molalla *	34,530.00
Arthur Gentemann, The Dalles	35,681.00
F. L. Somers, Klamath Falls	39,134.00

* Bidder will accept only one project

LANE COUNTY

Eugene Traffic Signals. State Project. Furnish and install traffic signal lights at three intersections on Pacific Highway in city of Eugene.

C. & S. Electric, Eugene	6,326.00
L. H. Morris Electric Co., Eugene	7,244.00
Mill Electric Co., Salem	7,503.00
City Electric Co., Salem	7,555.06

LINN COUNTY

Halsey-Crawfordsville Section of the Halsey-Sweet Home Secondary Highway. Federal Project No. S-230(3). 9.3 miles of paving; also furnishing crushed material in stockpile. Requires approximately 48 tons emulsified asphalt; 15,800 tons asphaltic concrete pavement; 5,000 cu.yds. crushed or screened shoulder material; and 6,500 cu.yds. crushed rock or crushed gravel in stockpile.

Porter W. Yett, Portland	113,010.00
Warren Northwest Inc., Portland	117,420.00
Acme Constr. Co., Eugene	121,850.00
D-H Paving Co., Vancouver, Wn.	122,340.00
Babler Bros., Portland	124,100.00
Central Heating Co., Eugene	127,145.00

MORROW COUNTY

Hardman-Chapin Creek Section of the Heppner-Spray Secondary Highway. Federal Project No. S-218(4). 6.14 miles grading, surfacing and oiling; also furnishing crushed rock in stockpile. Requires approximately 39,000 cu.yds excavation, 29,000 cu.yds. talus topping material, 12,000 cu.yds. crushed rock, and 240 tons 151-200 asphalt.

Morrison & Fisher, Walla Walla, Wn.	90,605.00
D. F. McKenzie, Salem	95,052.10
Inter City Sand & Gravel Co., Eugene	97,659.90
Lindstrom Bros. Inc., Portland	97,856.00
Heavy Hauling Co., Astoria	98,358.70

(Cont.)

Hardman-Chapin Creek Section (Cont.)

F. L. Somers, Klamath Falls	$ 101,105.00
E. H. Itchner, Molalla *	106,526.00
Rogers Constr. Co., Portland	109,351.00
O. C. Yocom Co., McMinnville	111,750.00
Newport Constr. Co., & Kern & Kibbe, Portland	115,706.50
Spada Bros. & K. C. Dack, Portland	117,415.12
J. N. & M. J. Conley, Portland	126,237.00
G. D. Dennis & Sons, Portland	126,836.50
C. J. Eldon, Portland	131,701.90

* Bidder will accept only one project

UMATILLA AND GRANT COUNTIES

Ukiah-Long Creek Section of the Pendleton-John Day Highway. State Project. Rock Production. Requires approximately 10,600 cu.yds. crushed rock in stockpile

Rogers Constr. Co., Portland	30,740.00) *
Rush Constr. Co., Enterprise	30,740.00)
E. H. Itchner, Molalla **	33,390.00
F. L. Somers, Klamath Falls	36,570.00

* Tie Bids
** Bidder will accept only one project

The Engineer submitted for the Commission's consideration a revised Maintenance Budget for 1950. He recalled that the budget discussed at the previous meeting contained an amount of $11,138,000 for maintenance purposes but the Commission ordered the amount reduced to $10,138,000, which has been done. He pointed out the several items where reductions have been made to make up the total. The Commission unanimously approved the budget as revised.

The Engineer also reported on the office furniture and equipment requirements for the first quarter of the year 1950, for which an amount of $25,655 was included in the budget that was considered by the Commission at the previous meeting. He recalled that action on this feature of the budget was deferred at that time to allow a review of the figures submitted by the various department heads. Such review has been made, he said, and it is now estimated that an expenditure of $19,185 will meet the needs of the department for office equipment during the first quarterly period, which is a reduction of $6,470 from the original estimate. He recommended specific approval of purchases in such amount during the first quarter of 1950, and tentative approval of an expenditure of $44,200 for the entire year. It was the feeling of the Commission that the purchase of desks, chairs, tables, map cabinets, bookcases and similar furniture should be deferred, insofar as is possible, until the new highway building has been completed, so when the purchases are made the type of furnishings will conform and harmonize with

the finish in the new building. Accordingly, the Commission approved the budget with such items deleted, thus reducing the amount authorized for the first quarter of 1950, to $13,455.

The Engineer requested specific authority to purchase during the first quarter of 1950, engineering equipment which is estimated to cost $5,470; equipment for the Parks Department estimated to cost $2,468; and equipment for the Sign Shop which is estimated to cost $1,765, a total of $9,703. He said that provision was made in the 1950 budget for these purchases, but they were not included in the commitments for the first quarter; and due to the fact that the equipment is needed now, he would like authority to place the orders immediately. The Commission approved the request unanimously.

The Engineer brought up for discussion the removal of Primary Federal Aid Highway No. 36 from the Federal Aid Highway System. He stated that this highway, which extends northerly from the Stanfield-Boardman Highway at a point a short distance west of Pendleton, to a junction with the Columbia River Highway near Cold Springs, in Umatilla County, was placed on the Federal Aid System by action of a former Highway Commission in 1932 and in 1937, but has never been constructed. He also said that there is no apparent justification for the road now because the existing Pendleton-Cold Springs Highway has been designated a Federal Aid Secondary Highway, and a major portion of it has been improved to satisfactory standards. He exhibited a map showing the location of the road and recommended that it be removed from the Federal Aid System. The Commission approved the recommendation unanimously and thereupon signed a letter directed to the Bureau of Public Roads to that effect.

The Commission approved the payment of 1950 membership dues in the Western Association of State Highway Officials, amounting to $50, and also approved payment of 1950 membership dues in the American Association of State Highway Officials, amounting to $675.

The Commission confirmed verbal approval previously given for the Director of the Travel Department to attend, at state expense, a joint meeting of the Travel Departments of British Columbia, Washington and Oregon, which was held in Seattle on February 3 and 4, 1950

In this connection, the Commission also authorized the State Highway Engineer to go to Washington, D. C., at state expense, during the early part of March, 1950, to meet with the Transportation Committee of the American Association of State Highway Officials and to attend a hearing of the Congressional Committee on road matters.

There was presented for the Commission's consideration a request from Robert W. Sawyer of Bend for the erection of three historical testboards on state highways in Central Oregon, and a request from Mr. H. G. Smith, member of the Historical Committee of the Oregon Historical Society, for the erection of a textboard on the Old Oregon Trail near the City of Baker. The Engineer advised that the textboards are to memorialize historical places, and that all of them have been recommended by the Memorials Committee of the Oregon Historical Society. Moreover, the Committee has approved the text for each of the boards and the following headings: "Williamson River;" "Indian Trails;" "Peter Skene Ogden," and "Cattle Drives." He estimated the cost of

the textboards at approximately $200 each, or a total of $800, and recommended approval of the expenditure. The Commission approved the recommendation unanimously. (For complete wording of the textboards, as approved by the Memorials Committee of the Oregon Historical Society, see general files.)

The Commission had under discussion the setting of a date for its next regular meeting, and decided unanimously to hold such meeting on Monday and Tuesday, March 20 and 21, 1950. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel, Portland.

Consideration was given by the Commission to a request from the U. S. Army Engineers for permission to perform certain channelization and landscape work on the Right of Way of the Columbia River Highway at the entrance to McNary Dam Townsite. The Engineer advised that plans for this work have been examined and in his estimation, if the request is approved, a very worthy improvement, which will materially enhance the appearance of the highway at the entrance to this townsite, will result. Moreover, it will not be inimical to public usage of the highway. He recommended approval of the request. The Commission approved the recommendation and thereupon signed an agreement with the contracting officer of the United States of America, pertaining thereto.

The Engineer reported receipt of a request from the Evans Products Company, Coos Bay, for permission to construct a roadway across a state-owned stockpile site, adjacent to the Oregon Coast Highway near Delmar, to facilitate movements of their log hauling trucks which unload at this point. He explained that the Company operates an unloading dock at Delmar, which is on the newly improved section of the highway between Coos Bay and Coquille, and due to the large number of trucks that arrive at the dock simultaneously, it is impossible to scale logs and dump them without the trucks' backing up onto the highway shoulders, thus creating a hazard to highway travel. Were the company permitted to construct a roadway on the stockpile site, as it requests, the trucks could pull off onto this area for scaling purposes and then proceed to the unloading dump without being forced to park along the highway while waiting to unload. The construction of a roadway along the edge of the stockpile site, he said, will not interfere with the use of the site for stockpile purposes, and he recommended that a revocable easement be granted to the Company to construct and maintain such parking roadway on the state property. As a result of discussion, the Commission unanimously approved the recommendation and referred the matter to the Chief Counsel to prepare a form of agreement with the Company, that will protect the state's interests and will require vacation of the state's property should the use of the road become inimical to the state's interests.

The Commission had under discussion the adoption of a resolution giving the State Highway Engineer blanket authority to post state highways for reduced weight loads when he considers that necessary in order to properly protect these facilities from undue damage. The attached resolution relative thereto, marked EXHIBIT "O," which resolution by this reference is made a part hereof with like effect as though extended in full herein, was adopted by the Commission by unanimous vote.

The Commission had under discussion the appointment of a State Highway Engineer, a Chief Counsel, and a Secretary, in view of the fact that the terms of the present incumbents, Messrs. R. H. Baldock, J. M. Devers and H. B. Glaisyer, expire on February 28, 1950. Motion was made by Commissioner Chandler that each of these men be reappointed for a four-year term, ending February 28, 1954. The motion was duly seconded by Commissioner Reynolds. Chairman Banfield declared the motion carried by the unanimous vote of the Commission.

The Commission next had under discussion the selection of bonding companies and resident agents to participate in the new bond to be furnished by Mr. Baldock, as is required by law, covering his reappointment as State Highway Engineer. The Commission decided unanimously to renew the bond furnished by Mr. Baldock covering his previous appointment, in the amount of $350,000, in the same fifteen companies and with the same agents participating.

Commissioner Reynolds rendered a brief report on his inspection trip of state highways through Eastern Oregon, during the week starting Tuesday, January 24, in company with the State Highway Engineer, R. H. Baldock.

The Commission had under consideration the Chief Accountant's report on the Front Avenue Project in Portland, as rendered by him on September 19, 1949. In the discussion of this matter, the question arose whether or not the City of Portland would deed to the state its share of the properties acquired jointly by the city and the state. The Chief Accountant advised that the city is agreeable to do that, and is ready to close the matter by transferring to the state its interests in the unsold properties. He was instructed by Chairman Banfield to make sure that there is included in the list of properties in which the city's interest is to be deeded to the state, the property abutting Front Avenue that is being used by the Portland Chamber of Commerce as a Tourist Information Center. As a result of this discussion, the Commission unanimously approved the taking of whatever steps are necessary to conclude with the City of Portland the transactions that are pending on this project, including the deeding of certain parcels of property from the city to the state, the sale of certain parcels of property no longer required as right of way, and the final audit and settlement of accounts between the city and the state. The Chief Counsel was instructed to make certain that in concluding this transaction the state obtains all of the city's interests in the matter.

The Engineer reported that pursuant to previous instructions from the Commission he has carefully inspected the proposed location of the Ochoco Highway west from the town of Mitchell, particularly the section between Mitchell and Jones Ranch, about eleven miles in length, and in his estimation the location selected as a result of surveys several years ago, and which by-passes the main street in Mitchell, is the correct one. He exhibited a map showing the location as determined by the survey, and recommended adoption of the location as disclosed thereon. The Engineer also stated that the estimated cost to construct the highway on such location is $836,000, and he gave as his feeling that because of the importance of the road to traffic in the John Day Valley, the project should be given consideration by the Commission in the formulation of its next construction program. He pointed out that it would take nearly three years to complete the project, and recommended, in view thereof, that the existing road along this section be given a temporary oil treatment to allay the dust and keep the road in usable condition, which work he estimated would cost about $28,000. As a result of careful consideration

of this matter, the Commission approved the survey as reported by the Engineer by the adoption of the attached resolution relative thereto, marked EXHIBIT "P," which resolution by this reference is made a part hereof with like effect as though extended in full herein. The Commission also unanimously approved an expenditure of $28,000 to provide a temporary oil surface on the existing road as recommended by the Engineer, and authorized him to advertise the project for bids as soon as the plans can be prepared.

A delegation representing the Common Council of the City of Florence was present in regard to the improvement of the Oregon Coast Highway through their city. The group was headed by H. F. Severy, City Recorder, and included Mayor Paul V. Womer and George Burbach, Street Commissioner. Mr. Severy stressed the need for better drainage of the highway right of way, advising that due to development of the properties adjacent to the highway, the drainage problem has increased many-fold. He pointed out that the right of way is 100 feet wide, and presented pictures showing many pools of standing water on the right of way. He also said that the city has an eight-inch sewer and storm drain on Hamlin Street, south of Fourth Street, which has adequately taken care of surplus water in the past, but this sewer is now overloaded because of new developments, and as a result, each heavy rain causes considerable damage to lawns, driveways and building foundations. He urged the Commission to authorize improvement of these conditions. Mr. Severy also asked the Commission to bear in mind, when planning additional improvements on the Oregon Coast Highway through their city, the need to provide protection for school children and bus passengers who are obliged to use the highway. He advised that the City Council is negotiating for a modern street lighting system, which includes the placing of some lights on the highway, but the type of lights to be used and the location of the same depends upon the type of construction on the highway.

The Engineer recalled that the city some months ago requested the widening of the pavement on this highway through their city, and investigation revealed that such an improvement, including drainage and curb construction, would cost about $100,000, which the Commission could not approve, because of lack of funds. The Commission took the drainage matter under advisement.

Following departure of the group, the matter was again discussed, at which time the Commission indicated that it has a responsibility with respect to the drainage matter because of the right of way width. Accordingly, the matter was referred to the Engineer for further investigation and report as to what might be done to improve the condition and the cost of doing it.

A delegation from Springfield, headed by Mr. W. S. Fort, Chairman of the City Planning Commission, and including the following members of the City Council, was present in regard to the proposed improvement of the McKenzie Highway through their city, and the routing of the highway in connection with the adoption of a one-way street plan through their business district: Hon. B. P. Larson, Mayor, Messrs. John W. Boeshans, Frank R. Bouck, and Ralph Nicholas, Councilmen; and Fred R. Cheatham, City Manager. Mr. Fort presented a resolution adopted by the City Council at a meeting held on February 2, 1950, in which, among other things, the Council expresses its

willingness to acquire sufficient right of way along the South "A" Street Route so that the remaining cost of the South "A" Street plan will be comparable to the estimated cost of the North "A" Street plan. (For details of the city's offer, see copy of City Council's resolution in general files.) Mr. Fort urged the Commission to adopt the South "A" Street route. In order to clarify the right of way feature, Chairman Banfield inquired if the Highway Commission is to understand that the City of Springfield will furnish right of way up to the amount of $142,000 if the State Highway Commission will approve the one-way street plan and will adopt South "A" Street as the route for eastbound McKenzie Highway traffic. He was informed by Mr. Fort that this understanding is correct. Chairman Banfield then advised that the Highway Commission has a certain amount of money reserved to finance the improvement of the McKenzie Highway through the town of Springfield, which amount is the absolute maximum that the Commission will allocate to this improvement. The Commission took the entire matter under advisement. The matter was reconsidered following the departure of the group, at which time the Commission ordered that the City of Springfield be informed that the State Highway Commission will adopt the South "A" Street route and will proceed with the improvement along that route if the city will guarantee to acquire necessary right of way up to the amount of $142,000 appraised value, and provided the State Highway Engineer recommends the South "A" Street route. The matter was referred to the Engineer and Chief Counsel to work out the details with the city on such basis.

Mr. J. H. Balzhiser, Mrs. Balzhiser and their son Robert B. Balzhiser, appeared before the Commission regarding the opening of the curb on Franklin Boulevard (Pacific Highway) a short distance south of Walnut Street in Eugene, as a driveway entrance into their property. The State Highway Engineer advised that pursuant to instructions from the Commission at the previous meeting, he has consulted further with Mr. Balzhiser concerning this matter and as a result thereof, Mr. Balzhiser has stated that he will be satisfied with one opening fifty feet wide, about midway on his highway frontage. He recommended approval of this one opening, the northerly edge of which is to be exactly 110 feet south of the south line of Walnut Street. He exhibited a map showing the location of the opening. Mr. Balzhiser confirmed the statements of the Engineer and stated that he would be satisfied with just one opening, as disclosed on the map. The Commission by unanimous vote approved such opening, subject to further approval by the City of Eugene. The Secretary was instructed to convey to Mr. Balzhiser the Commission's action in writing.

A delegation from Eugene, headed by Mr. Howard S. Merriam, Chairman, Highways Committee, and including Messrs. Earl McNutt; Hugh P. Ford; Edwin A. Peterson, Clif Culp and Bob Davis, all members of this committee, appeared before the Commission in the interests of the further improvement of the Pacific Highway South of Eugene, particularly between the end of the present improvement at Judkins Point, and Goshen. Mr. Merriam presented statistics in behalf of the proponents of this project, and urged the Commission to make provision for it in its next construction program. Chairman Banfield pointed out that the Highway Commission has spent a large sum of money in the Eugene area during the last few years, which in fairness to other localities must be considered in the distribution of future highway funds. The Commission, he said, is sympathetic with the Judkins Point-Goshen project, but is not in position to approve it today, because of other projects which it considers more critical, such as the one contemplated in the City of Springfield. This concluded the conference.

The following people composed a delegation from Condon and vicinity, which appeared before the Commission regarding the further improvement of the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway: Hon. Stuart Hardie, State Senator; Hon. James D. Burns, Gilliam County Judge; Charles Quinn, County Commissioner; Frank Mercer, Chairman, Highway Committee, Condon Chamber of Commerce; Virgil Larsen, farmer; Robert Patching, farmer; C. K. Barker, stockman, all of Condon. Senator Hardie was spokesman for the group. He urged the Commission to authorize improvement of the ten-mile section of this highway extending westerly from a point about six miles west of Condon so that it can be used throughout all seasons of the year. He alleged that this ten-mile section has never been permanently located, graded or surfaced, and at certain times of the year is almost impassable, moreover, during the rainy season it is not maintained properly and water runs down the center of the road. He urged the improvement of this section and the balance of the highway between Condon and Wasco on the basis of creating a saving of some 80 miles of travel over the present route from Condon to Wasco via Biggs, which route, he said, has to be used extensively by traffic at certain times of the year because of conditions prevailing on the Condon-Wasco Highway. Senator Hardie endorsed the Commission's proposed program for constructing an oil surface on the West Cottonwood Grade Section of this Highway, and urged that the funds set up therefor be not transferred to any other project. In support of the oral arguments, Senator Hardie presented letters from the following: Condon Commercial Club; Gilliam County Court; Morrow County Court; Sherman County Court; Wheeler County Court; Moro Grain Growers' Association, and a joint resolution from the Wasco County Court, the Port of The Dalles, The Dalles Chamber of Commerce, and the City of The Dalles. Chairman Banfield advised that the Commission has ordered an economic survey of this road but the results of such survey have not yet been reported by the Engineer, so the Commission is not in position to take action today, but will do so when the report has been received and studied.

The Chief Counsel requested instructions relative to the offer of Mr. George A. Zwick to pay the sum of $225 for a small tract of land containing .6 acre, situate on the Newberg-McMinnville Section of the Pacific Highway West, near McMinnville, Yamhill County. He explained that the property is outside of the standard width highway right of way and was acquired in connection with a right of way transaction; further, that a small schoolhouse at one time occupied the premises, but the school district was consolidated with another one and the building was sold, leaving this small parcel of land which Mr. Zwick wishes to acquire because he owns the adjoining property. He recommended acceptance of the offer. The Commission approved the recommendation unanimously, and thereupon signed a bargain and sale deed conveying the property to Mr. Zwick.

The Engineer reported a communication from the County Court of Lane County requesting approval of a county road access to the newly constructed section of the Willamette Highway at Highway Engineer Station 442+82.25 in S.1, T.19S, R.1W, W.M. He said that the old highway was closed in order to permit relocation of the Southern Pacific Railroad tracks, and by reason thereof traffic approaching the highway from the county road and destined for eastbound points is now compelled to travel one and one-half miles west in order to reach the highway, and then to travel a like distance easterly,

resulting in an extra three miles of travel, whereas the distance between the old highway and the new highway is only 788.8 feet. The county road which the county court wishes to connect with the highway, he said, is an important road and the point of access desired is on a straight section of right of way, so no particular hazard will be created if the county is permitted to make the connection. He recommended approval of the request on the condition that the county will secure the right of way and construct the road without cost to the state. The Commission approved the recommendation unanimously.

The Secretary presented a letter from the Most Reverend Edward D. Howard, Archbishop of Portland in Oregon, who suggests that it would be proper for the State Highway Commission to erect an historical marker in the hamlet of St. Louis in memory of Marie Dorian, an untutored Indian woman who was prominently identified with the early history of this state, and who died on September 5, 1850, and was buried on the following day at this place. Reverend Howard suggests the placing of a memorial on about September 5, 1950, the centennial of her death. The Commission deferred action on this matter pending a report from the Engineer on suggestions previously offered by Mr. Walter Meacham, Secretary of the Old Oregon Trail Association, covering such matter and others of similar nature.

The Assistant Counsel, Mr. C. W. Enfield, presented to the Commission a request of Kuckenberg Construction Company that the Commission consent to an assignment of Contract 3094 by Kuckenberg Construction Company, a partnership, to Kuckenberg Construction Company, a corporation. The Commission consented to such assignment as set forth in the assignment instrument furnished by Kuckenberg Construction Company, wherein Kuckenberg Construction Company, a partnership, assigns all of its rights and interest in and to Contract No. 3094, and delegates all of its duties and obligations in said contract to Kuckenberg Construction Company, a corporation, and wherein Kuckenberg Construction Company, a corporation, agrees to perform all of said delegated duties and obligations, and wherein all of the individual partners of Kuckenberg Construction Company, a partnership, agree to remain personally liable under the contract and bond made a part of said contract to the same extent as they are and were liable prior to said assignment. The consent of the Commission to this assignment is further based upon the prequalification statement of Kuckenberg Construction Company, a corporation, as filed with the Highway Commission and as amplified by letter dated February 2, 1950, from Wilbur, Beckett, Oppenheimer, Mautz & Souther, attorneys for both Kuckenberg Construction Company, a partnership, and Kuckenberg Construction Company, a corporation.

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. with the same persons present and participating.

A letter was presented from Mr. Robert Y. Thornton, Attorney, Tillamook, expressing appreciation for the splendid work done by Highway Department maintenance crews in keeping the Wilson River Highway free from snow and open to travel during the recent storm period. The Commission ordered the communication acknowledged with thanks.

The following persons, representing the Mill City Chamber of Commerce, appeared before the Commission and briefly expressed their appreciation for the action taken by the Commission at this meeting in the allocation of funds

to finance construction of a six-mile section of the North Santiam Highway from Mill City to the Little North Fork of the Santiam River: David M. Reid, W. R. Hutcheson, E. J. Richards, and Lee S. Ross.

The Hon. Albert G. Flegel, Mayor of Roseburg, and Percy Croft, City Councilman, appeared before the Commission regarding the improvement of the Pacific Highway in North Roseburg, and the establishment of a one-way traffic plan for Pacific Highway travel in this city. Mr. Croft presented the principal arguments in behalf of their project. He was informed by Chairman Banfield that the Highway Commission previously authorized a survey and the taking of options for right of way needed for the improvement of the highway in north Roseburg, but the Commission has never discussed the establishment of a one-way traffic system. Mayor Flegel requested authority for the State Highway Engineer to make an economic survey of the city's highway needs so people will know something of the contemplated highway improvements and can spend their money properly for property development. The Commission took the matter under advisement pending receipt from the Engineer of a report as to whether or not, from the time standpoint, the Engineering Department can make such a survey and if so, what it will cost. The delegation was informed that they would be given an answer when the Commission has passed on this report.

A delegation from Kernville representing Read Creek Grange, and composed of J. D. Steere, L. Ward and Frank Ketola, was present and urged the construction of the unimproved portion of the Siletz Secondary Highway between Kernville and Siletz, about 17 miles in length. Mr. Steere headed the group. He stated that this 17-mile section of highway is crooked, narrow and in very bad condition, and that at certain times of the year it is necessary for the people who use this road to drive to Toledo by way of Kernville and Newport rather than take the shorter route by the Siletz Highway. He presented letters from the Toledo Chamber of Commerce and Read Creek Grange No. 851, and resolutions from the Siletz Valley Grange No. 558 and Siletz Chamber of Commerce, endorsing their request. Mr. Ward, too, urged the improvement, from the standpoint of safety to traffic. Chairman Banfield pointed out that the Commission is under considerable pressure from people of Newport and Toledo for the reconstruction of the Toledo-Newport Highway, so the question is, if the Commission is able to finance only one project in this vicinity, should it be the reconstruction of the Toledo-Newport Road or the improvement of the Siletz Road. Mr. Steere granted that the Toledo-Newport road needs improvement. However, he said, it is passable, notwithstanding that it is crooked, and is in much better condition than the Siletz Highway. Chairman Banfield concluded the discussion by stating that the Commission would analyze the project along with others in the formulation of future construction projects, but no promise can be made at this time.

The Commission discussed with the Engineer the bids received at the morning session for highway contracts. The Engineer pointed out that identical bids were submitted by Rogers Construction Company and Rush Construction Company for rock production on the Ukiah-Long Creek Section of the Pendleton-John Day Highway. He said that both of these contractors were contacted with respect to their bids, and each stated a willingness to abide by the Commission's decision based on the flipping of a coin to determine the successful bidder. The Commission agreed to such disposition of the matter and a coin was thereupon

flipped by the Secretary in the presence of Mr. Lee Shannon, representing Rush Construction Company. The toss was won by Rogers Construction Company. As a result of discussion, the Commission unanimously approved the award of this contract to Rogers Construction Company. The Commission's decision with respect to the remaining projects was publicly announced by Chairman Banfield at 3:00 p.m., as follows:

"Rock Production on the Black Bridge-Halfway Section of the Baker Homestead and Halfway Highways in Baker County. Rush Construction Company, Enterprise, submitted the low bid on this project at $26,255.50. The Commission has referred to the Engineer the bids received for this project and has authorized him to award the contract to the low bidder, at the bid price, when certain conditions have been satisfied.

"Surfacing and oiling the Wilson Creek-Spitzenberg Section of the Pittsburg-Scappoose County Road in Columbia County. The Commission has awarded this contract to O.C. Yocom Company, McMinnville, the low bidder, at its bid price of $82,196.50, based upon the use of asphalt.

"Rock Production on the Rock Creek-Condon-Service Creek Section of the Wasco-Heppner Secondary and John Day Highways in Gilliam and Wheeler Counties. The contract for this work has been awarded to Oscar E. Joelson, Eugene, the low bidder, at his bid price of $28,079.50.

"Furnishing and installing traffic signals at three street intersections on the Pacific Highway in the City of Eugene. The Commission has referred to the Engineer the bids received for this project, with authority to award the contract to the low bidder, C. & S. Electric, Eugene, at its bid price of $6,326 when certain conditions have been safisfied. (See footnote.)

"Paving and furnishing crushed materials in stockpile for the Halsey-Crawfordsville Section of the Halsey-Sweet Home Secondary Highway in Linn County. Bids for this project have been referred by the Commission to the Engineer with authority to award the contract to the low bidder, Porter W. Yett, Portland, at his bid price of $113,010 when certain conditions have been satisfied.

"Grading, surfacing and oiling the Hardman-Chapin Creek Section of the Heppner-Spray Secondary Highway in Morrow County. Morrison & Fisher, Walla Walla, Washington, submitted the low bid for this work at $90,605. There were thirteen higher bids. The Commission has accepted the low bid and has awarded the contract to Morrison & Fisher at their bid price.

"Rock Production on the Ukiah-Long Creek Section of the Pendleton-John Day Highway in Umatilla and Grant Counties. Identical low bids were submitted for this project by Rogers Construction Company, Portland, and Rush Construction Company, Enterprise, at $30,740. The Commission has awarded the contract to the Rogers Construction Company as a result of a flip of a coin to decide the successful bidder."

(Footnote): In connection with the Eugene Traffic Signal Project, the Engineer advised that the city of Eugene desires a change in the plans. He suggested ap-

(Footnote - Cont.)
proval of the change, subject to the condition that if extra costs are involved, such expense shall be paid entirely by the City of Eugene. The Commission approved the suggestion.

The Chief Counsel brought up for discussion matters pertaining to the redecking of the upper portion of the Steel Bridge, Portland, which work is estimated to cost $175,000. He stated that he has contacted the railroad companies who own this structure, relative to participation in the cost of constructing the new deck, but they absolutely refuse to contribute toward the expense, because of their prior agreement with the State Highway Commission pertaining to the use of this upper deck for state highway purposes. He read aloud for the Commission's information, provisions of the agreements between the railroad companies and Multnomah County, and the state, and between Multnomah County and the state covering public use of this structure, and he particularly pointedout that the agreement between the companies and the state provides that the state may acquire the upper deck of this structure if it so desires, either by negotiation or by condemnation. The matter was discussed at considerable length and it appeared to the Commission, by reason of the state's agreement with the railroad companies, that the companies are not obligated to contribute railroad funds toward the cost of redecking the upper deck. Accordingly, the Engineer was authorized by the Commission to proceed with the contracting of such redecking work at state expense. The Chief Counsel was instructed to contact the railroad companies regarding the purchase of the upper deck of this structure and to report back to the Commission.

A delegation representing the John Day Chamber of Commerce, and including Director E. E. Smith, Secretary I. B. Hazeltine, Fred Lemke, and P. N. Thorn, appeared before the Commission regarding the improvement of an eleven-mile section of the Ochoco Highway, extending westerly from the town of Mitchell. Also present in behalf of this project were the following members of the Roads and Highways Committee of the Portland Chamber of Commerce: Chairman Floyd Martin, A.R. Trombly and J. M. Stewart.

Mr. Smith headed the group. He inquired as to the plans of the Commission with respect to this proposed improvement. He was informed by Chairman Banfield that the Commission had under discussion during the morning session a report from the State Highway Engineer on this subject, and as a result thereof, the Commission adopted the Engineer's survey of this section and authorized an expenditure of $28,000 for construction of an oiled surface on the existing road. He pointed out that the present road is not on permanent alignment, and the probabilities are that the eventual location will bypass the main street in Mitchell. Mr. Smith expressed the appreciation of his group for the action. He then requested improvement of the John Day Highway between the towns of John Day and Mt. Vernon. He gave as his understanding that this section of highway is the most costly section of road in the state to maintain. He was informed by the Commission that there are no funds available to finance this improvement at the present time.

Mr. Dudley Turnacliff, Newport, Director of the Oregon US20 Highway Association was present and submitted a resolution from the Association expressing its appreciation for the action of the Commission in authorizing a survey for the permanent location of the Corvallis-Newport Highway between Toledo and Newport. He read aloud a letter from Mr. E. K. Willer, President of the Association, with respect thereto. He asked the Commission to extend the survey as far east as possible. Chairman Banfield thanked Mr. Turnacliff for the letter and advised him that the Commission will not be in position to take any action on his request until it has a full report from the Engineer on the subject.

The Engineer reported that an employee of the State Highway Department in Eastern Oregon who maintains a high classification in the organization has acquired control, by lease, of two tracts of land in Union County which contain deposits of cinders that are of value to the State Highway Department for highway construction; and that there is some indication that this employee discovered these deposits and leased them in connection with his departmental duties. This employee, he said, originally agreed to relinquish his rights to the properties for a reasonable sum, but later reversed himself and now is demanding several thousand dollars for his interests. He said that the situation is rather embarrassing, and requested instructions from the Commission as to how it should be handled. He was instructed by the Commission to contact this employee again and ascertain the full facts in the case, and make a setttlement with him if possible.

The Commission signed agreements, etc. as follows:

Easement agreement with Kathryn Huling for private roadway across state-owned property near Myrtle Point, Coos County.

Agreement and easement with Port of Newport providing for use of state-owned property at Depoe Bay.

Agreement with Bureau of Reclamation re right of way on Nyssa-Adrian Highway.

Agreement with Idaho Power Company for lighting Ontario and Nyssa Underpasses

Letter to Bureau of Public Roads re removal of Federal Aid Highway No. 36 from Federal Aid Highway System.

Letter of complaint by Ed. E. Gaines re accident involving log truck operated by Cloyd A. Golden.

EXHIBIT "A"

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or basis of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Minutes of February 6 and 7, 1950

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Pacific Highway East is a highway under the jurisdiction and control of the State and is, in addition, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate and construct the South Commercial Street- South Liberty Street Section of the Pacific Highway East within the City of Salem, Oregon, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Pacific Highway East is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation, construction, and maintenance of the South Commercial Street-South Liberty Street Section of the Pacific Highway East, a parcel of real property located in Marion County, Oregon, and described as follows, to-wit:

A parcel of land lying in Block 21, Nob Hill, George H. Jones, Addition to the City of Salem, Marion County, Oregon, the said parcel being all of Lots 2, 5, and 12 of said Block 21.

Also all that portion of Lots 3 and 4 of Block 21 described as follows:

Beginning at a point on the south line of Lot 4 which is 22.37 feet easterly from the southwest corner of Lot 4; thence easterly to the

(Cont.)

southeast corner of Lot 3; thence northerly 25.7 feet along the easterly line of Lot 3; thence southwesterly on a straight line to the point of beginning.

The parcel of land to which this description applies contains 16.000 square feet.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to acquisition of fee simple title to the aforesaid described property, it is necessary that there be acquired and extinguished such interest, if any there be, by which a right of access or any right in the nature of a right of access may accrue by virtue of the adjacency of the South Commercial Street-South Liberty Street Section of the Pacific Highway East when constructed to the remaining land of the larger tract of which the above-described property is a part.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the sixth day of February, 1950.

EXHIBIT "B-2"

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Old Oregon Trail Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of the federal highway system; and

WHEREAS for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen and straighten the section of the said highway as hereinafter set forth, and for such purpose and in connection therewith, the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Old Oregon Trail Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, straightening, construction, and maintenance of the Pumping Plant Hill-Ontario Section of the Old Oregon Trail Highway a parcel of real property located in Malheur County, Oregon, and described as follows, to-wit:

A parcel of land lying in Lot 2, Lot 3, and the Southeast quarter ($SE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 16, Township 17 South, Range 47 East, W. M., Malheur County, Oregon; and said parcel being all that portion of said Lot 2, said Lot 3, and said Southeast quarter ($SE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 16 included in a strip of land 100 feet in width, 50 feet on each side of the center line of the Old Oregon Trail Highway as said highway has been relocated over and across or adjacent to said Section 16, which center line is described as follows:

(Cont.)

EXHIBIT "B-2" (Cont.)

Beginning at a point which is Engineer's center line Station 1368+00; said point being approximately 90 feet north and 225 feet east of the northwest corner of Lot 2, Section 16, Township 17 South, Range 47 East, W. M.; thence South 40° 02' West 114.39 feet to Station 1369+14.39 equals Station 1368+93.74; thence continuing South 40° 02' West 1559.25 feet; thence on a spiral curve left (the long chord of which bears South 37° 02' West) 300 feet; thence on a 954.93 foot radius curve left (the long chord of which bears South 21° 41' 25" West 311.44 feet; thence on a spiral curve left (the long chord of which bears South 6° 20' 50" West) 300 feet; thence South 3° 20' 50" West 635.57 feet to Station 1400+00, said center line crossing the south line of said Lot 3 approximately at Station 1399+70.

The parcel of land to which this description applies contains 6.64 acres, of which 3.34 acres lie within the existing right of way, title to which hereby is alleged to be in the public, and 3.30 acres lie outside of the existing right of way.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to acquisition of fee simple title to the aforesaid described property, it is necessary that there be acquired all easements and rights of access, and all rights of ingress, egress, and regress from and to the remaining land of the larger tract of which the above-described property is a part, and the above-described property and any highway now or hereafter constructed thereon, except that there shall be reserved unto the owners of said remaining property rights of private access for six approaches to the said Old Oregon Trail Highway of the following widths and at the following locations:

a. An approach not to exceed 25 feet in width on the east side of the Old Oregon Trail Highway opposite Engineer's center line Station 1369+00.

b. An approach not to exceed 25 feet in width on the east side of the Old Oregon Trail Highway opposite Engineer's center line Station 1376+00.

c. An approach not to exceed 25 feet in width on the east side of the Old Oregon Trail Highway opposite Engineer's center line Station 1384+00.

d. An approach not to exceed 25 feet in width on the east side of the Old Oregon Trail Highway opposite Engineer's center line Station 1393+00.

e. An approach not to exceed 25 feet in width on the west side of the Old Oregon Trail Highway opposite Engineer's center line Station 1370+00.

(Cont.)

EXHIBIT "B-2" (Cont.)

f. An approach not to exceed 25 feet in width on the west side of the Old Oregon Trail Highway opposite Engineer's center line Station 1393+00.

Private access as hereinabove referred to is defined as a right of access from and to land abutting the highway; said access to be for ordinary travel to and from the abutting land only and shall not be used in connection with any commercial institution or activity established or conducted on the adjoining property, which, in any manner caters to, invites, solicits from or is dependent upon the users of said highway.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the sixth day of February, 1950.

EXHIBIT "B-3"

Minutes of February 6 and 7, 1950

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Halsey-Sweet Home Highway, State Secondary Highway No. 212, is a highway under the jurisdiction and control of the State; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen and straighten the Halsey-Crawfordsville Section of said Halsey-Sweet Home Highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, straightening, construction, and maintenance of the Halsey-Crawfordsville Section of the Halsey-Sweet Home Highway, State Secondary Highway No. 212, the parcel of real property located in Linn County and described as follows, to-wit:

A parcel of land lying in the D. L. C. of Hugh L. Brown, Claim No. 60, also in Section 5, Township 14 South, Range 2 West, W. M., Linn County, Oregon, and being a portion of the following described property: That tract of land which was conveyed by that certain deed to Verdis Burke and Francis R. Wright, recorded in Book 52, Page 450 of Linn County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land of variable width, lying on the northerly side of the center line of the Halsey-Sweet Home Highway as said highway has been relocated over and across or adjacent to the said property; which center line is described as follows:

Beginning at a point which is Engineer's center line Station 728+66.84; said point being approximately 1750 feet south and 2635 feet east of the northwest corner of Hugh L. Brown, Claim No. 60, Township 14 South, Range 2 West, W. M.; thence on a 572.96 foot radius curve right (the long chord of which bears North 71° 40' 45"

(Cont.)

EXHIBIT "B-3" (Cont.)

West) 491.47 feet; thence North 47° 06' 20" West 15.41 feet; thence on a 358.09 foot radius curve left (the long chord of which bears North 74° 18' West) 339.93 feet to Station 737+13.65 equals Station 737+34.54; thence South 78° 30' 20" West 564.39 feet; thence on a 572.96 foot radius curve right (the long chord of which bears North 89° 44' 40" West) 235 feet; thence North 77° 59' 40" West 1031.7 feet; thence North 79° 38' 55" West 134.37 feet to Station 757, said center line crossing the extended easterly and westerly lines of said property approximately at Stations 732+00 and 756+27 respectively.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to	Station	Width on Northerly Side of Center Line
728+66.84		733+58.31	60
733+58.31		757+00	40

The parcel of land to which this description applies contains 2.28 acres, of which 1.67 acres lie within the existing right or way, title to which hereby is alleged to be in the public, and 0.61 acre lies outside of the existing right of way.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the sixth day of February, 1950.

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the Sullivan Gulch Highway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the Throughway Law; and

WHEREAS, for the purpose of establishing, constructing, and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation of motor vehicles promoted, and highway travel in general safeguarded, the real property hereinafter described is necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required, and is being appropriated for right of way of the Sullivan Gulch Highway, for the purpose of establishing, constructing, and maintaining a throughway, the following described property, to-wit:

Lot 7, Block 38, Sullivan's Addition to the City of East Portland, containing 5,000 square feet.

2. That the highway facility for which the aforesaid property is required and is being taken, has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

(Cont.)

February 6, 1950

EXHIBIT "B-4" (Cont.)

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said property.

4. That upon the trial of any suit or action instituted to acquire the said property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the 6th day of February, 1950.

EXHIBIT "B-5"

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Sunset Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of the federal highway system; and

WHEREAS, for the purpose of providing highway facilities appurtenant to and as a part of said Sunset Highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to construct approach or connecting roads between said highway and the Hillsboro-Cornelius Pass County Road, Market Road No. 22, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way of Sunset Highway for use in connection with the construction and maintenance of approach or connecting roads between said highway and the Hillsboro-Cornelius Pass County Road, Market Road No. 22, parcels of real property located in Washington County, Oregon, and described as follows, to-wit:

Parcel No. 1:

A parcel of land lying in the John S. White D. L. C. No. 51, also lying in Section 23, Township 1 North, Range 2 West, W. M., Washington County, Oregon; the said parcel being described as follows:

Beginning at a point in the center of the Hillsboro-Cornelius Pass County Road, which point is a distance of 100 feet northeasterly from (when measured at right angles to) the located center line of the Sunset Highway (formerly Wolf Creek Highway) at Engineer's Station 2836+24.2; said point being south 950.6 feet and east 1274 feet from the northwest corner of said John S. White D. L. C. No. 51; thence North 4° 49' West along the said center of the County Road a distance of 182.51 feet to the true point of beginning; thence North 4° 49' West along the

(Cont.)

center of the County Road, a distance of 82.5 feet; thence South 89° 44' East a distance of 301.77 feet to the west line of the Oregon Electric Company right of way; thence South 1° 14' West along the west line of the Oregon Electric right of way, a distance of 408.01 feet to the north line of the Sunset Highway; thence North 61° 47' West along the north line of the Sunset Highway a distance of 259.53 feet to the east line of the Hillsboro-Cornelius Pass County Road; thence North 4° 49' West along the east line of the County Road a distance of 208.5 feet; thence South 85° 11' West a distance of 40 feet to the point of beginning.

The parcel of land to which this description applies contains 2.02 acres, of which 0.06 acre lies within the existing right of way, title to which hereby is alleged to be in the public, and 1.96 acres lie outside of the existing right of way.

Parcel No. 2:

A parcel of land lying in the John S. White D. L. C. No. 51, also lying in Section 23, Township 1 North, Range 2 West, W. M., Washington County, Oregon; the said parcel being described as follows:

Beginning at a point in the center of the Hillsboro-Cornelius Pass County Road, which point is a distance of 170 feet southwesterly from (when measured at right angles to) the located center line of the Sunset Highway (formerly Wolf Creek Highway) at Engineer's Station 2837+99.8, said point being south 1271.6 feet and east 1301 feet from the northwest corner of said John S. White D. L. C. No. 51; thence parallel to said highway center line North 61° 47' West a distance of 59.6 feet to a point 50 feet westerly from (when measured at right angles to) the center of said County Road, said point being the true point of beginning; thence South 4° 49' East along the west line of the County Road a distance of 230 feet; thence North 85° 11' East a distance of 50 feet to the center line of the County Road; thence South 4° 49' East along the center of the County Road a distance of 160 feet; thence North 61° 47' West a distance of 424.5 feet; thence North 28° 13' East a distance of 299.7 feet to a point on the south line of the Sunset Highway; thence South 61° 47' East along the south line of the Sunset Highway, a distance of 170.0 feet to the point of beginning.

The parcel of land to which this description applies contains 2.00 acres, of which 0.10 acre lies within the existing right of way, title to which hereby is alleged to be in the public, and 1.90 acres lie outside of the existing right of way.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

(Cont.)

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the sixth day of February, 1950.

EXHIBIT "B-6"

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Old Oregon Trail Highway and the Payette Spur of the Old Oregon Trail Highway are under the jurisdiction and control of the State and are, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing highways which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen and straighten the Pumping Plant Hill-Ontario Section of the Old Oregon Trail Highway and to reconstruct the Payette Spur Bridge and approaches to said bridge over the Snake River on the Payette Spur of the Old Oregon Trail Highway and for such purposes and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for quarry site and hauling road and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for quarry site and hauling road, for use in connection with the widening, straightening, construction and maintenance of the Pumping Plant Hill-Ontario Section of the Old Oregon Trail Highway and for use in connection with the construction and maintenance of the Payette Spur Bridge and approaches to said bridge over the Snake River on the Payette Spur of the Old Oregon Trail Highway, a parcel of real property located in Malheur County, Oregon, and described as follows, to-wit:

A parcel of land lying in the Southeast quarter ($SE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) and in Lot 2 of Section 16, Township 17 South, Range 47 East, W. M., Malheur County, Oregon; the said parcel being described as follows:

Beginning at a point on the north line of the Southeast quarter ($SE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of said Section 16, which point is 198.34 feet west of the northeast corner of said Southeast quarter ($SE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 16; thence running South 2° 23' 50" East 79.78 feet; thence South 21° 06' 10" West 75.28 feet; thence South 45° 58' 10" West 101 feet; thence South 62° 30' 10" West 215.50 feet; thence South 82° 40' 10" West 244.10 feet; thence North 46° 44' 50" West 513.75 feet to a point on the north line of

(Cont.)

the Southeast quarter (SE¼) of the Northwest quarter (NW¼) of said Section 16; thence along the north line of said Southeast quarter (SE¼) of the Northwest quarter (NW¼) South 89° 55' 50" East 903.50 feet to the point of beginning.

Also a strip of land 20 feet in width extending from the northeast corner of the foregoing described parcel easterly to the Old Oregon Trail Highway, the north line of said strip of land beginning at the northeast corner of above-described parcel and running thence along the north lines of said Southwest quarter (SW¼) of the Northwest quarter (NW¼) and said Lot 2, Section 16, South 89° 55' 50" East 289.52 feet to the westerly right of way line of the Old Oregon Trail Highway.

The parcel of land to which this description applies contains 5.06 acres.

2. That the highway facilities for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the sixth day of February, 1950.

EXHIBIT "C"

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, the Oregon legislature, during the session held in 1949, declared by law a procedure by which the construction, maintenance and use of approach roads on or within the right of way of a state highway may be accomplished, which procedure and legal enactment are embodied in Chapter 308, Oregon Laws 1949; and

WHEREAS, said law provides for and authorizes the issuance of permits by the State Highway Commission with respect to state highways, and provides for and vests in the State Highway Commission authority to adopt reasonable rules and regulations and vests in the State Highway Commission authority to issue permits for the construction of an approach road facility, thing, or appurtenance upon the rights of way of state highways; and

WHEREAS, the issuance of permits under said law is lodged in the discretion of the Commission with the single limitation that the Commission shall not deny any property adjoining such road or highway reasonable access thereto; and

WHEREAS, within the meaning and scope of said law and for the purpose of facilitating its administration it is deemed by the Highway Commission advisable that there be prepared, approved, and adopted by the Commission a combined form of application and permit in which there shall be set forth such rules and regulations as the Commission deems appropriate for the control and regulation of the construction, use, and maintenance of such approach road; and

WHEREAS, pursuant to instructions given by this Commission there has been prepared by the Chief Counsel and approved by the State Highway Engineer a form of application and permit, which form has been submitted to and is now before this Commission for consideration, approval, and adoption:

NOW, THEREFORE, BE IT RESOLVED AND ORDERED by this Commission, all members being present and voting affirmatively, as follows:

1. That the form of combined application and permit, which for identification bears the date of February 6, 1950, and the signatures of R. H. Baldock as State Highway Engineer, and J. M. Devers, as Chief Counsel, a copy of which application and permit is attached hereto and made a part of this resolution, hereby is approved and adopted as the form of application and permit which shall be used and employed in all instances where applications for road approaches are filed and approaches are located and constructed under the provisions and terms of said Chapter 308, Oregon Laws 1949.

2. Said form of application and permit shall remain in full force and effect until modified, amended, or voided by the official act of this Commission, duly recorded in its minutes and records.

Form E 307—1056—1-50

Road Approach Permit No. .....
(To be assigned by Salem Office)

OREGON STATE HIGHWAY COMMISSION

Application and Permit to Construct Approach Road

....., Applicant,
(Name of person, firm or corporation)

of ..... Oregon, under the provisions of chapter 308, Oregon Laws 1949, hereby declares and represents to the State of Oregon, by and through its State Highway Commission, that he is the owner/lessee* of certain real property abutting upon a state highway at the following described location, and that he has lawful authority to apply for this permit and to request and authorize the State of Oregon to construct such approach road, and makes application for a permit to construct and maintain a temporary/permanent* approach road connecting said property on the ..... side of ..... Highway, No. ....., Route No. U.S./Ore.*

....., in ..... County, Oregon, between/at/near* ..... and

....., and more particularly described as being at Mile Post ..... , Highway Engineer's Station ..... as indicated by the dimensions, figures and sketch map or plan contained herein.

The applicant hereby agrees, that if such permit is granted, to fully and faithfully comply with all the provisions and regulations hereinafter set forth and such other reasonable rules or regulations as may hereafter be promulgated by the Oregon State Highway Commission governing the construction, maintenance, and operation or use of such approach road, and further agrees to bear all expense of construction and maintenance of said approach road.

Date .....

.....
(Signature of applicant or name of company)

By .....

GENERAL PROVISIONS

1. No approach road or other facility shall be constructed upon the highway right of way until a signed copy of this permit is returned to the applicant.

2. The word Engineer as used herein shall mean the State Highway Engineer or his duly authorized representative.

3. This permit is granted with the specific understanding that the applicant shall be responsible and liable for all accidents, damage or injury to any person or property resulting from the construction, maintenance, repair, operation or use of said approach road for which the applicant may be legally liable, and that the applicant shall hold blameless and harmless and shall indemnify the State of Oregon, its State Highway Commission and members thereof, its officers, agents and employees against any and all claims, demands, loss, injury, damage, actions and costs of actions whatsoever, which they or any of them may sustain by reasons of the acts, conduct or operations of the applicant, his agents or employees in connection with the construction, maintenance, repair, operation or use of said approach road.

4. The construction, maintenance, operation and use of said approach road is subject to the paramount control of the legislature over said highway, and no right or privilege herein granted shall be deemed or construed to be beyond the reach or authority of the legislature to control the said highway, and the applicant in accepting this permit accepts it knowing that the rights and privileges herein granted may at any time be defeated and abrogated by legislative act.

5. The stopping or parking of vehicles upon the state highway right of way for the servicing of such vehicles or in furtherance of any business transaction or commercial establishment is strictly prohibited. Minimum set back distances as shown by dimensions on the sketch map or plan herein for buildings, pump islands, or any other structure now existing on or hereafter placed on applicant's property, shall be strictly observed. NO APPROACH WILL BE CONSTRUCTED FOR OR BY ANY APPLICANT FAILING TO CONFORM.

6. The number of approaches to a single property shall be limited to a minimum that will allow the property to accommodate and service such traffic as may be reasonably anticipated. NO APPROACH ROAD WILL BE CONSTRUCTED TO OR PERMITTED ON A HIGHWAY OR SECTION THEREOF WHERE RIGHTS OF ACCESS OF THE ABUTTING PROPERTY HAVE BEEN ACQUIRED BY THE STATE THROUGH PURCHASE OR GRANT.

For identification purposes:

* Strike out word or words not applicable.

State Highway Engineer

Chief Counsel

February 6, 1950

7. In the construction of an approach road under this permit, either by the applicant or by the State at the expense of the applicant, the State recognizes the applicant's ownership of the materials entering into said construction. If, for any reason (other than reconstruction or widening of the highway), it later becomes necessary or desirable for the State to remove such approach road, it shall be removed by the State at the expense of the applicant, and credit will be allowed for such materials, if any, as are salvaged for re-use by the State.

8. If in the event of the reconstruction or widening of any highway, it becomes necessary to remove, alter or reconstruct the approach road constructed under authority of this permit, the cost of such removal or replacement to a like width and condition will be borne by the State. Any widening or other improvement of the approach road at the applicant's request shall be done only under authority of a new permit and at the expense of the applicant.

9. The construction of the approach road by the applicant, his agent or contractor, (if authorized by the Special Provisions of this permit), will be permitted only when the applicant furnishes evidence of having at his disposal adequate and suitable equipment for doing the work and furnishes satisfactory plans and specifications.

10. Unless permission for construction of the approach road in whole or in part by the applicant, his agent or contractor, is specifically granted in the Special Provisions of this permit, the construction of said approach road will be done by the State, including the furnishing and placing of all materials necessary for the completion of such portion of the approach road that occupies the highway right of way; specifically: drainage facilities, dirt, rock, surfacing, and curbs or other materials listed in Special Provisions or shown on the sketch map herein.

11. No materials will be ordered by the State until this application, completed and accompanied by cash, money order, or certified check, payable to the Oregon State Highway Commission, in the amount hereafter stated in the Special Provisions, is approved by the District Maintenance Superintendent. No construction will be undertaken by the State until this permit is executed and returned to the applicant and all conditions specified herein have been complied with.

12. If the actual final cost of work done or materials furnished by the State in construction of all or any part of the approach road is more or less than the estimated cost thereof, the difference between the actual cost and the estimated cost will be refunded to the applicant or will be paid to the State by the applicant within 10 days after receiving a bill therefor, as the case may be.

13. Upon completion of said approach road, the applicant may perform additional minor work, such as seeding or planting of island, working or cutting edges of said approach, etc., provided that such work is done in a manner so as to cause no interference to traffic upon the highway and is performed at the applicant's sole expense.

14. The entire expense of maintaining said approach road shall be borne by the applicant, who is hereby permitted to make minor repairs, such as the correction of irregularities in the surfacing of the approach road, repair of curbs or walks, etc., provided that the maintenance work does not interfere with or interrupt traffic upon and along the highway. No work shall be done and no equipment shall be used by the applicant on the shoulder of the highway at any time, unless applicant shall have first secured approval from the Superintendent of Maintenance of the district in which the approach road is located.

15. No unauthorized signs shall be placed, permitted or maintained by the applicant upon any portion of the right of way, nor shall any signs not conforming to law be placed, permitted or maintained on property adjacent to the right of way (O. C. L. A., §§ 100-2901 to 100-2908, incl.). Where standard warnings signs, such as "Look Out for Log Trucks," are required by this permit or other regulations, or are ordered by the Engineer to provide warning of the approach road, such signs shall be furnished and placed by the State at the expense of the applicant.

16. The planting or placing of other adornments not prohibited by law on the island or any portion of the right of way by the applicant shall be limited to low growing shrubs, grass, or flowers that do not attain sufficient height to obstruct clear vision in any direction. No curbs, posts or other structures shall be placed on the highway right of way within ten (10) feet of the edge of pavement.

17. The applicant hereby authorizes officers, employees, agents, representatives and contractors of the State Highway Commission to enter upon property owned or leased by said applicant for the purpose of constructing the said approach road.

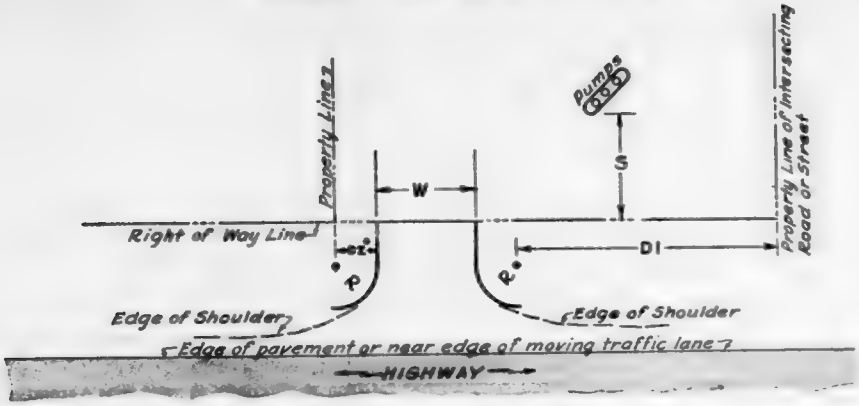
18. The word "applicant" and all references to the applicant contained herein shall include the plural when appropriate.

SPECIAL PROVISIONS

1. The approach road covered by this permit shall be single/dual,† and shall conform to the dimensions and figures indicated on the following or attached sketch map, cross-section and schedule of dimensions, and shall be constructed to the grade established by the Engineer.

SINGLE APPROACH ROAD

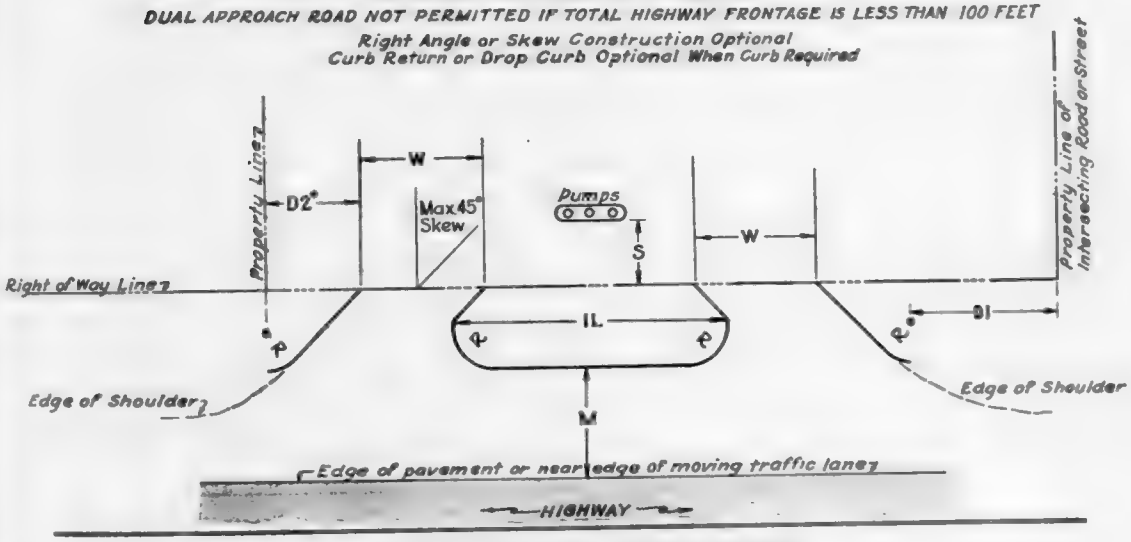
Right Angle or Skew Construction Optional
Curb Return or Drop Curb Optional When Curb Required



DUAL APPROACH ROAD

DUAL APPROACH ROAD NOT PERMITTED IF TOTAL HIGHWAY FRONTAGE IS LESS THAN 100 FEET

Right Angle or Skew Construction Optional
Curb Return or Drop Curb Optional When Curb Required



SCHEDULE OF DIMENSIONS

Applicable to Single or Dual Type Access

Dimension	Minimum	Maximum	Approved
D1	10'	None	
D2*	5'	None

AUTHORIZATION OF PERMIT

In consideration of the applicant's agreement to comply in all respects with the regulations of the State Highway Commission covering such operations, permission is hereby granted for the construction of the approach road or driveway as described in the above application and Special Provisions, said approach road or driveway to be in accordance with the regulations herein set forth. It is expressly understood that this permit is conditioned upon replacement or restoration of the highway to its original or to a satisfactory condition. It is further understood that this permit is issued subject to the approval of local, city or town authorities having joint supervision over said street or highway.

OREGON STATE HIGHWAY COMMISSION

Dated .....

State Printing Dept. 37189

EXHIBIT "C" (Cont.)

3. When application by an owner of land abutting a state highway is filed with the Commission, the State Highway Engineer shall, and he hereby is instructed to, make or cause to be made a full, thorough, and complete investigation of all facts attending the construction of said proposed approach road, together with all the conditions or circumstances which in any manner affect public safety or public welfare or the construction or maintenance of the highway involved, and said Engineer shall file with the Highway Commission at its office in Salem, Oregon, a complete record of such investigation, which shall include his recommendation for or against the granting of said application.

4. If the report and recommendation of said Engineer shows and establishes that said application in all respects conforms with the rules, regulations, and findings set forth in said adopted form of application and permit, then a permit may be issued to said applicant, employing for such purpose the said form which by this resolution has been approved and adopted.

5. Whenever a permit is issued pursuant to this resolution and within the meaning and reach of said law, such permit may, whenever convenient, be signed by the members of the Highway Commission or by a majority of the members of the Commission, or may be signed for the Commission by R. H. Baldock, as State Highway Engineer; W. C. Williams, as Assistant State Highway Engineer; W. W. Stiffler, as Assistant State Highway Engineer; R. B. Sipprell, as Director of Permits, or by W. C. Crews, as Assistant Director of Permits; and when so signed such permit shall be deemed in full force and effect until the same is changed, modified, amended, or terminated by the official action of this Commission.

6. The rules, regulations, and conditions set forth in said application and permit shall be observed in all respects by the applicant, and should the applicant violate any of said terms, rules, regulations, or conditions then said permit may be terminated by the official action of the Commission and the facilities constituting or constructed with and as a part of said approach road shall, without liability on the part of the State, its Highway Department, officers, agents, or employees, be promptly removed.

7. This resolution shall be entered in the minutes and records of the Commission as of the 6th day of February, 1950.

EXHIBIT "D-1"

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, the Pacific Highway is one of the major state highways and is likewise a federal highway, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that at the southerly edge of Cottage Grove a large sawmill is maintained by the Lorane Valley Lumber Company on real property abutting on said highway and employees of said mill together with other persons park their cars within the right of way limits of said highway and leave said cars so parked for extended periods of time; and

WHEREAS, the parking of cars on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission a hazard not only to through traffic but to the owners and drivers of said parked cars is created; and

WHEREAS, in the opinion of this Commission public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of cars should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendations by members of its staff, that the parking of motor vehicles along the Pacific Highway between M.P. 145.51 at the southerly limits of Cottage Grove, which is Engineer's Station 797+95, and M.P. 146.03, which is Engineer's Station 831+00, covering a distance of 0.52 mile in Lane County, Oregon, creates a hazard not only to through traffic but to persons owning and using said parked vehicles.

2. That in the opinion of this Commission the right of way of said highway at said location is not of sufficient width to permit parking facilities for large numbers of cars and at the same time provide the degree of safety and convenience which in the opinion of this Commission should be provided the motoring public.

3. That this Commission does further find and declare that the parking of cars for long periods of time on the right of way of said highway within said termini should be prohibited.

4. That the State Highway Engineer be, and he hereby is, instructed to erect signs at said termini, and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purpose of this resolution and the action of the Highway Commission as here declared, on which signs shall be printed in plain legible type the words, "NO PARKING ON HIGHWAY SHOULDERS."

5. That a certified copy of this resolution be sent to the owner and operator of said sawmill, and that a like copy be mailed to the Superintendent of State Police.

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the sixth day of February, 1950.

February 6, 1950

EXHIBIT "D-2"

Minutes of February 6 and 7, 1950

RESOLUTION

WHEREAS, pursuant to the provisions of O. C. L. A., S100-122, the Commission is authorized and directed, whenever the route of any state highway passes through the corporate limits of any incorporated city or town of this State, to select and designate the street or streets of such incorporated city or town over which the state highway shall be routed; and

WHEREAS, the highway known and identified as Pacific Highway, which is also identified as State Highway No. 1 and U. S. Route No. 99, is a state highway and is therefore under the jurisdiction and control of the State Highway Commission; and

WHEREAS, said highway as now located and routed passes through the corporate limits of the City of Cottage Grove, and pursuant to the provisions of O. C. L. A., S100-122, the Highway Commission has heretofore, by order made and entered in its official records, selected and designated North Ninth Street from the north line of Gibbs Avenue northerly to the south side of Thayer Avenue as a portion of a street of said city over which to route said highway traffic; and

WHEREAS, it has been found and declared by the municipal authorities of said city that the parking of vehicles on the easterly side of said portion of North Ninth Street restricts and impairs the free flow of traffic using said street, and said city has found and declared that the parking of vehicles on the easterly side of said portion of North Ninth Street tends to and does create traffic hazards; and

WHEREAS, based on studies and inspections of matters related to the parking of vehicles on said portion of North Ninth Street, the city plans and proposes to adopt and make a part of its official records an ordinance, a copy of which is attached hereto and marked "Exhibit A," by which it shall be unlawful to park any vehicle on the east side of North Ninth Street extending from the north line of Gibbs Avenue northerly to the south side of Thayer Avenue; and

WHEREAS, in response to instructions given by this Commission, the State Highway Engineer and the Traffic Engineer have investigated traffic conditions which obtain and exist with respect to the volume and character of traffic using said portion of North Ninth Street, and said State Highway Engineer and Traffic Engineer have made and filed their report and recommendation concerning said matter; and

(Cont.)

EXHIBIT "D-2" (Cont.)

WHEREAS, the Commission having given due and careful consideration to said report and recommendation, and based thereon and based also on knowledge of existing traffic conditions, is of the opinion that the planned and proposed action to be taken by said city officials is in the interest of the general public and therefore is entitled to the approval and support of this Commission;

NOW, THEREFORE, based upon the foregoing recitals of existing facts, it is hereby resolved by this Commission, all members being present and affirmatively voting as follows:

1. That it is hereby found and declared that the promiscuous and unregulated parking of vehicles on the east side of North Ninth Street extending from the north line of Gibbs Avenue northerly to the south side of Thayer Avenue in the City of Cottage Grove impairs the free and safe flow of traffic using said street and tends to and does create traffic hazards.

2. That the action planned and proposed to be taken by the municipal authorities of said city in and by the passage and adoption of said ordinance attached hereto and marked "Exhibit A" is hereby approved and the Commission hereby pledges full cooperation in the enforcement of the foregoing city ordinance when the same is lawfully passed and adopted, to the end that public welfare may be preserved and promoted.

3. That the Secretary be and he hereby is instructed to furnish said city officials with a duly certified copy of this resolution, and he likewise is instructed to furnish to the Superintendent of State Police a like certified copy.

4. That this resolution be entered in the minutes and records of the Commission as of the sixth day of February, 1950.

(See next page for "Exhibit A" mentioned in the above resolution.)

EXHIBIT "D-2" (Cont.)

Exhibit A

ORDINANCE NO.___

AN ORDINANCE ESTABLISHING A RESTRICTED PARKING AREA ON THE EAST SIDE OF NORTH NINTH STREET EXTENDING FROM THE NORTH LINE OF GIBBS AVENUE NORTHERLY TO THE SOUTH SIDE OF THAYER AVENUE, AND DECLARING AN EMERGENCY.

The Common Council of the City of Cottage Grove does ordain as follows:

Section 1. That it shall be unlawful for any person, firm or corporation to park a vehicle on the East side of North Ninth Street extending from the North line of Gibbs Avenue northerly to the South side of Thayer Avenue.

Section 2. The Street Committee of said City of Cottage Grove is hereby directed to mark said area mentioned in Section 1 with appropriate signs.

Section 3. Any person, firm or corporation violating the provisions of this ordinance shall be guilty of a misdemeanor, and upon conviction thereof before the City Recorder shall be fined in a sum not more than One Hundred and no/100($100.00) Dollars, and in addition thereto shall pay the costs of the action, and in default of the payment of such fine and costs shall be confined in the City Jail not to exceed one day for each Two and no/100($2.00) Dollars of such fine and costs.

Section 4. All ordinances, or parts of ordinances, in conflict herewith are hereby repealed.

Section 5. Inasmuch as this ordinance is necessary for the immediate preservation of the public health, peace and safety of the City of Cottage Grove, Oregon, in that it is necessary to have uniform regulation of traffic within the corporate limits of the City of Cottage Grove, Oregon, an emergency therefore is declared to exist, and this ordinance shall be in full force and effect from and after its passage by the Common Council and its approval by the Mayor.

Passed by the Common Council this ___ day of _____, 1950.

Approved by the Mayor this ___ day of _____, 1950

Filed with the Recorder approved this ___ day of _____, 1950.

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, in the resolution adopted by the Highway Commission and made a part of its records as of the 28th day of June, 1949, there are the following provisions identified as paragraph 2 on page 2, and paragraph 3 on pages 2 and 3:

"2. That permits on said forms marked 'Exhibit A' or 'Exhibit B' may be issued for and in the name of the State Highway Commission by the State Highway Engineer, within the meaning, purpose and scope of this resolution, and said permits when so issued either shall be signed by the State Highway Engineer or shall bear a rubber-stamped facsimile of the signature of the State Highway Engineer, and be countersigned by either the Director of Permits or the Supervisor of Transportation Permits, and when so signed, said permit shall be valid and in full force and effect until revoked by the State Highway Commission.

"3. That permits on said form marked 'Exhibit C' may be issued for and in the name of the State Highway Commission by the State Highway Engineer, within the meaning, purpose and scope of this resolution, and said permits when so issued shall bear the printed signature of the State Highway Engineer, and shall be countersigned either by the State Highway Engineer or the Director of Permits or the Supervisor of Transportation Permits, or his assistants, or, when issued from a field office only upon prior approval of the Director of Permits or the Supervisor of Transportation Permits, said permits shall be countersigned by any one of the following designated persons: Division Engineer, Acting Division Engineer, Assistant Division Engineer, Division Office Engineer, District Maintenance Superintendent, or District Maintenance Officeman; and when so signed, said permits shall be valid and in full force and effect until their expiration or earlier revocation by the State Highway Commission. All said permits shall bear an expiration date, and in no event shall said permits be valid for more than a period of one (1) year."; and

WHEREAS, as a result of further and subsequent consideration and upon advice of Counsel, it is the judgment of the Commission that said provisions and paragraphs should be deleted and new or revised paragraphs and provisions substituted.

NOW, THEREFORE, be it and it hereby is resolved and ordered by this Commission, all members being present and voting affirmatively, as follows:

1. That the foregoing quoted paragraphs and provisions of the resolution and order made, adopted, and passed by the Commission on the 28th day of June, 1949, be and the same are hereby deleted.

2. That in lieu of the foregoing deleted paragraph No. 2 there shall be and hereby is substituted the following:

(Cont.)

"2. That permits issued on forms 'Exhibit A' or 'Exhibit B' may be issued for and by the State Highway Commission within the meaning, purpose and scope of said law and of this resolution and order, and any permit or permits so issued shall be valid and in full force and effect when signed by the members of the Commission or when signed by any one of the following persons: R. H. Baldock, State Highway Engineer; W. W. Stiffler, Assistant State Highway Engineer; R. B. Sipprell, Director of Permits; or R. B. Hill, Transportation Permit Supervisor."

That in lieu of the foregoing deleted paragraph No. 3 there shall be and hereby is substituted the following:

"3. That permits within the meaning, purpose and scope of said law and of this resolution and order may be issued by the Commission using for such purpose form 'Exhibit C'. Any permit or permits so issued shall be valid and in full force and effect if and when signed by the members of the Commission or by a majority of said members, or when signed by any one of the following persons: R H. Baldock, State Highway Engineer; W. C. Williams, Assistant State Highway Engineer; W. W. Stiffler, Assistant State Highway Engineer; R. B. Sipprell, Director of Permits, or R. B. Hill, Transportation Permit Supervisor; provided, however, that in case of emergency, permits using said form 'Exhibit C' may be issued out of a field office, but only when the issuance of such permit or permits has or have been first approved by the Director of Permits or by the Supervisor of Transportation Permits. A permit issued out of a field office may be signed by the Division Engineer or the Acting Division Engineer of the District in which the field office is located, or may be signed by the District Maintenance Superintendents or District Maintenance Officemen."

Any permit issued and signed as above provided shall be valid and in full force and effect until date of expiration, which date shall not extend beyond one year from date of issuance. Any permit so issued may be cancelled by the Commission upon thirty days' notice.

3. All permits heretofore issued under said law and under said resolution are hereby validated and confirmed, notwithstanding the form of execution or by whom executed.

4. Except as herein modified or changed said original resolution shall remain and continue in full force and effect.

5. This resolution shall be entered in the minutes and records of the Commission as of February 6, 1950.

FOOTNOTE:

A statement signed by The Honorable Douglas McKay, Governor of Oregon, consenting to and approving the action of the Commission as disclosed in the above resolution is attached to the original resolution on file in the office of the Commission as Special Matters File No. 6.

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1949 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Scotts Mills	$ 1,012.20
Yamhill	1,863.88

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 6th day of February, 1950.

Hubbard	1,063.46	Yamhill	887.28
Huntington	2,014.41	Yoncalla	802.37
Island City	375.71		

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

(Cont.)

EXHIBIT "G" (Cont.)

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 6th day of February, 1950.

EXHIBIT "H"

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, by the enactment of Chapter 149, Oregon Laws 1949, it is provided as follows:

"Beginning with the year 1949 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 10 per cent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O.C.L.A.; section 15, chapter 413, Oregon Laws 1945, as amended by section 4, chapter 114, Oregon Laws 1947; and section 29, chapter 467, Oregon Laws 1947; and from fines and penalties collected for violations of the motor vehicle and transportation laws. Such appropriation shall be distributed among the several cities as provided in this act."

AND, WHEREAS, by said law it is further provided that:

"Such appropriation shall be allocated to the cities as follows: The sum of two hundred fifty thousand dollars ($250,000) shall be withdrawn from such appropriation each year and set up in a separate account to be administrated by the state highway commission. Such account shall be spent each year by such commission upon streets not a part of the state highway system within cities which are receiving excessive wear through sudden increases in population in the area or heavy and unusual industrial traffic. Such commission shall determine the distribution of such expenditures after considering applications made to it therefor from the cities. The balance remaining in such appropriation after the withdrawal of said two hundred fifty thousand dollars ($250,000) shall be distributed to all of the cities. Each city shall receive such share of the balance as its population bears to the total population of the cities."

AND, WHEREAS, by section 3 of said act it is provided that:

"Funds accrued and payable to cities under this act shall be remitted semiannually by the secretary of state to the financial officer of each city. The funds appropriated by this act shall be apportioned on a semiannual basis immediately following June 30 and December 31 of each year by the state highway commission who shall certify such apportionment to the secretary of state. Upon receipt of such certificate the secretary of state shall issue his warrants therefor payable to the cities in the amounts set out."

(Cont.)

AND, WHEREAS, the moneys which have been credited to the state highway fund by the State Treasurer covering the period of July 1 to December 31, inclusive, of the year 1949, which funds have accrued from sources designated in said legislative act, amount to $17,327,878.03 and are derived from funds accruing from the following sources:

Section 115-135, O. C. L. A. (motor vehicle license fees)	$ 372,682.65
Section 15, Chapter 413, Oregon Laws 1945, as amended by Section 4, Chapter 114, Oregon Laws 1947 (gasoline tax)	13,988,099.84
Section 29, Chapter 467, Oregon Laws 1947 (motor carrier fees)	2,830,256.93
From fines and penalties collected for violations of the motor vehicle and transportation laws	136,838.61
	$ 17,327,878.03

AND, WHEREAS, the ten per cent of the $17,327,878.03, which is available for distribution among the cities amounts to $1,732,787.80; and

WHEREAS, after withdrawing the sum of $125,000 (one-half of $250,000) as provided in said act, which sum is to be administered by the State Highway Commission within the meaning of section 2 of said chapter 149, Oregon Laws 1949, there remains a balance of $1,607,787.80, which balance is, in response to the command of said statute, to be distributed among the cities of the state, each city being entitled to receive such share of said balance as its population bears to the total population of the cities; and

WHEREAS, by applying the factors of allocation or distribution provided for in said Chapter 149, Oregon Laws 1949, the State Highway Commission has determined upon an apportionment of said balance among the cities of the State as shown in the tabulation given below;

NOW, THEREFORE BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting, as follows:

1. That the Commission does hereby find and declare that the funds made available for distribution among the cities of the State pursuant to said law should be and are allocated and apportioned to the cities named below in the amounts set opposite the names of the respective cities:

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2859 with Struss & McCoy for furnishing crushed material in stockpiles on the John Day Section of four state highways in Grant County, completed April 27, 1949.

Contract No. 2936 with Rogers Construction Co., for regrading and oil mat surfacing on the Forest Boundary-Agency Section of the Warm Springs Highway in Jefferson and Wasco Counties, completed October 25, 1949.

Contract No. 2938 with R. A. Heintz-Construction for grading, bituminous macadam surfacing and structures on the Pleasant Hill-Lost Creek Section of the Willamette Highway in Lane County, completed October 5, 1949.

Contract No. 2955 with T. W. Thomas for grading on the Clear Creek-Forest Boundary Section of the Warm Springs Highway in Wasco County, completed September 10, 1949.

Contract No. 2960 with Frank M. Parsons for grading and oil mat surfacing on the Carlton-Chehalem Creek Section of the Carlton-Chehalem Creek County Road in Yamhill County, completed August 13, 1949.

Contract No. 3057 with Del R. Beebe Construction Co., for grading and paving on the Delmar-Coaledo Section of the Oregon Coast Highway in Coos County, completed December 5, 1949.

Contract No. 3064 with Oscar E. Joelson, for furnishing crushed material in stockpiles on the Endicott Creek-Mystic Creek Section of the Coos Bay-Roseburg Highway, in Coos and Douglas Counties, completed October 10, 1949.

Contract No. 3073 with J. F. Johnston for constructing the Flynn Bridge over Mary's River on the Alsea Highway in Benton County, completed November 19, 1949.

Contract No. 3075 with Knight Pearcy for roadside improvement on the North Bend-Coos Bay Section of the Oregon Coast Highway in Coos County, completed December 3, 1949.

(Cont.)

EXHIBIT "I" (Cont.)

Contract No. 3134 with Hamilton and Thoms, for constructing the Cottage Grove and Latham Bridges on the Pacific Highway in Lane County, completed December 13, 1949.

Contract No. 3173 with J. C. Compton Co., for recoiling on the Pedee-Kings Valley Section of the Kings Valley Secondary Highway in Benton and Polk Counties, completed September 13, 1949.

Contract No. 3174 with Babler Bros., for grading and oil mat surfacing on the Terrebonne-Crook County Line Section of the Smiths Rock Market Road in Deschutes County, completed October 27, 1949.

Contract No. 3190 with Knight Pearcy and Parkrose Nursery, for planting on the Front Avenue (Alder St.-Bancroft St.) Section of the Pacific Highway West in Multnomah County, completed December 20, 1949.

Contract No. 3217 with Enoch I. Maers, for constructing the Fort Klamath Maintenance Building in Klamath County, completed December 12, 1949.

Contract No. 3218 with Leland J. Plank, for constructing caretaker's house in Armitage Park in Lane County, completed January 7, 1950.

Contract No. 3237 with Cascade Construction Co., for constructing median islands and paving on the Ochoco Avenue-Milwaukie Section of the Pacific Highway East in Clackamas County, completed December 13, 1949.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "J"

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, the Santiam Highway is one of the major state highways of the State and is likewise a part of the federal highway system, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that in the vicinity of the Town of Foster a lumber plant is maintained by the Willamette National Lumber Company on real property abutting on said highway, and that employees of said lumber plant and other persons park their cars within the right of way limits of said highway and leave said cars so parked for extended periods of time; and

WHEREAS, the parking of said cars on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission a hazard is created not only to through traffic but to the owners and occupants of parked cars; and

WHEREAS, in the opinion of this Commission, public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of cars should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports, and recommendations made by and under the supervision of the State Highway Engineer, that the parking of motor vehicles along the Santiam Highway between M.P. 30.70 (Highway Engineer's Station 1681+80) and M.P. 31.31 (Highway Engineer's Station 1002+15), a distance of 0.61 mile in Linn County, Oregon, creates a hazard not only to through traffic but to persons owning and using said parked cars.

2. That in the opinion of this Commission the right of way of said highway at said location is not of sufficient width to permit parking facilities for large numbers of cars and at the same time to provide the degree of safety and convenience which, in the opinion of this Commission, should be provided the motoring public.

3. That this Commission does further find and declare that the parking of cars for long periods of time on the right of way of said highway within said termini should be prohibited.

(Cont.)

4. That the State Highway Engineer be, and he hereby is, instructed to erect "NO PARKING ON HIGHWAY SHOULDERS" signs at said termini, and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as herein declared.

5. That a certified copy of this resolution be sent to the owner and operator of said lumber plant, and that a like copy be mailed to the Superintendent of State Police.

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the sixth day of February, 1950.

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: The Dalles-California Highway

Highway number: No. 4 Route number: U. S. 97

Location of Termini			Established Speed
M.P. 143.32 (south city limits of Bend)	to	M.P. 143.59 (Hayes Ave.)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

M.P. 86.26 (south city limits of Corvallis)	to M.P. 88.57 (Intersection with Kiger Island County Road)		40 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

February 6, 1950

EXHIBIT "M"

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, by the enactment of Section 100-114, O. C. L. A., the legislature, as a part of a highway system, selected and designated as a state highway, to be known as the "Old Oregon Trail," a highway and route which is described and fixed by the legislature in the following language:

> "From a junction with the Columbia River Highway east of Umatilla, southeasterly via Pendleton, La Grande, Baker, Huntington and Ontario to the Oregon-Idaho state line at Nyssa, including connecting routes to the Oregon-Idaho state line from Weiser, Payette and Ontario; provided, however, that nothing herein shall be deemed to in any way repeal, amend or change the provisions of sections 100-1101 and 100-1102, but said sections shall remain in full force and effect."

and

WHEREAS, there is, by the provisions of Section 100-115, O. C. L. A., vested in the Highway Commission power and authority to:

> "Make such changes in the location of highways named or designated by the legislature, or such highways as may have been heretofore or may hereafter be designated and adopted by the highway commission, as in the judgment and discretion of the highway commission will result in better alignment, more advantageous and more economical highway operation and maintenance, or as will contribute to and afford a more serviceable system of state highways than is possible under the present statutory location."

and

WHEREAS, after due consideration of all pertinent facts and consideration of the report and recommendation of the Highway Engineer, the Commission has found and declared that public welfare will be best served by a relocation of the section of said Old Oregon Trail which begins at Mile Point 291.17 on the original route or location and ends at Mile Point 318.78 of said original route, which proposed relocation involves a distance of approximately 21.38 miles; and

WHEREAS, there is attached hereto, marked Exhibit A and by this reference made a part hereof, a map or print on which there is shown colored in red the highway as originally located and there is likewise shown, colored in black, the route of said highway as relocated; and *

WHEREAS, the section of said highway which by reason of said relocation is eliminated as a part or section of the Old Oregon Trail proper cannot

(Cont.)

February 6, 1950

be abandoned as a public highway for the reason that there are people living thereon and communities which must be served thereby; and

WHEREAS, the Commission on the 21st day of September, 1949, by resolution and order duly and regularly adopted and entered in its official records, adopted said relocated route and location and thereby made the same the route and location of the Old Oregon Trail between Mile Point 291.17 and Mile Point 318.78 on the old route, which is common with Mile Point 312.55 on the new route; and

WHEREAS, said old route and location shown colored in red on said Exhibit A lies partly within Baker County and partly within Union County, and the county courts of the respective counties have, as a result of conference with the Highway Commission, agreed that public welfare will be best served by selecting and designating said old route of the Old Oregon Trail as a secondary state highway; and *

WHEREAS, in compliance with the provisions of Section 100-115, O. C. L. A., the County Court of Union County and the County Court of Baker County have, by appropriate resolution made, adopted, and entered in the records of the respective counties, joined with the Highway Commission and each other with respect to the section of said old route within the respective counties and have requested that said old state highway route be selected and designated as a secondary state highway; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the section of said highway eliminated by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERED by this Commission, all members being present and voting affirmatively, as follows:

1. That the following described road or highway, which is shown colored in red on the attached map, Exhibit A, hereby is selected, designated, established, and adopted as a secondary state highway and shall thereby become a part of the secondary state highway system of the State, to wit: *

La Grande-North Powder Secondary State Highway No. 343

Beginning at the intersection of the formerly located, constructed and traveled Old Oregon Trail Highway with the relocated Old Oregon Trail Highway approximately 3 miles southeast of La Grande; thence in a southerly and easterly direction to Union; thence in a southerly and westerly direction to an intersection of the formerly located, constructed, and traveled Old Oregon Trail Highway with the relocated Old Oregon Trail Highway approximately 0.6 mile south of North Powder, including a connection with the relocated Old Oregon Trail Highway in the City of North Powder, for a total distance of approximately 28.1 miles.

2. That when the highway as planned and contemplated by this resolution and order is constructed over said new route and made available for public traffic the section of the route of the Old Oregon Trail as described above, comprising approximately 28.1 miles, shall no longer be a part of the Old Oregon Trail, but shall for all purposes be eliminated therefrom.

3. That the resolution adopted by Union County and the resolution adopted by Baker County, a copy of each of which resolutions has been furnished the Commission, shall be accepted as the request and consent of each of said counties that said route and section of the Old Oregon Trail as originally located shall be made a part of the state secondary highway system.

4. That this resolution shall be entered in the minutes and records of the Commission as of the 6th day of February, 1950, and the Secretary hereby is instructed to deliver to the County Judge of Union County and to the County Judge of Baker County a duly certified copy of this resolution, and said Secretary is likewise instructed to deliver to the Bureau of Public Roads a like certified copy.

FOOTNOTE: *

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 15, under the heading "Resolutions Adopting Secondary Highways," and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "N"

Minutes of February 6 and 7, 1950

ORDER REDUCING MAXIMUM LOAD LIMITS
ON CERTAIN STATE HIGHWAYS

WHEREAS, the highways and sections of highways hereinafter set forth or described have been duly designated and declared to be and are state highways and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways; and

WHEREAS, said highways and sections of highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highways and sections of highways during the present period of freezing and thawing, and in order to protect said highways and sections of highways against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Highway Commission finds that it will be for the best interests of said highways that the maximum weights permitted and authorized by law be reduced during such period; and

WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon said highways and sections of highways during said period shall be reduced and fixed as in this order provided;

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said highways and sections of highways were not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said highways and sections of highways that the maximum total weight of load and vehicle which shall be permitted upon said highways and sections of highways during the said period, commencing on the dates hereinafter specified, shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle or combination of vehicles which shall be permitted upon any of the following listed highways or sections of highways shall not exceed 11,000 pounds gross on any single axle nor 20,000 pounds gross on any pair of tander axles nor a maximum of 36,000 pounds gross on all axles of the vehicle or combination of vehicles:

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394, O. C. L. A., shall be in full force and effect from the effective date hereinabove specified until modified, annulled, or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of each of the above highways and/or sections of highways and at the important crossroads on said highways so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county affected by this order, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this 6th day of February, 1950.

EXHIBIT "O"

Minutes of February 6 and 7, 1950

R E S O L U T I O N

WHEREAS, by the enactment of Section 115-394, O. C. L. A., it is provided that whenever with respect to any state highway or section thereof, the Commission shall find that such highway or section thereof is being damaged by reason of being subjected to any particular kind or character of traffic, or when said Commission shall find that in its judgment it would be for the best interests of the State or the highways of the State, or any section or sections of said highways, to reduce the maximum weight and speed permitted by law for vehicles moving over or upon said highways, or shall find that it would be for the best interests of the State and for the protection from undue damage to close such highway or highways, or any section thereof, for any or all traffic or for any particular class of traffic, or for the moving thereon of any kind, size or weight of vehicle, or any kind of commodity, freight or thing, the Highway Commission is authorized and empowered to determine and fix the reduced weights and speeds which shall be the maximum weights and speeds for vehicles or things moving over such highway or section of highway, or the Commission may prohibit the use of such highway or section of highway for the moving thereon of any kind, size or weight of vehicle, or any kind of commodity, freight or thing for such period or periods of time as in the judgment of the Highway Commission will be for the best interests of the State, and

WHEREAS, the State Highway Engineer, under instructions from the Commission, has made an investigation with respect to the highways and sections of highways hereinafter named, and has filed with the Commission his report and recommendation concerning said highways or sections of highways, and

WHEREAS, upon consideration of said report, and in consideration of the conditions and facts set out therein, and upon consideration of other matters and conditions respecting said highways, the Commission does now find and declare that said highways and sections of highways are being seriously damaged by reason of the kind, character and volume of traffic moving thereover, and

WHEREAS, the Commission does so find and declare that by reason of severe and unusual weather conditions the surfaces of said highways are being rendered incapable of sustaining and withstanding the volume and character of traffic to which they are being subjected, and

WHEREAS, upon consideration of all of the facts, conditions and circumstances it is the judgment of the Commission that it is and will be in the interest of the State of Oregon and will result in the prevention of undue

(Cont.)

damage to said highways that the character and kind of traffic moving over the highways hereinafter named shall be restricted and regulated in the manner and to the extent hereinafter specified,

NOW, THEREFORE, be it and it hereby is resolved and ordered by the Commission, all members being present and affirmatively voting as follows:

1. The Commission does hereby order and declare that upon the passage and adoption of this resolution and order, all traffic moving over the highways or sections of highways herein named and defined on Exhibit "A" and Exhibit "B," which Exhibits are hereto attached and by this reference made a part hereof, shall be restricted, limited and controlled as hereinafter provided.

2. Upon the adoption and passage of this resolution and order, no vehicle shall move over or upon any of said highways or sections of highways having a gross weight in excess of 36,000 pounds, or a single axle weight in excess of 11,000 pounds, or a dual axle weight in excess of 20,000 pounds, or a speed in excess of 35 miles per hour.

3. The Engineer hereby is instructed to place or cause to be placed or posted a notice in a conspicuous manner and placed at each end on the edge of said highways or sections of highways where the same can be readily seen and read, on which notice shall be instructions to traffic with respect to the limitations fixed in this resolution and order, and said notices after being so placed shall be maintained while this resolution and order is in effect.

4. This resolution shall remain in full force and effect until rescinded, modified or otherwise altered, as the case may be.

5. The Engineer hereby is instructed, whenever any highway or section of highway not named in the highways listed as a part of this resolution, is in such condition of repair or other physical condition that it can not sustain or accommodate the kind and character of traffic now moving thereover, to erect on said highway or section of highway a notice similar to the notice provided in this resolution, and thereafter, said highway or section of highway shall be deemed and considered as within the protection and scope of this resolution and order.

6. Whenever the State Highway Engineer shall find that the structural status of any one of said highways or sections of highways is again in condition to withstand and sustain normal traffic, the said Engineer shall report said fact and condition to this Commission so that appropriate action may be taken.

7. Notwithstanding the provisions and restrictions set out in paragraph 2 on pages 2 and 3 of this resolution and order, the State Highway

Engineer hereby is instructed and authorized to make constant or continuing inspection and examination of all highways and sections of highways covered by this resolution and order, and if, as a result of such inspection and examination, any of said highways or sections of said highways are found to be in such condition of repair or structural status as to not need the protection hereby provided, the said Engineer need not limit or restrict the use of such highways or sections of highways by the posting thereof.

This resolution shall be entered in the minutes and records of the Commission as of February 7, 1950.

Exhibit A

Following is a list of primary State highways or sections thereof on which the Commission anticipates the necessity for reducing the weights of vehicles and loads from those authorized by the statutes, due to damage or potential damage by frost, floods, or intensive rains:

Highway No.	Name	Highway No.	Name
4	The Dalles-California	28	Pendleton-John Day
5	John Day	32	Three Rivers
6	Old Oregon Trail	33	Corvallis-Newport
7	Central Oregon	34	Siuslaw
8	Oregon-Washington	35	Coos Bay-Roseburg
9	Coast	36	Pendleton-Cold Springs
15	McKenzie	37	Wilson River
16	Santiam	38	Oregon Caves
17	McKenzie-Bend	42	Sherman

EXHIBIT "P"

Minutes of February 6 and 7, 1950

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

> OCHOCO HIGHWAY from the easterly corporate limits of the town of Mitchell to a point 9.8 miles westerly thereof, known as Jones Ranch, in Wheeler County,

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the above mentioned section of state highway, particularly between Engineer's Station 228+50 and Engineer's Station 746+50, together with the maps, field notes and other engineering data submitted by the Engineer, hereby is approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. It is further ordered that the said route and the survey of the same hereby are adopted as the route and location of the OCHOCO HIGHWAY between the above described points.

3. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

4. That this resolution be entered in the minutes and records of the Commission as of the 7th day of February, 1950.

February 7, 1950

Portland, Oregon
March 20, 1950

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Assistant State Highway Engineer
W. W. Stiffler, 2nd Assistant State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Agent
Malcolm H. Hawke, Auditor
H. B. Glaisyer, Secretary

Mr. Milo K. McIver, recently appointed by the Honorable Douglas McKay, Governor of the State of Oregon, as a member of the State Highway Commission, effective April 1, 1950, to fill the vacancy created by the resignation of Mr. T. H. Banfield, was also present.

Chairman Banfield called the meeting to order at 9:00 a.m. and publicly made the following announcement:

"Subsequent to the furnishing of plans to bidders on the Ladd Canyon-North Powder Project, a change was made in the bid item, 'General Excavation, Unclassified.' All bidders were notified of this change by telegram on March 17th, but because of the short notice, we have decided to open the bids for this job tomorrow morning instead of this morning so bidders may withdraw their bids and submit new ones tomorrow if they wish."

Bids, as follows, for highway construction and for operation of the state-owned ferry at Astoria were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Banfield announced that the award of contracts would be made at 3:00 p.m. in the same room:

CLATSOP COUNTY

Astoria-Megler Ferry Service. Provide 16-hour ferry service across Columbia River at Astoria for a period of 2 years. State furnishes ferry boats and terminals.

Astoria Navigation Co., Astoria	$ 134,655.60
Knappton Towboat Co., Portland	140,658.00
Babbidge & Holt, Portland	152,096.16

(Cont.)

HOOD RIVER COUNTY

Parkdale Maintenance Building. State Project. Construct 32' x 78' masonry block building on Mt. Hood Highway at Parkdale.

Bemis & Co., Portland	$ 9,283.72

*** Bidder will accept only one project.

Mr. C. H. Armstrong, Assistant State Parks Superintendent, reported on the following State Parks matters in behalf of Mr. S. H. Boardman, State Parks Superintendent, who was absent on account of illness.

1. Boat concession at Sunset Bay State Park, Coos County: The Commission's Chief Counsel reported on this matter for Mr. Armstrong. He advised that on March 9, he inspected this property in company with Mr. Walter Alvin, representing the State Land Board; Mr. Cecil Quesseth, representing the Attorney General's Office; Mr. C. H. Armstrong, representing the State Parks Department, and Mr. C. W. Enfield, Assistant Counsel; and that a careful examination of all the pertinent facts was obtained. The site selected by Mr. L. A. Smith, who proposes to operate a boat service at this location, he said, is untidy in appearance; driftwood litters the area and there is no well-defined pathway or approach leading either from the park property or from the highway to the selected site. Moreover, Mr. Smith maintains a small, unattractive shack on the premises, which is not at all in keeping with the dignity of the park. He further advised that there are some problems connected with the granting of a concession at this place, involving the State Highway Commission and the State Land Board, which must be disposed of before a decision relative to Mr. Smith's application can be made, viz: a) The power or authority as possessed by the State Land Board over the body of water which constitutes Sunset Bay; b) The method, extent and by whom the activities of Mr. Smith can be adequately policed and supervised if he is given permission to conduct the service he proposes, and c) The extent, if any, of liability which the members of the State Highway Commission or of the State Land Board will assume, either personally or officially, if the privileges requested by Mr. Smith are granted.

The Chief Counsel advised that as a result of the inspection and discussion of the facts on the grounds, it was mutually agreed to recommend to the State Highway Commission and to the State Land Board

that no permit be given Mr. Smith authorizing the operation of a boat service, such recommendation being based on the uncertainty which exists with respect to the authority of the State Land Board over the body of water involved; the total absence of authority that the State Highway Commission has over the water which constitutes the Bay; the difficulty that would be encountered with respect to a proper policing of activities; the uncertainties with respect to revenues that would be required to make the project attractive or to warrant a required investment by the applicant, or compensate the state for necessary supervision; and the uncertainties with respect to liabilities which will involve the members of the State Highway Commission and the members of the State Land Board. He gave as his feeling that the boat service proposed by Mr. Smith will not prove satisfactory in any respect, and recommended, in view thereof, that Mr. Smith be granted no concession, and that the general public be allowed to launch boats in the Bay if they wish to do so, at any convenient location. This matter was discussed at some length and as a result thereof, the Commission adopted the report unanimously.

2. Restaurant concession at Silver Falls State Park: Mr. Armstrong advised that there is no concession presently operating in this park, the previous concession heretofore granted Mr. Ralph S. Nohlgren, Salem, having been cancelled some months ago. He gave as the feeling of the State Parks Superintendent that the operation of a concession in this park is a public necessity and he requested authority to negotiate arrangements with Mr. Nohlgren on the basis of his last year's concession, and if he is unsuccessful in such negotiations, that he be given authority to advertise the concession for sale. He recalled that Mr. Nohlgren operated the concession last year in a very satisfactory manner. The Commission unanimously approved the request.

3. In the discussion of this matter, the Assistant Parks Superintendent pointed out that the electric power line which now serves the park is in bad condition, and since it is owned by the State Highway Department, it is up the the state to finance the repairs and to extend the service about two miles to the Silver Creek Recreational area. He estimated the cost of the repairs at $3,500. However, he said the Portland General Electric Company has evidenced an interest in taking over the service, and if that materializes, then the state will be relieved of maintenance expense. He requested authority to negotiate with the Power Company officials with respect thereto. The Commission approved the request, but decided against the extension of service to the other recreational area.

4. Acquisition of property from Menasha Woodenware Company as an addition to Umpqua Lighthouse State Park: The Assistant Parks Superintendent stated that Mr. Boardman has been endeavoring for a long time to acquire this property, but without success. He requested instructions, in view of the fact that proposed development of the existing park is being held up until this additional land has been obtained. Commissioner Chandler stated that he has consulted with the local representative of the owners of the property, also without much success, although he gathered from the information given him that the Company is willing to give to the

state right of way as may be required, but no additional land. He gave as his feeling that the property should be condemned and so recommended. The Commission approved the recommendation unanimously and authorized the Chief Counsel to proceed on such basis.

5. Construction of an access road on the ocean waysides between Newport and Waldport, and between Waldport and Yachats: Mr. Armstrong advised that Mr. Boardman has in mind the utilization of the grade of the old Spruce Production Railroad which is owned by the State Highway Department. The Engineer estimated the cost to construct such roadway at between $60,000 and $70,000, and advised that no provision for financing it is contained in the 1950 budget. It was the feeling of the Commission that a roadway paralleling the Oregon Coast Highway at this location would be of no particular benefit at the present time, in view of which the Commission decided unanimously not to authorize it.

6. Proposed addition to The Cove-Palisades State Park: The Assistant Parks Superintendent presented for the Commission's approval and execution an amendment to the cooperative agreement with the U.S. Soil Conservation Service, supplementing acreage described in the Commission's original agreement with the Federal Government, dated December 20, 1939. He exhibited a map showing the properties now owned or controlled by the state, and the additional lands now desired and covered by the supplemental agreement. He further stated that this property can be acquired at no cost to the state, and recommended approval and execution of the amendatory agreement. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously. (The amendatory agreement was signed by the Commission on the following day.)

7. Removal of cinders from Round Butte in The Cove-Palisades State Park: The Assistant Parks Superintendent advised that pursuant to instructions of the Commission at the previous meeting, several sources of materials have been investigated with a view to their being used by local people, thus avoiding removal of material from Round Butte. Three of these, he said, are possible cinder pits, two of which have been partially prospected and one merely slightly uncovered. In addition, there are two sand spits available: one a large one immediately west of Madras which was the source of materials used in surfacing the Madras airbase and contains an immense supply of excellent sand suitable for construction of sand-clay roads and for use around ranches; the other a pit located along the road leading to The Cove State Park, such sand being very similar to that in the pit west of Madras. He recommended, in view of the investigation, that the local people not be allowed to remove cinders from Round Butte until the other sources have proven unsatisfactory. It was the Commission's decision, reached after discussion, not to permit removal of cinders from Round Butte until the other sources mentioned by the Assistant Parks Superintendent have been investigated and found unsatisfactory. The Assistant Parks Superintendent was instructed to render an additional report when this has been determined. Should investigation reveal that these sources are not suitable for the purpose intended, the Commission will then reconsider the matter.

8. Proposed recreational development of Rooster Rock on the upper Columbia River Highway: The Assistant Parks Superintendent exhibited a map showing the proposed development for this location as planned by Mr. S. H. Boardman, State Parks Superintendent, and explained the details thereof. He estimated the cost of providing such a development at $100,000 and advised that the matter is being brought to the Commission's attention at this time simply to point out what Mr. Boardman has in mind. Construction, he said, is proposed for some time in the future. It was the feeling of the Commission that this project and others of similar nature should not be approved until instructions have been received from the Legislature as to how far the Commission can go in spending the motorists' money for such purposes.

9. Proposed sale of fallen timber and snags in Van Duzer Corridor on the Salmon River Highway: The Assistant Parks Superintendent advised that the Denny Logging Company, which is now operating on private property adjacent to Van Duzer Corridor, has offered to pay the state $4 per M-FBM for the fallen trees and snags on the south side of the Salmon River Highway westerly from the summit of the Coast Range, a distance of about one mile. The Company, he said, proposes to drag the logs from the state's property to the Company's property, so there will be no occasion to truck-haul the logs on the state highway. He estimated about 100,000 M-FBM on the state's property, which will net about $400 to the state, and recommended accepting the offer, thus affording an opportunity to clean up the premises and get rid of undesirable windfalls which constitute a fire hazard. The Commission approved the recommendation unanimously.

10. Report on proposed purchase of Delmer Colegrove property for State Park purposes, in Curry County: The Chief Counsel advised that pursuant to instructions from the Commission, Mr. Colegrove was again contacted regarding this purchase, particularly with respect to his demand for commercial access to the highway when the proposed highway is constructed at this location, and Mr. Colegrove stated his unwillingness to deed his property to the state on the basis of the option previously secured from him, unless he is permitted to remove timber standing on the property during the next fifteen years and to graze sheep on the property for a like period; unless he is given access to the highway for a private road, and unless the state will agree to construct fences along his frontage when the proposed highway is built. The Chief Counsel said that it is quite evident that Mr. Colegrove will not settle on any other basis, and if the terms are not satisfactory to the Commission, then it will be necessary to condemn the property. This matter was discussed at considerable length It appeared to the Commission that the settlement as reported by the Chief Counsel is the best that can be made with Mr. Colegrove, and in view thereof the Commission by unanimous vote authorized purchase of the property at the price mentioned in the option, subject to the conditions detailed by the Chief Counsel.

The Commission discussed a letter from the Oregon Society of Landscape Architects relative to the appointment of a State Parks Superintendent upon retirement of the present Superintendent, Mr. S. H. Boardman, said letter being dated March 3, 1950, and being directed to Mr. T. H. Banfield, Chairman of the

State Highway Commission: Chairman Banfield read aloud his reply to this communication, in which he points out that the Commission some two years ago, upon recommendation of the State Parks Superintendent, appointed Mr. C. H. Armstrong as Assistant Parks Superintendent; that Mr. Armstrong is well qualified to succeed Mr. Boardman, and that the Commission feels satisfied the parks of the state will be in good hands and will be developed and supervised properly. He points out also that the Highway Commission has had in its employ for a number of years a competent Landscape Architect to care for more formal plantings, roadside beautification, park planting, et cetera, and his services are available at all times for counsel, so it is the feeling of the Commission that the State Parks will be in the hands of competent personnel. Commissioners Chandler and Reynolds approved the reply. The Secretary was instructed to notify Mr. Cuthbert, President of the Society of Landscape Architects, of the action taken.

The Right of Way Engineer presented for the Commission's consideration options obtained for the purchase of real property that is needed for various highway improvements throughout the state. Each item in the list was given careful consideration by the Commission, and as the result thereof, the Commission authorized the purchase of the properties at the prices mentioned in the options. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

In the consideration of the above mentioned options, particularly Item 15312, purchase of right of way from Wm. G. Huard for the Viento-Hood River Section of the Columbia River Highway, the Chief Counsel advised that since signing the option, Mr. Huard has consulted with some of his relatives and now is demanding retention of a portion of the property, consisting of about one acre of land, and access to the highway from such one-acre tract. In fact, he has retained the services of an attorney to protect his interests. The Chief Counsel advised that the amount being paid to Mr. Huard for his property includes payment for his access rights, and he gave as his feeling that settlement should be effected with him exactly on the basis of the terms of the option, and he so recommended. The Commission decided unanimously to exercise the option as executed and instructed the Chief Counsel to bring suit, if necessary, for specific performance of the provisions of the option.

The Assistant Counsel, C. W. Enfield, reported the necessity to acquire by condemnation certain properties that are needed as right of way for state highway improvements. He presented a list of such properties, together with the offers that he recommended in condemnation, as follows, and requested authority to institute the condemnation proceedings:

			Recommended Offer
Unit #2 Section of Sullivan Gulch Highway			
R 14703	Superbilt Mfg. Co., Inc., an Oregon corporation		
	(Right of Way)		
	Land: .52 acres or 22,651 sq.ft. at $.50 per foot	$ 11,325.00

Sylvan Section of the Sunset Highway			
R 15113	Mary E. Baker		
	(Right of Way)		
	Land: .5 acre at $5,000.00 per acre	$ 2,500.00	3,500.00

After careful consideration, the Commission unanimously approved the recommended offers and authorized the Chief Counsel to condemn the properties. The attached resolutions relative thereto, marked EXHIBIT "B-1", "B-2", and "B-3", which resolutions by this reference are made a part hereof with like effect as though extended in full herein, were thereupon adopted by the Commission by unanimous vote.

March 30, 1950

In connection with the condemnation of the Bradford T. Bowles property listed above, Item R-16051, which property is needed as right of way for the Goshen-Creswell Section of the Pacific Highway, the Assistant Counsel pointed out that bids would be received on the following day for the grading and paving of this section, and if the contract is awarded, the successful bidder should be furnished unencumbered right of way, which means that the fences along the Bowles property should be moved back to the right of way line immediately. He estimated the cost to re-establish such fences, consisting of about 280 rods, to be $980, and requested authority to proceed with the work at once with the understanding that the actual cost would be deducted from the $12,000 which is to be offered to Mr. Bowles for his property. The Commission approved the request unanimously.

The Chief Counsel rendered a report with respect to the settlement of pending law suits, as follows:

1. State Highway Commission v. Percy F. Philips, et al, File 1606. The Chief Counsel advised that this case involves the acquisition of two parcels of property in the City of Coos Bay, which property is needed as right of way for the relocation of the Oregon Coast Highway. The owners, he said, were offered the sum of $6,400 for their property but they demanded $8,000. However, subsequent to the filing of the complaint, the owners secured independent appraisals and upon the advice of their attorney, agreed to accept the sum of $7,170.13 for their land, of which amount, $7,000 represents value of the property and $170.13 the expense incurred by the property owners for appraisals and attorney's fees. He recommended approval of this settlement. The Commission approved the recommendation.

2. State Highway Commission v. Victoria Ford, File L-1702. The Chief Counsel stated that this case is an action in specific performance to enforce compliance with and performance of an option heretofore given by Victoria Ford to the State of Oregon for the purchase of 1.582 acres of land needed as right of way for the Dodson-Bonneville Section of the Columbia River Highway. The consideration set forth in the option was $6,580, but Miss Ford refused to execute a deed on such basis, and demanded the sum of $10,000. Subsequently she agreed to convey the property to the state for the sum of $7,500, plus $150 attorney's fees, or a total of $7,650. He recommended approval of the settlement. The Commission approved the recommendation.

3. State Highway Commission v. Harold C. Bayley, et ux, File L-1604. The Chief Counsel advised that this case involves the acquisition of right of way for the Sullivan Gulch Highway in Portland. That an offer of $1,300 was made to Mr. Bayley for his property, which he refused, giving as his reason that he did not wish to sell the property at any price. Subsequent to the filing of the complaint in the case, he said, several conferences were held with Mr. Bayley's attorney, and as a result thereof, it was agreed that the state should pay the sum of 25¢ per squar foot for the 6,000 square feet involved, making a total sum of $1,500, which amount has been paid to the owner. He recommended approval of the settlement. The Commission approved the recommendation.

4. State Highway Commission v. Walter B. McElroy, et ux, File L-1596. The Chief Counsel advised that complaint in this case was filed August 31, 1949, after he had offered to pay $3,800 for the purchase of 0.67 acre of land needed as right of way for the Dodson-Bonneville Section of the Columbia River Highway. The property owner, he said, demanded the sum of $12,000, but it was finally agreed to abide by an appraisal made by Mr. Horace Dryer, and for the state to pay the amount of Mr. Dryer's appraisal, plus the cost and expense which the owners had been forced to incur by reason of this acquisition. On such basis, he said, settlement was made for the total sum of $4,960, of which amount $460 represents appraisal fees, attorney's fees and other miscellaneous expense. He recommended approval of this settlement. The Commission approved the recommendation.

5. The State Highway Commission v. Leonard E. Thornbrough, et ux, File L-1482. The Chief Counsel advised that this case concerns right of way needed for the improvement of the Foster-Kent-Bend Section of the Santiam Highway, and that he offered the owners $550 for their property but they demanded $3,000 for it. The items entered in the state's offer, he said, have been carefully reviewed since the offer was made, and as a result thereof, the value, as appraised by the state, has been raised to $1,100, which sum properly reflects the value of the property, including out-of-pocket expense incurred by the owners as attorney's fees, et cetera. He recommended approval of the payment of $1,100 as settlement with the owners. The Commission approved the recommendation.

The Commission discussed and upon recommendation of the Engineer and Chief Counsel, approved an agreement with a partnership, consisting of J. L. Wooden, Harry E. Wooden, and G. M. Hall, providing for the lease of a section maintenance headquarters building in the city of Clatskanie, Columbia County, covering the period April 1, 1950 to April 1, 1952, with an option on the part of the state to extend the lease for an additional two years for a consideration of $25 per month. (The agreement was signed on the following day.)

The Right of Way Engineer presented a request from Charlotte E. Brown for permission to continue the use of certain state-owned property along the Brooks-Hubbard Section of the Pacific Highway, Marion County. He stated that Mrs. Brown has had the use of this property since the state acquired it in April, 1944, but it is now desirable to revise the provisions of the original permit in order to have it conform to existing conditions, particularly as to the duration of the permit and the fencing of the property. He pointed out that the revised permit provides for lease of the property for a five-year period dating from execution of the agreement by the Highway Commission, and also provides that the state shall erect alignment markers indicating the right of way boundary, and also indicating the alignment of the fence, which Mrs. Brown proposes to construct. He presented a form of agreement covering the matter bearing endorsements by J. M. Devers, Chief Counsel, and by W. C. Williams, Assistant State Highway Engineer. He recommended approval of the arrangement by the Commission. The Commission approved the recommendation unanimously. (The agreement was signed the following day.)

The Right of Way Engineer rendered a brief report on the estimated cost to acquire right of way for the improvement of the Old Oregon Trail between La Grande and North Powder via Ladd Canyon, which report indicated that the right of way will cost more than was originally estimated. The Commission took no action on this matter.

The Right of Way Engineer also brought up for discussion the matter of deeding to Mr. Dale Compton, et ux, a small parcel of state highway property on the Pacific Highway West, just west of the city of Newberg. He explained that this transaction, together with a smaller one with Mr. Henry A. Kellas, completes an arrangement whereby two streets which entered the highway from the north at this point were closed and a single new approach road was constructed to serve the owners of abutting properties. He exhibited a map showing the situation, and advised that the Commission at its meeting on June 27, 1949, approved the arrangement insofar as it pertains to the Kellas property. He recommended approval of the arrangement now effected with Mr. Compton. The State Highway Engineer concurred. The Commission approved the recommendation unanimously. (Bargain and Sale deeds conveying the properties to Mr. Kellas and Mr. Compton were signed by the Commission on the following day.)

The Commission had under consideration execution of a form of lease granting to the Civil Aeronautics Administration permission to maintain an airplane beacon on certain state highway property located along the upper Columbia River Highway in Section 20, T. 1 N., R. 5 E., W. M., Multnomah County. The Commission approved the request upon recommendation of the Engineer and Chief Counsel. (The lease agreement was executed by the Commission on the following day.)

The Right of Way Engineer brought up for discussion the construction of right of way fences along the Warm Springs Highway across the Warm Springs Indian Agency, in Jefferson and Wasco Counties. He advised that this right of way was negotiated in 1940 and acquired in 1941, one of the conditions of the acquisition being that the state would build fences along the right of way when the highway was constructed. The road is now built, he said, and the Indian Agency is demanding that the fences be constructed in order to protect grazing cattle. He estimated the cost of such fences at between $36,000 and $40,000. He said, however, that the Agency will build the fences and take full responsibility with respect to them for $30,180 including cattle guards, which is at the rate of about $3 per rod, compared with the $4 per rod that the state is to pay for similar fence construction under a recent contract. He recommended approval of the project and acceptance of the offer of the Indian Agency. The Engineer and Chief Counsel concurred therein. The Commission unanimously approved construction of the fences and ordered that the arrangement be covered by written agreement which is to provide that the Indian Agency shall maintain the fences after they are built.

The Commission had under consideration the sale to the Union Pacific Railroad Company of a small tract of land containing about 2.25 acres, situate near Hermiston, Umatilla County. The Right of Way Engineer explained that this small area is on the new location of the railroad company, which is acquiring additional property from the adjacent property owner, Mr. Henry Kopacz, who alleges ownership of the state's property. The state-owned tract, he said, is

of no particular value for highway purposes, and he recommended in view thereof that the property be deeded to the railroad company without charge. The Engineer and Chief Counsel concurred in the recommendation, although the Chief Counsel suggested, in view of Mr. Kopacz' attitude, that the property be deeded to him and he in turn deed it to the railroad company. The Commission unanimously approved the transaction, on the condition that the deed is to be prepared in favor of Mr. Kopacz, without consideration, but delivered to the railroad company to make its own settlement with Mr. Kopacz.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

Messrs. Joe D. Thomison, Secretary, Prineville Chamber of Commerce; A. R. Bowman, former County Judge, Crook County, and State Representative W. B. Morse, all of Prineville, were present and expressed appreciation for the action of the Highway Commission in authorizing the improvement of the Ochoco Highway westerly from the town of Mitchell. They also extended an invitation for the members of the Commission to attend a picnic celebration on August 27, 1950, in connection with the dedication of Painted Hills State Park, when the State Parks Superintendent, Mr. S. H. Boardman, is to be honored. Mr. Thomison was spokesman for the group. The Committee was thanked for its invitation.

The matter of sale to the City of Athena of an abandoned gravel pit adjacent to the Pendleton-Adams Section of the Oregon-Washington Highway had the attention of the Commission. The Right of Way Engineer advised that the city desires to use this property as a city dump. Also, that the owners of the surrounding property have no objection to the use of the property for such purposes. He recommended sale of the property to the city. The Commission approved the recommendation. (The deed was signed on the following day.)

The Commission also had under consideration the proposed sale to Mr. Otto Dieckoff of 1.6 acres of state-owned property along the Alsea Highway near the Benton-Lincoln County Line. The Right of Way Engineer stated that the property consists of a portion of right of way of the old route on the Alsea Highway, which has been abandoned, and Mr. Dieckoff has offered to pay $150 for it in order to fill out his holdings. He recommended acceptance of the offer. The Engineer and Chief Counsel concurred. The Commission approved the recommendation. (The deed was signed on the following day.)

The Assistant Counsel, Mr. J. W. DeSouza, brought up for discussion a proposed settlement with Mr. A. G. Walker, Gold Beach, covering loss of business incurred by him and his tenants during the period of the reestablishment of buildings in connection with the improvement of the Oregon Coast Highway in Gold Beach. He recited losses totaling $659.69, explaining details, and recommended that the several amounts be paid in order to complete commitments contained in the original option under which the right of way was acquired from Mr. Walker. The Commission approved the recommendation.

The Right of Way Engineer brought up for consideration the claim of Mr. Harold Cork, Monument, Oregon, who alleges that his property, situate on the Dry Canyon-Monument Section of the Kimberly-Long Creek Highway in Grant County, was damaged to the extent of $500 by stream erosion caused by the state's removing gravel from the North Fork of the John Day River in this vicinity. Mr. Cork has offered to perform the work necessary to restore his property, and will release the state from liability or responsibility for any future damage that might occur thereto, if paid the sum of $500. The Right of Way Engineer gave as his opinion that the state is obligated and recommended settlement of the claim on the basis outlined. The Commission approved the recommendation unanimously, on the condition that the release secured from Mr. Cork shall be in writing.

The Right of Way Engineer also presented a claim from Chas. M. Kelley for loss of a spring during construction of the Rainier-Goble Section of the lower Columbia River Highway. He said that Mr. Kelley's property is about one mile south of the town of Rainier, and the spring, which was used by Mr. Kelley for domestic purposes, was destroyed during construction of the highway. In negotiating the right of way from Mr. Kelley, he said, it was agreed that the state would develop another spring a short distance off the highway right of way, and it was further agreed that if this spring did not prove satisfactory, then the state would develop a third spring located at some distance from Mr. Kelley's house. The spring near the highway right of way, he said, has not proven satisfactory, and Mr. Kelley is now demanding development of the third spring, which will require about 1,600 feet of pipe, and is estimated to cost about $800. Mr. Kelley has offered to purchase the necessary materials, to install the same, and to give the state a full and complete release of responsibility if paid the sum of $1,000. He recommended acceptance of the offer. He also recommended payment of $125.00 to Mr. Osterman, present owner of a portion of the Kelley property, who was required to purchase a pump for such sum because of the destruction of the spring. The Commission approved both recommendations unanimously.

The Commission discussed the claim of Mr. Pearl Etzwiler for the destruction of a well on his property, resulting from the construction of the Pacific Highway West, just south of the town of Dundee. The Right of Way Engineer stated that in the improvement of this highway extra right of way was required from Mr. Etzwiler, and in the negotiations it was agreed that the state would move his house onto adjacent property, back off the right of way, and would provide a new well if the existing well was damaged by the highway construction. The existing well is not satisfactory, he said, and Mr. Etzwiler is demanding a new one, which he has offered to dig if the state will pay him the sum of $500. Moreover, his offer includes release of the state from future responsibility. He recommended approval of the settlement. The Commission approved the recommendation.

The Commission unanimously confirmed the sale of the following miscellaneous properties, representing salvage from right of way purchases, upon recommendation of the Right of Way Engineer and Chief Counsel:

Item	Former Owner	Location	Purchaser	High Bid or Sale Price
Gas Refrigerator, Gas Range, Bedding	Pioneer Auto Ct. & Garriott Auto Ct.	Canyonville-Johns Section	School for Blind, Salem	$160.00
Stove & Oil Heater	Pioneer Auto Ct.	Canyonville-Johns Section	R.L. Byrum	15.00
Roll-away double bed	Coyote Auto Ct.	Canyonville-Johns Section	V.L. Pade	15.00
Misc. furniture & equipment	C.H. Inman Auto Ct.	Canyonville-Johns Section	Pop Green	175.00
Building at 200 E. Central St.	City of Marshfield	Coos Bay	The Hunt Organization	50.00
Building at 346 N. First St.	City of Marshfield	Coos Bay	Grace Hall	75.00
Building at 352 N. First St.	City of Marshfield	Coos Bay	Grace Hall	75.00
Building at 340 N. First St.	City of Marshfield	Coos Bay	W. McAninch	50.00
One used door	Pioneer Auto Ct.	Canyonville-Johns Section	Chris Neilson	2.00
Misc. Household furniture	Pioneer Auto Ct.	Canyonville-Johns Section	C. Slabough	11.00
20 M-FBM old planking	Santa Cruz Cement	Coos Bay	C. Richert	40.00
Building at 210 N. Front St.	Butler-Dodge	Coos Bay	E. Dodge	500.00
Building on Dodson-Bonneville Section	Wegley	upper Columbia River Hwy.	Peter Kiewit Sons Co.	50.00

The Right of Way Engineer brought up for discussion the application of Arvin Sabey, Seaside, for permission to use a spring located within the right of way of the Oregon Coast Highway just south of Tolovana Park, near Seaside. He recommended approval of the request on a revocable basis, because it is merely giving an adjacent property owner the right to use domestic water from a spring located on state land. The Commission approved the recommendation.

The Commission discussed a request from H.T. and Ethel Beach, owners of the property abutting the Sunset Highway, for a change in the location of

the driveway entrance into their property. The Right of Way Engineer advised that these people now have access to the highway at a certain specified point, but want it moved about 2,100 feet westerly. He recommended approval of the change as being in the best interests of the state and the Beach family. The State Highway Engineer concurred. The Commission approved the recommendation.

The Commission also discussed the application of Miss Mina Foltz for modification of the point of access from her property to the Sunset Highway. The Right of Way Engineer stated that when the Commission acquired right of way for the Sunset Highway at this location it also acquired access rights, granting Miss Foltz a private access, which she now wishes changed to a commercial access with entrance to the highway from Barnes Road. He recommended approval of the request. The Commission approved the recommendation.

The Chief Counsel requested authority to pay the sum of $200 to Luis and Irma Whispell for the termination of a ground lease and the immediate vacation of property that is required in connection with the construction of the Dodson-Bonneville Section of the Upper Columbia River Highway, and for the release of all claims for damages. He explained that the Whispells are tenants on the property that the Commission acquired from Mr. Enquist, but they were not made a party in the condemnation action against Mr. Enquist and up to the present tire have refused to vacate the premises. The contractor's construction, he said, has reached the Enquist property, so it is necessary for the Whispells to leave, which they have agreed to do on payment of the $200. He recommended approval of this settlement. The Commission approved the recommendation.

The Commission discussed and approved an agreement with the City of Eugene, with respect to the use of certain state highway property in that city for recreational purposes, said property being located at the top of the bluff overlooking Judkins Point. (The agreement was signed by the Commission on the following day)

The Chief Counsel presented a form of petition for the vacation of a public street in the city of Reedsport. He explained that in making certain improvements, a private citizen encroached upon a street area, and now wants the street vacated so as to avoid the confusion and inconvenience of moving his buildings. He further stated that the vacation of the street will in no wise affect the state highway or state highway property. He recommended that the Commission join in the petition The Engineer concurred. The Commission approved the recommendation unanimously. (The petition was signed on the following day.)

The Commission had under discussion the application of the U. S. Army Engineers for a permanent easement and use of a state-owned gravel pit which they need in connection with the construction of a flood control project on the Walla Walla River near Freewater, Oregon. The Engineer advised that this flood control project will be of material benefit to the state, since the highway in this locality is now subject to extensive damage during extreme floods in the Walla Walla River. The gravel pit, he said, was acquired for use in construction of a new highway between Milton and the Washington State Line and while there is still some gravel available in the pit, the amount is not

great, and the control of the floods is of much more importance than the value of the remaining gravel. He exhibited a map showing the area desired by the Army Engineers, and recommended that the Army Engineers be permitted to use the property, and that the matter be covered by an easement deed. The Commission approved the recommendation unanimously, subject to approval of the form of deed by the Chief Counsel.

The Engineer brought up for discussion the results of negotiations with Mr. Keith Cobo, Klamath Falls, for the purchase of right of way needed for the proposed westside by-pass of US97 in Klamath Falls. He recalled that the Commission at its December meeting authorized negotiations with Mr. Cobo since he had started construction of a motel and had advised that he was willing to adjust his buildings in harmony with the proposed highway. It appears now, he said, that Mr. Cobo is demanding $15,000 for the area needed as right of way, which amount is approximately twice the appraised value of the property, so if the Commission still wishes to acquire the right of way it will be necessary to resort to condemnation. He pointed out that construction of this proposed highway is a project for several years in the future, and that the Commission previously authorized the survey for it principally upon request of the city and county in order that city and county owned land might be withheld from sale and made available to the state for right of way purposes. He suggested that before any improved properties are acquired or condemnation proceedings instituted, that the survey for the project be completed and the appraised value of right of way determined. He estimated the total cost of the right of way, based on Mr. Cobo's demands, at an amount in excess of $250,000. The Commission decided unanimously, in view of the fact that this project is only in the prospective stage, not to acquire the Cobo property nor any other privately owned property. The Engineer and Chief Counsel were instructed to let this entire project rest until further instructed by the Commission.

The Commission considered and approved the renewal of a previous agreement with the Klamath Falls City Park Commission for the lease of a stockpile site situate in Moore Park on the Klamath Lake Secondary Highway, about two miles north of Klamath Falls — consideration $1. (The agreement was signed by the Commission on the following day.)

The Commission discussed a written report from the Chief Counsel with respect to the proposed improvement of the Santiam Highway through the town of Sweet Home. In his report, the Chief Counsel recalled that the Highway Commission previously agreed to make this improvement and to pay the cost of moving the buildings if the City of Sweet Home would acquire the land needed for extra right of way. It appears now that the City cannot raise necessary funds and some of the property owners who were willing to donate right of way are not now willing to do so because others are demanding payment for their land. The Chief Counsel estimated the cost of right of way at $36,000 and the cost to move buildings at $50,000, making a total of $86,000. The Engineer exhibited a map showing the right of way situation. It appeared to the Commission that if this project is to go forward, it will be necessary for the state to finance it entirely with state funds, including

purchase of right of way, because of the inability of the city to contribute. After considerable discussion, the Commission voted unanimously to proceed with the improvement on such basis. The Chief Counsel was thereupon authorized and instructed to negotiate the purchase of the right of way.

The Chief Counsel reported numerous requests from people in Salem relative to the location of the proposed Pacific Highway by-pass through the city of Salem. These people, he said, are property owners who want to develop their holdings in harmony with the highway location, which they cannot do until they know where the highway is to be located and the limits of the right of way. He said that three or four of these property owners want to sub-divide their properties, extending about two or three miles along the route, and he gave as his feeling that it would be helpful to them if the right of way were staked, particularly because these people have acted in good faith and want to cooperate with the Commission. The Engineer estimated the cost to stake the right of way limits at $5,000. The Commission approved the expenditure by unanimous vote, upon the condition that no commitment is being made as to when the highway will be constructed.

The Commission had under discussion the appointment of an Auditor, pursuant to the provisions of Section 100-113 O.C.L.A., as amended by Chapter 359, Oregon Laws, 1947. The appointment of Malcolm H. Hawke, presently acting in this capacity, was approved by the Commission, effective March 1, 1950, at the same salary that he is now receiving. The attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The matter of a bond to be furnished by Mr. Hawke covering his appointment as Auditor was referred by the Commission to Commissioner Reynolds and the Secretary to work out.

The Chief Counsel requested instructions with respect to the procedure to be followed in cases where public bodies maintain directional signs upon state highway rights of way. He pointed out that the law prohibits maintenance of advertising signs on state highways; nevertheless, occasionally a public body such as Chambers of Commerce, et cetera, erect signs without permission, and the question arises whether or not the Commission wants these cases handled in the same manner as signs of private parties are handled. It was the opinion of the Commission that no favoritism should be shown, and that private parties, and Chambers of Commerce and other public bodies, should be treated alike. However, they should be given an opportunity to correct their mistakes before action is taken against them. Accordingly, the Chief Counsel was instructed to point out the law to the owners of the sign, when a case arises, and endeavor to secure their cooperation. If this procedure does not prove satisfactory, then the case should be brought to the attention of the Commission for further instructions.

The Commission discussed with the Engineer the bids received in the morning session for the furnishing of ferry service across the Columbia River at Astoria, and for construction projects. In the consideration of the bids received for the ferry service the question arose whether or not the low bidder would agree to the changing of the dock in Astoria from the foot of 14th Street, as presently located, to the proposed location at the foot of 17th Street,

without extra compensation. The Commission decided to defer the award of this contract until such information could be obtained. The Engineer was instructed to contact the low bidder relative thereto. The decision of the Commission with respect to the remaining projects was publicly announced by Chairman Banfield at 3:00 p.m. as follows, the action of the Commission in each instance being by unanimous vote:

"Astoria-Megler Ferry Service, Clatsop County. The low bidder for furnishing this service was Astoria Navigation Company, Astoria, at $10,383.10 per month, basic ferry service using the motor vessel "M. R. Chessman;" $7,773 per month basic service with one ferry, either "Tourist No. 3" or "Tourist No. 2;" and $3,886.50 per month additional ferry service by one vessel, either "Tourist No. 3" or "Tourist No. 2;" and $200 per month for furnishing and operating the light plant at the Megler Ferry Terminal. There were two higher bids. The Commission has deferred the award of this contract for the time being.

"Construction of maintenance building at Parkdale on the Mt. Hood Highway in Hood River County. There were nine bidders for this project. The Commission has awarded the contract to the low bidder, Bemis & Co., Portland, at $9,283.72.

"Maintenance building at Veneta on the Territorial Highway in Lane County. The Commission received twelve bids for this project, the low one being that of Bemis & Co., Portland, at $9,384.56. The contract was awarded to the low bidder, Bemis & Co., at its bid price.

"Painting Yaquina Bay Bridge on the Oregon Coast Highway at Newport in Lincoln County. Two bids were received by the Commission for this project. Both were rejected, being too high.

"Rock Production on the Rome-Crooked Creek Section of the I. O. N. and Rome-Princeton Highways in Malheur County. Three bids were submitted for this work. The Contract has been awarded to the low bidder, Barney B. Helser, Molalla, at $18,216.

"Rock production on the Pendleton-Hilgard Section of the Old Oregon Trail Highway in Umatilla and Union Counties. The contract for this work has been awarded to the low bidder, M. C. Lininger & Sons, Medford, at $43,754. There were seven higher bids received.

"Grading and roadbed topping on the Ladd Canyon-North Powder Section of the Old Oregon Trail Highway in Union County. The Commission received twenty-two bids for this project, the low one being that of M. L. and C. R. O'Neil, Creswell, at $460,296.50. The contract has been awarded to the low bidder at his bid price.

"Surfacing and oiling the Forest Boundary-Jones Ranch Section of the Ochoco Highway in Wheeler County. A. H. Saxton & Sons, Rufus, submitted the low bid for this work at $82,487. There were ten higher bids. The Commission has awarded the contract to the low bidder, A. H. Saxton & Sons.

"Oiling Jones Ranch-Mitchell Section of the Ochoco Highway in Wheeler County. The low bid for this work was submitted by A. H. Saxton & Sons, Rufus, at $33,503. There were ten higher bids. The Commission has awarded the contract to the low bidder, A. H. Saxton & Sons, at their low bid."

The Chief Counsel reported that pursuant to instructions from the Commission at the previous meeting, he has written the district attorneys throughout the state with respect to over-loading cases pending in justice courts, and that he has received very favorable response from them. He expressed approval of the way in which the district attorneys are handling the cases in which they are involved. He was instructed by the Commission to write the District Attorneys thanking them for their cooperation.

The Chief Counsel brought up for discussion the following: (1) Disposal of State Highway Department land situate adjacent to the Pendleton Airport Secondary Highway; (2) Sale to the Pendleton Developing Company of a strip of Highway Department land fronting on US30 in the western part of the city of Pendleton, as a site for an office building for the Secretary of State. With respect to the first item, the Chief Counsel recalled the previous offer of the City of Pendleton to pay $1,080 for the 7.2 acre tract adjacent to the Airport Highway, and the County's offer to take over the Airport Secondary Highway as a county road if the Highway Commission will deed to the City of Pendleton the State's property adjacent to this road, consisting of about 108.33 acres, less 6.3 acres abutting on the Old Oregon Trail, which are needed by the State for proposed future widening of this highway and for stockpile purposes. He also recalled the city's offer to convey to the state as part consideration, a strip of city-owned land 120 feet wide along the north side of the Old Oregon Trail, and extending westerly about three quarters of a mile from the state's property, which strip will be needed in connection with said future widening of this highway. The city and the county, he reported, have stated a willingness to abide by these offers, although he advised that he has received an offer from Mr. R. E. Smith of Pendleton to purchase the 7.2 acre tract at $1,000 per acre. He gave as his understanding that it will cost about $4,000 to put the Airport Road in condition, and about $500 annually to maintain it.

In the discussion of this matter, it developed that the City of Pendleton and Mr. Smith have some sort of understanding with respect to the 7.2 acre tract. The question arose whether or not the Commission should deed this tract to the city at $1080 if the city intends to sell it to Mr. Smith at a much higher figure. The legality of the proceedings was brought into the discussion. The following prodecure was suggested by the Chief Counsel as being legal: Secure a copy of the arrangement or agreement between the city and Mr. Smith, and if satisfactory, then deed to the city the 7.2-acre tract for $1,080; deed to the city the balance of the acreage less a strip 210 feet wide bordering the Old Oregon Trail, which is needed for future widening of this highway and for stockpile purposes; relinquish jurisdiction and control of the Airport Secondary Highway to the county to be maintained as a county road; and secure a deed from the city to a strip of city-owned land 120 feet wide along the north side of the Old Oregon Trail westerly from the west line of the state's property. This matter was discussed by the Commission in considerable detail, but action thereon was deferred until the following day. (For final action, see additional paragraph ahead.)

With respect to Item No. 2, the Chief Counsel read aloud letters from the Pendleton City Council and the Pendleton Chamber of Commerce recommending to the Commission that the state deed back to the City of Pendleton the tract which the city deeded to the state without charge, so as to make this property available as a site for a proposed office building for the Secretary of State. He also read aloud a letter from the Pendleton City Planning Commission recommending that this property be retained by the state for park purposes, otherwise that it be returned to the city. The Engineer recalled that the city deeded this property to the state for park purposes, and that about $4,600 has been spent for development, although the property still is in poor condition. He pointed out that the tract is narrow and about one quarter mile long. He also said that access to the highway presently is controlled at this point, which would not be the case if the property were sold for the purpose intended. He pointed out that there are no cross streets available for traffic, and were the property commercialized, traffic entering the highway would create a very dangerous condition for highway traffic. This matter, too, was discussed at considerable length, but action thereon was deferred by the Commission until the following day. (For final action, see additional paragraph ahead.)

The Engineer reported a request from the Lincoln County Public Utilities District for permission to maintain a transformer on the right of way of the Corvallis-Newport Highway about one mile east of Toledo as a temporary proposition in order to supply this town with Bonneville power during a strike by employees of the Johnson Lumber Company, which now furnishes power to this community. The transformer, he said, will be placed on a wide section of the right of way about 50 feet from the center of the traveled roadway so will not be a hazard to highway traffic. He recommended approval of the request as a temporary expedient in order to help out the people of this town who will suffer unless an additional source of electrical energy is provided. The Commission approved the recommendation and instructed the Chief Counsel to prepare an appropriate form of permit covering the matter.

The Engineer reported on the request of the County Court of Tillamook County that consideration be given by the Commission to the designation of the Pacific City-Sand Lake Loop County Road as a state secondary highway in exchange for the Little Nestucca Secondary Highway. He said that the Pacific City-Sand Lake Loop Road is about 18 miles in length, whereas the Little Nestucca Highway is only 9.4 miles long; that the county road has been oiled throughout its length except a .7-mile section near its north end. He estimated the cost to complete the Little Nestucca Highway, which he said is practically unimproved, at $420,000. He pointed out, however, that the current construction program contains an item of $130,000 for the replacement of three bridges which the County Court insists must be constructed as a condition of the exchange. He estimated the cost to complete the Pacific City-Sand Lake Loop Road at approximately $100,000, and the annual cost to maintain it at $700 per mile. The matter was discussed at some length, but decision was deferred by the Commission until its next meeting. The Engineer was instructed to furnish additional information at that time.

The Engineer reported on the following requests heretofore presented to the Commission by Walter Meacham, Secretary of the Old Oregon Trail, Inc.:

1. That a text board be erected at the old Barlow home at Barlow.
2. That a text board be erected relative to Madame Dorion on US99 near Gervais.
3. That the bridge over the Sandy River at Troutdale be named the Lewis and Clark Bridge.
4. That the Mill Creek bridge on the Warm Springs Highway be named for someone identified with the history of the region, preferably a member of the Warm Springs Indian tribe.
5. That adequate turnouts be provided at historical markers.
6. That advance signs be placed ahead of the markers.
7. That all pioneer trails be shown on the state highway maps.

These requests, he said, were referred to the Memorials Committee of the Oregon Historical Society pursuant to established policy, and the following recommendations have been received:

1. The Committee feels that Barlow has been sufficiently commemorated by inscriptions along the Barlow road; also, the Barlow site is not appropriate, since the town of Barlow is named after Sam Barlow's son, William, and the home is on the original donation land claim of Thomas McKay, who already has a text board near Scappoose.

2. The Memorials Committee feels that, since there is already one text board erected to the memory of Madame Dorion near North Powder, another text board should be denied.

3. The Committee feels that the commemoration of Lewis and Clark should be reserved for more historical points of interest and does not recommend naming the Sandy River bridge for them.

4. The Memorials Committee feels that it should be guided by the policy of the Highway Commission as to whether the Mill Creek bridge should be named. If the Commission feels it would be appropriate to name the bridge, the Memorials Committee will make an investigation to determine if there is any member of the Warm Springs tribe of sufficient importance to be worthy of commemoration.

5. The State Highway Department does construct such turnouts as are reasonable and practical, and the Committee believes they are adequate.

6. The State Highway Department also erects advance warning signs of the approach to historical markers.

7. The Memorials Committee does not think it practical to combine a road map of the State of Oregon with a historical map.

The members of the Commission individually expressed their approval and acceptance of the recommendations of the Memorials Committee, and instructed the Secretary to convey to Mr. Meacham the action taken.

March 20, 1950

The Commission discussed briefly, without action, the report of the Engineer on the status, as of March 1, 1950, of surveys for projects contained in the Second Post War Construction Program (1950-51) as approved by the Commission on September 21, 1949. The Engineer was instructed hereafter to render such reports monthly, prior to Commission meetings.

The Commission also discussed a report from the Engineer, said report being based on the reconnaissance survey made in 1934 and revised as to current costs and traffic, on a proposed highway connecting the Pendleton-John Day Highway at Ukiah, Umatilla County, with the Starkey Secondary Highway near Starkey in Union County. According to the report, the length of the project is 35.7 miles and the estimated cost to construct it is approximately $1,075,000, exclusive of right of way, which the report indicates should be nominal because the entire route is through terrain where property values are low. The report also recites that an economic analysis of the project indicates that the benefits to the road users warrants construction of the road. In the discussion of this matter the question arose whether or not the U. S. Forest Service is interested in the project from the financial standpoint. Commissioner Reynolds recalled that at the previous meeting when the program for Forest Highway Funds was decided, officials of the U. S. Forestry Department at that time indicated that they were interested in this highway, and as a result thereof, $75,000 of Forest Highway Funds was allocated to finance a survey of the road. The Commission deferred action on this matter pending the results of the survey and advice from the federal officials.

In this connection the Engineer reported receipt of a request from the U. S. Bureau of Reclamation that the Highway Commission consider the proposed reconstruction of the Hilgard-Starkey Secondary Highway above the level proposed for a future dam on the Grande Ronde River rather than the improvement of this highway in its present location. He stated that investigations reveal that the cost to raise the highway above the level of the pool of the proposed dam would be about $330,000 more than the cost to improve the highway as planned, for which an amount of $80,000 has been provided in the Second Post War Program. No information has been received, he said, as to when the dam is to be constructed, if ever, and he gave as his opinion, in view thereof, that the expenditure of the additional $330,000 is not justified, particularly in view of the uncertainties as to construction of the dam and to the fact that the alignment of the highway at the higher elevation is not comparable to that which can be obtained along the existing route. The Commission decided unanimously to make no change in the present plans for the improvement of this road.

The Engineer requested authority to advertise for bids for the construction of approaches to the Sauvies Island Bridge, Multnomah County, at the next meeting of the Commission, so as to assure completion of the approaches when the bridge construction, now underway, is completed in September or October of this year. He estimated the cost of approach construction at $100,000 and advised that provision has been made for the expenditure in the current budget. The Commission approved the request unanimously.

A request was presented from residents of Hillsboro, Cornelius, Forest Grove and vicinity, that consideration be given by the Commission to the construction of a new highway extending due east from Hillsboro, along

Baseline, to a connection with the Sunset Highway, in lieu of the widening of the present Tualatin Valley Highway for four lanes of traffic between Hillsboro and Beaverton. The Engineer gave as his opinion that the construction of this road would not eliminate the need for widening the present Tualatin Valley Highway. He suggested that it might be advisable to make a reconnaissance survey to determine all the facts, in view of the possibility that such a highway would have merit. He estimated the cost of such survey at $1,000. The Commission deferred action on the matter pending a conference with a delegation from Hillsboro and vicinity scheduled to be present on the following day. (The Commission later referred the matter back to the Engineer for additional information as to the probable cost of a thorough survey of the project.) (See additional paragraph ahead.)

A petition was presented, signed by 148 residents of Creswell and vicinity, requesting the improvement of the Springfield-Creswell Secondary Highway No. 222 from its junction with the Willamette Highway to the end of the existing oiled surface, approximately one mile east of Creswell. The Engineeer advised that the section referred to is 6.28 miles in length and that while no detailed survey or estimate of cost has been prepared, he would judge that the improvement of the road would cost about $150,000. The average daily traffic on the road, he said, is 200 vehicles, which does not give it a very high priority, although it does merit consideration in a future construction program. As a result of discussion, the Commission denied the request for immediate undertaking, indicating, however, that it would consider the project in the programming of future funds.

The Commission discussed a written report from the Engineer dated March 15, 1950, on a request from people of Malheur County, particularly of the city of Ontario, for the widening of US30 between Ontario and the Snake River Bridge. The Engineer points out in his report that it would cost about $100,000 to widen the existing highway to a modern four-lane facility. He recommended against such an improvement because the present bridge over the Snake River is narrow, only wide enough to accommodate two lanes of travel. He also pointed out that the volume of traffic that uses this road is now approximately 5,000 vehicles daily, which indicates that the pavement should be widened in the not too distant future. He recommended consideration in the next Construction Program of a widening project estimated to cost $50,000 for the purchase of right of way adequate for four traffic lanes, and for future widening and resurfacing of the present highway to a 24-foot width with a 5-foot shoulder on each side. The matter was discussed briefly by the Commission, but a decision thereon was deferred pending discussion with a delegation from Malheur County scheduled for the following day. (As a result of the conference the Engineer was authorized to make a survey of the project. See ahead for additional paragraph.)

The Engineer requested authority to advertise for bids for the construction of a standard equipment storage building in the city of Fossil. He estimated the cost of the building at $14,920 and advised that provision for this building was anticipated in the 1950 budget, which the Commission approved in principal. The Commission approved the request unanimously.

The Engineer reported that there is now being constructed adjacent to the Pacific Highway East at Naef Road, between Milwaukie and Oregon City, an outdoor theater with parking space provided for some 600 cars. The theater's patronage, he said, will come largely from the north and will involve lefthand turning movements across the northbound traffic lanes of this heavily travelled four-lane highway. He further stated that the owner of the theater realizes that traffic congestion will result, and accordingly has tentatively indicated that he will bear the entire cost of constructing a left-turn lane and of installing a traffic signal at this point if the Highway Commission has no objections to the installation of these facilities on the highway. The Engineer also said that he knows of no way to avoid this situation, and he suggested that the Commission give its approval to the installation of the left-turn lane and the traffic signal on the condition that the owner of the theater pay the entire cost involved, which he estimated would amount to about $7,000. The Commission approved the recommendation unanimously on the condition that the owner of the theater will advance to the State the estimated cost of the project. The Engineer was authorized to negotiate with the theater owner on such basis and ordered that the final arrangement be covered by written agreement by the theater owner and the state.

The Commission had under discussion the matter of contributing state highway funds to help defray the cost of constructing two 36"-diameter culverts across The Dalles-California Highway north of Madras. The Engineer advised that the U. S. Bureau of Reclamation intends to construct these culverts, which are located partially on property that was patented after the year 1890 and over which the United States government has reserved right of way for irrigation ditches under provisions of the Act of August 30, 1890. According to this Act of Congress, he said, the Reclamation Service could require the state to pay the entire cost of the structures, but according to an agreement between the Commission and the Bureau, dated September 18, 1947, the cost of such structures is to be shared equally by the state and federal government. In this particular instance, he said, it appears that the center line of the highway is common to the section line which is the dividing line between the patented reserve and the unpatented reserve, in view of which the Bureau of Reclamation is asking the state to contribute only one quarter of the entire cost instead of 50% of the cost. He estimated the cost of the two culverts at $2,400, of which amount the state's share on such basis would be $600, or 25% of the total. He recommended approval of the payment of such amount and that the expense be charged to the reserve fund set up for minor betterments in the 1950 budget. The Commission approved the recommendation.

The Commission had under discussion the advisability of extending the proposed improvement of the Imbler-Summerville Federal Aid Secondary County Road improvement in Union County a distance of 2.4 miles to a place known as Dry Creek. The Engineer recalled that the Commission previously approved, in its 1950-51 construction program, an expenditure of $120,000 for the improvement of a 3.4-mile section of this road between Imbler and Summerville, which leaves an unimproved gap, 2.4 miles long, on this federal aid secondary highway. He estimated the cost to construct this extra 2.4-mile section at $20,000 and recommended approval of the expenditure, making a total estimated cost of $140,000 for the entire 5.8-mile section. The Commission approved the recommendation unanimously.

The Engineer reported completion of the survey for the re-alignment of the Oregon Coast Highway between Chrome Plant and Cedar Point, near Coquille, Coos County. He exhibited a map showing the proposed location and physical features along the route. He asked the Commission to approve the survey so the right of way may be acquired and the project placed in line for contracting. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein. The Chief Counsel was authorized and instructed to proceed with negotiations for necessary right of way and the Engineer was authorized to advertise the project for bids to be received when the right of way matters have been clarified.

The Commission discussed a resolution adopted by Coquille Grange #396 protesting a two-lane highway between Chrome Plant and Coquille on the Oregon Coast Highway, and urging construction of a four-lane facility. The Engineer advised that extensive investigations reveal that to provide a four-lane facility over this 3.5-mile section will cost about $1,729,000, exclusive of right of way; and that the cost to construct a four-lane facility along the section between Chrome Plant and Cedar Point, 2.7 miles in length, is estimated at $934,000, compared with an estimated cost of $450,000 for a two-lane facility along the same section. A two-lane highway facility, he said, with a paved roadway 24 feet side, will amply handle traffic for many years to come without congestion, the records revealing that the average daily traffic at the present time is approximately 2,400 vehicles. He recommended that the Grange's request be denied and that the Commission adhere to the proposed plan for a two-lane facility. The Commission approved the recommendation unanimously and ordered that the Grange be informed that the Commission has made no promise as to the width of the facility that is to be provided, and considers that a two-lane facility is adequate for some time to come.

The Engineer reported a request from the State Board of Higher Education for the loan of the services of the State Highway Engineering Department to make surveys and to prepare plans and cost estimates for the construction of a roadway and parking area at the University of Oregon Medical School in Portland. He advised that he has engineering personnel available to do the work and recommended approval of the request inasmuch as the Board of Higher Education will reimburse the Highway Department for expense involved. The Commission approved the recommendation subject to the condition that the State Highway Department will be reimbursed for its costs.

The Engineer brought up for discussion a request from the Director of Highways of the State of Washington that the Oregon Highway Department cooperate with the Washington Highway Department in a study to determine the proper site for an additional bridge across the Columbia River between Portland and Vancouver when such a facility is needed. He advised that present traffic studies indicate that an additional bridge facility will be required by 1960. However, the Washington Highway Department, which is planning extensive road improvements on the Washington side of the River needs now the information that will be derived from the bridge study, because their plans will be affected by the ultimate location of the new bridge. He estimated that it will cost

about $15,000 to make the survey, which expense would be shared equally by the two states. He recommended approval of the request on such basis. It was the feeling of the Commission that it should not approve such cooperative survey project because of the possibilities that it would commit this Commission or its successors in the selection of a site for a new bridge that, insofar as Oregon is concerned, will not be needed for ten years or more. Conditions then may be such that a different site might prove to be to the best interests of this state. However, the Commission authorized the Engineer to make an economic study of each of the routes on the Oregon side of the river at the sole expense of the Oregon Highway Department and to furnish to the Washington highway authorities the information that he assembles, leaving to the Washington Highway Department the responsibility for securing needed information on the Washington side of the river, provided such an arrangement meets with the approval of the Director of Highways of the State of Washington. The Engineer was authorized to convey the information to the Washington highway authorities.

The Commission discussed requests from J. R. Frum, Chairman of the Recreational and Natural Resources Committee of the Portland Chamber of Commerce and from Mr. Marshall Dana of the Oregon Journal, Portland, that a parking area for automobiles be constructed adjacent to the Indian fishing grounds at Celilo so tourists can get a close-up view of the fishing activities of the Indians at this place. The Engineer exhibited a map showing a tentative plan for such proposed project and estimated the cost to provide such a facility at about $25,000, which amount includes widening of the existing highway adjacent to the parking area to permit a left-turn refuge for vehicles. The estimated cost without such left-turn refuge, he said, is $19,500, which would have to be paid 100% by the state. In the discussion of this matter the question arose as to what provision should be made for the removal of the Indian buildings along the highway at this point, particularly the buildings located east of the proposed parking area. In view of this question the Commission deferred action in the matter until its next meeting. The Engineer was instructed to inform Mr. Dana of the action taken and the reasons therefor.

The attached resolution marked EXHIBIT "E" honoring Mr. T. H. Banfield, who has refused reappointment as a member of the State Highway Commission after serving as its Chairman for the past seven years, was read aloud by Commissioner Chandler at a testimonial dinner in behalf of Mr. Banfield held later in the evening, is entered into the records of this meeting at this time pursuant to the request of Commissioners Ben. R. Chandler and Chas. H. Reynolds. The resolution by this reference is made a part hereof with like effect as though extended in full herein.

The meeting adjourned at 5:00 p.m. to reconvene on the following morning in the same room.

Portland, Oregon
March 21, 1950

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel, the following being present:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Assistant State Highway Engineer
W. W. Stiffler, 2nd Assistant State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Agent
Malcolm H. Hawke, Auditor
H. B. Glaisyer, Secretary

Bids as follows for highway construction were opened and read aloud by the Secretary pursuant to previously published notice, following which Chairman Banfield announced that the award of contracts would be made at 3:00 p.m. in the same room:

UNION COUNTY (Held over from first day)

Ladd Canyon-North Powder Section of the Old Oregon Trail Highway. Federal Project No. FI-321(1). 13.58 miles of grading and roadbed topping. Requires approximately 599,000 cu.yds. excavation; 300 cu.yds. concrete in end basins and box culverts; 38,000 lbs. metal reinforcement; 310 lin.ft. 102-inch sectional plate culvert; 274,700 cu.yds. cinder topping; and 50,700 cu.yds gravel topping.

M. L. & C. R. O'Neil, Creswell	$ 460,296.50

The Engineer reported that pursuant to instructions from the Commission, he consulted with officials of the Astoria Navigation Company, which submitted the low bid on the previous day for the Astoria ferry operation, and secured from the company a written statement to the effect that if the State Highway Commission should construct a new dock at the foot of 17th Street in Astoria, the company would agree to use such dock in lieu of the present dock at the foot of 14th Street, and would not expect to receive extra compensation from the state by reason thereof. He presented the letter to the Commission and recommended award of the contract. The Commission accepted the statement as meeting its requirements and thereupon by unanimous vote awarded the contract to the Astoria Navigation Company, Astoria, at its bid price.

The following persons representing the communities of Hillsboro and Forest Grove came before the Commission regarding the construction of the new highway extending due east from the city of Hillsboro, on Baseline, to a connection with the Sunset Highway: A. J. McAlear, Hillsboro, Chairman of the City Planning Commission, J. W. Barney, City Manager, Hillsboro, and M. O. Gardiner, City Manager, Forest Grove. Mr. McAlear was spokesman. He urged the Commission to make a full investigation of the possibilities of such a highway in lieu of widening the present Tualatin Valley Highway between Beaverton and Hillsboro. Mr. Barney explained details of their plan for such a new road. Mr. Gardiner endorsed the remarks of the other speakers in behalf of the people of Forest Grove and vicinity. The matter was discussed at some length and as a result thereof the Commission referred it to the Engineer for report as to how much it will cost to make an economic analysis of the project.

Mr. William Niskanen, Bend, appeared before the Commission in behalf of the Central Oregon Chamber of Commerce and requested the following:

1. Improvement of The Dalles-California Highway between Crooked River Bridge and Terrebonne, a distance of about six miles. He gave as his understanding that surveys have already been made for improvement of thie section.

2. Improvement of the connection between the old and the new routes of The Dalles-California Highway at Culver. Mr. Niskanen stated that this connection is on a steep grade and that existing signs require traffic from the old highway to stop before entering the new highway,

which is rather difficult, particularly for trucks, and as a result, traffic pays no attention to the STOP signs. He suggested construction of a third traffic lane at this point to permit traffic from the old road to merge with traffic in the new highway without stopping. He stated his feeling that such an arrangement would not be hazardous and would eliminate the necessity for the STOP signs, which, he said, are not respected.

3. Reconstruction of the Bend-Sisters Highway on revised alignment between Tumalo and Bend. Mr. Niskanen alleged that the present bridge over the Deschutes River on this section is obsolete and presently is posted for a reduced load limit. He was informed by the Engineer that a survey for the permanent location of this section is now underway.

4. Replacement of two bridges on the McKenzie Highway between Sisters and Redmond. Mr. Niskanen stated that these two bridges are very weak and badly in need of replacement.

5. Early completion of the reconstruction of the Ochoco Highway between Prineville and Mitchell. Mr. Niskanen urged that funds be provided at an early date to finance the standard improvement of this section of highway.

6. Modernization of The Dalles-California Highway between Bend and Chemult. Mr. Niskanen urged the Commission to provide for such improvement in future construction programs.

7. Mr. Niskanen urged the Commission to do what is necessary to relieve the traffic congestion that occurs on the Mt. Hood Highway at Government Camp, expecially that which occurs during the wintertime due to the parking of cars along the highway by winter sports enthusiasts, which interferes greatly with through travel. He suggested the rerouting of the highway somewhat south of the present road.

He was informed by the Commission that the projects mentioned by him will be given consideration in the formulation of future construction programs, but no commitments or promises can be made with respect to any of them at the present time.

A delegation from Benton County, consisting of George Hendrix, farmer, Norman Sapp, sawmill operator, John Orr, farmer, and Clare Taylor, sawmill operator, all of Lobster Valley; Hon. George McBee, County Judge; and Francis Ziegler and B. N. Woods, representing the Businessmen's Club of Corvallis, appeared before the Commission and requested the extension of the Alsea-Deadwood Secondary Highway into Lobster Valley. Mr. Hendrix headed the group. He made an urgent plea for the Highway Commission to extend the Alsea-Deadwood Secondary Highway from its present terminus in Benton County to the floor of Lobster Valley so as to facilitate the marketing of farm produce. He declared the present road into Lobster Valley utterly inadequate to serve this growing community. As a solution to their problem he suggested use of a privately owned logging road which is available and will afford a much shorter and better highway than any other route. He exhibited a map showing the location of this road and the existing county road, and pointed out the saving in distance that can be realized by use of the private logging road. Mr. Hendrix gave the follow-

ing statistics pertinent to their request: that farm produce valued at $3 million was moved out of Lobster Valley in 1949; that there are 26 productive farms in this Valley, 53 dwellings of industrial workers, and seven sawmills, all of which will be accommodated by the proposed facility.

The Engineer advised that when this road was originally placed on the State Secondary Highway System it extended about five miles further than it does at the present time, but about twelve years ago at the request of the County Court a five-mile section was eliminated and in lieu thereof the Highway Commission placed the Tampico-Lewisville County Road on the Secondary Highway System. The County Court, he said, is now asking that it be replaced and the Tampico Secondary Highway taken off because of the importance of Lobster Valley. The private logging road mentioned by Mr. Hendrix, he said, is the shortest and most feasible route into Lobster Valley, being about 2.39 miles in length. He estimated the cost to improve such road to secondary state highway standards at $66,000, plus the cost to acquire it from the owners. It was his thought that it could be purchased for about $25,000, which would then make the total cost of improving the 2.39-mile section to reach Lobster Valley at about $91,000. He advised that the Tampico-Lewisville Secondary Highway which the County wishes to take back is gravel surfaced throughout, and no immediate improvements are required for existing traffic; also, it is 3.07 miles longer than the private logging road into Lobster Valley, so if the Commission approves the exchange the state would save about $600 a mile maintenance cost each year, or approximately $1,842 annually.

Mr. Orr spoke in behalf of the improvement from the standpoint of school children and the operation of school buses, declaring that the operation of school buses on the present road is dangerous. Judge McBee endorsed the remarks of the other speakers and advised that Benton County is ready and willing to assume jurisdiction over the Tampico-Lewisville Road if the State Highway Commission will extend the Alsea-Deadwood Highway as requested, but the County is not in financial position to improve the present road into this Valley.

The matter was discussed at considerable length but the Commission deferred action pending advice as to how much the owners of the private logging road want for their facility. The matter was referred to the Engineer and Chief Counsel to ascertain such information.

Mr. C. H. Baynard, Dundee, was present and requested permission to maintain on state-owned property at the junction of a county road with US99W, about one mile north of Dayton Junction, a private sign directing traffic to a golf course and a recreational area. He said that the sign has been maintained at this point for many years by permission of the former owner of the property, but since the property was acquired by the state as right of way, he has been ordered to remove it. Chairman Banfield explained that the Commission cannot grant his request without deviating from its established policy. During the last few years, he said, the Commission has, in the purchase of its rights of way, also purchased the right to prohibit signs, excepting directional signs which are placed by the Highway Department, and if the Commission should permit the sign in this instance a precedent would be established that would be difficult to avoid in passing on other requests

of like nature. Mr. Baynard then asked permission to leave the sign in its present location until the highway has been widened at this point for four lanes of travel, at which time, he said, he would move it to privately owned property on the opposite side of the highway. This request, also, was denied by the Commission.

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. with the same persons present and participating.

Mr. Rex Ellis, State Senator, Pendleton, came before the Commission relative to the purchase of a small tract of state-owned land lying adjacent to the Old Oregon Trail in the western part of the city of Pendleton, on which tract he proposes to erect a building for use by the Secretary of State. He urged the Commission to advertise the property for sale, and filed with the Commission letters from the Secretary of State, the Pendleton City Council, and Umatilla County Court, all of which recommended sale of the property for the purpose intended. He exhibited pictures of the property to show that it has not been developed for landscaping as was intended when the City of Pendleton deeded it to the state, and he urged the sale of the property so it can be placed back on the tax rolls. Senator Ellis was informed by Chairman Banfield that the sale of this property would place the Commission in a difficult position because in the acquisition of rights of way the Commission is presently purchasing access rights. He pointed out that the property under discussion fronts for a distance of 1200 feet on the highway and for this distance there are no entrances whatsoever. He also said that if the Commission should sell this property now it would be placed in an embarrassing position in passing on other matters of similar nature, because the Commission could not justify the purchase of access rights in other parts of the state if access to the highway were allowed in Pendleton. To allow such access, he said, would deviate from the Commission's standard policy and the Commission could not defend its action. In the event the Highway Commission should see fit to sell the property, he added, it would demand a minimum price from the purchaser, and that price would be quite high because of the value of the property as appraised by the City Planning Commission. Chairman Banfield also mentioned the hazards that would be created were access privileges granted at this location. He gave as his feeling that the Commission will wish to consider the disposition to be made of this property jointly with the disposition of the property adjacent to the Airport Secondary Highway, which the City of Pendleton is desirous of acquiring. He concluded the discussion by stating that the Commission would give the matter careful consideration.

The County Court of Malheur County, represented by County Commissioner A. P. Goodell, and County Engineer Walter Sandquist, was present regarding: 1. The improvement of US30 from the east city limits of Ontario to and including the Snake River Bridge; 2. The improvement of Secondary Highway 201 from Nyssa south to Adrian. Mr. Sandquist was principal spokesman. He urged the widening of the Ontario-Snake River Section to a minimum of 24 feet width, and the acquisition of right of way for an additional width roadbed when traffic justifies it. He pointed out that the present highway is only 16 feet wide, with two feet of oiled shoulder on each side, and he alleged that such width roadway is entirely too narrow for the large volume of traffic that uses the road. As to the Nyssa-Adrian Section, Mr. Sandquist urged resurfacing and widening, and in certain places a change in the highway location. He declared that this

road serves a highly productive farming area, consisting principally of sugar beets, and that records show a total of 201,287 tons of such produce, with by-products, transported over this road by truck during 1949, and in addition the records of the Union Pacific Railroad Company show that 5,339 carloads of agricultural products were shipped from Nyssa during 1949, much of which material was trucked over the Nyssa-Adrian Highway to the railroad company's loading dock. He presented a letter from the County Court in support of his oral arguments. The State Highway Engineer advised that a survey of the Nyssa-Adrian Highway is now underway to determine what is needed to put it in proper condition. Chairman Banfield advised that the Commission now has over $1 million allocated for expenditure in Malheur County during the next two-year period, in view of which it can promise nothing more at the present time; that the projects now presented will be analyzed but no guarantee can be given as to when they will be constructed. In reply to further inquiry of Mr. Sandquist as to whether or not the Commission has made any provision for modernization of the Snake River Bridge east of Ontario, Chairman Banfield replied in the negative; however, he added, provision has been made by the Oregon State Highway Commission for the replacement of the Snake River Bridges at Weiser and Payette when the State of Idaho has provided the funds to pay its share of the costs. Mr. Goodell also spoke for the improvement of the Nyssa-Adrian Highway, confirming Mr. Sandquist's remarks that it is a very heavily traveled highway and dangerous to travel because of the numerous right-angle turns. Chairman Banfield concluded the discussion by reiterating that the Commission will give these projects consideration in arranging future highway construction programs, but can make no promises with respect to them. Following departure of the group, discussion of this matter was resumed, at which time the Commission unanimously authorized the Engineer to conduct a location survey of the section between Ontario and the Snake River Bridge, on the basis of a four-lane highway facility.

A delegation from Klamath Falls was present representing the City Highway Committee and composed of the following people: Dr. C. J. Cox, Chairman, Planning Commission; Ed Bell, Merchants' Association, and Planning Commission; Harry Boivin, City Highway Committee; and Fred Hoagland, Chamber of Commerce. Dr. Cox presented a letter from the Hon. Robert A. Thompson, Mayor of the City of Klamath Falls, advising that this Committee represents the City of Klamath Falls in all matters within its city limits, and is authorized to act in that capacity. He introduced the members of the Committee and stated their main purpose in appearing before the Commission, to request construction of the proposed westside by-pass for US97 through Klamath Falls. He requested information as to whether or not the Commission intends to proceed with this project. He was informed by Chairman Banfield that this proposed highway has never been designated a state highway route, and that the only reason the Commission authorized negotiations for the right of way was the urging of the city and the county, by whom a portion of the right of way is owned, it being represented to the Commission that the city and county will retain ownership of the properties until the state requires them, if informed of the approximate line that the highway will follow. Recently, he said, Mr. Cobo, who is constructing a motel at the southern end of the proposed location, represented to the Commission that he wanted to adjust his facilities to fit the proposed highway and indicated a willingness to sell to the state such of his property as the state needs, but negotiations with Mr. Cobo

indicate that the price he wants for his property is twice its appraised value, which offer the Commission refused. Under the circumstances, he added, the Highway Commission has no plans whatsoever for this westside by-pass and it is a matter strictly up to the city and the county whether or not they wish to continue to hold the right of way for prospective use by the state at some future time. At the rate of the amount that Mr. Cobo is asking for his property, he added, the balance of the right of way for this proposed route would cost about $350,000, which is entirely too much for the Commission to consider. He pointed out the large amount of state highway funds that the Commission has expended in the vicinity of Klamath Falls during the past few years, aggregating between $4,000,000 and $5,000,000. Commissioners Chandler and Reynolds endorsed the remarks of Chairman Banfield.

Dr. Cox then brought up for discussion conditions prevailing at the Esplanade Underpass, advising that this underpass is not properly drained and a dangerous condition exists. The Engineer was instructed by the Commission to investigate the matter immediately. Mr. Hoagland inquired as to the status of the proposed South 6th Street viaduct and was informed by Chairman Banfield that the Commission is doing nothing with this project except to acquire right of way, with absolutely no commitment as to when the project will be constructed. He gave as his opinion that it will be several years before the work will go forward. Mr. Hoagland also brought up for discussion the establishment of a proposed traffic grid system in Klamath Falls and was informed by Chairman Banfield that the Commission at one time allocated funds to finance the survey of such system, but re-allocated the money to other projects in the Klamath Falls area after it was learned that the city had employed the services of an engineer from Los Angeles. Dr. Cox solicited aid from the Commission in the repair and maintenance of Klamath Avenue, which has been designated by the City of Klamath Falls as a truck route. It was pointed out that this street is not a state highway route and for that reason does not qualify for state highway funds. This concluded the conference.

The Commission discussed with the Engineer the bids received at the morning session for highway construction work, and by unanimous vote approved the award of contracts as was publicly announced by Chairman Banfield at 3:00 p.m., as follows:

"Astoria-Megler Ferry Service across the Columbia River at Astoria, Clatsop County. Three bids for providing this service were received by the Commission on the previous day. The Commission has awarded the contract to the Astoria Navigation Company, the low bidder, at its bid price.

"Grading and roadbed topping on the Ladd Canyon-North Powder Section of the Old Oregon Trail, Union County. M. L. & C. R. O'Neil, Creswell, submitted the low bid for this work at $460,296.50. There were 21 higher bids. The Commission has awarded the contract to the low bidder, M. L. & C. R. O'Neil, at their bid price.

"Milwaukie maintenance storage shed, Clackamas County. Serge R. Perrin, Oregon City, submitted the low bid for this project in the amount of $7,916. There were eight higher bids. The Commission has awarded the contract to Mr. Perrin at his bid price.

"Jewell maintenance building on the Nehalem Highway at Jewell, Clatsop County. The Commission received thirteen bids for this project, the low one being that of Bemis and Company, Portland, at $7,292.03. The Commission has awarded the contract to this company at its bid price.

"Grading and paving the Port Orford Section of the Oregon Coast Highway in Curry County. Inter-City Sand and Gravel Co., Eugene, submitted the low bid for this work at $77,310. There were six higher bids. The Commission has accepted the bid of the Inter-City Sand and Gravel Co. and has awarded the contract to this company at its bid price.

"Rock production on the Canyon Creek Summit-Soda Mountain Section of the John Day-Burns Highway in Grant County. J. A. Struss, Redmond, submitted the low bid for this work, at $20,046. There were three higher bids. The Commission has awarded the contract to the low bidder, J. A. Struss at his bid price.

"Grading and paving the Goshen-Creswell Section of the Pacific Highway in Lane County. The Commission received seven bids for this work, the low one being that of Porter W. Yett, Portland, at $133,973 based on the use of asphalt. He did not submit a bid based on the use of tar. The Commission has referred the bids to the Engineer with authority to award the contract to Mr. Yett at his bid price, when certain conditions have been satisfied.

"Brogan maintenance building, on the John Day Highway at Brogan, Malheur County. R. H. Jones, Hillsboro, submitted the low bid for this work at $11,267. There were eight higher bids. The Commission has awarded the contract to Mr. Jones at his bid price.

"Grading and paving, and construction of bridges on the South Unit, Denver Avenue-Columbia Slough Section of the Pacific Highway East (N.E. Union Avenue) Portland, Multnomah County. R. A. Heintz Construction Co., Portland, submitted the low bid for this work at $329,489.60 based on the use of asphalt. He submitted no bid based on the use of tar. There were seven higher bids. The Commission has awarded the contract to the low bidder, R. A. Heintz Construction Company, at its bid price.

Senator Angus Gibson headed a delegation from Junction City which requested the improvement of the Siuslaw Highway between Junction City and Triangle Lake. Those present besides Senator Gibson were Julius Hult, lumberman; Gus Johnson, lumberman; and Melvin Clark, representing the Clark Trucking Company. Senator Gibson urged re-alignment of this section to eliminate numerous curves, and the lowering of the grade over the low pass summit, as an accommodation to the logging industry. He read aloud and presented to the Commission a brief in support of his oral arguments, which brief particularly concerned the marketing of timber attributive to the low pass district along this highway. The Engineer advised that the section of highway referred to by Senator Gibson is approximately eight miles in length. He also said that the Siuslaw Highway is an important Federal Aid Secondary Highway and that its improvement is quite high on the priority list. He roughly estimated

the cost to improve it at from $750,000 to $1,000,000, which estimate, he said, is based on rough reconnaissance, and construction of the highway on entirely new alignment to meet modern standards. He estimated the cost to make a reconnaissance survey of the section at about $1,000. As a result of discussion, the Commission authorized the Engineer to make such reconnaissance survey and to report his findings within the next sixty days, if possible.

Mr. Harry Campbell, representing Jaymar Lumber Company, Hood River, came before the Commission and requested permission to truck-haul logs over the Columbia River Highway to the town of Hood River from a point one and one-half miles west of the town. He said that this Company has about 600,000 board feet of timber to move, which will take about one month's time to complete. The Engineer advised that this matter has been investigated and it has been determined that the truck-hauling of logs over this section of highway will cause no particular interference or hazard to other highway travel, provided the loads do not exceed 50 feet overall in length. He recommended, in view thereof, approval of the request on such basis subject to the standard requirements covering such operations. The Commission approved the recommendation unanimously.

The following persons representing the Battin Parent-Teachers' Association appeared before the Commission regarding their previous request for the installation of traffic signals on S. E. 82nd Avenue, Portland, (Cascade Secondary Highway) at the following intersections: Johnson Creek Boulevard; Cornwell Street; King Road; and Fuller Road. They also requested the marking and maintaining of safety lanes across S. E. 82nd Avenue at Luther Road, Lamphere Street, Otti Road, Monterey Avenue, and Sunnyside Road. The delegation was headed by Mr. Harold F. Juedes, Principal of Battin School, and included C. E. Ingham, representing Kendall Community Church; Mrs. Ralph Schamel, representing the Enterprise-Courier, Kendall Presbyterian Church and Battin Garden Club; Mrs. E. L. James, Member P. T. A., also representing the Townsend Club; and Wade T. Slabey, representing the Garden Gate Village. Mr. Juedes strongly urged the Commission to reconsider its previous denial of their request for the signals, and stated that the information previously given to the Commission was based upon results of an investigation that was made during a period of extremely inclement weather and therefore did not correctly represent the actual conditions. He alleged that an extremely hazardous condition exists for school children who are obliged to cross the highway, six of whom, he said, were severely injured during the past year. He presented petitions signed by 324 people, requesting installation of the signals and the marking of safety lanes, and he offered the services of the Parent Teachers' Association in any way that they can be of help. He inquired whether or not the Commission has any objections to the use of a portable stop light by the P. T. A. if the final decision of the Commission with respect to their request for standard signals is to deny it.

Chairman Banfield pointed out that the Highway Commission does not have police power to control highway traffic, its authority being limited to the establishment of a speed limit, and power of enforcement being in the hands of the State Police. He suggested that the delegation present its problem to the Superintendent of the Department of State Police. He went on to explain that the State Highway Commission, when requested, causes an

investigation of conditions to be made, and if the results thereof meet established standards as set up by the National Safety Council, then the Commission will install appropriate signals, provided financial cooperation is rendered by city or county, whichever is involved. In the present instance, he said, the investigations do not reveal conditions that meet the nationally accepted standards for signals. The other members of the delegation endorsed Mr. Juedes' remarks and personally urged approval of their project. As a result of the discussion, the Commission instructed the Engineer to make another investigation to determine whether or not there has been any change in conditions since the previous investigation.

The Engineer reported that plans and specifications for the construction of the Coos Bay Section of the Oregon Coast Highway are completed and the project is ready to advertise for bids as soon as right of way features have been cleared. He advised that the construction cost as presently estimated is $13,500 more than originally estimated, and that the present estimated cost of right of way will exceed that originally estimated by about $25,000, making the current total estimated cost of the project $458,500, compared with the previous estimated cost of $420,000. He requested authority for an increased authorization of $38,500, and permission to advertise the project for bids. The Commission approved both requests unanimously, subject to clearance of right of way.

The Engineer reported a request from the Bureau of Public Roads that the state maintain in behalf of the Bureau, the recently graded 8.4-mile section of the John Day-Burns Highway between Crow Flat and Poison Creek in Harney County. He said that the Bureau of Public Roads proposes to construct an oiled surface on this section during the current year, but would like to have the grade properly maintained in the meantime, and in view of the fact that the Bureau has no maintenance force in that vicinity, it is asking the state to do the work with the understanding that the Federal Government will reimburse the state later. He recommended approval of the arrangement. The Commission approved the recommendation. (An agreement covering the matter was executed by the Commission later in the session.)

The Commission discussed a resolution from the City Council of Grants Pass requesting the widening of Sixth Street and Orchard Avenue (route of the Pacific Highway) in Grants Pass, northerly from "A" Street to the north city limits of Grants Pass, so as to provide a traveled roadway 56 feet wide between curb lines. The Engineer advised that the existing surface on this section is only 20 feet wide, and that considerable traffic congestion occurs by reason thereof. He further stated that the improvement is worthy of serious consideration in an early construction program, and requested authority to make a preliminary survey of the project, which he estimated would cost not to exceed $500. The Commission approved the request unanimously.

A request was presented from the City of Beaverton for the widening of the Beaverton-Hillsdale Highway (ORE10) between Short Street and Cedar Street in this town. The Engineer advised that this matter had the attention of the Commission at a previous meeting, and the request was denied. The city, however, is very anxious for the improvement, and has requested reconsideration by the Commission. The Commission referred the matter back to the Engineer to inspect personally and report his findings.

The Commission discussed a report from the Engineer on traffic conditions on the Pacific Highway in North Roseburg, particularly at the intersection of Garden Valley Road. According to the report there is considerable congestion of traffic at this intersection caused by heavy left-turn movements, and as a result cars back up for several blocks during peak hours. A study of conditions, he said, reveals that to remedy the situation will require the widening of the pavement at the intersection to provide for a left-turn refuge. He estimated the cost of such improvement at $4,350 and recommended the expenditure, the funds to be taken from the 1950 Minor Betterment Budget for channelization projects. The Commission approved the recommendation unanimously.

There was presented to the Commission a request from the City of Prineville for the designation of a truck by-pass around this city for logging trucks. The Engineer brought to the Commission's attention a map showing the proposed location of such by-pass, which he said is about five miles in length. He estimated the cost to construct it to standards necessary for the carrying of truck traffic at a minimum of $30,000 per mile, or a total of about $150,000. He further stated that investigation reveals that there is no apparent congestion on the existing highway in Prineville by reason of truck traffic, and he recommended that the request be denied. The Commission approved the recommendation.

The Engineer reported that the towns of Cove and Imbler have fulfilled the legal requirements with respect to the expenditure of 1947 State Tax Street Funds which they received in 1948, and that the plans for the improvements proposed to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission.

The Engineer also reported that the cities of Drain, Haines, Imbler, Long Creek and Prairie City have fulfilled the legal requirements with respect to the expenditure of State Tax Street Funds that accrued to them during the first six months of 1949, and that the plans for the projects which they propose to finance with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission.

The Engineer further advised that the cities of Barlow, Helix, Long Creek, Paisley, Taft, Umatilla and Wheeler have fulfilled the legal requirements with respect to the expenditure of State Tax Street Funds which accrued to them during the second six months' period of 1949, and plans for projects they propose to finance with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission unanimously approved the Engineer's recommendation in each instance by the adoption of the attached resolutions relative thereto, marked EXHIBITS "F", "G", and "H", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Engineer presented for the Commission's consideration four projects which he recommended for inclusion in the 1950 Special State Tax Street Fund program, as follows:

No.	City	Previous Projects 1948	Previous Projects 1949	Estimated Cost of 1950 Proposed Projects State	City	Total	Recommended for Approval
Division II							
11	Amity	None	None	$11,000	$11,600	$22,600	Yes
Division III							
12	Eagle Point	None	None	$15,000	$ - -	$15,000	Yes
13	Oakland	Yes	None	$15,00	$ 2,000	$17,000	Yes
14	Yoncalla	None	Yes	$14,000	$ - -	$14,000	Yes

He advised that if these four projects are approved by the Commission, there will remain in the 1950 Special State Tax Street Fund account a balance of $97,400, of which amount $25,000 will be kept in reserve tentatively, the balance to be programmed as soon as additional projects can be cleared. In the discussion of this matter, the Secretary reported receipt of a communication from the City of Amity requesting a loan of $8,000 of state highway funds to assist the city in financing its share of the cost of the Amity project listed above, the city to reimburse the state in four equal annual payments of $2,000 each. As the result of discussion, the Commission unanimously approved all four projects on the condition, however, that the cities concerned will advance payment of their share of the costs involved. The request of the City of Amity for a loan of funds was denied as a matter of policy.

The Engineer presented for the Commission's approval two Special State Tax Street Fund Projects in the amount of $15,000 each, to take up the balance of $30,000 remaining unspent of the $250,000 allotment for 1949. One was a cooperative project with the City of Seaside for the construction of a bridge over the Necanicum River on 12th Avenue in Seaside. the estimated total cost of which is $47,500, of which amount the City of Seaside is assuming payment of $32,500 and the State the balance. The other is a bridge project in the city of Silverton, for the replacement of the bridge over Silver Creek on James Avenue in Silverton. The estimated total cost of this project is $29,700, of which amount the City is to pay $14.700 and the State the balance. The Commission questioned the legal qualification of these projects for the funds available, and accordingly deferred action with respect to both projects pending clarification of this feature. The Engineer and Chief Counsel were instructed to analyze the projects further and render an additional report at the next meeting.

The Commission discussed a request from the City of Toledo for the installation of a flashing beacon at the intersection of the Corvallis-Newport Highway with Main Street in Toledo. The Engineer advised that this request has been investigated by the Traffic Engineer, whose report indicates that a flashing beacon at this location is not warranted. He recommended that the request be denied. The Commission approved the recommendation.

The Commission also discussed, and upon recommendation of the Engineer, denied a request from the City of Umatilla for the installation of lights on Umatilla Bridge on the Old Oregon Trail in the City of Umatilla,

which bridge is now being rebuilt. The Commission also refused approval of the installation of conduits and pole bases on this bridge, which the Engineer estimated would cost about $800, for use in the event that the City of Umatilla should elect to proceed with the illumination of this structure on its own account.

The Engineer reported that in conformity with authority previously given him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission on February 6 and 7, 1950, and asked confirmation of the awards, which was unanimously given by the Commission:

Black Bridge-Halfway Section of the Baker Homestead and Halfway Highways in Baker County. Contract awarded February 16, 1950, to the low bidder, Rush Construction Company.

Spruce Street (Myrtle Point) Bridge Section on the Coquille-Myrtle Point County Road, Coos County. Contract awarded February 17 to VaDare Construction Company, low bidder.

Installation of traffic signals in the city of Eugene. Contract awarded to C. & S. Electric Company, Eugene, on February 23.

Halsey-Crawfordsville Section of the Halsey-Sweet Home Secondary Highway in Linn County. Contract awarded March 6, 1950, to Porter W. Yett, low bidder.

Barkley Springs-Algoma Section of The Dalles-California Highway in Klamath County. Contract awarded March 7, 1950, to Peter Kiewit Sons Company, low bidder.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

1. Lindstrom Bros., Contract 3095 for construction of a bridge over the Trask River on the Oregon Coast Highway, Tillamook County, requested an extension of time of 120 days, from December 31, 1949 to April 30, 1950, within which to complete this job. They stated that the bridge structure itself has been completed, and the only work remaining to be done is completion of the handrail painting and a small amount of cement finishing, which work they have been prevented from performing because of adverse weather conditions. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct -- in fact, the contractor was ordered to postpone the painting work until suitable weather prevails in the spring. He recommended in view thereof that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

2. Babler Bros., Contract 3093 for grading and bituminous macadam surfacing on the Rosedale Section of The Dalles-California Highway, requested an additional extension of time of 28 days from October 31, 1949 to November 28, 1949, within which to complete this job. They stated that this project was completed within the specified time limit with the exception of burning operations, which the U. S. Forest Service would not permit because of dry weather conditions, this project being within the limits of the National Forest. The Engineer stated that the reason given by the contractor for overrunning the time limit is correct. He also said that failure of the contractor to complete the project within the specified time has not interfered in any way with traffic, nor has it increased the state's expense for engineering supervision. He recommended in view thereof that the additional extension of time requested be granted without penalty. The Commission approved the recommendation.

3. L. R. Kauffman, Contract 2792-A for rock production on the Waldport Section of the Oregon Coast and Alsea Highways, requested an extension of time from June 30, 1949 to November 25, 1949, within which to complete this work. He alleged that his failure to complete the project within the specified time limit was due to the fact that the commercial plant from which he obtained his materials was engaged in other work which slowed down deliveries. The Engineer advised that the delay of the contractor in completing this project has involved no loss to the state. He further stated the job was completed on October 31, 1949, in view of which it is unnecessary to grant an extension of time beyond that date. He recommended the granting of the extension of time without penalty to October 31, 1949, the actual date of completion of the project, rather than to November 25, as requested. The Commission approved the recommendation.

4. J. S. Crepeau, Contract 3235 for construction of an office building in Eugene, requested an additional extension of time from February 11, 1950 to April 13, 1950, within which to complete this job. He gave the following reasons for failure to complete the project within the previously extended time: 1) Arrangement with the Resident Engineer on the job to postpone plastering work because of extremely adverse weather conditions; 2) Extreme cold weather and snow conditions which interfered greatly with all phases of the work; 3) Necessity for the heating subcontractors to reorder specified furnace and sewer tank because of delivery in the first instance of inferior material. The Engineer advised that the reasons given by the contractor for failure to complete the contract within the previously extended time limit are substantially correct. He recommended, therefore, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

5. Perkins Bros., Contract 3016 for construction of three bridges over Sprague River on the Sprague River County Road, Klamath County, requested an additional extension of time of 150 days from December 31, 1949 to May 30, 1950, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to adverse weather conditions. The Engineer advised that the contractor was ordered to discontinue work during the winter season because

of unfavorable working conditions and the possibility that damage would occur in the placement of concrete. He further stated that two of the structures are substantially complete and can be used at such time as the approach roadways are passable. As to the third structure, he said that some work remains to be done and the approach embankment, which is being constructed by the Indian Service, has not been completed. He recommended, in view of the circumstances, that the additional extension of time as requested be granted without penalty. The Commission approved the recommendation.

6. Porter W. Yett, Contract 2768 for grading and paving the North Bend-Coos Bay Section of the Oregon Coast Highway, Coos County, requested an additional extension of time of 426 days, from September 1, 1948 to October 31, 1949, within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to failure of the cement manufacturer to furnish sufficient cement to carry on paving operations during the operating season in the coast area. In addition thereto, he alleged that there were also shortages of labor and materials, shortage of railroad cars for transportation of materials, and critical delays due to failure of the Power Company to readjust its facilities and the inability of the Water Company to reestablish its water lines. The Engineer advised that this contract was actually completed in December, 1948, but subsequent to that time it was found necessary to refinish a concrete wall at the Standard Oil Company's plant, and due to the fact that Mr. Yett could find no one to do this work until the Fall of 1949, the work was delayed until completion on October 31, 1949. For the further information of the Commission, the Engineer stated that this section of highway has been open for full traffic use since the first week in November, 1948, since which time the State Highway Department has expended very little for engineering expense. He recommended in view of the circumstances that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2768, 2792-A, 2982, 2997, 3093, 3180, 3189, 3198, 3229, and 3242, for construction of state highway projects have been completed according to the requirements of the contracts, or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "I", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that the Gardiner Lumber Company is dredging an area to be used as a storage yard, adjacent to right of way that has been acquired by the Commission for future reconstruction of the Oregon Coast Highway just north of Gardiner, and that the Company proposes to fill its property up to the highway right of way line, and if that is done the slopes from the filled area will extend approximately 24 feet onto the state's right of way. The Company, he said, has requested an easement authorizing such encroachment. The

occupancy of the right of way by the fill slopes, he said, will not interfere with the highway construction or use -- in fact, the fill will be of benefit to the highway in that it will obviate the necessity to borrow as much material to construct the highway roadbed than if the fill were not there. He recommended, in view thereof, approval of the Company's request. The Commission approved the recommendation unanimously and referred the matter to the Chief Counsel to prepare an appropriate form of easement.

Consideration was given by the Commission to a request from Martin Peterson, Florence, Oregon, for a one-year extension of time on a previous agreement with the Commission authorizing him to remove excess or reject road materials from a state-owned quarry at Cape Creek on the Oregon Coast Highway, north of Florence. Mr. Peterson agrees to pay the sum of 3¢ per cubic yard for materials removed. The Commission unanimously approved the request upon recommendation of the Engineer. (An extension agreement continuing in effect the previous agreement up to and including February 28, 1951, was signed by the Commission later in the session.)

The Commission discussed a request from the Coos Bay Dredging Company for permission to open up the center dividing strip on the Oregon Coast Highway between North Bend and Coos Bay so as to permit entrance to and exit from the Company's premises at this location. The Engineer exhibited a map showing what the Company has in mind and explained details. He said that while as a general rule he is opposed to the cutting of medial islands where such cutting can be avoided, in this particular instance, investigation indicates that unless the Commission permits the center median to be cut, the only means of exit and entrance to the Company's property would be at the driveway entrance to the abutting property of the Standard Oil Company, where sight distance along the highway is very restricted. He gave as his feeling that the company should be allowed to have access to its property as desired in this instance, and he so recommended in the interests of safety to highway traffic. The Commission approved the recommendation unanimously, subject to the condition that the Coos Bay Dredging Company will pay all costs involved.

The Commission discussed the disposition to be made of the right of way on the former route of the John Day Highway between Prairie City and Dixie Summit, Grant County, where the highway has been reconstructed on revised alignment. The Engineer recommended that a portion of the old right of way that is valueless for state highway purposes be turned over to the County Court of Grant County for future maintenance as a county road, and that other portions be retained by the state. He exhibited a map showing in color the areas to be disposed of. Following discussion, the Commission approved the recommendation and by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "J", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Consideration was given by the Commission to a request from the Coos County Court that an old bridge over Sandy Creek on the Coos Bay-Roseburg Highway, be left standing for pedestrian use and as an historical landmark, rather than removed as was originally intended when the new bridge replacing it has been constructed on revised alignment. The Engineer advised that when the Commission entered into its agreement with Coos County in January, 1949, relative to the improvement of the highway at this location, it was contemplated

that the old bridge would be destroyed, and the agreement so provides. However, the bridge has not been removed and the county is now asking that it be left standing as an historical landmark. He recommended approval of the county's request. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously with the strict understanding that hereafter Coos County assumes all jurisdiction and control over the said bridge as a part of its county road system and also assumes future maintenance of the structure and all obligations, liabilities and responsibilities relative to the use of the bridge by pedestrians and others. (Agreement signed later.)

The Secretary reported receipt of a communication from the Allen Press Clipping Bureau to the effect that hereafter their charge for service rendered to the State Highway Commission will be 7¢ per clipping, with a minimum charge of $7 per month. He stated that the former charge was only 4¢ a clipping, with no minimum charge stated, and on the basis of the new rate the charge for the month of January, 1950, would be $67.62, compared with $38.64 under the old rate. He inquired as to the Commission's wishes in the matter. After discussion, the Commission decided unanimously to cancel the service.

The Engineer reported that the State Highway Department has been asked to join with a group consisting of Oregon State College, the League of Oregon Cities, Western Section of the Institute of Traffic Engineers, and the Association of County Engineers of Oregon, which is sponsoring the Third Annual Northwest Traffic Engineering Conference, to be held this year at Oregon State College. He recalled that the first conference was held in 1948 at Oregon State College, and the State Highway Department joined in the sponsorship of such meeting; the second conference was held in 1949 at the University of Washington in Seattle and was sponsored by a comparable group from that state. Much good was accomplished, he said, at both of these conferences, and it is anticipated that considerable benefits will accrue from the conference this year. He requested permission for the Highway Department to join with the other sponsors, and advised that the expense thereof will be negligible, probably not exceeding $25 for printing and the expense of Highway Department employees attending the conference. The Commission approved the request unanimously.

The Engineer presented the application of Mr. J. E. Crayne, Portland, to truck-haul logs 18 to 24 feet long on a solo truck, over the new Columbia River Highway from Bridal Veil overcrossing to Parkrose; and the application of Mr. S. C. Harman, Troutdale, to truck-haul logs 18 feet in length on a solo truck, over this same highway from Dodson, westerly, to the present end of construction at Troutdale, thence over the old highway to Fairview Road and Gresham. He said that the operations contemplated are of short duration, and that each of these operators will use only one truck. Moreover, the hauling will consist of only about two loads per day. He recommended approval of the requests. The Commission approved the recommendation.

The Engineer reported that since the last meeting of the Commission he has ordered certain sections of highways posted for reduced weight loads, and that in certain instances he has ordered the lifting of reduced load limits heretofore in effect. He presented a list of the highways which have been newly posted and a list of those where the reduced limits have been lifted, and asked the Commission to confirm his action. (For a complete list of the highways affected, see attached resolutions, marked EXHIBITS "M-1" and "M-2.) The Commission approved the Engineer's request unanimously by the adoption of

the attached resolutions relative thereto, marked EXHIBITS "M-1" and "M-2", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Commission considered an offer from the City of Prineville to purchase two obsolete pieces of road maintenance equipment at $500 each, or a total of $1,000. The Engineer advised that this equipment consists of one 1929 model 750-gallon oiler which was built in the Highway Department Shops, and one 1927 retort. He further stated that in 1948 two similar units were advertised for sale but no bids were received, and they were again advertised on January 23, 1949, and were sold to the high bidders at $159.05 and $113.76 respectively. He recommended acceptance of the offer of the City of Prineville. The Commission approved the recommendation.

The Engineer requested authority to purchase office furniture and equipment totaling $8,985; also miscellaneous and service station equipment totaling $6,480; repair shop equipment totaling $12,500; and road maintenance equipment (on rental) totaling $247,150, as outlined in his letters to the Commission dated March 7 and March 14, 1950. He advised that provision for these expenditures is contained in the 1950 budget and if they are allowed by the Commission, there will remain unexpended balances as follows in the several accounts: repair shop equipment account, $12,350; miscellaneous and service station equipment account, $2,225; office furniture and equipment account, $21,760; and road maintenance equipment account, (on rental) $110,500. As the result of careful consideration of this matter, the Commission by unanimous vote approved immediate purchase of all the materials, as requested.

The Engineer requested authority for Mr. Malcolm H. Hawke, Auditor, to go to San Francisco at state expense to examine the records of the Western Union Telegraph Company with respect to work performed in connection with the Bridal Veil Overcrossing Project, for the cost of which the Company expects to be reimbursed. He estimated the out-of-state travel expense at $80.45.

He also requested authority for Mr. Manley Robison, Director of the Travel Department, to attend the Third Annual Northwest Resort Conference at Washington State College on April 2 to 4, estimated out-of-state travel expense, $65; and authority for Mr. Carl Jordan, Assistant Travel Director, to attend a Sportsmen and Vacation Show in Los Angeles during April 6 to 18, 1950, at an estimated out-of-state travel expense of $210. He said that the Advisory Committee on Travel Matters has recommended that Mr. Robison and Mr. Jordan attend these two functions. The Commission unanimously approved all three requests on the condition that they are also approved by Governor Douglas McKay.

The Commission confirmed out-of-state travel expenditures by the following persons, as authorized at a previous time by telephone:

W. C. Williams, Assistant State Highway Engineer, and Forrest Cooper, Right of Way Engineer, to travel to Los Angeles for conference on February 28, with Ralph B. Lloyd, re Sullivan Gulch right of way. Total estimated cost - $256.

Mark H. Astrup, Landscape Engineer, travel to attend Third Annual Roadside Development Coordinators' Conference in Columbus, Ohio, March 22 to 25. Estimated cost - $300.

George W. Hester, Assistant Office Engineer, in attendance at meeting of Oregon State Legislative Interim Committee for study of roads and streets, in Boise, Idaho, February 20 and 21. Estimated cost - $59.

The Chief Counsel reported that the City of Port Orford has fulfilled the requirements of the Commission with respect to the closing of certain streets as a condition precedent to the improvement of the Oregon Coast Highway through this town, and he recalled that the Commission, on the strength of the city's action, awarded a contract at this meeting for the construction of the project. In order fully to satisfy the legal requirements, he said, it is now necessary for the Commission to declare itself formally with respect to the street closures. He presented a form of resolution with respect thereto. The Commission by unanimous vote approved and adopted such resolution as recommended. A copy of the resolution is attached hereto, marked EXHIBIT "K", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Chief Counsel also presented for the Commission's approval an agreement with the Western Union Telegraph Company providing for the temporary and permanent reestablishment of its facilities along the Barkley Springs-Algoma Section of The Dalles-California Highway during and after the reconstruction of this section of highway by the State Highway Department. He pointed out that the agreement has been executed by the Western Union Telegraph Company and has been approved as to engineering features by Assistant State Highway Engineer W. C. Williams, and as to legal features by himself. He recommended approval by the Commission. The Commission approved and signed the agreement as submitted.

The Chief Counsel also presented a form of tri-party agreement among the State of Washington (by its Department of Highways), the State of Oregon (by its State Highway Commission), and The Pacific Telephone and Telegraph Company, with respect to use by the telephone company of the Interstate Bridge between Portland and Vancouver in connection with the operation of its telephone facilities between these two cities. He pointed out that the agreement provides for payment of $420 annually by the telephone company for the use of this structure, and that the agreement is retroactive to January 1, 1947, the retroactive feature being inserted because it has taken so long to reach a mutual agreement. The Commission approved and signed the agreement as prepared.

The Chief Counsel presented a form of resolution with respect to acquisition from the Federal Government of a tract containing 2.88 acres of land situate adjacent to the Pacific Highway West, at Camp Adair, Benton County. He recalled that the Commission previously authorized and directed him to acquire this property, which he has done, and he has received the deed, but according to the requirements of the Federal authorities, it is necessary that the Commission accept the deed by formal resolution. He presented a form of resolution for this purpose and recommended adoption of the same. The Commission approved the recommendation and by unanimous vote adopted the attached resolution covering the subject, which resolution is marked EXHIBIT "L", and by this reference is made a part hereof with like effect as though extended in full herein.

The Chief Counsel again brought up for discussion the question of the disposal of two tracts of land at Pendleton, one being state highway property adjacent to the Airport Road, and the other a small tract fronting on the old Oregon Trail within the city limits of Pendleton, which has been proposed as the site for an office building for the Secretary of State. He suggested that the Commission might wish to give some thought to the disposal of both tracts on a combination basis, and he offered the following plan. Accept the offer of the City of Pendleton to pay $1080 for the 7.2 acre tract adjacent to the Airport Road on the condition that the city deed to the state a strip of city-owned land 120 feet wide, containing about 20 acres, abutting the north right of way line of the Old Oregon Trail, westerly from the west line of the state's property near the Airport Road, which property is valued at about $100 per acre. Secure from the city, if possible, an instrument in writing to waive or surrender any claim that the city may have to the tract located within the city limits if that property is not used for park purposes, so as to release the Commission from any obligation to maintain it or develop it as a park. He suggested further that the Commission deal with the County with respect to the remaining property along the Airport Road, and deed that property to the county, provided the county will take over future maintenance and responsibility for the road, which would place the county and the city in a position to negotiate any arrangements they desire with respect to such property. He assured the Commission that such procedure is strictly legal and that the Commission can proceed on that basis without fear of unjust criticism. Commissioner Reynolds gave as his feeling that the solution suggested by the Chief Counsel is as satisfactory as is possible to obtain. Commissioner Chandler expressed himself in like manner, as did Chairman Banfield, whereupon the Chief Counsel was instructed to prepare a form of agreement in accordance therewith and submit it to the three parties for study.

The Chief Counsel, Mr. J. M. Devers, requested two weeks' time off to spend a much-needed vacation in the Hawaiian Islands. He stated that during his absence, work in his office would be attended to by his Assistants, Messrs. C. W. Enfield and Samuel Hall. The Commission unanimously approved the request.

The Chief Counsel rendered a brief progress report on the results of a conference with attorneys representing the Railroad Companies that own the Steel Bridge in Portland, regarding purchase by the state of the upper deck of this bridge. He said that these attorneys have received authority from their principals to discuss the matter with the Highway Commission and to consider any offer or proposition that the Highway Commission has to make, following which they are to submit the offer to their principals. He stated that upon his return from his vacation he will follow through with this matter and render an additional report.

The Commission had under discussion the setting of a date for its next regular meeting, and decided to hold such meeting in Portland on Monday and Tuesday, April 24 and 25, 1950. The Commission also set Monday, April 3, 1950, as the date for a special meeting to elect a new Chairman of the Commission and to pass on routine matters that accumulate in the meantime. The Secretary was instructed to arrange to hold both meetings in the Imperial Hotel, pursuant to the usual practice.

The Commission approved and signed agreements, etc. as follows:

Lease agreement between Hall & Wooden, a partnership, and the State Highway Commission covering section headquarters building in Clatskanie, Columbia County, for two year period, with option on the part of the state to extend it for additional two years at $25 per month.

Permit in favor of Charlotte E. Brown for use of land on the Brooks-Hubbard Section of the Pacific Highway.

Deed conveying small triangular tract of land just west of Newberg, on the Pacific Highway, to Dale Compton, et ux.

Lease to Civil Aeronautics Administration covering property on the Columbia River Highway, for the erection of an air beacon.

Agreement with the City of Eugene re use of state highway property in Eugene for recreational purposes.

Petition covering the vacation of a public street in the city of Reedsport.

Renewal lease with Klamath Falls City Park Commission covering stockpile site in Moore Park on Klamath Lake Secondary Highway, two miles north of Klamath Falls.

Agreement with Bureau of Public Roads for maintenance of Crow Flat-Poison Creek Section of John Day-Burns Highway, Harney County.

Extension agreement with Martin Peterson, Florence, Oregon, granting authority to take excess or reject road materials from state-owned quarry at Cape Creek on Oregon Coast Highway north of Florence.

Agreement with the City of Portland, providing for signalization of S.E. Powell Boulevard, (route of the Mt. Hood Highway). (Authorized by the Commission on December 19, 1949.)

Agreement with Lois B. and Oscar E. McDaniel, providing for lease of a borrow pit on the Pumping Plant Hill-Ontario Section of the Old Oregon Trail. Consideration $575. (Authorized by Commission February 6, 1950.)

Agreement with the City of Port Orford, amending previous agreement dated June 14, 1949, relative to closure of certain streets in connection with improvement of Oregon Coast Highway through the city. (Authorized by the Commission on February 6, 1950.)

Bargain and sale deed conveying unto Henry A. Kellas and wife, small parcel of land on US99W just west of the city of Newberg. (Authorized by Commission on June 27, 1949.)

Resolution amending previous resolution with respect to the abandonment of the Sandy Creek Section of the Coos Bay-Roseburg Highway, so as to preserve an existing covered bridge as an historical landmark. Recommended by Engineer and Chief Counsel.

March 21, 1950

Agreement between the State and Western Union covering the temporary and permanent revision of Western Union lines on the Barclay Springs-Algoma Section of The Dalles-California Highway in Klamath County.

Agreement with U. S. Secretary of Agriculture whereby there was made available to the State certain real property acquired or to be acquired by the United States in connection with the Central Oregon Grazing Project OR-LU-2, is hereby further amended and supplemented by adding to "Exhibit A" certain additional lands situated within the aforesaid project.

Agreement with The Pacific Telephone and Telegraph Company granting permission to install, fasten and suspend to and from the Interstate Bridge the Company's cables and other facilities used in connection with its lines communication.

The meeting adjourned at 5:00 p.m.

Minutes of March 20 and 21, 1950

EXHIBIT "A"

Minutes of March 20 and 21, 1950

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

NORTHEAST UNION AVENUE SECTION, PACIFIC HIGHWAY EAST

14767- Pacific First Federal Savings and Loan Association, and Wesley Grant
Right of Way (Boone)
Option expires September 8, 1950

2.167 acres at $1,000.00	$ 2,167.00	
2.0 acres at $2,500.00	5,000.00	
Allowance- loss trailer space, concrete slab, curbing, lawn, utility connections	1,100.00	
- abandoned sewer and water lines (800 feet)	580.00	
- 4 electric light poles $7 each and moving trailer court electric sign	328.00	
- service station, fixtures, equipment	16,908.00	
- moving shop building	1,000.00	
- 800 feet sewer drain-off line left in ground at $1.50 ft.	1,200.00	
- damages - for severance, taking access, loss business, etc.	3,142.00	
Amount to be paid owner		$ 31,425.00
Amount chargeable to Right of Way		31,425.00

Access controlled.

(Cont.)

March 20, 1950

NORTHEAST UNION AVENUE SECTION, PACIFIC HIGHWAY EAST (Cont.)

STATE to: Construct access road from Union Ave. to grantor's remaining property, Engr.Sta. 105+30 (Estimated)	$ 2,500.00	
Extend present sewer drain-off line into Columbia Slough (Estimated)	250.00	
Amount chargeable to Construction		$ 2,750.00
GRAND TOTAL (Estimated)		34,175.00

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY- UNIT #2

15810- Meaney, Mary E. (Boone)
Right of Way
Option expires August 4, 1950

5,000 sq.ft. at 25¢ sq.ft.	1,250.00	
Amount to be paid owner		1,250.00
Amount chargeable to Right of Way		1,250.00

Takes all.

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY (DOERNBECHER ACCESS ROAD) - UNIT #2

15799- Kenney, Walter A. (Witt)
Right of Way
Option expires August 20, 1950

13,785 sq.ft. at 25¢ plus sq.ft.	3,500.00	
Amount to be paid owner		3,500.00
Amount chargeable to Right of Way		3,500.00

Takes all.

15796- M & M Woodworking Company (Witt)
Right of Way
Option expires August 26, 1950

6,880 sq.ft. at 25¢ sq.ft.	1,720.00	
Allowance- moving small house and garage with lean-to	1,000.00	
Amount to be paid owner		2,720.00
Amount chargeable to Right of Way		2,720.00

Access not controlled

STATE to construct an adequate connection at grade between Doernbecher access road and the M & M Woodworking Company access road, for freight hauling (Estimated)	150.00	
Amount chargeable to Construction		150.00
GRAND TOTAL (Estimated)		2,870.00

VIENTA-HOOD RIVER SECTION, COLUMBIA RIVER HIGHWAY

15312- Huard, Wm. G. ⊕ (See Footnote) (Benson)
Right of way
Option expires May 23, 1950

7.0 acres at $1,000.00 **	$ 7,000.00	
108.0 acres at $20.00	2,160.00	
Allowance- buildings and service station	18,500.00	
- concrete fish ponds and fish	3,500.00	
- outdoor fireplaces, drinking fountain, gasoline pumps, etc.	1,340.00	
- water system	2,500.00	
Amount to be paid owner		$ 35,000.00
Amount chargeable to Right of Way		35,000.00

Access controlled.

** Owners reserve water from spring for domestic use, 1-inch pipeline under highway, Engr. Sta. 787+90

NEHALEM HILL SECTION, OREGON COAST HIGHWAY

15915- R. C. Rasmussen, and Loretta Rasmussen (Boone)
Right of Way
Option expires August 15, 1950

0.10 acre	25.00	
Allowance- 8 rods fence at $4.00 per rod	32.00	
Amount to be paid owner		57.00
Amount chargeable to Right of Way		57.00

Access not controlled.

15867- Mead, Lee and Helena Mead (Boone)
Right of Way
Option expires August 15, 1950

1,050 sq.ft.	25.00	
Amount to be paid owner		25.00
Amount chargeable to Right of Way		25.00

Access not controlled.

15866- Adams, Cleve and Clara Adams (Boone)
Right of Way
Option expires September 1, 1950

192 sq.ft.	15.00	
Amount to be paid owner		15.00
Amount chargeable to Right of Way		15.00

Access not controlled.

(Cont.)

NEHALEM HILL SECTION, OREGON COAST HIGHWAY (Cont.)

15868- Johns, Robert A. (Boone)
Right of Way
Option expires September 1, 1950

5,000 sq.ft. at 4¢ sq.ft.	$ 200.00	
Amount to be paid owner		$ 200.00
Amount chargeable to Right of Way		200.00

Access not controlled (takes all).

15869- Johns, Raymond L. (Boone)
Right of Way
Option expires September 1, 1950

9,800 sq.ft. at 4¢ sq.ft.	392.00	
Allowance- damages	47.40	
Amount to be paid owner		439.40
Amount chargeable to Right of Way		439.40

Access not controlled.

SOUTH COMMERCIAL - SOUTH LIBERTY STREETS (SALEM) SECTION, PACIFIC HIGHWAY

15909- Randall, Benjamin M. and Edna F. Randall (Benson)
Right of Way
Option expires September 5, 1950

1 lot (50x100')	1,500.00	
Amount to be paid owner		1,500.00
Amount chargeable to Right of Way		1,500.00

Takes all.

15891- Snider, Fred M. and Beulah K. Snider (Benson)
Right of Way
Option expires June 29, 1950

FOOTNOTE: (#)

File #15,312, purchase of right of way from Wm. G. Huard for the Vento-Hood River Section of the Columbia River Highway:

The Chief Counsel reported that Mr. Huard has changed his mind since signing the option and is demanding redemption of a small portion of the property and access to the highway from such parcel, so it may be that he will not accept settlement on the basis of the option. The Commission decided unanimously not to grant the access and instructed the Chief Counsel to settle with Mr. Huard exactly on the basis of the option, otherwise to bring suit for specific performance thereof.

EXHIBIT "B-1"

Minutes of March 20 and 21, 1950

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the Sullivan Gulch Highway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation of motor vehicles promoted, and highway travel in general safeguarded, the parcels of real property hereinafter described are necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there are needed and required, and are being appropriated for right of way of the Sullivan Gulch Highway, for the purpose of establishing, constructing and maintaining a throughway, the following-described parcels of real property, to-wit:

File No. R 14703
Owner: Superbilt Manufacturing Co., Inc., a corporation of Oregon

A parcel of land in Section 36, Township 1 North, Range 1 East of Willamette Meridian, Multnomah County, Oregon, being more particularly bounded and described as follows:

(Cont.)

EXHIBIT "B-1" (Cont.)

Beginning at a point on the north line of N. E. Holladay Street, 650 feet west of the intersection of the north line of N. E. Holladay Street and the west line of N. E. 28th Avenue as said street and avenue are now laid out in the City of Portland; running thence west along the north line of N. E. Holladay Street 200 feet; thence north along a line parallel to the west line of N. E. 28th Avenue to the southerly right of way line of the Oregon-Washington Railroad and Navigation Company; thence easterly along said southerly right of way line to a point 650 feet west of the west line of N. E. 28th Avenue; thence south to the place of beginning.

The parcel of land to which this description applies contains 0.52 acre.

File No. R 14705
Owner: Milton D. Tarlow

A parcel of land lying in Section 36, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and being all of the following described property: That tract of land which was conveyed by that certain deed to Milton D. Tarlow, recorded in Book 735, Page 147 of Multnomah County Record of Deeds; the said parcel being described as follows:

Beginning at a point in the north line of N. E. Holladay Street 350 feet west of the west line of N. E. 28th Avenue in the City of Portland; running thence westerly along the north line of N. E. Holladay Street 100 feet; thence northerly on a line parallel with the west line of N. E. 28th Avenue to the southerly line of the right of way of the Oregon-Washington Railroad & Navigation Company; thence easterly along the southerly line of said right of way to the point of intersection of the southerly line of said right of way with a line drawn northerly from the place of beginning and parallel with the westerly line of N. E. 28th Avenue; thence southerly on a line parallel with the westerly line of N. E. 28th Avenue to the place of beginning.

The parcel of land to which this description applies contains 0.32 acre.

File No. R 14728
Owners: Dan Noren and Myrtle Noren, husband and wife

A parcel of land lying in Section 35, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon; the said parcel being Lot 8, Block 38, Sullivan's Addition to the City of East Portland, Oregon, containing 5,000 square feet.

(Cont.)

EXHIBIT "B-1" (Cont.)

File No. R 14879
Owner: Simica Milich

A parcel of land lying in Block 38 of Sullivan's Addition to the City of Portland, Oregon, situated in Section 35, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon; the said parcel being Lot 2, Block 38, Sullivan's Addition to the City of East Portland, Oregon, containing 5,000 square feet.

2. That the highway facility for which the aforesaid parcels of real property are required and are being taken, has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcels of property, as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcels of real property.

4. That upon the trial of any suit or action instituted to acquire the said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twentieth day of March, 1950.

EXHIBIT "B-2"

Minutes of March 20 and 21, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Pacific Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate in part and to widen the Goshen-Creswell Section of said highway, and for such purposes, and in connection therewith, the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Pacific Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocating in part and the widening, construction, and maintenance of the Goshen-Creswell Section of the Pacific Highway a parcel of real property located in Lane County, Oregon, and described as follows, to-wit:

> A parcel of land lying in the East half ($E\frac{1}{2}$) of Section 26, Township 18 South, Range 3 West, W. M., Lane County, Oregon, and being a portion of the following described property: That tract of land which was conveyed by that certain deed to Bradford T. Bowles, recorded in Book 273, Page 317 of Lane County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land variable feet in width, lying on each side of the center line of the Pacific Highway as said highway has been relocated, which center line is described as follows:
>
> Beginning at a point which is Engineer's center line Station 58+48.73 opposite and 75 feet distant from which point the westerly line of the said strip of land intersects the northerly line of

(Cont.)

EXHIBIT "B-2" (Cont.)

said property; said point being 2274.9 feet south and 246.5 feet east of the southeast corner of the Silas Severin D. L. C. #41, Township 18 South, Range 3 West, W. M.; thence South 10° 44' 30" West 4188.6 feet; thence on the arc of a spiral curve to the left (the long chord of which bears South 10° 04' 30" West) 400 feet; thence on the arc of a 5729.58 foot radius curve to the left (the long chord of which bears South 5° 18' 30" East) 686.67 feet to Engineer's center line Station 111+24 approximately at which Station said center line crosses the south line of Section 26.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to Station	Total Width	Width on Westerly Side of Center Line	Width on Easterly Side of Center Line
58+48.73	70+00	250	75	175
70+00	111+21.46	Variable	To existing highway	175

The parcel of land to which this description applies contains 36.55 acres, of which 4.35 acres lie within the existing right of way, title to which hereby is alleged to be in the public, and 32.20 acres lie outside of the existing right of way.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the State Highway Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to acquisition of fee simple title to the aforesaid described property, it is necessary that there be acquired all easements and rights of access, and all rights of ingress, egress, and regress from and to the remaining land to the larger tract, of which the above-described property is a part, and the above-described property, and any highway now or hereafter constructed thereon, except that there shall be reserved unto the owners of said remaining property rights of access for two approaches not to exceed twenty-five feet in width to the said Pacific Highway, one approach to be located on the easterly side of said relocated and improved Pacific Highway opposite Highway Engineer's center line Station 86+25, the other approach to be located on the easterly side of said relocated and improved Pacific Highway at a point to be later designated by the Chief Counsel for the State Highway Commission. The State shall have the right at its option to build at any future time at its sole cost an outer highway upon right of way now owned or later to be acquired by the State, and upon construction of such outer highway, the said rights of access for the said two approaches to the relocated and improved Pacific Highway herein reserved shall terminate and cease, and the owners of said remaining property shall thereupon have access to the outer highway. Said outer highway shall be connected to the main highway only at such point or points as the State of Oregon may designate.

EXHIBIT "B-2" (Cont.)

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twentieth day of March, 1950.

EXHIBIT "B-3"

Minutes of March 20 and 21, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Sunset Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen and improve the Sylvan Section of the Sunset Highway, and to construct and maintain an approach or connecting road between said highway and Raab Road, Multnomah County Road No. 1138-E, and S. W. Scholls Ferry Road, Multnomah County Road No. 1202, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLTED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, construction, and maintenance of the Sylvan Section of the Sunset Highway and the construction and maintenance of an approach or connecting road between said highway and Raab Road, Multnomah County Road No. 1138-E, and S. W. Scholls Ferry Road, Multnomah County Road No. 1202, a parcel of real property located in Multnomah County, Oregon, and described as follows, to-wit:

A parcel of land lying in Section 6, Township 1 South, Range 1 East, W. M., Multnomah County, Oregon, said parcel being that tract of land which was conveyed by that certain deed to Mary E. Baker, recorded in Book 890, Page 528 of Multnomah County Record of Deeds, which tract is a portion of that certain tract of land described in deed recorded in Book 429, Page 471, Deed Records of Multnomah County, Oregon, and known as the Whitham Tract in the Nathan B. Jones D. L. C. in Section 6, Township 1 South, Range 1 East, W. M., in the County of Multnomah and State of Oregon, and more particularly described as follows:

(Cont.)

March 20, 1950

EXHIBIT "B-3" (Cont.)

Beginning at the southwest corner of the said Whitham Tract, said point being North 1249.53 feet and East 1241.15 feet from the southwest corner of Section 6, Township 1 South, Range 1 East, W. M.; thence North 89° 50' East 254.83 feet; thence North 0°58' West 88.17 feet to the south line of the Tualatin Valley Highway (County Road No. 1138); thence along the south line of said highway on a 2824.79 foot radius curve to the left (the long chord of which bears South 86° 02' 12" West) 274.05 feet to the east line of Raab Road; thence South 38° 41' West along the east line of said Raab Road, 8.85 feet to the westerly line of said Witham Tract; thence South 22° East along said westerly line 68.02 feet to the point of beginning.

The parcel of land to which this description applies contains 21,854 square feet.

2. That the highway facilities for which the aforesaid property is required and is being taken have been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owner.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twentieth day of March, 1950.

EXHIBIT "C"

Minutes of March 20 and 21, 1950

RESOLUTION

WHEREAS, the State Highway Commission by authority of Section 100-113, O.C.L.A. as amended by Chapter 359, Oregon Laws 1947, is authorized and empowered to appoint an auditor who as to qualifications shall be a certified public accountant and who shall in all other respects be qualified for such position and who on qualifying shall give to the State of Oregon a fidelity bond in an amount fixed by the Commission but which shall be not less than $100,000, executed by a corporate insurance company authorized to transact business within this state shall be charged with the duty of handling the fiscal affairs of the Commission; and

WHEREAS, it is provided in and by said law that the Commission may authorize said auditor to employ such necessary assistants and other help as may be necessary for the proper and efficient performance of all of the duties and obligations of the position, the salaries of the auditor, his assistants and other help to be fixed by the Commission; and

WHEREAS, it is by said law provided that the bond furnished by said auditor shall be conditioned upon the faithful discharge by the auditor of the duties of his position, the faithful performance by all persons employed by him of their duties and trusts and conditioned further on the transfer and delivery to his successors or any other person designated by the Commission of all monies, books, papers, records and other articles or effects belonging to the position of auditor; and

WHEREAS, the Commission upon inquiry into and examination of the experience, training and other qualifications of Malcolm H Hawke is of the opinion that he is fit, qualified and competent to serve as auditor within the meaning and purpose of said law.

NOW THEREFORE, be it and it hereby is resolved and ordered by this Commission, all members being present and voting affirmatively:

1. That Malcolm H. Hawke be and he hereby is appointed to fill the position of auditor to serve at the pleasure of this Commission but who may not serve for a longer time than four years without reappointment by the Commission.

2. Said Malcolm H. Hawke shall, before entering upon the duties of said position, give to the State of Oregon a fidelity bond executed by a competent insurance company licensed to transact the business of surety within this state, which bond shall be in the penal sum of $100,000 00 and shall be in form satisfactory to the Commission; said bond shall be conditioned upon the faithful discharge by the auditor of the duties of his position and shall be conditioned further upon the faithful performance by the persons employed by him of their duties and trusts and shall also be conditioned upon the trans-

(Cont.)

fer and delivery to his successor or to any other person designated by the Commission of all monies, books, papers, records and other articles or effects belonging to the position.

3. Upon qualifying as required by law and as prescribed herein, said Malcolm H. Hawke may enter upon the duties of his position and may employ such assistants and other help as may be necessary for a proper and efficient performance of the duties and obligations of the position. The salaries of such assistants and other help shall be in keeping with the salaries fixed by the Civil Service Board but nevertheless shall be subject to the approval of the Commission.

4. Said auditor shall, for the performance of the duties of his position, receive a salary of $560.00 per month, and shall, in addition, receive his necessary travel expense. Said salary shall be subject to change by the Commission.

5. The auditor shall be responsible to the Commission for the proper and efficient handling of all fiscal affairs of the Commission and shall make monthly reports to the Commission in which there shall be disclosed the status of the finances including all assets and obligations. Said auditor is expressly directed to incorporate in such reports information with respect to all unperformed and unliquidated financial obligations existing by reason of contracts to which the State by and through its Highway Commission is a party.

6 In addition to the duties prescribed in said law and in this resolution and order, said auditor shall perform such other duties not inconsistent with the statute which he may be required to do and perform by the Commission.

This resolution shall be entered in the records of the minutes of the Commission as of March 20, 1950.

EXHIBIT "D"

Minutes of March 20 and 21, 1950

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

CHROME PLANT-CEDAR POINT SECTION
of the OREGON COAST HIGHWAY in
COOS COUNTY,

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission, and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the above mentioned section of state highway, particularly between Engineer's Station 686+00 and Engineer's Station 808+00, together with the maps, field notes and other engineering data submitted by the Engineer, hereby is approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. It is further ordered that the said route and the survey of the same hereby are adopted as the route and location of the OREGON COAST HIGHWAY between the above described points.

3. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

4. That this resolution be entered in the minutes and records of the Commission as of the twentieth day of March, 1950.

March 20, 1950

EXHIBIT "E"

Minutes of March 20 and 21, 1950

R E S O L U T I O N

WHEREAS, when the citizenry of the State of Oregon through its legislature created its State Highway Commission, that citizenry recognized that the building of public highways was destined to become one of the most important activities in which governments, either state or federal, can engage; and

WHEREAS, that same citizenry gave thought to the idea that only to men, great men, trained men, men of keen judgment, men of strong intellect and integrity, could there be entrusted the entire responsibility incident to the job at hand, and hence the qualifications prescribed called for men to whom monetary award has no appeal but to whom the only satisfying compensation is the knowledge of a job well done; and

WHEREAS, the men who from the beginning of highway development in Oregon have served their state and their country as members of the State Highway Commission have been men who have brought to the state, to its industries and to its institutions, success and honorable achievement; and

WHEREAS, T. H. Banfield has for the past seven years served as Chairman of that Commission during which time he has generously devoted his time, his talents, his judgment and his good will to his state, his country and the cause to which he so generously pledged himself; and

WHEREAS, at the close of seven years of faithful, conscientious service it may fittingly and rightly be said of T. H. Banfield, "He accomplished much because he was not concerned with who got the credit."

NOW, THEREFORE, we, the undersigned members of the Oregon State Highway Commission, speaking for ourselves, for the members of the Highway Department and for the citizenry of the entire State of Oregon, hereby resolve;

That as Commissioners we express and extend to our mutual friend and co-worker, T. H. Banfield, our sincere and heartfelt appreciation of the great privilege which we have shared and enjoyed while serving with him as a member of the Oregon State Highway Commission;

That for the Department and the citizenry of the State we recognize the high standard of leadership that he has eminently and faithfully given to the building of highways and, therefore, the building of Oregon during his service for the past seven years;

(Cont.)

EXHIBIT "E" (Cont.)

That for ourselves and the people of Oregon we express sincere regret that Mr. Banfield found it necessary to decline acceptance of reappointment for another three years tendered him by His Excellency, Governor Douglas McKay;

That we remind Portland's First Citizen of 1949 and Oregon's outstanding Chairman of its Highway Commission for the past seven years that his leadership, his fidelity and his contribution to the building of better highways will constantly remind the people of Oregon of its unpaid debt to a great public servant;

That this resolution be entered in the permanent records of the Commission as of the twentieth day of March, 1950, and a copy be appropriately embossed and presented to the Honorable T. H. Banfield.

Minutes of March 20 and 21, 1950

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Cove	$ 1,372.62
Imbler	778.25

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 21st day of March, 1950.

March 21, 1950

EXHIBIT "G"

Minutes of March 20 and 21, 1950

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the first six month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Drain	$ 2,092.95
Haines	800.25
Imbler	386.33
Long Creek	505.19
Prairie City	1,487.99

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 21st day of March, 1950

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the second six month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Barlow	$ 146.91
Helix	517.00
Long Creek	672.38
Paisley	669.56
Taft	1,381.49
Umatilla	2,099.08
Wheeler	731.71

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 21st day of March, 1950.

EXHIBIT "I"

Minutes of March 20 and 21, 1950

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2768 with Porter W. Yett for grading and paving on the North Bend-Coos Bay Section of the Oregon Coast Highway in Coos County, completed October 31, 1949.

Contract No. 2792-A with L. R. Kauffman for furnishing crushed materials in stockpiles on the Waldport Section of the Oregon Coast and Alsea Highways in Lincoln County, completed October 31, 1949.

Contract No. 2982 with T. W. Thomas for grading and oil mat surfacing on the Campbell Ranch-Gerking School Section of the Athena-Holdman and Havana-Helix Secondary Highways in Umatilla County, completed July 19, 1949.

Contract No. 2997 with C. J. Eldon for regrading, surfacing and oiling on the Yellow Creek-Calapooya Creek Section of the Elkton-Sutherlin Secondary Highway in Douglas County, completed September 30, 1949.

Contract No. 3093 with Babler Bros. for grading and bituminous macadam surfacing on the Rosedale Section of The Dalles-California Highway in Klamath County, completed November 28, 1949.

Contract No. 3180 with D. F. McKenzie for oil mat surfacing on the Jamieson-Vale Section of the John Day Highway in Malheur County, completed October 5, 1949.

Contract No. 3189 with Western Golf Course Supply Company for landscaping on the North Medford-Crater Lake Junction Section of the Pacific and Crater Lake Highways in Jackson County, completed November 30, 1949.

Contract No. 3198 with J. C. Compton Co. for reoiling and rock production on the Cave Junction Section of the Redwood and Oregon Caves Highways in Josephine County, completed December 20, 1949.

(Cont.)

EXHIBIT "I" (Cont.)

Contract No. 3229 with Alan A. Siewert for constructing state highway maintenance building at Stayton, completed February 28, 1950.

Contract 3242 with F. H. McEwen for furnishing crushed materials in stockpiles on the Bandon-Brush Creek Section of the Oregon Coast Highway in Curry and Coos Counties, completed February 8, 1950.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "J"

Minutes of March 20 and 21, 1950

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the John Day Highway No. 5 known as the Prairie City-Dixie Summit Section in Grant County, the westerly terminus of which is at highway engineer's station 0+00 of the John Day Highway and the easterly terminus of which is at highway engineer's station 452+00 of the reconstructed line, in Section 10, Township 12 South, Range 34 East, W. M.; and

WHEREAS, by reason of the relocation of said section of said highway, a portion or unit of the right of way of the highway, as formerly located, has been eliminated and is no longer within the right of way boundaries of the new location, which eliminated section or area is no longer needed for highway purposes; and

WHEREAS, Grant County and the Highway Commission have heretofore entered into an agreement under date of January 25, 1950, relating to the use to be made of and jurisdiction over the abandoned section; and

WHEREAS, the contract for the construction of the relocated section of the John Day Highway has been completed and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the area and section of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portion of the old right of way which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between highway engineer's station 199+80 and highway engineer's station 452+00 of the relocated Prairie City-Dixie Summit Section of the John Day Highway, which area is identified and shown colored in red on map filed in the office of the State Highway Commission and marked "Exhibit A" and by this reference made a part of this resolution, is hereby abandoned as any part of the right of way of said highway. All of said abandoned section of the right of way of said John Day Highway shall be maintained as a county road by the County Court of Grant County in accordance with said State-County agreement. The Commission hereby surrenders all jurisdiction over said county road and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Grant County. Said road shall thereafter be maintained by the County for such public use as the County may determine.

(Cont.)

EXHIBIT "J" (Cont.)

2. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. It is the judgment and finding of the Commission that all of the area colored in green on said Exhibit is and will be needed for highway right of way and for highway construction, improvement, maintenance, and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Grant County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned section of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes.

EXHIBIT "K"

Minutes of March 20 and 21, 1950

R E S O L U T I O N

WHEREAS, that highway designated as the Oregon Coast Highway, otherwise known and designated as State Highway No. 9, is a state highway under the jurisdiction and control of the State Highway Commission; and

WHEREAS, pursuant to the provisions of Section 100-122, O.C.L.A., the Highway Commission has heretofore, by order made and entered in its official records, selected and designated a portion of Oregon Street, in the City of Port Orford, Oregon, as a portion of the route of the said highway through the said city; and

WHEREAS, under the provisions of Section 100-125a, O.C.L.A., the Highway Commission is permitted and authorized, whenever the Commission shall have selected and designated a street or streets over which to route a state highway within an incorporated city, to close any street at the point where the same intersects or is intersected by the street or streets designated as the route of a state highway, by formal agreement with the municipal authorities of a city set out in a resolution or ordinance of the city designating the particular street or streets to be closed by name and intersection; and

WHEREAS, by agreement dated the 14th day of June, 1949, by and between the State of Oregon, by and through its State Highway Commission, and the City of Port Orford, as the same was amended and modified by an agreement dated the 8th day of March, 1950, the said City of Port Orford agreed to adopt and enforce ordinances or charter provisions or other requirements for the closure and dead-ending of the following streets where the same connect with the Oregon Coast Highway:

(a) Seventh Street on both sides of the Oregon Coast Highway;
(b) Fifteenth Street, on the east side of the Oregon Coast Highway;
(c) Seventeenth Street on the east side of the Oregon Coast Highway;

and

WHEREAS, on the 8th day of March, 1950, the Common Council of the City of Port Orford duly adopted City Ordinance No. 130, which provided for and authorized the closure of the above named streets at the point of their respective intersections with the Oregon Coast Highway, upon completion of the proposed project for improvement of the said highway within the said city; and

WHEREAS, the Highway Commission has given due and careful consideration to the matter, based upon the reports and recommendation of the

(Cont.)

EXHIBIT "K" (Cont.)

Chief Highway Engineer and the Traffic Engineer, and based also upon knowledge of existing traffic conditions,

NOW, THEREFORE, based upon the foregoing recitals of existing facts, it is hereby resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That it hereby is found and declared that the entry and exit of vehicles to and from the Oregon Coast Highway at the above named street intersections impairs the free and safe flow of traffic using said highway and tends to and does create dangerous and hazardous traffic conditions.

2. That the closure and dead-ending of the above named streets, where the same intersect with the Oregon Coast Highway, is necessary to the safety of the general public, and will contribute to a more expeditious and orderly movement of traffic on the said highway.

3. That the above named streets be closed and dead-ended by constructing or erecting curbs or other suitable barriers at the point where said streets intersect with the Oregon Coast Highway during and as a part of construction of said improvement project, and that said streets be closed and dead-ended of record as of the date the Commission adopts a resolution accepting said project.

4. That the Secretary be and he hereby is instructed to furnish said City Officials with a duly certified copy of this resolution.

5. That this resolution be entered in the minutes and records of the Commission as of the twenty-first day of March, 1950.

EXHIBIT "L"

Minutes of March 20 and 21, 1950

R E S O L U T I O N

WHEREAS, the Commission has heretofore found and declared that the acquisition of certain parcels of real property, title to which was vested in the United States of America, were, and they now are, necessary and needed in connection with the permanent improvement of the Pacific Highway West, U.S.99W, and in particular with that portion of said highway located in Benton and Polk Counties, and

WHEREAS, the Commission has heretofore authorized and directed its Chief Counsel, J. M. Devers, to apply to the proper agency of the United States of America for the acquisition of said real properties, and

WHEREAS, acting under said authority, the Chief Counsel, J.M. Devers, has made application to the United States of America under Section 17 of the Federal Highway Act approved November 9, 1921 (42 Stat. 212) to acquire approximately 2.88 acres of land for said purposes which said land has been conveyed by quitclaim deed executed by the United States of America, acting by and through Jess Larson, Administrator of General Services Administration, under date of February 23, 1950, and which deed describes in particularity a parcel of land lying in Section 30, Township 10 South, Range 4 West, W.M., Benton County, Oregon, and being a portion of the lands conveyed by that certain deed to the United States, dated June 9, 1942, and recorded in Book 100, at Page 288 of the Benton County Record of Deeds, and

WHEREAS, it now is desired by the Commission to ratify all things heretofore done in connection with the acquisition of said land and to accept the said deed in accordance with all the terms and conditions therein contained.

NOW, THEREFORE, Be it Resolved that the Commission does hereby accept the delivery of the said quitclaim deed in accordance with all of the terms and conditions therein contained and does hereby approve and ratify all things and acts heretofore done by the authorized representative, or representatives, of this Commission in connection with the said acquisition.

Be it Further Resolved that the said deed be placed on record in the Deed Records of Benton County, Oregon, and that thereafter the appropriate officer of the United States of America be informed in full as to the recording reference, or references, of the said instrument.

Be it Further Resolved that this Resolution shall be entered in the minutes and records of the Commission as of this 21st day of March, 1950, and that two certified copies thereof be furnished to Harold W. Anderson, Assistant Regional Counsel, Real Property Division, General Services Administration, Seattle 4, Washington.

ORDER REDUCING MAXIMUM LOAD LIMITS

ON CERTAIN STATE HIGHWAYS

WHEREAS, the highways and sections of highways hereinafter set forth or described have been duly designated and declared to be and are state highways and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways; and

WHEREAS, said highways and sections of highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highways and sections of highways during the present period of freezing and thawing, and in order to protect said highways and sections of highways against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Highway Commission finds that it will be for the best interests of said highways that the maximum weights permitted and authorized by law be reduced during such period; and

WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon said highways and sections of highways during said period shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said highways and sections of highways were not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said highways and sections of highways that the maximum total weight of load and vehicle which shall be permitted upon said highways and sections of highways during the said period, commencing on the dates hereinafter specified, shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle or combination of vehicles which shall be permitted upon any of the following listed highways or sections of highways shall not exceed 11,000 pounds gross on any single axle nor 20,000 pounds gross on any pair of tandem axles nor a maximum of 36,000 pounds gross on all axles of the vehicle or combination of vehicles:

RESOLUTION LIFTING REDUCED LOAD LIMITS ON VARIOUS STATE HIGHWAYS

WHEREAS, on the 6th day of February and on the 21st day of March, 1950, at meetings of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted resolutions reducing the maximum load limit on various state highways and sections of state highways; and

WHEREAS, subsequent to the passage of the said resolutions, conditions have changed so that it no longer is necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolutions.

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit as set forth in the said resolutions of February 6 and March 21, 1950, on various state highways or sections thereof, to-wit:

		Weight violations. Engineer reports negligence in Southern Oregon Justice Courts. No action.
		Weight violations. Lakeview. Engineer reports that Justice of Peace has discouraged writing citations. No action.
		Hood River County. Mt. Hood Hwy. Construction of new bridge over White River. Action deferred.
		Clackamas County. Woodburn-Estacada Secdy. Hwy. Improvement along Dubois Creek survey. Action deferred.
17055		Clatsop County. Warrenton. Footpath along Fort Stevens Secdy. Hwy. and Oregon Coast Hwy. Construction approved.
		Lane County. Improvement of Mohawk Valley-Marcola County Road. Lane County Court to handle.
		Marion County. Silverton. Request for flashing beacon at Church Street and Cascade Hwy. denied.
		Umatilla County. Milton. Traffic light at Main Street denied. Installation of traffic island considered. Action deferred.
		Josephine County. Grants Pass. Request of California and Oregon Coast Railroad Company for two crossing signals denied.
17056		Lake County. Lakeview. Full width street paving on two state highways requested. Request denied.
		Contracts. Engineer reports award of contracts referred to him.
		Extensions of time. Contract 3280.

Page	Date 1950	Subject
	July 26	
17057		Contracts completed. 3082, 3115, 3267, 3269, 3280, 3306, 3310, 3351, 3352. See Exhibit "A".
		Surveys. Engineer requests authority to conduct surveys. Action deferred.
		Lincoln County. Oregon Coast Hwy. No parking on shoulders near Devil's Lake approved. See Exhibit "B".
		Crook County. Prineville. Reduced speed zones approved. See Exhibit "C-1" and "C-2".
		Grant County. John Day Fossil Beds. Erection of text board approved.
17058		Travel Advisory Committee. Appointment of Ralph A. Coan and George M. Henderson approved.
		Travel budget. Budget referred back to Advisory Committee.
		Jackson County. Sams Valley Secdy. Hwy. Abandonment of part approved. See Exhibit "D".
		Linn County. Albany-Santiam Hwy. Request for reduced speed zone denied. Erection of curve signs approved.
17059		State Tax Street Funds. Apportionment approved. See Exhibit "E".
		Benton County. Corvallis. City claims commitment made for construction of 99W north of city. Secretary to search records.
		Deschutes County. Bend. Rerouting of The Dalles-California Hwy. discussed. Action deferred.
		Salem. Marion Street bridge piers. State Construction Company deny liability in their contract default.
		Hood River County. Hood River. Lofts and Son protest highway improvement. Referred to Commissioner Reynolds.
17060		Ralph Watson discusses highway folio. Sending to legislators authorized if approved by Commissioners Reynolds and McIver.
		Agreements and other papers signed.
	July 27	
		Commission leaves Wallowa Lake and motors to Baker. Island City F.A.S. road inspected.
17061		Ladd Canyon section of the Old Oregon Trail inspected. Commission motors to Ontario and inspects Snake River bridges.
	July 28	
		Commission motors to Jordan Valley and Burns. Inspects highways enroute.
		Harney County. Burns. Delegation requests a number of highway improvements. No action.
	July 29	
17062		Commission motors to Bend, Salem and Portland inspecting highway facilities enroute.
17063		EXHIBIT "A". Completed contracts accepted.
17065		EXHIBIT "B". No Parking resolution. Lincoln County
17067		EXHIBIT "C-1". Reduced speed limit. Prineville. Ochoco Hwy.
17068		EXHIBIT "C-2". Reduced speed limit. Prineville. Madras-Prineville Hwy.
17069		EXHIBIT "D". Abandonment resolution. Sams Valley Hwy.
17071		EXHIBIT "E". Special state tax street fund. Apportionment.

Portland, Oregon
April 3, 1950

The State Highway Commission met in special session at 9:00 a.m. in the Streamline Room of the Imperial Hotel for the purpose of electing a chairman and disposing of accumulated routine matters. Present were:

Ben R.Chandler, Commissioner
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Assistant State Highway Engineer
C. W. Enfield, Assistant Counsel
Sam Hall, Assistant Counsel
Forrest Cooper, Right of Way Engineer
M. H. Hawke, Auditor
H. B. Glaisyer, Secretary

Commissioner Chandler introduced Mr. M. K. McIver, Portland, who recently was appointed a member of the State Highway Commission by Governor Douglas McKay, to fill the vacancy created by the resignation of Mr. T. H. Banfield, former Chairman, whose regular term expired March 31, 1950. It was pointed out that because of this change, the Commission at this time does not have a Chairman as it is required to have by law. Motion was thereupon made by Commissioner Reynolds that Commissioner Chandler be unanimously elected Chairman. The motion was duly seconded by Commissioner McIver, and carried without dissenting vote.

Chairman Chandler and Commissioner Reynolds approved the minutes of the meeting of the Commission held on February 6 and 7, 1950, subject to approval by former Chairman T. H. Banfield. (Mr. Banfield later approved the minutes by letter.)

The Right of Way Engineer presented a number of options for acquisition of right of way. These were carefully considered by the Commission in detail, including the option prices, and received the Commission's unanimous approval. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Engineer requested authority to purchase a maintenance headquarters site in the town of Spray, Wheeler County. He explained that for many years the Highway Department has leased property from Mr. R. E. Baxter at $20 per month, but recently Mr. Baxter advised that he does not care to renew the lease, which expired March 31, 1950. He will, however, sell the property, consisting of a lot and a building located thereon, to the State for the sum of $1,500. Mr. Baxter's lot, he said, is not large enough by itself for the purpose intended, but could be made suitable by the purchase of adjoining property owned by Mr. Carl Miller, which property consists of a house and seven lots, for which Mr. Miller is asking $7,500. In other words, a suitable site can be acquired for the total sum of $9,000. The Engineer gave as his

opinion that the price asked by each owner is fair and reasonable, and he recommended purchase of both properties at the amounts thereof because a maintenance headquarters at this place is badly needed. The Commission unanimously approved the recommendation.

The Engineer brought up for discussion the purchase of additional right of way needed for widening the Columbia River Highway through the Celilo Indian Village, east of The Dalles, Wasco County. He explained that the present right of way is only about 30 feet wide through this village, the roadbed for the most part being on railroad property, and that because of the proximity of the railroad the widening must be done on the river side of the road, where the land is owned by the Indians. The Highway Department, he said, has tried for several years to acquire necessary land, about 55 feet wide by 3000 feet long, which is held in trust by the Indian Service, but until recently the efforts have been unsuccessful. A short time ago, however, the Director of Indian Affairs in Oregon offered to sell this area to the state for the sum of $3,000 if the transaction is expedited so the money can be used to finance the elimination of a sand-blow condition on the south side of the highway, there being no federal funds available to pay the cost of such work. He recommended acceptance of the offer because the right of way is urgently needed for the proposed improvement of the highway, and because it will satisfactorily solve a problem that has been pending for a long time. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the acquisition of right of way needed for the widening and resurfacing of the Oregon Coast Highway between Brookings and the California state line, for which project an allocation of $200,000 has been provided in the 1950-51 program. He advised that the present right of way is only 60 feet wide and in order to satisfy the requirements of the Bureau of Public Roads will have to be widened to 80 feet, which necessitates acquisition of additional width along approximately one-third of the section involved. He estimated the cost of acquiring such right of way for this particular project at $36,000, and the cost to purchase additional land to provide 80 foot width right of way for the entire section at about $200,000, which amount also includes the cost of moving numerous buildings. He pointed out that the Right of Way Department is experiencing difficulty in its negotiations for the right of way that is needed now because the purchase of access rights is included, and many of the owners will not consider disposing of their rights if similar rights are not acquired from the owners of adjoining parcels where the Commission is taking no land, so it appears that numerous condemnation actions will have to be started unless either rights of access are acquired throughout the entire section, or restriction of access on all parcels needed now is waived. He gave as his opinion that it is impractical to spend $164,000 for additional right of way now which will probably not be required for fifteen to twenty years or longer. He recommended in view thereof that the Right of Way Department be authorized to negotiate the acquisition of land only that is needed for the present widening project, and that no attempt be made to acquire rights of access at this time. If that is done, he said, the condemnation cases will be avoided and the project can be prepared for early contracting. The Commission approved the recommendation unanimously and so ordered.

The Engineer reported the results of an investigation made by J. W. Cattrall, Engineer, County and City Relations, with regard to the condition of the Hurricane Creek County Road, Wallowa County, which was partially improved as a Federal Aid Secondary Highway Project during the 1938-1940 biennium. He said that the inspection was made by Mr. Cattrall in company with representatives of the Bureau of Public Roads and two members of the Wallowa County Court and the County Roadmaster, and it was determined that the present condition was not caused by heavy traffic, but actually was the result of travel over the road during the time frost was leaving the ground. A portion of this road that is in the worst condition, he said, is located within the city of Enterprise, outside of the limits of the Federal Aid Project, so is not covered by the maintenance agreement between the state and Wallowa County. He added that the county court indicated that it is going to ask the State Highway Department to repair the road this coming summer and suggested, if such request is made, that the Commission approve it on the condition that the County will pay all the costs involved, and provided a state crew and equipment are available to do the work. The Commission approved the recommendation.

The Engineer reported that pursuant to authority given him by the Commission at the previous meeting, he wrote Mr. W. A. Bugge, Director of Highways of the State of Washington, regarding the proposed traffic study to determine a site for another interstate bridge across the Columbia River between Portland and Vancouver, and suggested in his letter four possible bridge locations, which Mr. Bugge in his reply dated March 14, 1950, stated are satisfactory to his department. The Engineer requested, in view thereof, that he be granted authority to proceed with his studies on the Oregon side of the river, which he estimated would cost about $10,000. The Commission approved the request unanimously, on the condition, however, that this Commission or any future Highway Commission will not be committed in any manner whatsoever with respect to construction of a bridge at a location which the studies might indicate is the proper location for the bridge under present conditions, it being the feeling of the Commission that a second bridge across the Columbia River, so far as Oregon is concerned, will not be needed for ten to fifteen years, when conditions may be different than they are now and another location might then be considered more desirable.

The Engineer brought up for discussion the matter of providing safety for highway traffic on the Pacific Highway East at its junction with Naef Road between Milwaukie and Oregon City, where a drive-in theater has been constructed. He read aloud a letter from the owner of the theater who states a willingness to contribute his personal funds to help defray fifty percent of the cost of installing safety facilities consisting of a traffic signal and construction of a turn-out lane with a left-turn refuge, all of which is estimated to cost about $12,000. The Engineer pointed out that Naef Road is a county road, in view of which there is no law to prevent people from turning off the highway or entering the highway at this point. Moreover, the American Association of State Highway Officials, which has made a study of drive-in theaters, recommends that the states pass laws prohibiting the construction of such theaters adjacent to heavily traveled highways. He recommended, in view of the fact that there appears to be no possible way to stop the operation of this theater, that the Commission accept the offer of

the theater owner to pay fifty percent of the cost of the needed facilities, subject to the condition that the work is done according to state highway specifications and to the entire satisfaction of the State Highway Engineer, and provided further that the owner of the theater will furnish a bond and public liability and property damage insurance for public protection during the time construction is underway. The Commission approved the recommendation unanimously.

The Engineer requested approval of increases in the fund allotments for the following projects: 1) Cornelius Road Traffic Interchange, $4,000; 2) Recoiling North Santiam Highway between Gates and Mill City, $5,000. He explained that the first project is a major betterment project for which an amout of $15,000 was allocated by the Commission, but the present estimated cost is $19,000. The Gates-Mill City Project, he said, is a minor betterment project for which an amount of $16,000 was previously approved, but the present estimated cost is $21,000. He also said it was originally intended to construct the latter mentioned project with state forces; however, the work is suitable for contracting, and he prefers that it be done in that manner, if the Commission approves. He recommended approval of the increases for both projects and that he be authorized to advertise both of them for bids to be received at the next meeting of the Commission. The Commission approved the recommendation unanimously.

The Engineer requested approval of an increase of $30,000 in the allotment heretofore authorized by the Commission for the improvement of the Wallowa Lake Highway, Wallowa County. He advised that the 1950-1951 program contains an item of $100,000 for grading, surfacing and oiling the Chief Joseph Monument-Wallowa Lake Park Section of this highway, 4.74 miles in length, but to make a complete improvement at one time, including the construction of a new bridge over the Wallowa River within the park, will require an additional expenditure of $30,000, making a total allotment of $130,000. He recommended approval of the increased amount. The Commission approved the recommendation.

The Commission discussed a report from the Engineer with respect to the construction of a proposed "outer" highway paralleling the Pacific Highway East between Portland and the town of Milwaukie. The Engineer recalled that the Commission recently approved the construction of this road, for which the sum of $65,000 was allocated in the 1946 program, such approval being conditioned on the city's furnishing right of way and consenting to only one entrance (that now existing) to the highway from the service road. The City of Milwaukie, he said, has approved this arrangement but points out that in connection with excavation work for a railroad spur to serve the International Harvester Company there will be sufficient excess materials available to construct the roadbed of the service road, and the city agrees to build this service road grade for 35¢ per cubic yard. Were the state required to build the grade, he said, it would be necessary to transport materials from outside sources, which would cost the state about 75¢ per cubic yard. He recommended acceptance of the city's offer, and that the matter be covered by written agreement between the city and the state. The Commission approved the recommendation unanimously.

The Commission discussed a letter from Mayor M. McKim of the City of Baker, requesting the installation of traffic control signals on some of the

city streets that are designated state highway routes. The Engineer requested authority to make a traffic survey in this city to determine the need, if any, and the cost to install such traffic signals. The Commission approved the request.

A request was presented from Mr. C. H. Demaray, Receiver for the California and Oregon Coast Railroad, for the installation of signals at two highway-railroad grade crossings, one on the Pacific Highway and the other on the Williams Secondary Highway, near Grants Pass. Mr. Demaray asks that this installation be entirely at state expense. The Engineer advised that there is very low priority of need for signal installations at these crossings, owing to the small amount of railroad traffic, there being only two train movements daily over them. He also pointed out that the present practice in connection with such signal installations is for the state and the railroad company to pay jointly the costs involved. He recommended that the request be denied. The Commission approved the recommendation.

The Commission discussed and upon recommendation of the Engineer denied a request from the Kelly Creek Parent-Teachers Association of New Pine Creek, Oregon, for the construction of a sidewalk on the Fremont Highway extending from the town of New Pine Creek to Kelly Creek School, a distance of about one-half mile.

There was presented to the Commission for consideration a petition signed by numerous property owners and residents of Cannon Beach, Clatsop County, requesting adequate ingress and egress to and from the new route of the Oregon Coast Highway on Division Street in Cannon Beach, which access is not provided in the present plans for the improvement of the highway at this location. The Commission deferred action on the matter until its next meeting, and instructed the Engineer to make a complete report on the subject at that time.

A letter was presented from Mr. M. O. Gardner, City Manager of the City of Forest Grove, requesting early approval of the plan prepared by the State Highway Engineer for traffic control in Forest Grove, which plan the Engineer reported to the Commission at its meeting on December 19, 1949. The Commission confirmed the action taken at such meeting, to the effect that while the project is a meritorious one, the Commission is not presently in position to obligate the expense involved, but will give the project further consideration in the event that underruns develop in the current construction program, and if such underruns do not materialize, then the project will be considered along with others in the formulation of future programs.

The Engineer reported that Contract No. 3096 with Vernie Jarl for furnishing crushed material in stockpiles on the Minam-Wallowa Lake Section of the Wallowa Lake and Joseph-Wallowa Lake Highways in Wallowa County, was completed on March 2, 1950. Also that Contract No. 3244 with D & R Construction Co., for construction of metal guard rail on the Soda Gulch-Keene Creek Section of the Green Springs Highway in Jackson County was completed March 15, 1950. Both projects, he said, were completed according to the requirements of the contracts, or modifications thereof, and now are ready for acceptance by

the Highway Commission. After due consideration, the Commission by unanimous vote accepted the said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that during the late war a permit was granted to the United States of America to install and maintain a 10-inch pipeline along and across a portion of the Warm Springs Highway. This pipeline, he said, no longer is required by the Government, which has removed it from the highway and has requested cancellation of its obligations under the permit. He recommended approval of the request. The Commission approved the recommendation and thereupon signed a form of release relative thereto.

The Engineer also reported that in January, 1943, the Highway Commission granted as a war measure a permit to the United States of America to construct, operate and maintain a power pole line upon a portion of the Warm Springs Highway, which power line, he said, was built to serve the Madras Airport. He also said that the power line is of no further value to the Federal Government because it has transferred the airport to the City of Madras, and the power line to the Pacific Power and Light Company, which will still serve the airport after the Federal Government has been released from its obligation. He recommended that the Federal Government be released from further obligation with respect to this pole line, and the transfer of its rights to the Pacific Power and Light Company be approved. The Commission approved the recommendation unanimously and thereupon signed a form releasing the Federal Government from its obligations under the permit.

The Commission had under discussion a request from the Bonneville Power Administration for authority to construct power transmission pole line crossings of state highways at the following locations:

1. Oregon Coast Highway at M.P. 227.52 (Highway Engineer Station 405+33.4) between Reedsport and Winchester Bay, Douglas County.

2. Coos River Secondary Highway No. 241 at M.P. 3.71 between Eastside and Enegren Ferry in Coos County.

3. Oregon Coast Highway at M.P. 258.78 (Engineer Station 107+45.3) between Coos Bay and Delmar Overcrossing in Coos County.

The Engineer advised that these proposed crossings have been investigated and it has been determined that they willnot interfere with highway usage or be inimical to the state's interests. He recommended in view thereof approval of the request. The Commission approved the recommendation unanimously and thereupon signed permit forms covering the three crossings.

The Engineer reported that pursuant to authority heretofore granted to him by the Commission he has posted certain highway sections for reduced loads. He presented a list of the highway sections so posted (see list in EXHIBIT "C-1" attached hereto) and asked the Commission to confirm the postings. The Commission unanimously approved the postings, as reported, by the adoption

of the attached resolution relative thereto, marked EXHIBIT "C-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that conditions have changed along certain highway sections heretofore posted for reduced weight loads, so the restrictions no longer are required, in view of which he has ordered the signs removed and legal weight loads restored. He submitted a list of the highway sections so affected (see list in attached EXHIBIT "C-2") and requested confirmation of his action. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "C-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer requested confirmation of the telephonic authority given by Commissioners Chandler and Reynolds for C. H. Armstrong, State Parks Engineer, to attend at state expense a meeting of the Governor's Columbia Basin Recreational Planning Committee, which is to be held in Spokane, Washington, on April 5, 1950. He estimated the out-of-state travel expense at $31.50. The Commission unanimously approved the request.

The Engineer also requested authority for G. S. Paxson, Bridge Engineer, to attend a meeting of the Bridge Committee of the Highway Research Board in Washington, D. C., on May 2 and 3, 1950. He stated that Mr. Paxson's expense in attending this meeting will be paid by the Highway Research Board. Mr. Paxson wishes, however, to consult with federal officials of the Bureau of Public Roads in Washington, D. C. and with officials of the Michigan State Highway Department during the same trip concerning their experimental pavement heating project in Detroit, Michigan, and this will necessitate an expenditure of $35 of state highway funds. He recommended approval of the expenditure. The Commission approved the recommendation unanimously.

The Commission had under discussion a request from the county court of Yamhill County that the old steel bridge over the Yamhill River, on the Three-Mile Lane Secondary Highway near McMinnville, known as the "Dayton Bridge", be given to the county when it has been replaced by a new structure. The Engineer advised that the bridge is not suitable for re-establishment on the state highway system, so is of no particular value to the state. He pointed out that the 1950-51 construction program provides for the construction of a new bridge at this location and he recommended that when this bridge is completed the old bridge be turned over to Yamhill County, without cost, for its use on a county road, particularly in view of the fact that the county constructed it in the first instance, and it being the established policy of the Highway Commission to let the counties have the bridges in cases of this kind. The Commission approved the recommendation unanimously.

The Commission discussed a request from the U. S. Army Engineers for permission to maintain an entrance road sign on the southerly side of US730 opposite the Willamette Avenue Entrance to McNary Dam Townsite. The Engineer presented a map showing the proposed location of the sign and a sketch showing the type of sign to be erected. He recommended approval of the request. The Commission approved the recommendation.

The Secretary presented a letter from Miss Charlotte Mish, Artist, Portland, offering her services to the State Highway Commission in publicizing the state of Oregon through a series of paintings. Miss Mish offers to furnish a series of twelve paintings on canvas for the sum of $250 each, but she also expects reimbursement for travel expense and for time devoted to research and preliminary sketching. The Commission decided unanimously not to retain the services of Miss Mish in this regard and instructed the Secretary to inform her that no provision has been made for the expenditure of State Highway funds for such purposes.

The Commission discussed proposed bridge projects in the cities of Seaside and Silverton, particularly the question whether or not these projects qualify for Special State Tax Street Funds, with which it is planned to partially finance them. The Engineer recalled that this matter was first discussed by the Commission at its previous meeting when it was referred to the Chief Counsel and himself for further study to determine the qualification of the projects. In the discussion of this matter the question arose as to the legality of the allocations. The Commission expressed a willingness to approve the contribution of $15,000 toward the cost of each project, if the projects qualify from the physical and legal standpoint. Action on the allocations was deferred until the next meeting of the Commission, when the Engineer is to report on the physical facts, and the Chief Counsel is to report on the legal facts. (Delegations from Silverton and Seaside were present later in the session and as the result of information disclosed at that time, the Commission unanimously approved the $15,000 allocation for the James Avenue Bridge in Silverton, but again deferred its decision with respect to the bridge project in Seaside.)

Chairman Chandler reported numerous complaints concerning the condition of the Warm Springs Highway, and asked the Engineer for a report as to the status of this road and what prompted the complaints. The Engineer advised that this highway was built and opened up for the public under tremendous pressure by people who wanted to use the road. The section between Madras and Warm Springs Agency, he said, was constructed before the war with standard base and top, and has stood up very well under traffic since completion. Prior to the war, he said, truck traffic on the highway system was normal, but the war changed conditions and the highway system was subjected to additional burdens that had not been foreseen. Three things in particular, he said, have caused present conditions, viz: frequent movements of overweight loads which crack the pavement surface; weight violations by the operators of large trucks, and extremely adverse weather conditions. The disregard of truck operators of the weight regulations, he said, is causing chaotic conditions, and these overloads combined with heavy frosts have ruptured pavements, necessitating extensive repairs. He gave as his feeling that the imposition of fines is not enough to stop overloading. He further stated that these conditions are not confined to Oregon alone, but are true more or less over the entire nation, but in Oregon it is particularly true because of the increase in population since 1940 of nearly 60 percent, resulting in material increase in traffic and particularly heavy motor truck traffic.

In reply to an inquiry from Chairman Chandler as to what provision has been made to correct the situation, the Engineer stated that in order to

meet present day requirements and to reduce maintenance costs, it is going to be necessary to reconstruct existing pavements to withstand greater loads and to build new roads of the heavier type. In order to clarify any misunderstanding, he stated that the damage that is being done to the highways is not all due to overloading, but a portion of it is due to the repeated attack of big loads that are within the legal weight limits. The Commission instructed the Engineer to render a complete written report on the subject.

Mr. Harold E. Wheeler, Portland, was present and inquired concerning rumors with respect to the rerouting of the Old Oregon Trail in the vicinity of the town of Boardman. He was informed by the Engineer that surveys are now underway on a proposed routing that will place the highway on higher ground south of Boardman, where it will not be flooded by backwater of a proposed dam in the Columbia River near this place, but the work is not far enough advanced to permit reporting to the Commission.

A delegation from The Dalles, consisting of Messrs. Lloyd E. Brady, City Manager, Farrell S. Booth, City Councilman, and Chris Fauerso, County Engineer, was present and asked the Commission to authorize an engineering study in The Dalles with the view in mind of adopting a one-way travel plan for US30 traffic through their city. Mr. Brady headed the group. He stated that the people of The Dalles are in favor of such a study, so as to have an engineering determination of the question. Chairman Chandler advised that it has been the policy of the Commission in the past to cooperate with the cities in such matters, and pursuant to that policy, the Commission will authorize the Engineer to make such a survey in The Dalles, provided he has engineering personnel available to do the work. He made it clear, however, that the authorization for the survey does not carry with it any commitment of funds whatsoever for development of a one-way street system but is simply to determine the feasibility of such a system. He also stated that the Highway Commission requires the unanimity of opinion of all the people in The Dalles with respect to routing of highway traffic and the adoption of a plan as may be recommended by the Engineer as a result of the engineering investigation, because it is contrary to the policy of the Commission to force any plan upon any community. The Engineer was thereupon authorized by the Commission to conduct the survey as requested, such survey to cover the possibilities of several routes and to disclose the cost to improve them and to acquire necessary right of way.

The matter of completing unfinished business that accumulates at meetings of the Commission had the Commission's attention. Chairman Chandler expressed a desire for such matters to be disposed of as rapidly as is possible so the list can be kept at a minimum, and it was so ordered.

Commissioner Reynolds brought up for discussion the matter of getting the plans and specifications for highway projects into the hands of contractors early so as to give them the maximum length of time within which to prepare their proposals. He reported receipt of complaints that two week's time is not enough. Mr. T. M. Davis, District Engineer, Bureau of Public Roads, who was present, stated that two full weeks of advertising of a project in which federal aid is involved is all that the government requires. The State Highway

Engineer stated that in the past the plans and specifications have been ready about two weeks before highway lettings, but hereafter he will endeavor to get the information into the hands of the contractors at least three weeks before the meetings of the Commission.

Commissioner Reynolds also brought up for discussion the matter of expediting highway surveys. He gave as his opinion that surveys should be completed several months in advance of the time that it is planned to construct the projects so as to avoid unnecessary delays in contracting the work. The Engineer pointed out that acquisition of right of way is involved in most instances, and he suggested that he should have at least a year's time within which to complete surveys and work up the plans for any particular project. He also said that he would present to the Commission at its next meeting a list of survey projects for the Commission's approval. Chairman Chandler stated his feeling that everything in connection with a project should be cleared as quickly as possible after the project has been authorized, and he expressed a desire that all projects now scheduled for construction be placed under contract before the end of the year. The Engineer was instructed to take action accordingly.

A delegation from the city of Seaside, including Honorable Lester U. Raw, Mayor; Cecil W. Wright, City Attorney; Radford R. Shawcross, City Engineer; and George Grey, representing Seaside-Astoria Port Commission, appeared before the Commission regarding the replacement of a bridge on 12th Avenue in Seaside, as a Special State Tax Street Fund Project. Mr. Wright headed the group. He advised that the present bridge on 12th Avenue is in a bad state of repair, having recently collapsed as a result of the operation of heavy trucks over it, and, because of the importance of the structure to the city, it is necessary to replace it with a new bridge, which is estimated to cost $47,500. The City, he said, is unable to finance the work on its own account so is asking the state to contribute $15,000 from its Special State Tax Street Fund account. He pointed out that the Necanicum River parallels the Oregon Coast Highway through their town, and that the city has constructed six bridges and Clatsop County one bridge across this river, only one of which, being the one under discussion, serves the northern part of their city. In the discussion, Mr. Wright advised that the 12th Avenue Bridge is used extensively by truckers and one of the main reasons for its failure was the operation of government trucks over it during improvement of the Seaside jetty. Chairman Chandler advised that the Commission has discussed this matter but has not reached a decision because of a question whether or not the project qualifies under the statutes for Special State Tax Street Funds, so the Commission has asked the Engineer and Chief Counsel to make further investigations as to the physical and legal facts involved, and when such information has been furnished, the Commission will take action and the city will be advised.

A delegation from the city of Silverton, including Hon. Errol W. Ross, Mayor, and Messrs. George Weisner, Clint H. Weiby, George M. Christensen and C. B. Anderson, City Councilmen, and Robert E. Borland, City Manager, was present regarding the construction of a bridge across Silver Creek on James Avenue in Silverton. Mayor Ross headed the group. He stated that it is imperative that a new bridge be constructed at this location. He estimated the cost of the structure at $29,700 and advised that the city is not financially able to

finance it on its own account, hence requests a contribution from the state of $15,000 of Special State Tax Street Funds to assist them. In support of his request he said that there is only one other bridge across Silver Creek in their city, and if anything should happen to that bridge, it would be disastrous because the south part of the city then would be isolated and could not be served in emergencies, especially should fires occur. He said that the James Avenue Bridge serves much heavy traffic, including logging trucks, oil and gas trucks, and the like, and in their estimation the project qualifies for the state funds that they have requested.

Chairman Chandler advised that in a previous discussion of this matter a question arose in the minds of the members of the Commission whether or not the project qualifies legally for Special State Tax Street Funds, and in order to determine the facts the Commission has referred the matter to the Engineer and Chief Counsel for additional reports, and will take final action when these reports are rendered. He suggested that it would be advisable for the city to furnish additional information in support of their request. The Commission, he said, will be glad to assist the city in this matter if the project qualifies under the law. Following the departure of this group, the Commission continued discussion of the matter, at which time the State Highway Engineer stated that in his opinion there is no question as to the qualification of the project. He strongly recommended approval of the $15,000 contribution as requested. The Commission approved the recommendation unanimously.

Commissioner Chandler reported there is to be placed on the ballot for consideration by the people of Coos County at the primary election in May a measure which, if it carries, will authorize a county bond issue to pay 50% of the cost of constructing a bridge over the Coquille River at a place known as Bullards, near Bandon, which bridge is estimated to cost about $600,000. He recalled that this matter has been before the Commission several times in the past and that the former Commission at one time agreed to contribute fifty percent of the cost of the bridge on the condition that Coos County would pay its share of the cost in cash, which the county could not guarantee, so the project was tabled. This bridge, he said, is on a county road and the Commission's previous offer carried with it an understanding that the state would not be asked to contribute any funds whatsoever to construct approaches to the bridge or to improve the county road. The matter is being brought up at this time, he said, because of the proposed bond issue which, if the people approve it, will provide the cash necessary to meet the state's offer. As a result of the discussion, the Commission voted unanimously to proceed with the construction of this bridge on the basis of the previous offer that the county will contribute in cash fifty percent of the cost involved.

Commissioner Reynolds inquired as to the status of the proposed agreement with the City of Pendleton with respect to state property along the Airport Secondary Highway, and the small tract within the city limits which the Pendleton Developing Company wishes to acquire as a site for a building to be constructed for the Secretary of State. The Right of Way Engineer, Mr. Forrest Cooper, advised that a form of agreement containing the provisions that the Commission approved at the previous meeting has been prepared, and copies thereof were mailed to the Pendleton City Council and the Umatilla County Court

for acceptance, but neither the city nor the county has responded to date. He presented a copy of the agreement for the Commission's consideration. Following discussion, the Commission approved the form of the agreement as prepared, it appearing to the Commission that the provisions are in conformity with its wishes as expressed at the previous meeting.

Chairman Chandler brought up for discussion the preparation of highway legislation for adoption by the 1951 Legislature. He gave as his belief that there are now on the statute books a number of laws affecting highways which should be clarified or revised to meet present-day conditions. He mentioned several things in this category and instructed the Legal Department to render a report on the subject at the next meeting.

Commissioner Reynolds brought up for discussion the matter of providing fire insurance coverage for Highway Department buildings as protection over and above coverage furnished by the state under the provisions of the Restoration Act. He particularly referred to the Schedule of Buildings prepared by the Auditor as of December 31, 1949, and questioned some of the valuations mentioned therein. In the discussion it was brought out that the Right of Way Department is now engaged in an appraisal of all Highway Department buildings, which, when completed, will indicate their true value. The Engineer was instructed to furnish Commissioner Reynolds with a copy of such appraisal when it is complete.

The Commission approved and signed agreements, et cetera, as follows:

Release of Federal Government from obligation in connection with maintenance of 10-inch pipeline on a portion of the Warm Springs Highway.

Release of Federal Government from obligation with respect to maintenance of power pole line on portion of the Warm Springs Highway.

Permit authorizing Bonneville Power Administration to install three power line crossings of state highways, viz: Oregon Coast Highway at M. P. 227.52, between Reedsport and Winchester Bay, Douglas County; Coos River Secondary Highway at M. P. 3.71, between Eastside and Enegren Ferry, Coos County; and Oregon Coast Highway at M. P. 258.78, between Coos Bay and Delmar Overcrossing, Coos County.

Revocable permit granting to Arvin Sabey use of a spring on state highway property near Tolovana Park in Clatsop County.

"Indenture of Access" granting H. T. and Ethel Beach change in location of their right of access to the Sunset Highway in Washington County.

(Cont.)

"Modification and Grant of Access" modifying access heretofore granted to Miss Mina Foltz between her property and Barnes Road on the Sunset Highway.

Bargain and Sale Deed to Otto Dieckhoff for sale of property on the Alsea Highway, in Lincoln County.

Bargain and Sale Deed conveying to the City of Athena certain land in Umatilla County.

The meeting adjourned at 12:00 noon.

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY - UNIT #2

15811- Anderson, Lillian, and Martha N. Smith
Right of Way
Option expires July 26, 1950 (Boone)

5,000 sq.ft. at 25¢ sq.ft.	$ 1,250.00	
Allowance- division of properties, loss on proposed plan of erection of an apartment house	250.00	
Amount to be paid owner		$ 1,500.00
Amount chargeable to Right of Way		1,500.00

Access controlled.

GOSHEN-CRESWELL SECTION, PACIFIC HIGHWAY

16055- Garske, Joseph P., Adina L. Garske and Veronica Garske
Right of Way
Option expires September 9, 1950 (Landon)

EXHIBIT "B"

Minutes of April 3, 1950

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3096 with Vernie Jarl for furnishing crushed material in stockpiles on the Minam-Wallowa Lake Section of the Wallowa Lake and Joseph-Wallowa Lake Highways in Wallowa County, completed March 2, 1950.

Contract No. 3244 with D & R Construction Co., for construction of metal guard rail on the Soda Gulch-Keene Creek Section of the Green Springs Highway in Jackson County, completed March 15, 1950.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

ORDER REDUCING MAXIMUM LOAD LIMIT

ON A SECTION OF WARM SPRINGS HIGHWAY

WHEREAS, the section of highway hereinafter set forth has been duly designated and declared to be and is a state highway and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway; and

WHEREAS, said section of highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said section of highway during the present period of freezing and thawing, and in order to protect said section of highway against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Highway Commission finds that it will be for the best interests of said highway that the maximum weights permitted and authorized by law be reduced during such period; and

WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon said section of highway during said period shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said section of highway was not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said section of highway that the maximum total weight of load and vehicle which shall be permitted upon said section of highway during the said period, commencing on the date hereinafter specified, shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle or combination of vehicles which shall be permitted upon the following named section of highway shall not exceed 11,000 pounds gross on any single axle nor 20,000 pounds gross on any pair of tandem axles nor a maximum of 36,000 pounds gross on all axles of the vehicle or combination of vehicles:

Name of Highway and No.	County	Section Restricted (by mile point)	Date Effective 1950
Warm Springs 53	Jefferson	25.30 to 30.00	March 27

(Cont.)

EXHIBIT "C-1" (Cont.)

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394, O. C. L. A., shall be in full force and effect from the effective date hereinabove specified until modified, annulled, or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above section of highway and at the important crossroads on said section of highway so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of the county affected by this order, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this 3rd day of April, 1950.

RESOLUTION LIFTING REDUCED LOAD LIMITS

ON VARIOUS STATE HIGHWAYS

WHEREAS, on the 6th day of February and on the 21st day of March, 1950, at meetings of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted resolutions reducing the maximum load limit on various state highways and sections of state highways; and

WHEREAS, subsequent to the passage of the said resolutions, conditions have changed so that it no longer is necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolutions.

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit as set forth in the said resolutions of February 6 and March 21, 1950, on various state highways or sections thereof, to-wit:

HIGHWAYS LISTED IN RESOLUTION OF FEBRUARY 6, 1950

Name of Highway and No.	County	Section Restricted (by mile point)	Date Lifted 1950
McKenzie 15	Lane	49.67 to 55.00	Apr. 1
Crater Lake 22	Jackson	47.10 to 54.60	Mar. 29

Modoc Point Secondary 427	Klamath	Entire Length	" 1

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on such highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and to the Superintendent of the Department of Police for his information.

Dated this 3rd day of April, 1950.

OREGON STATE HIGHWAY COMMISSION

By Ben. R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner

R. H. Baldock
State Highway Engineer

ATTEST:

H. B. Glaisyer

Portland, Oregon
April 24, 1950

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
M. H. Hawke, Auditor
H. B. Glaisyer, Secretary

Bids as follows for highway construction were opened and read aloud by the Secretary, pursuant to previously published notice, following which Chairman Chandler announced that the awards of contracts would be made at 3:00 p.m. in the same room.

CLACKAMAS COUNTY

Division #1 Reoiling Project on the Woodburn-Estacada, Cascade, Clackamas and Mt. Hood Highways. State Project. 32.0 miles reoiling. Requires the placing of approximately 12,300 cu.yds. of crushed aggregates from state stockpiles and the furnishing and placing of approximately 1300 cu.yds. of crushed aggregates; 780 tons 150-200 asphalt and 330 tons emulsified asphalt.

J. C. Compton & Co., McMinnville	$ 56,017.00
Harr & Horton, Portland	57,508.45
Babler Bros., Portland	59,124.25
Oregon Asphaltic Paving Co., Portland	60,935.75
Acme Constr. Co., Eugene	61,548.75
O. C. Yocom Co., McMinnville	61,598.50
D-H Paving Co., Vancouver	63,614.00

COOS COUNTY

Coos Bay (Fir Avenue-Ingersoll Avenue) Section. Oregon Coast Highway. Federal Project No. F-141(12). 1.12 miles of grading and paving; and 0.43 mile of grading railroad roadbed. Requires approximately 30,800 cu.yds. of excavation (including topsoil); 7500 cu.yds. rock or gravel base materials; 4,000 sq.yds. Portland cement concrete base; 8,800 tons class "B" asphaltic concrete; 40 tons emulsified asphalt; 1400 cu.yds. broken concrete slope protection; 1280 cu.yds. class "A" concrete in walks, driveways, curbs and gutters and median strips; and 200 lin.ft. of electrical conduit.

Coos Bay Dredging Co., Coos Bay	241,480.44
Porter W. Yett, Portland	246,048.50

DESCHUTES COUNTY

Crook County Line-Bend Airport Section. Powell Butte Secondary Highway. About 8 miles northeast of Bend. Federal Project No. S-98(1). 0.53 mile grading and 7.56 miles surfacing and oiling; also furnishing crushed material in stockpile. Requires approximately 5,800 cu.yds. of excavation; 16,000 cu.yds. cinder base material; 16,450 cu.yds. crushed cinders; and 480 tons 150-200 asphalt.

F. L. Somers, Klamath Falls	$ 74,981.00
D. F. McKenzie, Salem	76,582.00
Babler Bros., Portland	76,678.50
Inter City Sand & Gravel Co., Eugene	76,815.00
M. C. Lininger & Sons, Medford	80,492.00
M. L. O'Neil & Son, Eugene	82,909.50
J. N. & M. J. Conley, Portland	92,586.00
McNutt Bros., Eugene	93,367.00

MALHEUR COUNTY

Vale Rock Production Project on the Central Oregon and Vale-West Highways, near Vale. State Project. Requires approximately 7,000 cu.yds. crushed rock or crushed gravel in stockpile.

Barney B. Helser, Rome	17,150.00
N. A. Toole Constr. Co., Ontario	18,060.00

MARION AND POLK COUNTIES

Marion Street Bridge over Willamette River at Salem. Federal Aid Project U-322(1). Construct 5 piers only. Involves following approximate quantities: 2,200 cu.yds. excavation, 9,400 ft. foundation piling, drive 286 piles, 1,800 cu.yds. concrete and 220,000 lbs. metal reinforcement.

State Constr. Co., Seattle, Washington	172,699.00
Lee Hoffman, Portland	232,980.00
M. T. Butler & Carl M. Halvorson, Portland	269,500.00
General Constr. Co., Portland	288,940.00
Guy F. Atkinson Co., Portland	292,792.00

MULTNOMAH COUNTY

Troutdale-Dodson Section of the Columbia River Highway. State Project. 18.3 miles of roadside improvement. Requires approximately 1,700 cu.yds. topsoil; 4,400 lin.ft. concrete curbs; irrigation system; seeding 60 acres to grass; planting 165 trees, 4,380 shrubs and 250 vines; felling 540 snags and trees; and installing 200 wood sight posts.

R. & M. Constr. Co., Central Point	35,953.90
Rich & Sons Nursery, Hillsboro	41,312.90
Rogers Constr. Co., Portland	41,319.50
T. W. Thomas, Portland	42,632.60
Haftorson Constr. Co., Portland	49,271.30

SHERMAN COUNTY

Moro-Kent School Section of the Sherman Highway. State Project. Rock production. Requires approximately 10,000 cu.yds. crushed rock in stockpile.

M. C. Lininger & Sons, Medford	$ 26,700.00
F. L. Somers, Klamath Falls	28,500.00
Arthur Centemann, The Dalles	28,900.00

WASHINGTON COUNTY

Sunset Highway-Cornelius Pass Section, of the Sunset Highway about 5½ miles east of North Plains. State Project. 0.15 mile grade widening and paving. Requires approximately 5,700 cu.yds. of excavation; 15 cu.yds. concrete curb; 850 cu.yds. rock or gravel base material; 230 cu.yds. crushed rock or crushed gravel; and 800 tons class "B" asphaltic concrete.

Porter W. Yett, Portland	18,865.00
G. D. Dennis & Son, Portland	19,005.50
Erland & Blickle, Portland	19,283.00
United Contracting Co., Portland	21,760.00

WHEELER COUNTY

Fossil Maintenance Building. State Project. Construct 32' x 78'8" masonry block maintenance building.

Bemis & Co., Portland	9,880.16
Bechtel Bros., Elgin	10,478.00
Walter H. Rohde, Pendleton	11,840.10
McCormack Constr. Co., Pendleton	13,505.00
Serge R. Perrin, Oregon City	16,375.00

Mr. S. H. Boardman, State Parks Superintendent, was present and reported the following park matters:

1. Conference with County Judge T. A. Power, Jefferson County, re removal of cinder deposits from Round Butte in The Cove State Park, Jefferson County: The Parks Engineer, Mr. C. H. Armstrong, reported on this matter. He advised that he discussed it thoroughly with Judge Power, pointing out a number of alternate sources of materials which are available for local use, and that Judge Power agreed to investigate these sources and let the Commission know the results thereof. The Commission expressed the hope that the alternate sources will prove satisfactory so that it will not be necessary to remove any more cinders from Round Butte.

2. Proposed purchase of tax lots located at Battle Rock State Park, Curry County: The Parks Superintendent exhibited a map showing properties located in and adjacent to this park, which have been acquired by

Curry County for delinquent taxes, and advised that the county is willing to deed these to the state for $824, which is the amount of the unpaid taxes. In the discussion of this matter the Parks Superintendent pointed out that for the most part the property in question is submerged, practically all of it being beyond the limits of the ocean meander line. It was also brought out that the state now owns most of the rock itself and an excellent viewpoint abutting the highway, so no particular advantage would be gained by owning the tax lots. Accordingly, the Commission decided unanimously not to accept the county's offer.

3. Report of the Parks Engineer on his attendance at Columbia River Basin Inter-Agency Meeting in Spokane on April 5: The Parks Engineer stated that this meeting was fostered by the National Parks Service and discussion was principally from the recreational standpoint, including activities and plans of the several states with respect thereto. Attending this meeting, he said, were representatives of the U. S. Forest Service, National Parks Service, U. S. Corps of Engineers and state agencies, and the thought expressed at the meeting was that possibly a better plan of development can be worked out through the direction of the group, although nothing definite was decided because the National Park Service has no money to finance its activities.

4. Request of Lincoln County Historical Society that the old Yaquina Bay Lighthouse, located in the state park at Yaquina Bay, be given to the Society for use as a museum: The Parks Superintendent presented a letter from Mr. James H. Howes, Secretary of the Society, requesting that this old lighthouse be given to the society for such use. The letter was read aloud by the Secretary. The Parks Superintendent advised that the building is in a bad state of repair and that it would cost about $30,000 to put it in suitable condition for use by the caretaker of the park. He also said that the building is of no value to the state, and he suggested that it be given to the Society to tear down and rebuild, and that an entirely new building be constructed for the use of the caretaker. He cautioned against the use of the old lighthouse until it has been rebuilt. As a result of discussion the Commission voted unanimously to let the Lincoln County Historical Society have this building on the condition that the building will be torn down and rebuilt for its purposes, and provided that the Society will assume all responsibility in connection with it. The Commission also unanimously approved the construction of a caretaker's house at this location, for which, the Parks Superintendent advised, an item of $12,000 has been included in the 1950 budget. The Engineer was instructed to furnish Commissioner Reynolds a set of plans for the new building before advertising it for bids.

5. Improvement of the wall at Peter Skene Ogden State Park to prevent dogs from leaping over: The Parks Superintendent advised that the wall is constructed on the edge of a precipice and is too low to prevent dogs from jumping over it to their death on the rocks below, which they occasionally do. He suggested as a preventive measure the addition of a railing along the top of the wall, which he believed would effectively protect the dogs and would not interfere with the view of

the Crooked River Gorge. He estimated the cost of such railing at about $500. It was the feeling of the Commission that the railing would encourage people to sit on the wall, particularly children, which might increase the dangers more than if the railing were not there. Accordingly the Commission decided unanimously against construction of the railing.

6. Construction of latrines in three state parks: The Parks Superintendent requested authority to construct a latrine in each of the following parks: Catherine Creek State Park, Union County; Dimmick State Park, Hood River County; and Neptune State Park, Lane County. He estimated the cost at $3,600 each and advised that provision for them is included in the 1950 budget. The Commission approved the request unanimously and ordered that the work be done by contract.

7. Proposed addition to concession building at Silver Falls State Park: The Parks Superintendent advised that present facilities in the main building at this park are not sufficient to accommodate the sale of minor articles. He recommended construction of an addition to the present building for this purpose at an estimated cost of $2,500. The Commission approved the recommendation unanimously.

8. Consider purchase of traffic counters to be used in recording cars that enter state parks: The Parks Superintendent requested authority to purchase fifteen such traffic counters ar a cost of $40 each. The State Highway Engineer stated that the Traffic Department uses a considerable number of such traffic counters in its activities and he suggested that the taking of traffic counts at state parks be handled under the supervision of that Department, with the understanding that if additional counters are needed, the Traffic Department can purchase them. The Parks Superintendent explained that in order to secure information that he wants it would be necessary to keep the counters at the parks on a permanent basis. The Commission referred the matter back to the Engineer and Parks Superintendent for additional information, which is to be reported at the next regular meeting.

9. Employment of a Parks Historian to fill the vacancy caused by the retirement of the present Historian, Mr. Wm. A. Langille, about June 1, 1950: The Parks Superintendent recommended employment of Mr. Howard Corning. The Commission took the matter under advisement.

10. Removal of down-timber and snags in Van Duzer Forest Corridor along the Salmon River Highway: The Parks Superintendent reported that a homesteader, Mr. C. L. Swensen, who owns the tract adjoining this corridor is logging his property and wishes to secure the down-timber and snags from the state's property for which he will pay the sum of $6 per M-FBM. Mr. Swensen, he said, will drag the logs from the state's property to his property so it will not be necessary for him to operate on the highway. He estimated there are about 30 M-FBM of logs to be removed and he recommended acceptance of the offer. The Commission approved the recommendation unanimously on the condition that Mr. Swensen's operations are closely watched to see that he does not remove any material other than the down-timber and the snags, and that he does not use the highway in connection with his operations.

A letter was presented from Mr. and Mrs. George M. Johnson, protesting the sale of food, ice cream, soft drinks, et cetera, by Mr. Jack Flaucher in connection with his concession at the Vista House on the upper Columbia River Highway. The Johnsons state that they operate an establishment nearby and their business is adversely affected by reason of the sale of such commodities in the Vista House. The Parks Superintendent advised that Mr. Flaucher is conducting his business in strict conformity with the requirements of his agreement with the Commission, which includes a provision that he shall keep the premises free of scrap papers and other litter. The Commission expressed regret that the business of Mr. and Mrs. Johnson is suffering because of the sales at the Vista House, but it could not justify the rearrangement of its agreement with Mr. Flaucher in view of the Parks Superintendent's report. The Secretary was instructed to inform Mr. and Mrs. Johnson accordingly.

The Right of Way Engineer presented for the Commission's consideration a number of options for the acquisition of real property that is needed for various highway improvements throughout the state. After careful consideration of each item on the list, the Commission approved the options and authorized the Right of Way Engineer to close them at the prices mentioned therein. The attached resolution relative thereto marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Right of Way Engineer reported the status of acquisition of right of way needed in connection with the construction of the Marion Street Bridge over the Willamette River in Salem, particularly right of way needed on the West Salem side of the river. He stated that one of the owners, Mr. Paul Wallace of Salem, from whom one acre of land is required, has agreed to sell this land to the state for the sum of $735, which is fair and reasonable, but the situation is different with respect to land required of Mr. Wilber T. Lewis. A part of Mr. Lewis' land, he said, is under cultivation and Mr. Lewis also owns an old building at the west end of the Center Street Bridge, which is occupied by a tavern and rents for $250 a month. This property is under lease which has seven years yet to run and the renter has the right to renew the least for ten additional years. The net return to the owner annually under this lease agreement, he said, is $2,900. He advised further that although the appraised value of the property needed by the state is $43,370, Mr. Lewis will accept $42,500 for the same. The state, however, must make some sort of settlement with the renter. The State Highway Engineer pointed out that because of the high cost of this property, which he considers exorbitant, he has been working on a plan to re-align the highway so as to by-pass the building, and if this works out satisfactorily, it will not be necessary to disturb the renter and possibly will result in considerable saving in right of way costs. This matter was discussed by the Commission at considerable length, but action was deferred until later in the session. The Engineer and Chief Counsel were instructed to give the matter further study and report their findings at that time. The Commission decided unanimously to hold up the award of the contract for the construction of piers for the Marion Street Bridge, bids for which were received this day, until all right of way matters pertaining to the project have been disposed of satisfactorily. The Commission unanimously approved the settlement reported by the Right of Way Engineer with respect to the Paul Wallace property.

In this connection, the Chief Counsel reported receipt of objections from the owners of property abutting on streets that are to be used as approaches to this bridge, who claim damages because of the fact that the highway grade is to be raised in front of their properties. He explained that according to law these property owners have a right to damages in cases of this kind. The Engineer and the Chief Counsel were instructed to report on this feature as well as the other, later in the session. Chairman Chandler expressed the feeling of the Commission that matters such as this should all be clarified before the Commission takes bids for any project, since the Commission does not like to be forced to make a decision after bids have been received. The Engineer and Chief Counsel were instructed to bear this in mind in working up future projects.

(As a result of further discussion on the matter the following day, the Commission authorized condemnation of the Lewis property and an offer of $8,000 in connection therewith. See additional paragraph ahead.)

The Commission discussed with the Engineer matters concerning which delegations would appear on the following day.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Representatives of the County Court of Tillamook County, County Judge Harland M. Woods, and County Commissioners Wesley Schulmerch and August Schollmeyer, who were scheduled to be present on the following day, appeared before the Commission at this time, as the result of misunderstanding on the part of the court. Judge Woods headed the group. He asked the Commission to approve their previous request that the Sand Lake Loop County Road be exchanged for the Little Nestucca Secondary Highway on the State Secondary Highway System. He also asked for the improvement of the Clements Corner-Brickyard Road as a Federal Aid Secondary Highway Project. He was informed by Chairman Chandler that the Engineer has filed his report on the proposed exchange of roads and when the Commission has time to discuss it the county court will be advised thereof. As to the other project, Chairman Chandler advised that this is a new one to the present Commission, which is not in position at the present time to pass on it but will receive a report from the Engineer and then will give it consideration in the formulation of its next program, there being no unallocated funds available at the present time. If the Engineer's report is favorable, he said, it might be possible for the Commission to help out the county, if that is the county's number one project, but that will depend upon what is disclosed by the report. The matter of constructing bridges on the Little Nestucca Secondary Highway was brought into the discussion. The Engineer pointed out that an item of $130,000 has been provided in the present construction program to finance three bridges. He also said that the county court's request for exchange of roads is based on the state's constructing these three bridges. Chairman Chandler concluded the discussion by stating that it is the intention of the Commission to proceed with the construction of the three bridges referred to, but whether or not the Commission will approve the exchange of roads is something that is yet to be determined. The Court will be advised, he said, when final action has been taken. (The matter was

further discussed, later in the session, at which time the Commission decided unanimously not to approve the exchange of roads as requested. See additional paragraph ahead.)

The Assistant Counsel, Mr. C. W. Enfield, requested authority to institute condemnation proceedings to acquire property owned by G. W. Tenney which is needed as right of way for Unit No. 2 of the proposed Sullivan Gulch Highway in Portland, and to acquire property owned by Catherine S. Duncan which is needed as right of way for the same highway section. He recommended an offer of $71,000 in connection with the Tenney condemnation, and $2,500 in connection with the Duncan condemnation, detailed as follows:

				Recommended Offer
R 14701	G. W. Tenney (Right of Way)			
	Land: 13,068 sq.ft. at 60¢ per square foot		$ 7,840.80	
	Buildings:			
	Main factory: 14,352 sq.ft. at $4.40 per sq.ft.	$64,584		
	Depreciation 33-1/3%	21,528	43,056.00	
	One st. I.C. shed 40x60, 2400 sq.ft. at $1.50		3,600.00	
	One st. frame storage 30x40, 1200 sq.ft. at $1.50 per sq.ft.		1,800.00	
	Frame shaving bin 10x60, 600 sq.ft. at $1.50		900.00	
			57,196.80	
	Allowance for reproduction of A.D.T. alarm system, awnings, signs, plumbing, electric wiring, and other special installations		13,030.00	
			$ 70,226.80	$ 71,000.00
R 14704	Catherine S. Duncan (Right of Way)			
	Land: 5227 square feet at $0.45 per square foot		2,352.15	$ 2,500.00

The Commission approved the Assistant Counsel's request and the recommended offers. The attached resolution relative thereto, marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Right of Way Engineer presented for the Commission's approval a form of agreement with the U. S. Bureau of Reclamation concerning acquisition of federal land that is needed as right of way in connection with the improvement of the Garrison Corner Section of the Nyssa-Adrian Secondary Highway in Malheur County. He explained that this agreement supercedes a five-year agree-

ment which the Commission approved at the previous meeting, and extends to fifty years the effective period of the previous agreement. The Commission unanimously approved the agreement as submitted. (The agreement was signed later in the session.)

The Right of Way Engineer also presented for the Commission's approval a request from Mr. James H. Davis, Ontario, for a change in the location of the point of access from his property to the new location of the Pumping Plant Hill-Ontario Section of the Old Oregon Trail. He said that it was necessary to buy some property from Mr. Davis, in connection with which Mr. Davis was granted access at a certain point but now wants his old driveway restored. He recommended approval of the request. The Commission approved the recommendation.

The Right of Way Engineer presented for the Commission's approval a list of "Sales of Miscellaneous Property" that have been effected subsequent to the last meeting of the Commission, pursuant to authority previously given the Commission's Chief Counsel, as follows:

1. Miscellaneous furniture, et cetera, acquired from Nemic Auto Court on Canyonville-Johns Section, Pacific Highway. Sold to Roseburg Furniture Exchange for $66.

2. Three light sashes acquired from Pioneer Auto Court on the Canyonville-Johns Section, Pacific Highway. Sold to Hal W. Lehman, Salem, for $14.80.

3. Four windows and one door acquired from Pioneer Auto Court, Canyonville-Johns Section, Pacific Highway. Sold to State Highway Sign Department for $4.00.

4. One door and two small windows acquired from Pioneer Auto Court. Sold to J. D. Johnson, Salem, for $4.00.

5. Building used by construction department in connection with construction of the Vadis-Gardiner Ranch Section of the Sunset Highway, Washington County. Sold to Fred M. Brown, Hillsboro, for $100.

6. Old dwelling at 495 East Third Street, Eugene. Sold to W. H. Goddard, Eugene, for $50.

7. 285-gallon gas tank, ten years old, on the Dodson-Bonneville Section of the Columbia River Highway. Sold to Garrabrant Bros., Hood River, for $10.

8. Old dwelling located at 338 Ferry Street, Eugene. Sold to C. & D. Wrecking Company, Eugene, for $50.

9. Kitchen furniture, consisting of chairs and table, acquired from Pioneer Auto Court on the Canyonville-Johns Section of the Pacific Highway. Sold to Robert L. May, Jr., Salem, for $7.00.

The Commission unanimously approved these sales as reported.

The Commission discussed and upon recommendation of the Chief Counsel and the Engineer approved a form of "Release of Slope Easement" in favor of N. J. Thomas and Alma G. Thomas, covering an easement located on the West Slope-Beaverton Section of the Tualatin Valley Highway. By way of explanation, the Chief Counsel advised that the easement no longer is required because the Thomases have filled in their lot and wish title to their property cleared, which will be effected by approval of the easement release. (The release was signed by the Commission later in the session.)

The Assistant Counsel, Mr. J. W. DeSouza, brought up for discussion a proposed settlement with Mr. Frank Finlayson of his claim for damage to his house located adjacent to the Oregon Coast Highway near Newport. He stated that the highway at this point was reconstructed very close to Mr. Finlayson's house and rather than move his house, Mr. Finlayson constructed shoring to protect it and he is now asking the state to construct the foundation, which is estimated to cost about $700. He gave as his opinion that the request is reasonable and just, and accordingly recommended approval of an expenditure of $1,000 for the purpose, the extra amount being requested to take care of contingencies, should they arise. The Commission approved the recommendation unanimously on the condition that a full release of further responsibility or obligation is received from Mr. Finlayson.

Mr. DeSouza also presented for the Commission's consideration a request from Mr. George Arthur Zwick for a change in the point of access from his property to the Pacific Highway West, between Dundee and Dayton Junction. He said that Mr. Zwick now has one reserve access but wants it changed to another location which will not only be better from his standpoint, but also from the standpoint of the state. He recommended approval of the request. The Engineer and Chief Counsel concurred. The Commission approved the recommendation unanimously. (The form of "Indenture of Access" covering the change was signed by the Commission later in the session.)

The Engineer reported that the Veterans Memorial Association of Gold Beach is contemplating the remodeling of a building which it owns, adjacent to the Oregon Coast Highway at Third Street in this town, which location is just south of the recently improved section of the highway at this place. The Association wishes to remodel the building in harmony with the location of the highway, so has suggested that if the state needs additional right of way for the future improvement of the highway such right of way be acquired now so they can do their rebuilding in conformity therewith. He recommended approval of the request and that the Right of Way Department be authorized to negotiate an option. The Commission approved the recommendation.

The Engineer also brought up for discussion the matter of purchasing additional property in the City of Eugene, adjoining the present maintenance headquarters, and particularly described as Lot 9 in Block 35 of Fairmount Addition. This lot, he said, has a frontage of about 70 feet on 15th Avenue and 190 feet on Fairmount Boulevard, and there is located on the property a one-storey frame house with concrete basement. If this property is purchased, he said, the state would then have title to all the property abutting on Fairmount Boulevard, which could be vacated, giving the Highway Department control and use of this 80-foot street, and an additional 70-foot frontage on 15th Avenue.

He also pointed out that by purchasing this lot the Highway Department would not only acquire an additional 190-foot frontage on Fairmount Boulevard, but would also have full and complete use of Walnut Boulevard. He exhibited a map showing the situation and advised that he believed the lot can be purchased from the owner for about $5,500. The Engineer also mentioned that if this property is purchased the house would be occupied by one of the section foremen, who would be in a position to keep a lookout over the other buildings in the Highway Department group and would be near at hand in case of emergency. The Commission unanimously approved the securing of an option for the property.

The Engineer presented for the Commission's information a written report dated April 7, 1950, concerning state properties which are subject to assessment and taxation, but no action was taken thereon. In this connection the Chief Counsel advised the results of a conference with members of the State Tax Commission which was to the effect that the Tax Commission is willing to confer with the Highway Commission as to state highway properties, and will approve any arrangement that the State Highway Department can work out with county assessors.

The Chief Counsel reported the following settlements of condemnation cases and requested approval of the same by the Commission:

1. State of Oregon vs. Burt E. Barclay, et al, involving acquisition of 2.64 acres of land needed for the Scott Creek Section of the Alsea Highway, Lincoln County. Settled for $2,634 plus fencing.

2. State of Oregon vs. Carl G. Bechen, et al, involving acquisition of two parcels of land containing 3.86 acres, needed for construction of two approach or connecting roads between the Sunset Highway and the Hillsboro-Cornelius Pass County Road in Washington County, settled for $2600, and reduction in acreage from 3.86 acres to 3.62 acres.

3. State of Oregon vs. Chauncey Florey, et ux, involving acquisition of 0.76 acre of land needed in connection with relocation and construction of a portion of the Tiller-Trail Secondary Highway in Douglas County. The amount offered in condemnation was $200. Settlement effected with owner for $1500. The Chief Counsel explained that the Commission's offer was based upon an appraisal considering that the property was best suited for agricultural purposes, but the owner contended that it was industrial property and that he planned to use it as a site for a large sawmill, which contention was doubted, but which subsequently proved to be a fact because the owner actually constructed a large sawmill upon the remaining property at greater construction expense than that to which he would have been put had the mill been constructed on the property taken by the state. A reappraisal of the property under condemnation was made, he said, and upon the basis thereof it was determined that the first appraisal, based upon the land being best suited for agricultural purposes, was incorrect, and that the land taken by the state is worth $1,500 for industrial use, which amount the owner accepted. The Chief Counsel also stated that in the negotiations with the Floreys it was agreed that the state would abandon to the Floreys, who own the abutting property on both sides of the

highway, a small portion of the old highway right of way which is not needed by the state, hence it is now necessary that the Commission adopt a resolution abandoning in favor of the Floreys such portion of the old highway.

The Commission by unanimous vote approved all three settlements as reported by the Chief Counsel. The Commission also by unanimous vote adopted the attached resolution, marked EXHIBIT "C", with respect to the settlement with Chauncey Florey, et ux, as reported by the Chief Counsel, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Chief Counsel also asked the Commission to confirm the following settlements:

1. Settlement of the case of State vs. Cerruti, involving property on the Columbia River Highway, Multnomah County.

2. Settlement of the case of State vs. C. L. Ambers, et al, concerning a stockpile site near the town of Gates on the North Santiam Highway.

3. Settlement of the case of State vs. Anderegg, et al, concerning property situate on the Sunset Highway.

With respect to the first case, the Chief Counsel advised that the jury returned a verdict of $4,000 plus attorney's fees, whereas his offer was in the amount of $3,000. The case, he said, was appealed to the Supreme Court, and sent back for retrial which is now scheduled, but the defendants have agreed to settle for the amount returned by the first jury, which was $4,000 plus $400 attorney's fees, and they have agreed to pay their own costs. He recommended settlement on such basis. The Commission approved the recommendation.

With respect to the Ambers case, the Chief Counsel stated that an option was secured in the amount of $42; later on, however, the owner refused to sign a deed on such basis, but has agreed to settle for $350. He recommended payment of such sum in order to avoid witness and court expense which he said would be considerable. The Commission approved the recommendation.

As to the Anderegg case, the Chief Counsel explained that his offer to Mr. Anderegg was $1,250, based upon an appraisal, but the offer was refused, although Mr. Anderegg agreed to accept $1,850 for his property. A reappraisal of the property, he said, revealed that if the case went to trial the state's expense would be greater than the difference between the amount of the offer and the demand, in view of which he recommended payment of $1,850 to the owner. The Commission approved the recommendation.

The Chief Counsel brought up for discussion a proposed settlement of the controversy with Contractor C. J. Eldon arising out of construction of the Coffey Creek Bridge on the Tiller-Trail Secondary Highway in Douglas County, State Highway Contract No. 2788. He said that the contract was awarded on

March 12, 1946, but Mr. Eldon was dilatory in starting the job and carrying on the work to completion, which resulted in the state's incurring excessive engineering expense, amounting to $365.29. Also, as a part of the work, Mr. Eldon was to keep the existing bridge in good condition, which he did not do, so repairs were made by a state crew, at a cost of $385.59. As a result of Mr. Eldon's tardiness, he said, it was necessary to extend the time limit for completion of the project several times, which the Commission did, on the condition that Mr. Eldon would reimburse the state for the extra engineering expense and for the cost of the bridge repair work. The Chief Counsel pointed out that one of the conditions of the contract was that the contractor was to have the lumber from the old bridge, but the Highway Department needed and took some of this lumber, and Mr. Eldon lost most of the remaining lumber during high water in the creek. The value of the lumber taken by the state, he said, was $373.62 and this was considered in the preparation of the final voucher, along with the cost of the bridge repair work and the extra engineering expense, but Mr. Eldon refused to accept the final payment on such basis. Moreover, he has taken the matter to court, notwithstanding an endeavor to settle the matter by negotiation and the withdrawal of the state's claim for repairing the bridge, and in his suit Mr. Eldon is demanding payment for the full value of the lumber which was lost by reason of high water. The Chief Counsel inquired whether or not it is the desire of the Highway Commission to carry this matter through the courts or waive the engineering penalty, which appears to be the only difference remaining between the parties concerned. Chairman Chandler gave as his opinion that a principal is involved. He questioned the advisability of specifying a penalty in a contract if it is not enforced. He also expressed the feeling that the Commission should do whatever is necessary to collect the amount of the penalty in each instance. The Assistant Counsel, Mr. Sam A. Hall, expressed the opinion that because of the circumstances surrounding this case, the Highway Commission would lose the case in court. He recommended waiver of the state's claim and settlement out of court, as did also the Chief Counsel, who stated that he could not recommend otherwise, although he has no sympathy with Mr. Eldon. As a result of discussion and in view of the Chief Counsel's advise, the Commission referred the matter back to the Chief Counsel with authority to settle the case out of court by waiving the penalty, if in his better judgment that is the best procedure to follow.

The Commission discussed with the Engineer the bids received at the morning session for highway construction, and at 3:00 p.m. Chairman Chandler announced the Commission's decision with respect to each project, as follows, the Commission's action being by unanimous vote:

"Division #1 Recoiling Project on the Woodburn-Estacada, Cascade, Clackamas and Mt. Hood Highways, Clackamas County. The Commission received seven bids for this work, the low one being that of J. C. Compton & Co., McMinnville, at $56,017. The contract has been awarded to J.C. Compton & Co. at its bid price.

"Grading and paving the Coos Bay (Fir Avenue-Ingersoll Avenue) Section of the Oregon Coast Highway, Coos County. The Commission received two bids for this work, the low one being that of Coos Bay Dredging Company, Coos Bay, at $241,480.44. The other bid was that of Porter W. Yett, Port-

land, at $246,048.50. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Coos Bay Dredging Company, when certain conditions have been satisfied.

"Grading, surfacing and oiling the Crook County Line-Bend Airport Section of the Powell Butte Secondary Highway, Deschutes County. Eight bids were submitted for this work. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder. F. L. Somers, Klamath Falls, at his bid price of $74,981 when certain conditions have been satisfied.

"Vale Rock Production Project on the Central Oregon and Vale-West Highways, near Vale, Malheur County. The Commission received two bids for this work, the low one being that of Barney B. Helser, Rome, Oregon, at $17,150. The other bid was submitted by N. A. Toole Construction Co., Ontario, at $18,060. The contract has been awarded to Barney B. Helser, the low bidder, at his bid price.

"Construction of five piers for the Marion Street Bridge over the Willamette River in Salem in Marion and Polk Counties. State Construction Company, Seattle, submitted the low bid for this work at $172,699. Lee Hoffman, Portland, submitted the next low bid at $232,980. There were three higher bids. The Commission has deferred the award of this contract until the following day. (The Commission later referred the bids to the Engineer with power to award the contract to the low bidder, State Construction Company, when certain right of way matters have been cleared.)

"18.3 miles of roadside improvement on the Troutdale-Dodson Section of the Columbia River Highway, Multnomah County. The Commission has awarded this contract to the R. & M. Construction Company, Central Point, who submitted the low bid for this work at $35,953.90. There were four higher bids.

"Rock production on the Moro-Kent School Section of the Sherman Highway in Sherman County. M. C. Lininger & Sons, Medford, submitted the low bid for this work at $26,700. There were two higher bids. The Commission has awarded the contract to the low bidder, M. C. Lininger & Sons, at their bid price.

"Grade Widening and Paving on the Sunset Highway-Cornelius Pass Section of the Sunset Highway in Washington County. The Commission received four bids for this work, and has awarded the contract to the low bidder, Porter W. Yett, Portland, at his bid price of $18,865.

"Construction of a masonry block maintenance building at Fossil, Wheeler County. Five bids were submitted for the construction of this building, the low one being that of Bemis & Co., Portland, at $9,880.16. The Commission has awarded the contract to Bemis & Co. at the amount of its bid."

The Commission discussed a proposed agreement with the City of Milwaukie relative to the construction of an "outer" highway on the east side of and paralleling US99E between the cities of Portland and Milwaukie. A form of agreement prepared by the Chief Counsel was presented. The Engineer advised that the provisions of the agreement, as prepared, are in conformity with ideas heretofore expressed by the Commission, and recites that the city shall make available to the state all necessary right of way and shall construct the necessary highway embankment and roadbed, pursuant to plans and specifications prepared by the state. The city also consents to the closing of the present access roadway leading from Harvester Drive to a connection with the main highway, and agrees to maintain this outer highway as a city street at city expense when construction is completed. The Engineer also pointed out that the agreement provides that the state shall reimburse the city for the construction of the roadbed or embankment at the rate of 35¢ per cubic yard for all material incorporated therein; that the state shall also construct on the roadbed when it is completed, a standard blacktop surface. He recommended approval of the agreement. The Chief Counsel concurred. As a result of discussion, the Commission approved the recommendation unanimously. (The agreement was signed by the Commission later in the session.)

The Chief Counsel brought to the Commission's attention the claim of Mr. Carl Hammer, Hermiston, Oregon, for repairs to his 1947 Buick automobile, which he alleges was damaged when driven into a tree that was felled across the Columbia River Highway by a State Highway Department crew. He stated that Mr. Hammer's original claim was in the amount of $469.60 and that investigation reveals that the state is liable, but not to the extent of the amount demanded because a considerable amount of the repairs were not due to the car being driven into the tree. He recommended payment of the sum of $129.25 to Mr. Hammer, who, he said, has agreed to accept such amount as payment in full, and moreover has signed releases on such basis. The Commission approved the settlement as reported.

The Chief Counsel requested authority to execute, and file, the consent of the Commission to the vacation of a portion of an alley situate in Block 7 of the amended plat of Fairmount in the city of Eugene. He said that this "vacation" would be to the benefit of the Highway Commission, and is recommended not only by himself, but also by the Commission's Engineer. The authority requested was granted by the Commission by unanimous vote.

The Commission discussed briefly matters pertaining to authority heretofore granted the Chief Counsel by resolution adopted on September 19, 1949, to settle certain claims against the State Highway Department, but deferred action thereon until its next meeting.

The Engineer brought to the attention of the Commission a letter from the Honorable Douglas McKay, Governor, concerning oily substances that have been deposited on the sands of the beach, and which, it is alleged, have affected waterfowl and which may adversely affect recreational activities. Governor McKay suggests in his letter that, inasmuch as the beach between high and low tides is public property under jurisdiction of the Highway Commission, the Highway Commission investigate the conditions to ascertain the source of

the trouble and possible remedy. The Commission instructed the Engineer to check with the Parks Superintendent, who has investigated the matter, and report his findings.

The Engineer reported that at the request of the State Board of Control he has investigated the feasibility of utilizing a vacant lot situate at the southeast corner of the intersection of Capitol and Center Streets, Salem, as a parking lot for state-owned automobiles. It appears that the Board of Control has in mind to erect a service station on this lot for state cars and to make available for car parking that area not used for such purpose; and the suggestion has been made that the property be purchased with state highway funds. It also appears that the purchase price of the lot is $13,500 and that it will cost from $750 to $1,000 to pave it. The Engineer pointed out that the proposed parking area will accommodate only about eighteen cars and that the cost, per car, to provide space at this location would be about twice as much as to provide it at the old Washington Grade School site about one block farther east. He recommended against the use of state highway funds to purchase this property. The Commission approved the recommendation.

The Engineer reported on the proposal of Tillamook County that the Pacific City-Sand Loop County Road be exchanged for the Little Nestucca Secondary Highway in the State Secondary Highway System, which was the subject discussed with the Tillamook County Court earlier in the session. He said that a very careful investigation has been made which discloses that the county road referred to is eighteen miles in length, all of which, except a section .7 mile long, will be improved with an oil surface by midsummer. He estimated the cost to complete this oiling work at $100,000 and the ultimate cost for complete modernization of the road at $750,000. The estimated cost to complete the Little Nestucca Secondary Highway, he said, is $650,000, of which amount $130,000 has already been allocated in the current program for the replacement of three bridges, which bridges the county wants constructed as planned, regardless of the exchange of roads. He pointed out that the county road is 8.5 miles longer than the Little Nestucca Secondary Highway, so will cost annually approximately $6,000 additional for maintenance. He recommended that the county's request be denied. The Commission approved the recommendation.

The Engineer reported that pursuant to authority granted him by the Commission at the previous meeting, he conferred with the owners of the private road leading from the Alsea-Deadwood Secondary Highway into Lobster Valley, Benton County, and ascertained that this road, plus all necessary right of way needed for widening it, may be purchased for the sum of $31,500. Were the road to be constructed at current prices, he said, the actual cost would be approximately $36,000. He estimated the cost to modernize this private road, which is 2.39 miles long, at $66,000, making a total cost of $97,500 to provide a suitable road into the floor of Lobster Valley. The Engineer recalled the offer of the Benton County Court to assume future jurisdiction, and control, maintenance, et cetera, of the Tampico-Lewisville Secondary State Highway No. 202 if the Highway Commission will extend the Alsea-Deadwood Road into Lobster Valley. He recommended approval of the offer and the purchase of the private road from the Yew Creek Logging Company for $31,500, and that, when the arrangements have been consummated, he be authorized to improve the road to secondary highway standards

at an additional cost of approximately $66,000. As a result of discussion, the Commission unanimously approved the recommendation. The Engineer was authorized to advertise the project for bids when the exchange of roads has been effected and right of way matters clarified.

The Commission discussed a written report from the Engineer, dated April 21, 1950, on the condition of the Crater Lake Highway and on the condition of the Redwood Highway. In his report the Engineer recalls the necessity to place reduced load limits upon these highways during the spring thaw, objections to which were offered by operators in the Medford area. He said that there is no way of avoiding the placing of such reduced load limits unless the existing surfacing is reinforced and stabilized. He estimated the cost of such stabilization work on the Crater Lake Highway between M.P. 46.85 (Prospect) and M.P. 39.35 (Cascade Gorge) which he said is the worst section, at $135,000. A far worse condition exists on the Redwood Highway between Cave Junction and the California state line, he said, a distance of 12.7 miles, and on a half-mile section near the town of Selma. He estimated the cost to stabilize these two sections at about $300,000 making a total expenditure of $435,000 for both projects. He declared the improvement imperative, and recommended that he be given authority to advertise both projects for bids to be received at the next meeting of the Commission so as to assure that the work will be completed this year. He also recommended that the entire cost be paid with state funds because of the delay that the use of federal aid funds would entail. As a result of discussion, the Commission unanimously approved both recommendations.

In this connection, the question arose whether or not the state's scales at Grants Pass are properly located, and if scales are needed on the Redwood Highway between Kerby and Cave Junction. Also, whether or not the state scales at Eagle Point are situated so they cannot be by-passed. The Engineer was instructed to check into these features. He was authorized to relocate the scales at Grants Pass and Eagle Point if the investigation reveals that they are not in the proper location at the present time to secure desired results. He was also authorized to install a new set of scales on the Redwood Highway near Cave Junction. He was instructed to ascertain at each of these points who the truck operators are hauling for, where their loads arise, and their destination.

The Engineer reported on a request from property owners of Cannon Beach that access to the new route of the Oregon Coast Highway be allowed from Division Street in Cannon Beach. He exhibited a map showing the improvement now underway at this place. He pointed out that this highway has been designated a through highway, and that, in anticipation of an extremely heavy traffic moving in and out of Cannon Beach during the tourist season after the highway is built, it was considered inadvisable to permit entrance to the highway at Division Street, as was first contemplated. It seems preferable, he said, to construct a traffic interchange in lieu thereof at another location about 1,000 feet south of Division Street, and the present project plans call for such connection, which will afford access to and from Cannon Beach without the hazard of cross-traffic. In addition, access to the new highway will be available by the existing highway, which connects with the new one immediately north of Cannon Beach. He gave as his opinion that entrance to and exit from Cannon Beach is adequately provided and he recommended that the

request for the additional access be denied. The Commission approved the recommendation unanimously, subject, however, to a further review of the situation after the highway has been completed and opportunity afforded to check traffic conditions at that time.

The Commission discussed a report from the Engineer on the results of studies to determine the volume of traffic that patronized Hoodoo Ski Bowl during the past winter season. The report discloses that during the four-month skiing season from December 1st to March 31st, 1,840 cars, containing an average of 3.6 persons per car, or a total of 6,624 persons, patronized this place, which is considerably more than the number estimated by the people who have asked the Highway Commission to keep open the road that leads to the Bowl from the Santiam Highway. In view of this report, the Commission authorized the Engineer to keep this road open again next winter.

The Engineer presented a written report dated April 15, 1950, containing specific data relative to damage to highways caused by heavy loads. He explained that this is an informative letter which does not need any particular action at this time. Also, that he will augment it by additional reports from time to time in the future.

The Engineer also reported on the damage which was done to state highways during the past winter by reason of frost action, slides, floods, et cetera, covering the entire state. He estimated the cost to repair such damage at $1,000,000 in excess of the amount that was anticipated when the 1950 Maintenance Budget was approved. He was instructed by the Commission to report later in the year whether or not he will need funds in excess of the $1,000,000 now held in reserve to pay this expense, with the understanding that should additional funds be required they can be transferred at that time.

The Engineer brought up for discussion the allocation of funds temporarily set up in the current construction program to finance the improvement of the Wasco-Condon Secondary Highway and the Klamath Lake Secondary Highway, totaling $330,000. He recalled that originally the allocation provided $80,000 for the Wasco-Condon Highway and $250,000 for the other, but the Commission deferred a definite decision with respect to these allocations pending inspection of both roads, which inspection was made recently by the Commission. In the discussion of this matter it was pointed out that delegations appearing before the Commission regarding the Wasco-Condon Road particularly stressed the importance of surfacing this road from the end of the present surfacing about six miles west of ndon, westerly a distance of about 11.5 miles, because this section is only a dirt road and is almost impassable during the winter months. It was also pointed out that there is a dirt section about 1.24 miles in length on the west side of the John Day River which is suitable only for one-way traffic because it is narrow and crooked. The Engineer also advised that two sections, one of which is 5.26 miles long and extends east of the John Day River, and the other 3.76 miles in length, extending westerly from the John Day River, have been graded and surfaced with pit-run gravel. These two sections he said, should be improved by surfacing with crushed rock. Chairman Chandler expressed a preference for the elimination of the dirt sections. He suggested that the $80,000 now available

be spent for improvement of the existing road easterly from the summit of East Cottonwood Grade, and that the Commission consider in its 1951 program an allocation for the improvement of the West Cottonwood grade section. As a result of the discussion, the Commission unanimously approved the suggestions of Chairman Chandler and it was so ordered.

As to the Klamath Lake Secondary Highway, the Engineer advised that a survey is now being made which follows new alignment from the end of the present oiled surface and connects with the present road about eleven miles northerly thereof, and that this survey will be completed in about six weeks' time. He roughly extimated the cost to grade, surface and oil this section at approximately $300,000, which is about $50,000 in excess of the amount tentatively allocated for this highway in the current construction program. He suggested that the Commission approve the grading and placing of a cinder surface on this eleven-mile section now so that the work can be performed this fall and winter, construction of the remaining portion of the highway to follow later as funds become available. The suggestion was approved by the Commission by unanimous vote, subject to the condition, however, that $250,000 is the maximum amount the Commission will spend for this improvement and that no more work should be undertaken than can be financed with such sum, and provided further that the project is approved by the Bureau of Public Roads for Federal Funds, and that right of way matters are satisfactorily disposed of in advance of advertising the project for bids.

The Commission discussed a report from the Engineer on the establishment of a proposed one-way street system through the city of Redmond. The Engineer advised that The Dalles-California Highway follows Sixth Street through this city, which street, according to present plans, will be used for northbound or for southbound highway traffic, one or the other. He said that his studies cover the use of either Fifth Street or Seventh Street as the route for traffic flowing in the opposite direction. The Seventh Street route, he said, is about one-half mile longer than the Fifth Street route, and the estimated cost to construct it is about $26,710 more than the estimated cost to construct the Fifth Street route. He recommended adoption of the Fifth Street route for northbound highway travel, which route, he said, is the one preferred by the City Council, and that the Right of Way Department be authorized to negotiate options for needed right of way so that the project can be advertised for bids in the immediate future. The Commission approved the recommendation unanimously, it being understood that the estimated total cost of the project is $146,200, being $31,200 in excess of the amount originally set up in the state's Major Betterment budget for such improvement.

The Commission had under discussion a letter from the City of Beaverton requesting reconsideration by the Commission of its action previously taken denying the city's request for the improvement of the Hillsdale-Beaverton Highway (ORE10) between Short Street and Cedar Street in Beaverton. The Engineer advised that, acting on instructions from the Commission at the previous meeting, he conferred with the city officials relative to their

request and carefully investigated the project they have in mind. The existing street, he said, has a paved width of only 16 feet and is very congested. Moreover, the street is adjacent to the railroad and can be widened only on one side and maximum width that can be obtained is 24 feet. He estimated the cost of the requested work at $10,000 and recommended approval of the project for this year's construction in order to relieve the existing congestion and hazards of this narrow street which carries very heavy traffic through the center of the town. The Commission approved the recommendation unanimously.

The Engineer reported on the request of the City of Seaside for state aid in financing the construction of a new bridge across the Necanicum River on 12th Avenue in Seaside. He advised that the physical features involved clearly identify this project as one which is eligible for Special State Tax Street Funds, and he recommended an allocation of $15,000 of such funds to assist the city in financing the project. (For details see copy of Engineer's written report dated April 14, 1950, in general files.) As the result of discussion the Commission unanimously approved the recommendation.

The Commission discussed a report from the Engineer on drainage conditions obtaining at the highway underpass on Esplanade Avenue in the city of Klamath Falls which were brought to the attention of the Commission at the previous meeting by a delegation from that city. The Engineer advised that an investigation reveals that the drainage facilities are very unsatisfactory, and as a result, water accumulates in the bottom of the underpass, causing the dangerous condition to which the delegation referred. The only satisfactory way to correct the condition, he said, is to lower a section of the outfall sewer, which is estimated to cost $3,660. He recommended approval of the improvement as a minor betterment project to be financed from reserve funds in the 1950 budget. The Commission approved the recommendation.

The Commission discussed a report from the Engineer on the request of people residing along 82nd Avenue (Cascade Secondary Highway) in the vicinity of Battin School, Portland, for further study of the need of traffic lights at the Johnson Creek Boulevard intersection with 82nd Avenue, and at the intersection of Battin Road with 82nd Avenue, previous requests for such installations having been denied. According to this report, the second investigation, which was made by the Traffic Engineer on March 30, indicated only a minor increase of traffic over that previously reported, the average hourly volume of vehicles being determined as 600, and the pedestrian count showing an average of only 39 persons per hour, whereas the nationally recognized requirements for signals call for an average of 750 vehicles and 250 pedestrians per hour. The report also indicates that over the past three years and ten months, a total of five accidents have occurred, only one of which might have been prevented by signals; and that from such standpoint alone, there are 356 unsignalized intersections on the rural state highway system which have a higher accident record. In view of this report, the Commission again unanimously denied the request for signals. However, the Commission authorized the school district to operate a portable school-crossing warning signal as a trial proposition, if the district is willing to purchase one and provided the signal is properly supervised.

The Commission also discussed a report from the Engineer on the need to install traffic control signals and channelization at intersections on

McLoughlin Boulevard (Pacific Highway East) in Portland, particularly between the Ross Island Bridge and the south city limits. The Engineer estimated the cost of such signalization at $142,630, and advised that the state's share of this expense would be $71,315 if the work is done as a cooperative project with the city, as has been done in the past. The Commission deferred action on this matter pending formulation of its program for 1951.

The Commission discussed and upon recommendation of the Engineer unanimously approved a petition from residents of Rickreall requesting construction of a footpath along US99W (Pacific Highway West) from its intersection with the Salem-Dallas Highway northerly to Rickreall Grade School, at an estimated cost of $1,500. The Engineer was authorized to proceed with the construction of the footpath, provision for which is included in the 1950 budget.

A petition was presented from residents along the Fox Hollow Secondary Highway south of Eugene, requesting construction of pavement on this highway from Eugene to its intersection with North Spencer County Road. The Commission referred the matter to the Engineer for investigation and report.

The Engineer reported that the following cities and towns have fulfilled the legal requirements with respect to the expenditure of State Tax Street Funds that accrued to them during the second half of the year 1949, and that the plans of the projects proposed to be financed with such funds have been examined and found satisfactory:

Aumsville	Echo	Madras	Sublimity
Canyonville	Elkton	Monument	Troutdale
Cove	Fairview	Nehalem	Tualatin
Creswell	Harrisburg	Oceanlake	Wallowa
Culver	Lafayette	Phoenix	
Dayton	Lostine	Rockaway	

He recommended approval of the plans by the Commission. The Commission approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer presented for the Commission's consideration six Special State Tax Street Fund projects involving the improvement of city streets in the following cities and towns:

Gresham - total cost, $29,500 (State's share, 15,000)

Empire - total cost, $4,300 (All state funds)

Joseph - total cost, $13,200 (All state funds)

Coquille - total cost, $8,750 (All state funds)

Burns - total cost, $14,000 (All state funds)

Milton - total cost, $17,000 (State's share 15,000)

He recommended approval of all except the Milton project, which he said consists of the lengthening of an existing bridge to allow the Army Engineers to widen the channel of the Walla Walla River as a portion of a flood control project.

The existing bridge, he said, is suitable for traffic and the only necessity for the extension is to accommodate the flood control project, in view of which he questioned its eligibility for state funds. The Commission unanimously approved the projects located in the cities of Gresham, Empire, Joseph, Coquille and Burns, but deferred until its next meeting a decision with respect to the bridge lengthening project in the town of Milton. Commissioner Reynolds expressed a desire to look into this project before the Commission makes a final decision with respect to it.

The Engineer requested authority to advertise for bids for construction of buildings at the following section maintenance headquarters, provision for which he said is included in the 1950 budget heretofore approved by the Commission as to principle.

1. Prospect (Crater Lake Highway). Construct standard concrete block building 32' x 78' for section maintenance headquarters. Estimated cost of building $14,500, including state force work, grading, surfacing, some oiling, fence, gas pumps, well and pump. Total estimated cost of project - - - - - $19,000

2. The Dalles (US30). Construct additional storage facilities for department equipment consisting of cars and station wagons. Open storage frame building 20' x 48'. Estimated cost - - - - - - $ 4,650

3. La Grande (US30). This project is being substituted for the one shown on the budget proposed for Klamath Falls. Construct a sign storage building 18' x 40', frame construction. Estimated cost - - - $ 3,550

4. Basque maintenance station (US95, Malheur County). Construct additional housing facilities for department employees consisting of one frame cottage 24' x 26'. Total estimated cost complete - - - $ 7,750

Grand total - - - - - - - $34,950

The Commission approved the request unanimously.

Consideration was given by the Commission to a report from the Engineer with respect to the widening of the pavement, channelization, and installation of traffic lights at the intersection of Naef Road with the Pacific Highway East, north of Oregon City, where a drive-in theater has been constructed. The Engineer advised that pursuant to authority granted him by the Commission, he contacted the owner of the theater, Mr. Phil L. Polsky, to determine whether or not he would pay half the expense involved to provide necessary facilities and Mr. Polsky expressed a willingness to contribute $5,000. A careful survey of the project, he said, indicates that the facilities will cost $12,000 and he recommended approval of a cooperative project, each party to pay 50 percent of the total cost when the amount has been definitely determined. The Commission approved the recommendation unanimously. (An agreement covering the matter was signed by the Commission later in the session.)

The Commission considered, and referred to the Engineer for investigation and report, a letter from the Aumsville City Council requesting the

widening of Highway 222 (North Santiam Highway) through Aumsville.

The Commission discussed a report from the Engineer on a petition signed by 424 interested parties in North Portland requesting the improvement of Swift Secondary Highway at its intersection with the Pacific Highway East and the Pacific Highway West. In this connection the Commission also discussed a letter from Mr. Frank J. Kernan, owner of property at this location, who urgently requests this improvement at an early date to facilitate the development of his own property, and who submits to the Commission a proposition with respect to right of way which will be needed for the proposed highway across his holdings. The Engineer advised that the improvement is a meritorious one and is needed in order to complete the highway development at this point. He estimated the cost at $220,000 of which amount $9,000 is the appraised value of right of way across Mr. Kernan's property. He further stated that this matter has been considered for several years and that Mr. Kernan originally demanded the sum of $30,000 for right of way needed from him but has now stated his willingness to donate the right of way free of cost to the state if the state will pay him for constructing 112,000 cubic yards of highway embankment on the right of way, at the rate of 70 cents per cubic yard, or a total of $78,400. He explained that Mr. Kernan desires this sort of an arrangement because he plans to fill in his adjoining property and can not do so unless the highway fill is made either before or at the same time. He recommended acceptance of Mr. Kernan's offer. The Commission deferred a decision in the matter pending discussion of it with Mr. Kernan, scheduled to be present on the following day. (As a result of further discussion on the following day, the Commission referred the matter back to the Engineer for an additional report at the next meeting, which report is to include reasons why it is important to complete the project in the next construction program, if the Commission should decide to accept Mr. Kernan's offer. The Chief Counsel was instructed to report on the legality of the transaction and to prepare a form of agreement covering the matter for execution by the Commission if it decides to go ahead with the project.)

The Engineer brought up for discussion a proposed rearrangement of state highway traffic routing in the city of Portland necessitated by the adoption by the city of a one-way street grid, particularly as it affects Fourth Avenue and Sixth Avenue. He pointed out that each of these streets is a state highway route and that under the new setup both are limited to one-way northbound travel. He recommended as a solution for this problem, and in order to provide a routing for southbound state highway traffic, the elimination from the state highway system of that portion of Sixth Avenue which extends south from Burnside Street to S. W. Grant Street, and the designation of Broadway as a southbound state highway travel route between Burnside Street and S. W. Lincoln Street and that the diagonal street between Lincoln and Grant Streets connecting Broadway and Sixth Avenue be added to the system. He also recommended that the maintenance agreement between the Highway Commission and the City of Portland be revised accordingly. In this connection he pointed out that the city has requested installation of traffic signals on Jefferson street and Columbia Street (state highway routes) at their intersections with S. W. First Avenue, S. W. Second Avenue and S. W. Eleventh Avenue, a total of six signals, which are estimated to cost $12,000, the expense therefor to be shared equally by the

city and the state. And the city also wants the state to pay fifty percent of the cost of two illuminated signs at each intersection of the one-way grid system, insofar as they are required on state highway routes, which signs are estimated to cost $8,300.00, making an estimated total outlay of $20,300, of which the state's portion would be $10,150. He recommended approval of the arrangement as outlined, which he suggested should be covered by a written agreement between the City and the State, and that the Commission authorize payment of its share of the costs on a fifty-fifty basis, funds for which are provided in the 1950 budget for urban signs. The Commission unanimously approved the Engineer's recommendation with respect to both subjects. The Chief Counsel was instructed to prepare an appropriate form of resolution covering the re-routing of highway traffic from Sixth Avenue to Broadway, and an agreement with the City with respect to the installation of the signals and illuminated signs.

The Commission considered and upon recommendation of the Engineer denied a request from the Sweet Home Parent-Teachers Association for the installation of a traffic signal at the intersection of "M" Street (Santiam Highway) with 18th Avenue in the town of Sweet Home. According to the Engineer's report, investigation reveals that there is not sufficient warrant for this signal, the average hourly volume of traffic at this intersection being only 461 vehicles, whereas the nationally accepted standard is 750 vehicles. Moreover, the average hourly volume of pedestrian traffic is only 28 as compared with the national warrant of 250.

The Engineer requested authority to increase the project authorization for the installation of traffic signals in the city of Eugene (Contract No. 3287) by the amount of $1,735 to pay the cost of connecting the signals to the city's main control in the city hall so the lights can be synchronized with other lights in the downtown area. The city, he said, will pay one-half of this expense, so the extra cost to the state will be only about $867.50. The Commission authorized the expenditure.

The Engineer reported that in the preparation of schedules to accommodate the five state highway oiling crews for the current season, it has been found that there is more work than the five crews can perform, so it appears necessary to have some of this work done by contract. He further stated that the re-oiling of some 32 miles on four highways in Division No. 1, which is estimated to cost about $97,000, has been advertised for bids to be received at this meeting, pursuant to oral authority heretofore given him by the Commission. He pointed out that this oiling work was contemplated in the preparation of the 1950 General Maintenance Budget as approved by the Commission, but the contracting of the work places it in another category, so a transfer of $97,000 of General Maintenance Funds to the Special Maintenance Account is required. He asked the Commission to confirm the authority given him to contract these projects, and to approve the transfer of funds to pay for the work. The Commission unanimously approved the arrangement as requested.

A letter was presented from the McKenzie River Development and Protective Association, Vida, Oregon, in which the Commission was requested to authorize snow removal on the McKenzie Highway so as to make this highway available for traffic throughout its length at the earliest possible time. The Engineer estimated the cost to open this highway by June 8 at $10,000, by

June 15 at $7,000, and by June 20 at $3,000. He recommended that the request be approved and that he be authorized to start snow removal operations on May 15 so the highway can be open by June 15. The Commission approved the recommendation unanimously.

The Commission discussed communications from the Umatilla County Court, the Pilot Rock Commercial Association and the Morrow County Court requesting the construction of an oil surface on the Heppner Highway, State Highway No. 52, from Nye Junction westerly a distance of about 21 miles to a place known as Lena. The Commission referred this matter to the Engineer for a report as to how much it would cost to do this work.

A letter was presented from the Astoria Central Labor Council, Astoria, Oregon, in which the Highway Commission is requested to provide a four-lane highway facility on US30 between Rainier and Astoria to take care of increased traffic that will use this road in the future, and to relieve heavy traffic on the Sunset Highway. The Commission deferred a decision in this matter pending receipt of a report from the Engineer on the results of an economic study that he is now making of all highways in the vicinity of Astoria. The Secretary was instructed to convey such information to the Labor Council.

The Commission discussed and unanimously approved an agreement with the County Court of Yamhill County with respect to the construction of the Yamhill River Bridge Section of Three Mile Lane State Secondary Highway No. 152 in Yamhill County. (The agreement was signed by the Commission on the following day.)

The Commission also discussed and approved an agreement with Union County providing for county maintenance of the Imbler-Dry Creek Section of the Imbler-Dry Creek County Road (Federal Aid Secondary Highway #481) after the proposed improvement of this section by the state has been completed. (The Commission signed the agreement on the following day.)

The Commission approved an agreement with Multnomah County providing for county maintenance of the Sauvies Island Bridge Section of Gillihan County Road (Federal Aid Secondary Highway #643) after improvement of this section has been completed by the state. (The Commission signed the agreement the following day.)

There was presented to the Commission for approval a proposed agreement with the Town of Paisley, Lake County, providing for the improvement of Mill Street in that town as a Special State Tax Street Fund project, at an estimated cost of $6,000, which is to be paid entirely with state funds. This agreement provides that the city shall assume and be solely responsible for the maintenance of said street after the improvement is complete. The Commission approved the agreement by unanimous vote. (The agreement was signed on the following day.)

Chairman Chandler inquired as to the status of the proposed agreement with the City of Pendleton and Umatilla County with respect to state-owned land situate adjacent to the Pendleton Airport Road, and a small parcel

of land adjacent to the Old Oregon Trail within the Pendleton city limits, on which the Pendleton Developing Company proposes to erect a building for the use of the Secretary of State. The Assistant Counsel, Mr. C. W. Enfield, advised that in the city's study of the matter it ascertained that there are certain federal restrictions that have to be ironed out before the transaction can be consummated, that these restrictions are being checked, and it is hoped the action can be completed in the not distant future.

The Engineer reported that pursuant to authority heretofore granted him by the Commission, he has awarded contracts, as follows:

Grading, surfacing and oiling the Garrison Corner Section of the Nyssa-Adrian Secondary Highway in Malheur County, bids received February 6, contract awarded April 5, to the low bidder, N. A. Toole Construction Company.

Grading and paving the Goshen-Creswell Section of the Pacific Highway, Lane County, bids received March 21, contract awarded April 19, to the low bidder, Porter W. Yett.

The Commission unanimously confirmed the awards as reported.

The Engineer also reported that surveys for the relocation of the Starkey Secondary Highway between Hilgard Junction and Red Bridge, and for the relocation of the South Unit of the Joseph-Wallowa Lake Section of the Joseph-Wallowa Lake Secondary Highway have been completed. He exhibited maps showing the relocated alignment and explained details in connection therewith. He requested the Commission's approval of the surveys and authority for the Right of Way Department to carry on negotiations for the acquisition of needed right of way and that he be authorized to advertise these improvements for bids as soon as the right of way has been acquired. As the result of careful consideration of the facts disclosed by the Engineer the Commission by unanimous vote approved and adopted both surveys. The Chief Counsel was authorized to negotiate immediately for right of way, and the Engineer was authorized to advertise both projects for bids when right of way matters have been satisfactorily disposed of. The attached resolution, marked EXHIBIT "E", approving the surveys as reported by the Engineer, which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The meeting adjourned at 5:00 p.m. to reconvene at 9:00 a.m. the following morning in the same room.

Portland, Oregon
April 25, 1950

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the following persons present and participating:

Ben. R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Auditor
H. B. Glaisyer, Secretary

At 9:00 a.m. bids, as follows, for highway construction, were opened and read aloud by the Secretary pursuant to previously published notice, following which Chairman Chandler announced that awards of contracts would be made at 4:00 p.m. in the same room.

BAKER COUNTY

Salisbury Junction-Poker Creek Section, of the Sumpter Valley Secondary Highway, about 7 miles south of Baker. Federal Project No. S-97(1). 4.05 miles grading, surfacing and oiling. Requires approximately 54,300 cu.yds. excavation; 20,200 cu.yds. topping materials; 7,900 cu.yds. crushed rock; 370 cu.yds. rock slope protection; and 250 tons 150-200 asphalt.

Allen E. Sackett, Hood River	$ 78,585.00
Stevenson Constr. Co., Salem	82,059.00
F. L. Somers, Klamath Falls	82,302.00
J. C. Papin, Baker	84,401.50
Durbin Bros., Eugene	88,578.75

J. N. & M. J. Conley, Portland	98,017.00
Newport Constr. Co., Portland	102,845.00

BAKER AND UNION COUNTIES:

North Powder ("E" Street) and Telocaset Junction-Wingville Junction Section, City Street and Old Oregon Trail Highway, near the town of North Powder. City and State Project. 0.22 mile grading, surfacing and oiling; furnishing crushed materials in stockpile. Requires approximately 1400 cu. yds. of excavation; 1,200 cu.yds. cinder topping; 5,900 cu.yds. crushed rock or crushed gravel; and 18 tons of 150-200 asphalt.

N. A. Toole Constr. Co., Ontario	21,034.00
Rush Constr. Co., Enterprise	24,313.00

DOUGLAS COUNTY

North Dillard Bridge Section, near Roseburg on Pacific Highway. Federal Aid Project FI-78(14). Construct reinforced concrete and steel bridge 504 feet in length; grade, surface and pave 0.57 mile highway approaches. Involves approximately 600 cu.yds. trench excavation, 62,500 cu.yds. general excavation, 5100 cu.yds. selected roadbed topping, 2500 tons Class "B" asphaltic concrete, 600 cu.yds. excavation for structure, 320 ft. steel piling, 950 cu.yds. Class "A" concrete, 151,000 lbs. metal reinforcement, 474,000 lbs. structural steel and 1040 ft. metal rail.

Messrs. Howard Moffat, Manager, Bend Chamber of Commerce, and Douglas Ward, Chairman of the Highway Committee of said Chamber, appeared before the Commission regarding the Tumalo Grade Section of the McKenzie-Bend Highway, and regarding The Dalles-California Highway between Bend and Willamette Highway Junction. Mr. Moffat was spokesman. He stated that these two projects are the projects of primary importance to the people of their district. He gave as his understanding that a survey of the Tumalo Grade Section is now underway, and inquired when the Commission plans to construct this project, particularly a new bridge over the Deschutes River located thereon. He also mentioned that The Dalles-California Highway south of Bend is badly in need of improvement and urged consideration of that project by the Commission. Chairman Chandler ad-

vised that the Engineer is now conducting a location survey of the Tumalo Grade Section and it is expected that the survey will be completed this year, but the Commission is not in a position at this time to make a commitment as to construction of the project, due to uncertainty of funds. As to The Dalles-California Highway project, Chairman Chandler advised that the Engineer has been instructed to make a reconnaissance report of existing conditions, and when this report is rendered the Commission will then decide whether or not to authorize a definite location survey. The section that the Commission has in mind, he said, extends from the town of Gilchrist to the Willamette Highway Junction. He further stated that the Commission is not in a position to make any allocation or promise with respect to this project because of the uncertainty of funds, which have to be distributed equitably to all parts of the state, but the Commission has the improvement in mind and will consider it in formulating future construction programs. Mr. Moffat then inquired concerning the Powell Butte County Road. He was informed that the Federal Aid Secondary Highway designation has been extended to a junction with Federal Aid Secondary Highway #40 so that this entire road is now on the federal aid secondary highway system. Moreover, the Highway Commission at this meeting received bids for grading, surfacing and oiling the section between the Crook County line and the Bend Airport, and expects to award the contract to the low bidder when certain conditions have been satisfied.

A delegation from the city of Garibaldi including the following appeared before the Commission in the interest of improvement of the Oregon Coast Highway through their city, by widening the pavement and constructing curbs and gutters: Eugene S. Kelty, publisher; B. J. Spencer, Mayor; Joe Sause, Fred Wolfsen and William Webber, Councilmen; George Goodrich, City Attorney; Barney Groth, City Recorder; and G. R. Boatwright, City Engineer. Mr. Kelty was spokesman for the group. He briefly reviewed the background of their request, pointing out that the city was forced by the State Sanitary Authority to construct a sewer system, in connection with which it was necessary to disrupt the present highway surface. This work, he said, has now been completed, and the city has also recently replaced its water mains under and across the highway, which required additional disruption of the highway surface. The city, he said, now wants the pavement restored, and a four-lane highway constructed, with curbs along the section, which is about one-half mile in length. If the Highway Commission will approve such project, he added, the City Council will adopt an ordinance prohibiting parking of vehicles along this half-mile section of highway and providing for off-street parking. He presented a copy of a resolution adopted by the City Council to such effect. Mr. Kelty also stated that if the Commission will construct a four-lane highway through their town the city will construct sidewalks at city expense. In support of his request, he gave statistics on highway travel, population, and industries, as they concern their city. He mentioned that the city has $3,500 available to apply on the cost of repairing the highway and city streets which have been torn up by the sewer construction, which money has already been deposited with the State Highway Commission. Mr. Kelty also mentioned that the city has in mind the improvement of side streets, which cannot be undertaken until grades have been established by the State Highway Commission for the permanent grade of the highway. He strongly urged the Commission to authorize the highway improvement this year. Chairman Chandler advised that due to uncertainties of funds the Commission can make no promise at this time but will consider it in formulating future construction programs, and

in the meantime will obtain a complete engineering report on the subject. He gave as his feeling that the improvement would cost $65,000 or $70,000, and he also said that due to the Commission's financial setup, it does not seem possible to do the work this year, even if the Commission should authorize it. Mr. Kelty then inquired concerning the $3,500 the city has deposited with the Commission for repairs. He was informed that the amount is not sufficient to pay the entire cost of the repairs but will be applied so far as it will go for such work, and the city will have to arrange to finance the balance. The matter was discussed further, during which Mr. Kelty recalled the offer of the city to provide off-street parking of cars if the Highway Commission will approve their project. Chairman Chandler concluded the discussion by saying that the Commission would secure an estimate of the cost to do the work that the city has in mind and then make its decision.

Mr. Frank Kernan, Portland, was present regarding his offer to donate right of way for proposed improvement of Swift Secondary Highway in North Portland, details of which were explained to the Commission by the Engineer on the previous day. Mr. Kernan confirmed the Engineer's statements to the effect that he would donate right of way for the highway improvement on the condition that the Highway Commission will pay him for constructing embankment on this right of way in connection with the filling-in of his adjacent private property. He declared that by such an arrangement the state would realize a saving of $35,000 in the construction of the highway fill. The Commission took the matter under advisement. Following Mr. Kernan's departure the matter was again discussed and as a result thereof the Commission instructed the Engineer to render a complete report on the subject at the next meeting of the Commission, and to include in such report information as to the importance of finishing this highway project next year at an estimated cost of $150,000 if the Commission should accept Mr. Kernan's offer and should spend $70,000 for the highway embankment this year. The Chief Counsel was instructed to report on the legality of the matter and to prepare a form of agreement with Mr. Kernan for consideration by the Commission if the project is approved.

Mr. Russell Coleman, representing the California-Western States Life Insurance Company, appeared before the Commission. He requested that the group life insurance agreement that his Company now has with the State Highway Commission be amended to provide that employees of the State Highway Department may secure life insurance in excess of $1,000, the present limit. He said that a number of Highway Department employees have asked for this excess insurance and that his Company will be glad to furnish it if the Highway Commission will authorize payroll deductions to pay the premium. He gave as his opinion that the arrangement will not entail more deductions from the payroll but will merely change the amount of the deduction for each employee who takes advantage of the extra insurance. He also said that in order to avoid criticism from other insurance companies, which might feel that they are being discriminated against, only those employees who are insured under the group plan will be allowed to purchase the excess insurance. The Commission took the matter under advisement.

Following Mr. Coleman's departure the matter was again discussed, at which time the Commission approved Mr. Coleman's request unanimously.

The meeting adjourned for luncheon at 12:00 o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

A delegation from Benton County consisting of Messrs. Clare Taylor and Norman Sapp, sawmill operators; John Orr and Howard Martin, farmers, all of the Lobster Valley District; and Francis Ziegler, representing the Businessmen's Club of Corvallis, was present. Mr. Orr headed the group. He stated that they had just learned that the Highway Commission on the previous day granted their request for the improvement of the Alsea-Deadwood Secondary Highway into Lobster Valley, and their object in coming to the Commission at this time was simply to express appreciation for the Commission's action.

Messrs. A. D. Fogle and Floyd Walling, Sweet Home, Oregon, were present regarding the proposed improvement of the Santiam Highway through Sweet Home. They offered objections to the improvement as presently planned, which provides for two-way traffic on their main city street, and urged the Commission to revise the plan so as to provide for one-way traffic such as is now in effect in the city of Lebanon. They were informed that the Sweet Home project has been under consideration by the Commission for a long time, that right of way for the most part has been acquired, so it is now too late to make any changes.

Mrs. Beulah Moore, Boring, Oregon, owner of the rock point at the mouth of Depoe Bay, Lincoln County, was present. She was accompanied by her attorney, Mr. David Spiegel, Portland, and Mr. Ted C. Tabler, Portland, a prospective renter of her property. Mr. Spiegel stated that Mrs. Moore has plans for the lease of her property for commercial purposes but has encountered difficulties because of the fact that the Highway Commission has closed up the opening in the rock protective wall immediately north of the Depoe Bay Bridge which was used for about eleven years by the previous owner of the property. He asked the Commission to allow the opening in the wall so as to provide ready access to patrons of the business establishment which it is proposed to construct on Mrs. Moore's premises. He alleged that this is the only feasible approach to the premises and advised that Mrs. Moore will do whatever the Engineer suggests in order to provide safety to the public and will cooperate in every way possible so that the aesthetic features of the highway at this point will not be marred. In support of Mr. Spiegel's remarks, Mr. Tabler stated that he is the prospective lessee of Mrs. Moore's property, on which he plans to spend about $15,000 for construction of a restaurant building if the Commission will allow access to the premises through the rock wall at the point mentioned by Mr. Spiegel. He declared that the present opening some distance north of the bridge is too far away for practical purposes. The matter was discussed at some length but action thereon was deferred by the Commission pending consultation with the Engineer and Chief Counsel. Following departure of the group the matter was again discussed, at which time the Commission referred it back to the Engineer for a complete report at the next meeting of the Commission. The Engineer was instructed to consult with the State Parks Superintendent and the Chief Counsel in the preparation of his report.

Mr. William Wood, realtor, Depoe Bay, was present regarding the establishment of public restroom facilities at this place. He suggested a

location for such facilities under the north end of the Depoe Bay Bridge. Mr. Wood stated that there are a number of organizations in Depoe Bay that are willing and agreeable to maintain the restrooms during the summer months when large crowds visit this place and that it would be satisfactory to all if the doors were locked for the balance of the year. He was informed by Chairman Chandler that if the people of Depoe Bay will submit their request and offer in writing the Commission will give it consideration.

Mr. T. R. Williams, representing the Astoria Navigation Company, contractors for the operation of the ferry across the Columbia River between Astoria, Oregon, and Megler, Washington, starting June 1, 1950, was present concerning the purchase of the marine insurance coverage for the ferry equipment. It was pointed out in the discussion that by combining the insurance that the contractor is obliged to furnish with that which the state has to furnish, a considerable saving in premium expense can be effected. As a result of this discussion it was mutually agreed to purchase the insurance on such combined basis, and to advertise for bids for furnishing the same, alternate quotations to be received for each type of coverage and for total coverage -- moreover, the purchases are to be limited to American Insurance companies. The Engineer was instructed to consult with Commissioner Reynolds for details.

Mr. Williams reported that the Astoria Navigation Company is encountering difficulties with labor unions which are demanding in connection with their operation certain things which the Company cannot approve, among others being a 40-hour week at the same rate of pay that they are receiving for 48 hours a week. He said that to comply with this demand would increase their labor costs about 22%, which was not contemplated when they received the contract and which they cannot afford to pay. He gave as his feeling that the crew will strike and that a picket line will be set up which will close down the ferry operations entirely. He was instructed to consult with the Commission's Chief Counsel should he have difficulty in arriving at a satisfactory settlement with the unions.

The Engineer reported a request from businessmen of Astoria for ferry service later at night during the summer season for the accommodation of tourists and local transportation, both from Oregon and Washington. He gave as his feeling that desired results could be obtained by eliminating the early morning ferry trip and adding an extra one in the evening which, he said, could be done at a cost to the state of about $190 per month, consisting of payment of overtime for ticket agents at both Astoria and Megler. He also said that such arrangement would not involve any extra pay to the ferry contractor. He recommended approval of the request on such basis. The Commission approved the recommendation unanimously, it being understood that the change would be effective for three summer months only.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

1. L. R. Kauffman, Contract No. 3245 for surfacing on the Cougar Creek-Preacher Creek Section of the Alsea-Deadwood Secondary Highway in Lane County, requested an extension of time of 107 days from March 1 to June 15, 1950, within which to complete this job. He attributed his failure to complete the project within the specified time limit to unfavorable

weather conditions which made the moving and installation of equipment impossible. The Engineer advised that the contract was awarded so late in the year that the contractor was unable to get on the job because of winter weather, and that a much better job can be done during the summer season. He recommended that the extension of time be granted as requested, without penalty. The Commission approved the recommendation unanimously.

2. Oscar E. Joelson, Contract No. 3228 for slide correction work on the Siskiyou Section of the Pacific Highway in Jackson County, requested an extension of time of 30 days from November 30, 1949 to December 30, 1949 within which to complete this job. He alleged that the project had progressed more slowly than anticipated due to the extreme care that had to be taken to safeguard highway traffic, and that this feature had prevented completion of the job within the specified time limit. The Engineer advised that extremely heavy traffic on this section, and bad weather, slowed the contractor's operations considerably, and he recommended that the extension of time be granted as requested, without penalty. The Commission approved the recommendation unanimously.

3. Arthur Gentemann, Contract No. 3119 for rock production on the Mosier Section of the Columbia River Highway in Hood River and Wasco Counties, requested an additional extension of time of 30 days from March 31, 1950 to April 30, 1950 within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to heavy snow, rain and freezing weather. The Engineer advised that on December 19, 1949, a request for an extension of time to March 31 was granted with the understanding that all engineering costs incurred by the state on this job from October 1, 1949 to the date of completion of the project would be charged against the contractor. He recommended that the present request for additional extension of time be granted with the penalty reaffirmed from the date of October 1, 1949, to the date of completion. The Commission approved the recommendation unanimously.

4. City Electric, Inc., Contract No. 3209 for the installation of traffic signals on Main and Esplanade Streets in the city of Klamath Falls, Klamath County, requested an additional extension of time of 30 days from March 15 to April 15, 1950 within which to complete this job. They alleged that materials received on factory order were partially incorrect and not complete, and that for this reason the job could not be completed within the previously extended time limit. The Engineer advised that the contractor had expedited the work as much as practicable and that his delay was entirely the result of slow delivery of signal equipment from the factory. He recommended that the additional extension of time be granted as requested, without penalty. The Commission approved the recommendation unanimously.

5. W. R. Grasle Company, Contract No. 3178 for installing traffic signals at seven street intersections in Eugene, Lane County, requested an extension of time of 120 days from December 31, 1949, to

April 30, 1950, within which to complete this job. They alleged that due to labor trouble the Union Metal Company, which was to furnish steel poles, could not deliver them until February 10, 1950; however, the installation was completed about March 10, except for the painting, which could not be done until weather conditions were suitable. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended that the extension of time be granted as requested, without penalty. The Commission unanimously approved the recommendation.

6. City Electric, Inc., Contract No. 3225 for installation of traffic signals on the Oregon City-Milwaukie Section of the Pacific Highway East in Clackamas County, requested an extension of time of 10 days from March 31, 1950, to April 10, 1950, within which to complete this job. They attributed their failure to complete the project within the specified time limit to weather conditions which prevented painting the poles. The Engineer advised that installation of the system, except for the painting of the poles, was completed within the specified time limit and that all work was completed by April 10. He recommended that the extension of time be granted as requested, without penalty. The Commission unanimously approved the recommendation.

(The Commission in discussing the requests for extensions of time as listed above considered but did not necessarily adopt the recommendations of the Engineer and/or the reasons given by the contractors for failure to complete their projects within the specified time limits.)

The Engineer reported that contracts Nos. 3225, 3285, 3228, 3231 and 3235 for construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said projects are now ready for acceptance. After due consideration the Commission by unanimous vote accepted said contracts by adopting the attached resolution relative thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a request from the City of Freewater for permission to install and maintain a neon sign reading "Freewater City Center," on highway right of way at the intersection of the Oregon-Washington Highway at the Adams Street entrance into the city of Freewater. The Engineer advised that the Highway Department now maintains at this location a large reflectorized sign 36" x 60" in dimension, reading "Freewater City Center," and in addition thereto, advance signs reading "Freewater Junction Ahead" and "Entering Freewater" have been erected. These signs, he said, conform to national standards and in his estimation are sufficient. He recommended that the request be denied. The Commission unanimously approved the recommendation.

The Commission considered a request from the Gardiner Lumber Company for permission to fill in and use as a parking area a portion of state highway right of way beneath the Umpqua River Bridge immediately north of Reedsport, on the Oregon Coast Highway. The Engineer said investigation reveals that such use of the right of way will not interfere with the usage of the highway by traffic, and he recommended that the Company be granted a revocable lease to

use the area, without charge. The Commission approved the recommendation by unanimous vote.

Consideration was given by the Commission to a request from people residing along the Junction City-Eugene Secondary Highway ir Lane County, for designation of a 30-mile per hour speed zone between Santa Clara and the north city limits of Eugene. The Engineer recalled that the Commission some time ago designated a 40-mile per hour speed zone along this section, but subsequently, two school children were killed and there has been much local agitation for a lower speed limit. Traffic on this highway, he advised, is approximately 90% local traffic, but both the Traffic Engineer and Captain Lansing of the State Police deem it advisable to designate a speed limit of 30 miles per hour. He stated his concurrence therein and recommended approval of a speed limit of 30 miles per hour on this highway section. The Commission unanimously approved the Engineer's recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission approved and signed a letter directed to the Bureau of Public Roads, authorizing R. H. Baldock, W. C. Williams and J. W. Nash to sign reimbursement vouchers for federal funds as occasion necessitates. The Engineer explained that this is a perfunctory matter, to meet the requirement of the Bureau of Public Roads for a new letter of authorization whenever there is a change in the membership of the Commission.

The Commission considered and denied a request from the City of Albany that Waverly Lake and the surrounding land along US99E at the north corporate limits be deeded to the City of Albany.

The Commission discussed a request from Blackwell Brothers' Produce Company, Albany, for permission to conduct certain logging operations along the Albany-Lyons Secondary Highway about five miles west of Lyons. The Engineer advised that this matter has been thoroughly investigated and it has been determined that operations will not create a hazard to highway travel if they are properly supervised. He recommended that the request be approved on the condition that the Company will furnish public liability and property damage insurance in the amounts of $100,000 - $300,000 - $40,000, for public protection, and a bond in the amount of $2,500 as protection to the highway roadbed. The Commission approved the recommendation and thereupon signed an agreement with Blackwell Brothers' covering the matter.

The Commission considered a petition signed by 29 property owners of Cannon Beach in which the Commission is requested to restrict or entirely prohibit vehicular traffic on the ocean beach between Ecola Hotel and the mouth of Elk Creek, about 0.7 mile north. The Chief Counsel advised that the law requires that such a request come from the County Court, and this, being a request from residents only, does not conform to the law. The Commission ordered that the petitioners be so informed.

A report of the Engineer on violations committed by March Logging Company, Myrtle Creek, Oregon, in truck-hauling logs over state highways in Douglas County was considered by the Commission. The Engineer reviewed

briefly the history of violations by this Company, pointing out two especially large overloads — one, apprehended a short distance north of Canyonville on March 24, 1950, having a combined overload of 10,190 pounds, the other being an overload in the same vicinity of 17,090 pounds. In addition to these two violations he called attention to the Company's record for the years 1945 up to April 3, 1950, in which the percentage of violations to loads weighed is as follows: 1945 - 0.4%, 1946 - 1.3%, 1947 - 1.5%, 1948 - 22.2%, 1949 - 14.7%, 1950 - 38.0%. He pointed out that during the years 1945, 1946 and 1947, the Company enjoyed a very favorable record, due, he believed, to the fact that during these years they were passing the Roseburg scales and all loads were weighed. During the latter part of 1948 and 1949, he said, the Company changed its operations and truck-hauled from the Tiller-Trail Highway east of Canyonville to either Myrtle Creek or Dillard. These loads, he said, did not pass a truck scale but were occasionally weighed on loadometers immediately north of Canyonville. It was his thought, as the record indicated, that they have deliberately overloaded since the trucks have not been passing a regularly operated scale. The Company, he stated, has been advised of these violations, and has sent to him a letter stating that they do not intentionally overload and a copy of a bulletin of instructions issued by them to their log truck drivers and loaders which is intended to stop the overloading. He recommended that the Company be given another chance to keep their loads within the legal limits. The Commission unanimously approved the recommendation with the understanding that the Company's permit will be cancelled upon the first violation following their being notified of the Commission's action. The Engineer was instructed to contact the members of the Commission by telephone before actually cancelling the permit.

The Commission also considered the log hauling record of Ralph Shirtcliff, Myrtle Creek, in connection with his operations in the vicinity of Canyonville. The Engineer reported that Mr. Shirtcliff has a long record of violations through the years 1945 to March 1, 1950, in which the percentage of violations to loads weighed appears as follows: 1945 - 5.4%, 1946 - 40%, 1947 - 12%, 1948 - 21.1%, 1949 - 8.9%, 1950 - 33.3%. He pointed out that a number of these violations were extremely heavy overloads and that on October 27, 1948, the Director of Permits warned Mr. Shirtcliff that a repetition or continuation of such overloads would result in reporting his record to the Commission. The Engineer recommended, in view of the high percentage of violations and the high percentage of loads exceeding the weight limit by more than 10,000 pounds, that Mr. Shirtcliff's P.U.C. permit be suspended for at least thirty days, and that it not be restored until Mr. Shirtcliff furnishes the Commission, in writing, a statement to the effect that he will henceforth abide by the rules, regulations and statutes. The Commission approved the Engineer's recommendation and ordered that, if Mr. Shirtcliff's P.U.C. permit is reinstated and he again is apprehended for a violation of the requirements, the permit be cancelled permanently.

The Engineer reported that since the last meeting of the Commission he has ordered a section of the John Day Highway between Mile Points 176.00 and 207.70 posted for reduced weight loads, and in other instances he has ordered the lifting of reduced load limits heretofore in effect. He presented a list showing the newly posted section and those sections on which the reduced limits have been lifted, and asked the Commission to confirm his actions. (For a

complete list of the highways affected see attached resolutions marked EXHIBITS "H-1" and "H-2".) The Commission approved the Engineer's request unanimously by the adoption of the attached resolutions relative thereto, marked EXHIBITS "H-1" and "H-2", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Commission discussed a letter from G. Cyrus Bishop, Portland, advising that it would be more convenient for contractors if the Commission's contract lettings were held on Tuesday and subsequent days instead of on Monday as is now the practice. He pointed out that when bids are opened at 9:00 a.m. on Monday, out-of-town contractors must come to Portland on Friday to make arrangements for their proposal bonds and to secure last minute quotations, and then in order to attend the opening they must stay in Portland Saturday and Sunday. For the contractor who lives closer to Portland, he said, it means that this contractor must make a trip to Portland on Friday to secure a bond and another trip on Monday if he wishes to attend the bid opening. He recalled that some years ago the Commission opened bids at 10:00 a.m. which gave contractors time to get last-minute quotations and to secure their bonds. As the result of discussion the Commission decided, as a trial proposition, to open bids at 2:00 p.m. when contract lettings are held on Monday, with announcement of awards at 5:00 p.m. on the same day, and to open bids at the customary time, 9:00 a.m., when they are held on other days of the week.

The Commission discussed a date for its next regular meeting and decided to hold such meeting on Thursday and Friday, May 25 and 26, 1950, in the Imperial Hotel, Portland. The Secretary was instructed to make the usual arrangements for use of the Green Room in this hotel.

Pursuant to instructions from the Commission on the previous day, the Chief Counsel reported results of further negotiations with Mr. Wilber T. Lewis for right of way needed in West Salem in connection with the Willamette River Bridge project in Salem. He stated that Mr. Lewis was contacted on the basis of letting him retain his tavern, but he is unwilling to deal on any other basis than that reported on the previous day, so it appears necessary to acquire the right of way by condemnation, which procedure he recommended with an offer of $8,000. He also recommended that the award of the contract for the construction of bridge piers, for which a satisfactory bid was received at this letting, be deferred until this right of way matter has been settled, or at least until the condemnation papers have been filed. As the result of considerable discussion the Commission decided unanimously to condemn the Lewis property as recommended, and authorized the Chief Counsel to proceed accordingly and offer the amount of $8,000 in connection therewith. The attached resolution with respect thereto, marked EXHIBIT "I", which resolution is made a part hereof with like effect as though extended in full herein, was adopted by the Commission by unanimous vote. The Commission also decided to hold up the award of the contract for construction of the bridge piers until the condemnation papers have been filed in court.

In this connection, Chairman Chandler reiterated that the Commission hereafter wants all right of way matters in connection with each construction project satisfactorily disposed of before that project is advertised for bids. Specific instructions were given the Engineer not to call for bids for any

additional work in connection with the Salem bridge project until right of way has been acquired, including that needed on the east side of the river where certain property owners have indicated that they are going to claim damages by reason of change in the grade line of the street in front of their premises. The Chief Counsel was authorized to do whatever is necessary to clarify such right of way matters.

The Engineer reported briefly on the status of the three-party agreement among the State Highway Commission, the City of Eugene, and Lane County with respect to the improvement of the Pacific Highway and the Coburg County Road, in Eugene, particularly as it concerns the contracting of the East Eugene Grade Separation structure for which bids were received at this letting. He pointed out that provision has been made in this grade separation project for the construction of approaches to the Ferry Street Bridge, which is a county obligation, and for the construction of a connection from the main highway to Fourth Avenue by means of an underpass, which is strictly a city project and was included at the request of the city of Eugene as an alternate item to be paid for solely by the city. He gave as his belief that the city and the county is each able to meet its obligations with respect to this project according to the terms of the tri-party agreement. Accordingly, he recommended that the Commission accept the low bid submitted by Mr. Tom Lillebo for construction of the East Eugene Grade Separation structure, which, he said, is a satisfactory bid, and award the contract to Mr. Lillebo at his bid price after certain details have been consummated with the city and the county, and their willingness to concur in the award has been received in writing. (For details of the Engineer's report to the Commission see his letters dated April 7 and April 21, 1950, directed to the Commission, and his subsequent letter dated May 4, 1950, to the Mayor and the Common Council of the City of Eugene.) As a result of discussion, the Commission unanimously approved the Engineer's recommendation and thereupon referred the bids to him with authority to award the contract to the low bidder, Mr. Tom Lillebo, when details with respect to the award have been satisfactorily ironed out with the city and the county, and written statements have been received from the city and county concurring in the award.

The Commission discussed with the Engineer the bids received at the morning session for highway construction projects and at 4:00 p.m. Chairman Chandler publicly announced the Commission's decision with respect to each project as follows, the Commission's action being by unanimous vote:

"Grading, surfacing and oiling on the Salisbury Junction-Poker Creek Section of the Sumpter Valley Secondary Highway in Baker County. The low bid for this work was submitted by Allen E. Sackett, Hood River, at $78,585. There were eight higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading, surfacing and oiling on the North Powder ("E" Street) and Telocaset Junction-Wingville Junction Section of a city street and the Old Oregon Trail in Baker and Union Counties. N. A. Toole Construction Company, Ontario, submitted the low bid for this work at $21,034. One higher bid was received. The Commission has awarded this contract to the low bidder, N. A. Toole Construction Company, at their bid price.

"North Dillard Bridge Section on the Pacific Highway near Roseburg in Douglas County. Construction of reinforced concrete and steel bridge and approaches thereto. The low bid for this work was submitted by Tom Lillebo, Reedsport, at $229,329.50. There were ten higher bids. The Commission has awarded this contract to the low bidder, Tom Lillebo, at his bid price.

"Furnishing crushed rock in stockpiles on the Juniper Ridge-Alkali Lake Section of the Lakeview-Burns Highway, in Harney and Lake Counties. F. L. Somers, Klamath Falls, submitted the low bid for this work at $16,020. There were three higher bids. The Commission has awarded the contract to the low bidder, F. L. Somers, at his bid price.

"East Eugene grade separation structure involving construction of a reinforced concrete viaduct and the grading, surfacing and paving of 0.51 mile highway in Eugene, Lane County. Tom Lillebo, Reedsport, submitted the low bid for this job at $462,124.75, using asphalt. He submitted no bid using tar. Nine higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder, Tom Lillebo, when certain conditions have been satisfied.

"Construction of a masonry block equipment storage building at the Highway Department Maintenance Yard in Eugene, Lane County. Bemis and Company, Portland, submitted the low bid for this job at $8,417.08. There were five higher bids. The Commission has awarded the contract to the low bidder, Bemis and Company, at their bid price.

"Painting structural steel in two deck arches of the Newport Bridge over Yaquina Bay in Lincoln County. The low bid for this job was submitted by Saxon Painting Company of Tacoma, Washington, at $24,870. Three higher bids were received. The Commission has awarded the contract to the low bidder, Saxon Painting Company, at their bid price.

"Recoiling and shoulder work on the Mill City-Gates Section of the North Santiam Secondary Highway, in Marion County. Babler Brothers, Inc., Portland, submitted the low bid for this job at $12,893, using asphalt. They did not submit a bid using tar. Eight higher bids were received. The Commission has awarded the contract to the low bidder, Babler Brothers, Inc., at their bid price.

"Grading, surfacing, oiling and paving the Sauvies Island Bridge Section of the Columbia River Highway and Gillihan County Road, Multnomah County. The low bid for this job was submitted by Parker-Schram Company, Portland, at $70,759 using asphalt. They submitted no bid using tar. There were five higher bids. The Commission has awarded this contract to the low bidder, Parker-Schram Company, at their asphalt bid price.

"Regrading, surfacing and oiling on the Imbler-Dry Creek Section of the Imbler-Dry Creek County Road near Imbler, Union County. The low bid for this job was submitted by E. H. Itschner Company, Molalla, at $87,607.50. There were eleven higher bids. The Commission has awarded this contract to the low bidder, E. H. Itschner Company, at their bid price.

"Construction of an addition to the existing Office Building at the Highway Department headquarters in La Grande, including a new heating plant. McCormack Construction Company, Pendleton, submitted the low bid for this work at $21,820. There were two higher bids. The Commission has awarded the contract to the low bidder, McCormack Construction Company, at their bid price."

The Commission considered the selection of persons to represent the Oregon State Highway Department at the annual meeting of the Western Association of State Highway Officials in Reno, Nevada, on June 12 to 15, 1950. The Engineer recommended that the following Engineers be authorized to attend this meeting at state expense: R. H. Baldock, State Highway Engineer; W. C. Williams, Assistant State Highway Engineer; G. S. Paxson, Bridge Engineer; H. G. Smith, Construction Engineer; E. A. Collier, Maintenance Engineer; F. B. Crandall, Traffic Engineer; and N. M. Finkbiner, Engineer of Materials.

The Chief Counsel recommended the following from the Legal and Right of Way Department: J. M. Devers, Chief Counsel; C. W. Enfield, Assistant Counsel; S. A. Hall, Assistant Counsel; Forrest Cooper, Right of Way Engineer; R. L. Porter, Assistant Right of Way Engineer; and C. E. Parker, Property Manager.

It was estimated that the total expense involved would not exceed $1200. The Commission unanimously approved the recommendation of both the Engineer and the Chief Counsel subject to further approval by Governor McKay.

The Commission unanimously authorized the Secretary, H. B. Glaisyer, to attend at state expense the annual meeting of the American Association of State Highway Officials which is to be held in Miami, Florida, later in the year.

The Commission also authorized the Engineer to attend, at state expense, a meeting of the American Society for Engineering Education in Seattle on June 20, 1950, he having been asked to deliver a message at such meeting. Estimated cost, $40.00.

A letter from the Daily Journal of Commerce, Portland, was presented requesting that they be provided with the names of plan-holders for highway projects on which bids are to be received by the Commission. Chairman Chandler gave as his feeling that the release of such information prior to the opening of bids will have no adverse effect on the bidding. Commissioners Reynolds and McIver expressed themselves similarly, whereupon the Secretary was authorized, as a trial proposition, to furnish such lists when requested.

The Engineer requested authority to spend $10,000 of highway funds ($5,000 State and $5,000 Federal Aid) to assist in financing a joint research project by all of the states under the direction of the Highway Research Board, to determine the effect of heavy-axle loads on various types of pavements. He explained that it is planned to carry on a series of tests which will provide valuable information for all of the states; also, that refunds will be made to the contributing states in the event the cost of the project is less than the total of the funds provided. The Commission deferred its decision in the matter pending definite information as to whether or not the Bureau of Public Roads will approve an expenditure of Federal funds for such purposes.

Chairman Chandler brought up for discussion the matter of reinforcing the newly constructed section on the Warner Secondary Highway in Lake County. He gave as his understanding that this section is not standing up under the heavy traffic that uses it, which indicates that corrective measures should be taken to insure against complete failure of the surface. He pointed out that the current program contains an item of $200,000 for construction of an additional section between Drake Creek and Adel, and he expressed the feeling that it would be good economy to re-allocate a portion of such sum to finance the strengthening of the section already improved. Commissioners Reynolds and McIver concurred, whereupon the Engineer was instructed to investigate the conditions and report his findings before the new project is advertised for bids.

The Right of Way Engineer advised that the Portland Realty Board and the American Association of Real Estate Appraisers are sponsoring a joint conference in Portland during April and May, 1950, for a study of real property appraising, which meeting will be addressed by expert real estate appraisers. He gave as his opinion that this meeting would be very beneficial to the state, and he requested authority for the following men from the Legal and Right of Way Department to attend at state expense, including a $25.00 registration fee for each: C. W. Enfield, Assistant Counsel; Samuel A. Hall, Assistant Counsel; R. L. Porter, Assistant Right of Way Engineer; W. F. Collins and R. L. Byrum, Real Estate Agents; and himself. The Commission unanimously approved the request.

The Engineer advised that protests have been received from residents of Tillamook County who want something done to prevent the flooding of the Oregon Coast Highway by high water in the Kilchis River, which occurs at frequent intervals. These people, he said, have offered numerous suggestions to alleviate the condition, including the use of pontoon bridges. To properly eliminate the condition, he said, will necessitate the reconstruction of the highway on new alignment, which will cost about $400,000. The Commission deferred action on the matter pending personal inspection of the section when the Commission makes its next trip through the Tillamook district.

It was also reported that complaints have been received concerning the flooding, at times, of the Fishhawk Falls Cut-off. The Engineer was instructed to investigate the conditions and render a complete report on the subject.

The matter of excess insurance to be carried for the two Assistant State Highway Engineers, Messrs. W. C. Williams and W. W. Stiffler, under the fidelity blanket bond policy recently acquired from General Casualty Company of America was brought up for discussion by the Secretary. He advised that the policy as now written provides $40,000 excess coverage for Mr. Williams but no excess coverage for Mr. Stiffler, and the question arises whether or not such coverage should be provided, inasmuch as Mr. Stiffler is in charge when the State Highway Engineer and the First Assistant State Highway Engineer are absent. As a result of discussion the Commission ordered a reduction in the amount of excess coverage for the First Assistant Engineer, Mr. Williams, from $40,000 to $20,000, and the purchasing of $20,000 excess coverage for the Second Assistant Engineer, Mr. Stiffler.

It was brought to the Commission's attention that August Mosier, an employe in the La Grande Shops, is scheduled for retirement on August 31, 1950.

Commissioner Reynolds advised that Mr. Mosier is in good health and in possession of all his faculties, and that he wants to be continued on the payroll until May 1, 1951, after which time he will be able to provide for himself. The Commission instructed the Engineer to endeavor to secure an extension of time for Mr. Mosier up to that date.

Commissioner Reynolds reported receipt of complaints that contractors are not allowed sufficient time in which to prepare their bids for contract lettings. The Engineer stated that projects now are advertised two weeks prior to the bid openings, but that he will see what can be done to give contractors a longer time and will try to lengthen it to three weeks, if possible.

The matter of overnight parking in state parks was brought up by Commissioner Reynolds, who stated that the Commission has not yet received the report on this subject from Mr. Armstrong, Parks Engineer, as requested. The Commission ordered this report rendered at the earliest possible time.

The Commission discussed briefly a report from the Chief Counsel that the Justice of the Peace at Lakeview, Lake County, has written him to the effect that he does not intend to impose fines on truck operators who are apprehended for overloading their equipment. The Chief Counsel was instructed to report the situation to the County Judge of Lake County and request his assistance to the end that violators of the requirements will be properly penalized.

The Commission signed agreements, etc. as follows:

Agreement with Bureau of Reclamation covering acquisition of federal land needed as right of way for the Garrison Corner Section of the Nyssa-Adrian Secondary Highway, Malheur County.

"Release of Slope Easement" in favor of N. J. and Alma G. Thomas, covering property located on the West Slope-Beaverton Section of the Tualatin Valley Highway.

"Indenture of Access" covering change in point of access for the George Arthur Zwick property on the Dundee-Dayton Junction Section of the Pacific Highway West.

Agreement with Yamhill County and the City of McMinnville in connection with the construction of the Yamhill River Bridge Section of the Three-Mile Lane Secondary Highway.

Agreement with Union County with respect to maintenance of the Imbler-Dry Creek Federal Aid Secondary Highway Project after construction is completed by the state.

Agreement with Multnomah County providing for county maintenance of the Sauvies Island Bridge Section after the construction of this project is completed by the state.

Agreement with City of Paisley providing for improvement of Mill Street as a Special State Tax Street Fund Project.

Agreement with Blackwell Brothers' Produce Company, Albany, covering logging operations along the Albany-Lyons Secondary Highway about five miles west of Lyons.

Agreement with the City of Oregon City covering installation of flashing beacons at the intersections of 7th and Washington Streets, and 14th and Washington Streets, in Oregon City.

Agreement with the City of Milwaukie covering construction of an "outer highway" along US99E between Portland and Milwaukie.

Agreement with Portland Drive-in Theaters, Inc. re installation of signal and other safety facilities on US99E at Naef Road where outdoor theater has been constructed, providing owner of theater will pay 50% of total cost.

Letter directed to Bureau of Public Roads authorizing R. H. Baldock, W. C. Williams and J. W. Nash to execute reimbursement vouchers for federal funds.

Agreement with City of Silverton providing for construction of James Street Bridge as a Special State Tax Street Fund Project.

Agreement with City of Coos Bay covering one-way traffic, parking restrictions and stop streets in connection with the Fir Avenue-Ingersoll Avenue Section of Oregon Coast Highway in Coos Bay.

The meeting adjourned at 5:00 p.m.

EXHIBITS "A" THROUGH "I"

Minutes of April 24 and 25, 1950

EXHIBIT "A"

Minutes of April 24 and 25, 1950

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

CANYON ROAD SECTION, TUALATIN VALLEY HIGHWAY

16049- Bouchet, Eugenie
Right of Way (Witt)
Option expires September 13, 1950

1,306.8 sq.ft. at 25¢ sq.ft. Waiver of access, except private access at Engr.Sta. 5+00	$ 326.70	
Amount to be paid owner		$ 326.70
Amount chargeable to Right of Way		326.70
STATE to provide access at Engr.Sta.5+00 (Est.)	50.00	
Amount chargeable to Construction		50.00
GRAND TOTAL (Estimated)		376.70

Access controlled.

CASCADE LOCKS-VIENTO SECTION, COLUMBIA RIVER HIGHWAY

15336- Tichenor, Frank L. and Olive
Right of Way (Mayhew)
Option expires September 20, 1950

EXHIBIT "B"

Minutes of April 24 and 25, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the Legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by the exercise of the power of eminent domain, fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the Sullivan Gulch Highway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation of motor vehicles promoted, and highway travel in general safeguarded, the parcels of real property hereinafter described are necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there are needed and required, and are being appropriated for right of way of the Sullivan Gulch Highway, for the purpose of establishing, constructing and maintaining a throughway, the following-described parcels of real property, to-wit:

File No. R 14701
Owner: G. U. Tenney

A parcel of land lying in Section 35, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and being all

(Cont.)

of the following described property: That tract of land which was conveyed by that certain deed to G. U. Tenney, recorded in Book 1307, Page 367 of Multnomah County Record of Deeds; the said parcel being described as follows:

Beginning at a point in the north line of N. E. Holladay Street 1,000 feet west of the west line of N. E. 28th Avenue; thence west along the north line of N. E. Holladay Street 150 feet; thence north and parallel with the west line of N. E. 28th Avenue to the south line of right of way of Oregon-Washington Railroad & Navigation Company; thence northeasterly along the south line of said right of way 150 feet, more or less, to a point which would be intersected by a line, running northerly from the place of beginning, parallel with the west line of N. E. 28th Avenue and through south line of said right of way; thence southerly along said intersecting line and parallel with the west line of said N. E. 28th Avenue to the place of beginning.

The parcel of land to which this description applies contains 0.30 acre.

File No. R1470
Owner: Catherine Duncan

A parcel of land in Section 36, Township 1 North, Range 1 East, W. M., City of Portland, Multnomah County, being more particularly bounded and described as follows:

Beginning at a point on the north line of N. E. Holladay Street 450 feet west of the intersection of the north line of N. E. Holladay Street and the west line of N. E. 28th Avenue as said Street and Avenue are now laid out in the City of Portland; running thence west along the north line of N. E. Holladay Street 50 feet to the east line of a parcel of land now or formerly owned by Multnomah County; thence north along said east line to the southerly right of way line of the Oregon-Washington Railroad & Navigation Company; thence easterly along said southerly right of way line to the west line of a parcel of land now or formerly owned by Milton D. Tarlow; thence southerly along said west line to the place of beginning.

The parcel of land to which this description applies contains 0.12 acre.

2. That the highway facility for which the aforesaid parcels of real property are required and are being taken, has been planned, designed, located, and will be constructed in a manner which, in the opinion of this

Commission, will be most compatible with the greatest public good and the least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcels of property, as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcels of real property.

4. That upon the trial of any suit or action instituted to acquire the said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fourth day of April, 1950.

EXHIBIT "C"

Minutes of April 24 and 25, 1950

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate a section of the Tiller-Trail Secondary Highway, otherwise designated as State Highway No. 230, in Douglas County; and

WHEREAS, by reason of the relocation, a portion of the right of way of the highway as originally located, hereinafter more particularly described, will no longer be needed for highway purposes for the service of people living thereon or communities served thereby; and

WHEREAS, the said portion of the right of way of the highway as originally located is a fragment of the old right of way no longer needed for right of way purposes, and which in the judgment of the Highway Commission is not needed or valuable for any public use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition of the hereinafter described portion of the right of way of the said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the section of the Tiller-Trail Secondary Highway known as the Milo-Tiller Section has been relocated and realigned, and therefore the portion or fragment of the old route hereinafter defined and described as "Unit 1" is no longer a part of the route of the Tiller-Trail Secondary Highway and is, therefore, eliminated therefrom.

2. The aforesaid portion or fragment of the old Tiller-Trail Secondary Highway, which for the purpose of this resolution is identified as "Unit 1", and more particularly described as follows:

UNIT 1

A parcel of land lying in the East one-half of the East one-half of the Northwest quarter ($E\frac{1}{2}E\frac{1}{2}NW\frac{1}{4}$) of Section 33, Township 30 South, Range 2 West, W. M., Douglas County, Oregon, and being that portion of the old Tiller-Trail Highway lying southerly of the right of way of the Tiller-Trail Highway as relocated, said relocated highway right of way being a strip of land sixty (60) feet in width, 30 feet on each side of the center line of the Tiller-Trail Highway as said highway has been relocated, which center line is described as follows:

(Cont.)

April 24, 1950

EXHIBIT "C" (Cont.)

UNIT 1 (Cont.)

Beginning at Engineer's center line Station 1226+89.2, said Station being approximately 280 feet north and 503 feet west of the Southeast corner of the Northeast quarter of Section 33; thence South 64° 27' 30" East 538.1 feet; thence on a 572.96 foot radius curve right (the long chord of which bears South 53° 29' 45" East) 219.3 feet to Engineer's center line station 1234+46.6; said center line crossing the North and South center lines of said Section 33 approximately at Station 1232+45;

shall be and hereby is abandoned as part of said Tiller-Trail Highway and shall revert to and title shall vest in the abutting owner or owners.

3. There is attached hereto and made a part hereof a white print upon which there is shown colored in blue the section of the Tiller-Trail Highway herein designated as "Unit 1", which fragment or portion, pursuant to the terms of this resolution, is eliminated as a part of the right of way of the said highway as now located. *

4. That this resolution shall be entered in the minutes and records of the Highway Commission as of the twenty-fourth day of April, 1950, and a certified copy thereof forwarded to the aforesaid abutting owners.

FOOTNOTE: *

The white print map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, said resolution being Resolution No. 216, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "D"

Minutes of April 24 and 25, 1950

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the second six month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Aumsville	$ 689.33	Lostine	$ 576.33
Canyonville	2,223.39	Madras	2,245.99
Cove	906.87	Monument	333.37
Creswell	1,757.24	Nehalem	822.12
Culver	511.35	Oceanlake	1,573.60
Dayton	1,793.96	Phoenix	1,810.92
Echo	1,282.61	Rockaway	2,689.53
Elkton	604.58	Sublimity	791.04
Fairview	1,308.04	Troutdale	1,519.93
Harrisburg	2,429.62	Tualatin	672.38
Lafayette	1,582.08	Wallowa	2,802.54

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 24th day of April, 1950.

EXHIBIT "E"

Minutes of April 24 and 25, 1950

RESOLUTION ADOPTING SURVEYS

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of each of the following sections of state highways, to wit:

> SOUTH UNIT, JOSEPH-WALLOWA LAKE SECTION of the JOSEPH-WALLOWA LAKE SECONDARY HIGHWAY NO. 351, in WALLOWA COUNTY;
>
> HILGARD JUNCTION-RED BRIDGE SECTION of the STARKEY SECONDARY HIGHWAY NO. 341, in UNION COUNTY;

and in connection therewith to prepare maps showing the route and location of each of said highway sections and to file said maps, reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the South Unit, Joseph-Wallowa Lake Section of the Joseph-Wallowa Lake Secondary State Highway, particularly between Highway Engineer's Station 85+00 and Highway Engineer's Station 335+00, together with the map, which for identification purposes bears Map File No. 5B-36-4, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission in Salem, Oregon; and,

2. That the survey of the Hilgard Junction-Red Bridge Section of the Starkey Secondary Highway, particularly between Highway Engineer's Station 42+25.06 and Highway Engineer's Station 456+00, together with the map, which for identification purposes bears Map File No. 5B-36-6 & 7, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission in Salem, Oregon; and

3. It is further ordered that the said routes and the surveys of the same hereby are adopted as the routes and locations of the JOSEPH-

(Cont.)

EXHIBIT "E" (Cont.)

WALLOWA LAKE SECONDARY HIGHWAY NO. 351 and of the STARKEY SECONDARY HIGHWAY NO. 341 between the above described points.

4. That when said sections of said highways are permanently constructed, the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

5. That this resolution be entered in the minutes and records of the Commission as of the 25th day of April, 1950.

EXHIBIT "F"

Minutes of April 24 and 25, 1950

RESOLUTION ACCEPTING COMPLETED CONTRACTS

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3225 with City Electric, Inc., for installing traffic signals on the Oregon City-Milwaukie Section of the Pacific Highway East in Clackamas County, completed April 10, 1950.

Contract No. 3285 with Rush Construction Company for furnishing crushed materials in stockpiles on the Baker-Homestead and Halfway Highways in Baker County, completed April 15, 1950.

Contract No. 3228 with Oscar E. Joelson for slide correction of the Siskiyou Section of the Pacific Highway in Jackson County, completed December 30, 1949.

Contract No. 3231 with Kelly Construction Company for constructing caretaker's cottage at Wallowa Lake Park in Wallowa County, completed January 17, 1950.

Contract No. 3235 with J. S. Crepeau for construction of state office building in Eugene, Lane County, completed April 10, 1950.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

April 24, 1950

EXHIBIT "G"

Minutes of April 24 and 25, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Junction City-Eugene Secondary

Highway number: 223 Route number: none

Location of Termini		Established Speed
M.P. 9.97 (Edgewood Road, Santa Clara)	to M.P. 12.65 (North city limits, Eugene)	30 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient

(Cont.)

number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

THIS ORDER vacates and annuls the previous order made by this Commission on May 15, 1947, insofar as it pertains to the section of highway described herein.

EXHIBIT "H-1"

Minutes of April 24 and 25, 1950

ORDER REDUCING MAXIMUM LOAD LIMITS

ON A SECTION OF THE JOHN DAY HIGHWAY

WHEREAS, the John Day Highway and the section of the John Day Highway hereinafter set forth or described has been duly designated and declared to be and is a state highway and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the state of Oregon as a state highway; and

WHEREAS, said highway and section of highway is in the judgment of the State Highway Commission being subjected to a kind and character of traffic which will damage and injure the said highway and section of highway during the present period of freezing and thawing, and in order to protect the section of highway against such damage and injury it is deemed and is the judgment of the highway Commission and said Highway Commission finds that it will be for the best interests of said section of highway that the maximum weights permitted and authorized by law be reduced during such period; and

WHEREAS, the State Highway Commission has after due investigation determined and found and it is the judgment of the Commission that the maximum weights which shall be permitted upon said section of highway during said period shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission being of the opinion that said section of the John Day Highway was not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interest of said section of highway that the maximum total weight of the load and vehicle which shall be permitted upon said section of highway during the said period commencing on the dates hereinafter specified shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED that the maximum weight of combined load and vehicle or combination of vehicles which shall be permitted upon the following listed highway and section of highway shall not exceed 11,000 pounds gross on any single axle nor 20,000 pounds gross on any pair of tandem axles nor a maximum of 36,000 pounds gross on all axles of the vehicle or combination of vehicles.

Name of Highway and No.		County	Section Restricted (by mile point)	Date Effective 1950
John Day	5	Grant and Baker	176.00 to 207.70 (East limits of Prairie City to Whitman Nat'l Forest Boundary)	April 20

EXHIBIT "H-1" (Cont.)

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394, O. C. L. A., shall be in full force and effect from the effective date hereinabove specified until modified, annulled, or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the section of highway and at the important crossroads on said section of highway so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of the counties affected by this order, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this 25th day of April, 1950.

EXHIBIT "H-2"

Minutes of April 24 and 25, 1950

RESOLUTION LIFTING REDUCED LOAD LIMITS ON VARIOUS STATE HIGHWAYS

WHEREAS, on the 6th day of February and the 21st day of March, 1950, at regular meetings of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted resolutions reducing the maximum load limits on various state highways and sections of state highways; and

WHEREAS, subsequent to the passage of the said resolutions, conditions have changed so that it no longer is necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolutions.

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit as set forth in the said resolutions of February 6 and March 21, 1950, on various state highways or sections thereof, to-wit:

HIGHWAYS LISTED IN RESOLUTION OF FEBRUARY 6, 1950

Name of Highway and No.		County	Section Restricted (by mile point)	Date Lifted 1950
Eddyville-Blodgett	180	Lincoln & Benton	11.72 to 19.29	April 24
Rogue River Loop	260	Josephine	Entire Length	April 17
Sams Valley	271	Jackson	8.98 to 17.25	April 17

HIGHWAYS LISTED IN RESOLUTION OF MARCH 21, 1950

Warm Springs	53	Wasco	11.30 to 13.70	April 10
			28.00 to 30.00	April 10

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on such highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said highways or sections of highways are located, and to the Superintendent of the Department of State Police for his information.

Dated this 25th day of April, 1950.

EXHIBIT "I"

Minutes of April 24 and 25, 1950

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Salem-Dallas Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate in part and to improve the Salem-West Salem Section of the Salem-Dallas Highway by constructing a new bridge across the Willamette River at Marion Street, and by reconstructing and improving the present bridge across the Willamette River located at Center Street, and by relocating in part and constructing highway connections and approaches to said bridges, and for such purposes and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to acquire fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

1. The Highway Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocating in part and the construction, improvement, and maintenance of the Salem-West Salem Section of the Salem-Dallas Highway a parcel of real property located in Polk County, Oregon, described as follows, to-wit:

File No. R 16151
Owner: Wilbur P. Lewis and Eletha Lewis

A parcel of land lying in Section 22, Township 7 South, Range 3 West, W. M., Polk County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to Wilbur P. Lewis and Eletha Lewis, recorded in Book 79, Pages 102 and 103 of Polk County Record of Deeds; the said parcel being described as follows:

(Cont.)

EXHIBIT "I" (Cont.)

Beginning at a point on the northerly right of way line of Edgewater Street in West Salem, said point being 55.99 feet north and 32.87 feet east of the intersection of the center lines of Edgewater Street and Wallace Road; running thence South 35° 15' 40" East along the easterly line of the Earl C. and Eunice O. Burk property (deed recorded in Book 132, Page 510) a distance of 607.24 feet to the easterly line of said Lewis property; thence North 23° 50' 50" East along said line a distance of 1132.78 feet to a line which is parallel to and 40 feet northerly of the center line of the Marion Street-Edgewater Street Connection; thence on a 612.96 foot radius curve left (the long chord of which bears South 71° 01' 50" West 6.26 feet) 6.26 feet; thence on a 1472.39 foot radius curve left (the long chord of which bears South 62° 43' 10" West 410.82 feet) 412.17 feet to a point opposite and 40 feet northerly from Engineer's center line Station 55+19.77; thence South 52° 02' 40" West a distance of 202.73 feet; thence South 50° 42' West 46.86 feet; thence South 51° 41' 15" West 147.89 feet; thence South 54° 19' 20" West 30.21 feet; thence South 56° 57' 15" West 51.08 feet to the easterly line of property leased to Clarence Dickinson (not recorded) by Wilbur P. Lewis and Eletha Lewis; thence South 23° 27' 24" East along said line 18.95 feet to the easterly projection of the northerly line of Edgewater Street; thence westerly along said northerly line 77.31 feet to the place of beginning; EXCEPT that portion of the above-described property conveyed by that certain deed, wherein Wilbur P. Lewis and Eletha Lewis are grantors and the State of Oregon is grantee, recorded September 3, 1943, in Book 114, at Page 436 of the Deed Records of Polk County, Oregon.

The parcel of land to which this description applies contains 6.15 acres, of which 0.2 acre, more or less, lies in the Willamette River.

2. That the highway facilities for which the aforesaid property is required and is being taken have been planned, designed, located, and will be constructed in a manner which, in the opinion of the State Highway Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fifth day of April, 1950.

Portland, Oregon
May 25, 1950

The State Highway Commission met in regular session at 9:00 a.m. DST in the Green Room of the Imperial Hotel. Present were:

Ben. R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
M. H. Hawke, Auditor
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Chandler announced that the awarding of contracts would take place at 3:00 p.m. in the same room.

CROOK COUNTY

West Unit, Deschutes County Line-Prineville Section of the O'Neil Secondary Highway, about 11 miles east of Prineville. Federal Aid Project No. S-63(1). 5.29 miles of grading, surfacing and oiling; also furnish 2,000 cu.yds. crushed material in stockpile. Requires approximately 43,700 cu.yds. excavation; 1,800 lin.ft. metal guard rail; 4 cu.yds. reinforced concrete in steps; 23,350 cu.yds. crushed cinders, rock or gravel; and 330 tons 150-200 asphalt.

Valley Constr. Co., Portland	30,140.00

UNION COUNTY

Catherine Creek State Park Latrine. State Project. Construct latrine in park on State Route 203. Involves construction of 11'6" x 22' frame building, plumbing for and installation of 4 water closets, 2 urinals and 2 lavatories, septic tank, wiring building, and other miscellaneous work.

Walter Rohde, Pendleton	2,766.00
Bechtel Bros., Elgin	3,125.00
McCormack Constr. Co., Pendleton	5,945.00

WASCO COUNTY

Dufur Rock Production Project on The Dalles-California Highway. State Project. Requires approximately 11,000 cu.yds. crushed rock or crushed gravel in stockpile, part of which is for Wasco County.

E. C. Hall Co., Portland	26,400.00
Vernie Jarl, Gresham	28,600.00
Arthur Gentemann, Gresham	30,690.00

WASCO COUNTY

Forest Boundary-Jefferson County Line Section of the Warm Springs Highway, about 21 miles northwest of Madras. State Project. 18.27 miles of reoiling; also furnishing 6,000 cu.yds. crushed rock in stockpile. Requires approximately 13,250 cu.yds. crushed rock; 460 tons 150-200 asphalt; and 280 tons emulsified asphalt. This project may be bid in combination with the Wasco County Line-Madras Grading and Oil Mat Surfacing and Madras Rock Production Projects in Jefferson County.

Rogers Constr. Co., Portland	*	74,627.00
E. C. Hall Co., Portland		75,281.00

Alfred H. Cohn, President of the State Construction Company, Seattle, to whom the Commission awarded the contract for the construction of piers for the proposed Marion Street Bridge in Salem, appeared before the Commission in company with his attorney, Mr. E. C. Hart, regarding this project. Mr. Cohn recalled that their offer submitted at the previous meeting was $60,000 below the next low bidder. He said that a review of their calculations revealed a gross error and his company stands to lose considerable money if it undertakes to do the work at the price quoted, so they have decided not to accept the award, particularly in view of the fact that the State Highway Department would not consider a compromise arrangement. He asked the Commission to relieve the company of payment of the penalty under the bid bond, and to return the bond to them. Chairman Chandler advised that the Commission cannot, in good faith and fairness to other bidders, return the bid bond; moreover, it would not be in conformity with past policy of the Commission. He expressed regret that

the mistake was made and pointed out that the delay in getting the work underway very likely will result in considerable extra expense to the state. The Highway Commission, he said, is not responsible for the mistake and has no alternative but to declare the company in default and to order recovery of the amount of the bond. He added that if the Commission took any other action it would jeopardize its future position in cases of similar nature. Commissioners Reynolds and McIver indicated concurrence in Chairman Chandler's statements.

Following departure of Mr. Cohn, the Commission authorized the taking of whatever steps are necessary in order to recover the amount of the bid bond.

Mr. T. R. Williams, representing the Astoria Navigation Company, contractors for the operation of the Astoria-Megler Ferry, starting June 1, 1950, was present regarding the insurance to be furnished in connection with this operation. W. W. Stiffler, Assistant State Highway Engineer, explained the bids received in Salem on May 22, 1950, for the furnishing of such insurance. He presented a tabulation of the bids, as follows, and recommended acceptance of the low combination offers of Jewett, Barton, Leavy and Kern for Units "A" and "C", at $12,058.50 and $770.00, respectively, and the offer of Durham and Bates for Unit "B" at $5,408. Mr. Williams concurred in the recommendation.

Bidder	Unit "A"	Unit "B"	Unit "C"	Unit "D"
Jewett, Barton, Leavy & Kern, Portland	$12,058.50	$12,180.00	$ 770.00	$19,448.50
Dooly & Company, Portland * **	12,057.98	6,620.00	1,000.00	19,677.98
Martin Knudsen & Son, Astoria * **	12,057.98	6,620.00	1,000.00	19,677.98

Rogers Ins. Agency, Inc., Portland ***	12,677.17	10,591.92	1,232.00	20,661.09

	Low Combination Bids			Total Combined Bids
Jewett, Barton, Leavy & Kern, Portland	$12,058.50		$ 770.00	
Durham & Bates, Portland		$ 5,408.00		$18,236.50

* Bidder will accept award only of all units as bid under Unit "D".
** Bid submitted with qualifications concerning type of coverage, also Excess Protection & Indemnity quotation being subject to firm order & placement in London market.
*** Excess Protection and Indemnity quotation subject to firm order and placement in London market.

Following discussion, the Commission unanimously approved Mr. Stiffler's recommendation.

The Commission unanimously approved the minutes of its meetings held on March 20 and 21, 1950, and April 3, 1950.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following state parks matters:

1. Re-lease of U. S. Government land in Cove State Park, Jefferson County: The Parks Superintendent advised that there are 2,400 acres of government-owned land in this park which has been under temporary lease for a number of years, and which the Commission instructed him to purchase if possible. The property, he said, was at one time under jurisdiction of the Reclamation Service, which advised that it was not for sale, but it presently is under the Department of Land Management. He asked the Commission to consent to the leasing of the property on a fifty-year basis, with an option to renew it for 99 years. The Commission approved the request. (A letter directed to the Secretary of the Interior, Washington, D. C., with respect thereto was signed by the Commission on the following day.)

2. Establishment of maximum speed limits on roadways in state parks: The Parks Superintendent asked the Commission as a safety measure to establish formally a maximum speed limit for the operation of vehicles in state parks. The Chief Counsel advised that there is no statute covering the matter and were reduced speed signs maintained, violators could not be penalized. The Commission instructed the Parks Superintendent to submit a list of the parks in which he considers that a speed regulation should be established.

3. Rentals to be charged for park caretakers' residences: The Parks Superintendent stated that in his estimation the rentals now being paid are too low. He presented a list of the parks in which caretakers' residences are being maintained, and showing the present rental rates, and the proposed rental rates, as follows:

	Park	Present Rate	Proposed Rate
Oscar J. Beck	Battle Mt.	$ 10.00	$ 20.00
William Cahill	Bonneville	10.00	25.00
Gorman Chapman	Humbug Mt.	10.00	20.00
Sanford Chilson	Silver Falls, CCC	2.50	15.00
Geo. E. Dietz	Dabney	5.00	15.00
B. L. Dillabough	Sawyer	10.00	20.00
Dewey Dresher	Shore Acres	10.00	20.00
B. E. Duggan	Honeyman	10.00	20.00
Warren D. Folliett	Collier	10.00	25.00
D. Grassick	Short Sand Beach	5.00	15.00

(Cont.)

(Cont.)	Park	Present Rate	Proposed Rate
G. Grassick	Talbot	10.00	15.00
Clyde Holcomb	Casey	10.00	20.00
Clyde Huskey	Emigrant Springs	10.00	20.00
Monroe Ivie	Talbot	5.00	15.00
Jess Jones	Cascadia	2.50	10.00
Roland LeCompte	Neptune	5.00	15.00
Harry Luckett	Cape Arago	10.00	20.00
Geo. Marlman	Ecola	10.00	20.00
Kay McGuire	Silver Falls	10.00	20.00
A. E. McLean	Armitage	10.00	25.00
Stanley Pierce	Silver Falls, CCC	2.50	10.00
David T. Pompel	Silver Falls, CCC	2.50	10.00
Royal H. Rands	Cove	10.00	20.00
Harold Reed	Bradley	10.00	20.00
O. J. Shaw	Silver Falls, HDP	10.00	20.00
Harold Taylor	Silver Falls, CCC	2.50	10.00
W. W. Timm	TouVelle	2.50	10.00
James V. Webb	Saddle Mt.	5.00	15.00
Geo. Witte	Williamson	5.00	20.00
Alva E. Zimmerman	Wallowa	10.00	25.00

He recommended approval of the proposed rates and advised that they would be put into effect on June 1st if there are no objections. The Commission unanimously approved the rental increases as recommended, which the Commission was informed are identical with the rentals now being paid for use of buildings under control of the Engineering Department.

4. Oil flotsam on Oregon beaches: The Parks Superintendent advised that pursuant to previous instructions from the Commission, he has had all of the park beaches inspected either by the District Park Supervisors or the park caretakers, who report that no oil whatsoever has been found. He gave as his belief that no oil problem exists so far as parks are concerned, and that visitors to the parks along the beach will be able to enjoy them as they have in the past, unless the conditions change. The Engineer was instructed to convey the information to Governor McKay.

5. Condemnation of lands owned by the Menasha Woodenware Company which are needed for Umpqua State Park: The Parks Superintendent recalled that the Commission at the previous meeting authorized the acquisition of these properties by condemnation, if necessary. Since then, he said, the Company has replaced its local manager, and he gave as his feeling that the new manager should be consulted and his attitude ascertained before the condemnation proceedings are filed. The Commission concurred in this point of view, and so ordered.

6. Status report on acquisition of Curry County ocean waysides: The Parks Superintendent reported a gift of 367 acres of land from the

Pacific Borax Company. At his request, the Secretary read aloud a letter from the Company stating its willingness to deed the property to the state on the condition that it receives a letter from proper legal authority to the effect that under Oregon state law the company may retain rights to minerals, et cetera, on the property. The Commission approved such condition and instructed the Parks Superintendent to obtain such a letter from the Attorney General. The Parks Superintendent was also instructed to prepare an appropriate letter of thanks to the company for its generous gift.

In the discussion of this subject, the Right of Way Engineer, Mr. Forrest Cooper, rendered a brief status report on the acquisition of other properties that are needed for this proposed park, particularly properties owned by Messrs. Crooks, Skinner and Nichols. It appears that it is going to be necessary to acquire the Crooks property by condemnation, and that negotiations are still being carried on for the others.

7. Purchase of traffic counters for use in state parks: The Parks Superintendent recalled that at the previous meeting of the Commission he requested authority to purchase a number of these counters, and that the Commission deferred action on the matter pending a report from the Engineer as to whether or not it would be possible for the Traffic Engineering Department, which now has a number of these counters, to make such counts as are needed. Since then, he said, he has ascertained that the traffic counters will cost about $10,000, in view of which he has decided not to do anything more about it.

8. Renewal of permits covering the grazing of sheep in Cape Sebastian State Park, Curry County: The Parks Superintendent advised that several of these permits are now in effect and will have to be renewed in the not distant future. He recommended such renewals on the basis of the fee formerly obtaining, which is 50¢ per head annually, and that the permit, heretofore issued to Mr. Clyde B. Miller, be reissued to Mr. David C. Shaw, Gold Beach, who has purchased Mr. Miller's sheep and wishes the grazing privilege. The Commission approved the recommendation unanimously.

9. Offer of Van Vleet Logging Company to purchase dead timber in Saddle Mountain State Park: The Parks Superintendent advised that the Company has tendered its check in the amount of $6,400 to pay for this timber, but he considers it advisable to sell the timber as a result of competitive bidding. He requested authority to advertise the timber for sale. The Commission approved the request unanimously.

10. Overnight camping in state parks: The State Parks Superintendent submitted a written report on this subject, which included information assembled from personal inspections of state parks in adjoining states by the Parks Engineer, Mr. C. H. Armstrong. (For details see copy of this report directed to Mr. Ben. R. Chandler, Chairman, State Highway Commission, and dated May 23, 1950, in general files.) The Commission deferred action on this matter pending study. The Parks Superintendent was instructed to render an additional report particularly outlining plans for overnight camping in Wallowa Lake State Park, Sunset Beach State Park and Silver Falls State Park.

The Right of Way Engineer, Mr. Forrest Cooper, presented for the Commission's consideration a number of options that have been obtained for the acquisition of real property that is needed in connection with numerous proposed state highway improvements throughout the state. He requested authority from the Commission to close the options at the amounts stated therein. After careful consideration of each item, the Commission approved the request unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In the discussion of the real property options referred to above, the Commission also discussed the following:

1. Acquisition of right of way for improvement of the Santiam Highway in Sweet Home. The Commission ordered that this project be advertised for bids to be received at the next meeting of the Commission.

2. Acquisition of right of way for the Ladd Canyon Section of the Old Oregon Trail through property owned by Mr. T. E. Peterson, Right of Way File No. 16254. The Commission deferred action on the option obtained from Mr. Peterson pending investigation and recommendation of the State Highway Engineer with respect to the improvement of the highway on present alignment, avoiding Mr. Peterson's property, for which he is asking an exorbitant amount.

3. Acquisition of property needed for improvement of the Sylvan Section of the Sunset Highway, Elmer R. Helmcke, et ux; Wilfred Helmcke, et ux; and Dorothy Helmcke Westfall, owners, right of way file numbers 15882, 15883 and 15884. The Commission deferred action on this matter pending inspection of the premises and recommendation of the Engineer.

Mr. T. R. Williams again appeared before the Commission in behalf of the Astoria Navigation Company regarding the company's controversy with labor unions regarding the operation of the Columbia River ferries between Astoria, Oregon, and Megler, Washington, which the company is taking over on June 1st. Mr. Williams stated that they have been negotiating with the unions and have offered to pay the men 7½¢ per hour over and above the rate they previously were paid, but indications are that the offer will be refused. The Astoria Navigation Company, he said, has gone to the limit of its possibilities in effecting a compromise, and there appears to be a deadlock which eventually will end in a strike, stopping service unless additional benefits are granted. He pointed out that the unions are asking for a forty-hour week for the men, with the same pay that they have been receiving for forty-eight hours. He also said that if some sort of arrangement cannot be made it might be necessary for the state to take over the ferry operation, and if so, the Astoria Navigation Company will agree to operate the ferries as state's agent without extra cost. He was informed by Chairman Chandler that the Commission is not presently in a position to do anything about the matter and will not be able to do anything until a strike actually occurs; that in the meantime the Company should consult with the Commission's Chief Counsel as to any action to be taken. The Chief Counsel was therupon instructed to consult with Mr. Williams before the meeting adjourned.

Following Mr. Williams' departure, the Chief Counsel advised that the Commission has authority to take over the ferry operation if it considers that is the proper thing to do, and can arrange with the Astoria Navigation Company to act as the state's agent, if it so desires. He recommended, however, that in order to avoid public criticism, nothing whatsoever be done unless and until a strike develops and the ferries are tied up. The Commission took no action.

The meeting recessed at 12:00 noon for luncheon and reconvened at 2:00 p.m. with the same persons present and participating.

The Engineer brought up for discussion the matter of acquiring additional property along McLoughlin Boulevard (US99E) at the State Highway Department headquarters between Portland and Milwaukie. He said that a meeting is to be held this evening with the Clackamas County Housing Authority, the City of Milwaukie and the County Court of Clackamas County, to discuss the disposition of this land, which is under the jurisdiction of the Clackamas County Housing Authority, and they want to know if the State Highway Department is interested in acquiring some of it on each side of the highway for future highway development, and if so, the state can purchase it at the rate of about $800 per acre. The Engineer recommended the acquisition of strips on each side of the highway, which he said would be needed at some future time for a proposed access road, and the purchase of additional acreage for park purposes. Mr. A. G. Skelton, Division Engineer, who was present, advised that the Federal Government will remove what houses there are on the property, and will accelerate the moving of the houses in conformity with the wishes of the State Highway Commission. He also stated that at the meeting this evening about all that the group will want to know is whether or not the Highway Commission is at all interested in acquiring this property. The question arose whether or not the state should purchase this property which is classified as an industrial area. The Engineer pointed out that if the adjacent property were developed for industrial purposes, the need for the access road would be emphasized. Following discussion, the Commission authorized the securing of an option.

The Right of Way Engineer brought up for discussion a proposed agreement with the California-Oregon Power Company relative to the lease of a five-acre tract of company land near Prospect on the Crater Lake Highway which is needed in connection with a grade widening and paving project between Cascade Gorge and Prospect, for which bids were received at this meeting. He said that this tract is needed as a site for a crushing plant and the company is willing to lease it to the state for a consideration of $1.00 per year under certain conditions. It appears that the Southern Oregon Sugar Pine Timber Company also has a lease on the property, but is willing that the state use the property on the condition that the state pay a portion of the premium on the bond which the company was required to furnish the California-Oregon Power Company as protection in the event the power company's facilities are damaged by reason of the use of the property. The Chief Counsel advised that the agreement contains provisions which are rather severe, nevertheless he recommended approval of the agreement on the condition that the Resident Engineer in charge of the contractor's operations be furnished a copy of the agreement to enable him to see that the provisions thereof are strictly complied with. He gave as his understanding that the premium on the bond which

the timber company furnished the power company amounted to about $625 annually, a portion of which, he said, very likely will have to be paid by the state. The Commission unanimously approved the recommendation. (The agreement was signed the following day.)

The Commission discussed with the Engineer the bids received at the morning session for highway construction, and at 3:00 p.m. Chairman Chandler announced the Commission's decision with respect to each project, as follows, the Commission's action being by unanimous vote:

"Furnishing of insurance covering the Astoria-Megler Ferry operation. Bids for furnishing this insurance were received in Salem on May 22 and were discussed by the Commission at this meeting with a representative of the Astoria Navigation Company, which is concerned. The Commission unanimously accepted the offer of Jewett, Barton, Leavy & Kern, Portland, to furnish insurance for Units "A" and "C" at $12,058.50 and $770.00 respectively, and the offer of Durham and Bates, Portland, for Unit "B" at $5,408.00.

"Grading, surfacing and oiling the West Unit of the Deschutes County Line-Prineville Section of the O'Neil Secondary Highway, Crook County. The low bid for this work was submitted by F. L. Somers, Klamath Falls, at $106,295.50. There were seven higher bids. The Commission has awarded the contract to Mr. Somers at his bid price.

"Construction of guard rail and sight posts on the Pacific and Oregon Coast Highways in Douglas, Coos, Jackson and Josephine Counties. The Commission received four bids for this work, the low one being that of Meade & Hobson, Grants Pass, at $16,612.80. The contract has been awarded to Meade & Hobson at their bid price.

"Construction of a latrine in Dimmick State Park, Hood River County. Four bids were received for this work, the low one being that of Gilbert Roberts, Hood River, at $2,472. The contract has been awarded to Mr. Roberts at his bid price.

"Grade widening and paving of the Cascade Gorge-Prospect Section of the Crater Lake Highway in Jackson County. The Central Heating Company, Eugene, submitted the low bid for this work at $159,010. There were six higher bids. The contract has been awarded to the low bidder, The Central Heating Company, at its bid price.

"Construction of a maintenance building at Prospect on the Crater Lake Highway, Jackson County. The Commission received two bids for this work, but has rejected both of them as being too high. The project will be re-advertised.

"Reoiling work on seven state highways in Jackson, Josephine and Douglas Counties. The low bid for this work was submitted by Harr & Horton, Portland, at $65,857.10. There were five higher bids. The Commission has awarded the contract to the low bidder, Harr & Horton, at their bid price.

"Regrading, surfacing, oiling and furnishing crushed rock in stockpiles on the Wasco County Line-Madras Section of the Warm Springs Highway, Jefferson County. Rogers Construction Company, Portland, submitted the low bid for this work at $147,810. There were three higher bids. The contract has been awarded to Rogers Construction Company at its bid price.

"Klamath Agency Rock Production Project on five state highways in Klamath County. J. N. & M. J. Conley, Portland, submitted the low bid for this work at $25,000. There were two higher bids. The contract has been awarded to J. N. & M. J. Conley at their bid price.

"Reoiling on three state highways near Eddyville, Blodgett and Philomath in Lincoln and Benton Counties. The Central Heating Company, Eugene, submitted the low bid for this work at $87,817.60 based on the use of asphalt. They submitted no bid based on the use of tar. Harr & Horton, Portland, submitted the next low bid at $93,841.50. based on the use of asphalt. They, too, submitted no bid based on the use of tar. There were four higher bids. The Commission has awarded the contract to the low bidder, The Central Heating Company, at its bid price, using asphalt.

"Construction of a frame dwelling at Blue Mountain Maintenance Patrol Station on the I. O. N. Highway, Malheur County. The Commission received no bids for this work and the project will be re-advertised at a later date.

"Construction of the James Street Bridge in the town of Silverton, Marion County. The low bid for this work was submitted by H. G. Carl, Salem, at $19,400.07. There were seven higher bids. The contract has been awarded to H. G. Carl, the low bidder, at his bid price.

"Construction of a latrine in Catherine Creek State Park, Union County. Walter Rohde, Pendleton, submitted the low bid at $2,766. There were two higher bids. The contract has been awarded to Mr. Rohde at his bid price.

"Dufur Rock Production Project on The Dalles-California Highway, Wasco County. The low bid for this work was submitted by E. C. Hall Company, Portland, at $26,400. There were two higher bids. The contract has been awarded to the E. C. Hall Company, low bidder, at their bid price.

"Reoiling and furnishing crushed rock in stockpiles on the Forest Boundary-Jefferson County Line Section of the Warm Springs Highway, Wasco County. The low bid for this work was submitted by Rogers Construction Company, Portland, at $74,627. They qualified their bid by stating that they would not accept the award of the contract unless also awarded the contract for the Wasco County Line-Madras contract, which contract has been awarded to them. There were three higher bids. The Commission has awarded the contract to Rogers Construction Company at its bid price.

"Paving the Sherwood (Main Street) Section of a city street in the town of Sherwood, Washington County. Cascade Construction Company, Portland, submitted the low bid at $11,355. Parker-Schram Co., Portland, submitted the only other bid at $12,649. The contract has been awarded to the low bidder, Cascade Construction Company, at its bid price.

"Reciling project on the Sunset and Nehalem Highways near Manning, North Plains and Buxton, Washington County. Harr & Horton, Portland, were the low bidders for this work, at $27,318.56. There were five higher bids. The contract has been awarded to Harr & Horton at their bid price.

"Construction of a reinforced concrete and steel bridge over the South Yamhill River on Three Mile Lane Secondary Highway near McMinnville, Yamhill County. Frank Watt Construction Co., Portland, were the low bidders for this work at $213,775. Hamilton & Thoms, Eugene, submitted the next low bid at $224,490. There were nine higher bids. The Commission has awarded the contract to the low bidder, Frank Watt Construction Co., at its bid price."

The Assistant Counsel, Mr. C. W. Enfield, requested authority to acquire by condemnation certain parcels of real property that are needed for various highway improvements. He submitted a list of such properties, together with the offers that he recommended in condemnation, as follows:

			Recommended Offer
Unit #2, Sullivan Gulch Highway			
R 14694	Myrtle S. Miller (Right of Way) 5,198 square feet	$ 9,200.00	$ 9,200.00
N. E. Union Avenue Section of Pacific Highway East			
R 14797	Michael Hodes (Right of Way) 0.18 acres, or approx. 7,841 sq.ft. of land at $2,000.00 per acre	360.00	
	Allowances and damage items	550.00	
	Filling and graveling	800.00	
	Replacing 220' of fencing	200.00	
	Moving stock from parcel and providing new space	100.00	
	Replacing concrete slab	240.00	
		2,250.00	2,600.00
Cascade Locks-Hood River Section of the Columbia River Highway			
R 15314 15315	Wesley Scoggin, et ux. 0.61 acre 4.46 acres (Right of Way)	5,500.00	5,500.00

(Cont.)

Salisbury Junction-Poker Creek Section of the Sumpter Valley Highway

			Recommended Offer
R 15998	Mary Corbett Robertson, et al. (Right of Way and Gravel Pit)		
	1.5 acres at $200.00 per acre	$ 300.00	
	7.05 acres at $8.00 per acre	56.40	
	542 rods of fencing at $2.25 rod	1,219.50	
	Allowance for Damages: 10% of $12,500.00 (Value of farm as per McCune, appraiser)	1,250.00	
		2,825.90	$ 2,900.00

City of Sweet Home Section of the Santiam Highway

R 14292	Hasel Truitt (Right of Way) 978 sq.ft. at $1.00	978.00	1,000.00
R 15830	Harry Swager, et ux. (Right of Way) 1,262 sq.ft. of land	1,750.00	1,800.00
R 15831	John Gilbert, et ux. (Right of Way) 1,027 sq.ft. lump sum offer	1,500.00	1,500.00

As the result of careful consideration, the Commission approved the request and the recommended offers, and authorized the Counsel to proceed with the condemnation of the properties. The attached resolutions relative thereto, marked EXHIBITS "B-1", "B-2", "B-3", "B-4", and "B-5", which resolutions by this reference are made a part hereof with like effect as though extended in full herein were thereupon adopted by the Commission by unanimous vote.

The Chief Counsel reported difficulty in effecting settlements for right of way needed from Mr. William G. Huard for the Viento-Hood River Section of the upper Columbia River Highway in Multnomah County; and for the improvement of the Brookings Section of the Oregon Coast Highway in Curry County. With respect to the first of these two, he advised that the Commission at one time approved an option taken from Mr. Huard, but after consulting with his children Mr. Huard refused to sign the deed, so now it is necessary to take the matter to court, and he requested authority to do so. The Commission approved the request unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "B-6", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Concerning the Brookings right of way, the Chief Counsel advised that there are seven properties involved and it appears necessary to condemn them. He requested authority to institute the condemnation proceedings, if necessary, and to offer for each tract the amount of the highest appraisal therefor as determined by competent appraisers. The Commission unanimously approved both requests by the adoption of the attached resolution with respect thereto marked EXHIBIT "B-7", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Right of Way Engineer reported the results of taking bids in Salem on May 22nd for the purchase of a residence building acquired from Harold Bates in connection with a right of way settlement on the Three Mile Lane Secondary Highway near McMinnville. He stated that two bids were received, one being that of David W. LaChance, McMinnville, at $1,625, and the other being that of Willis Jenne, McMinnville, at $555. He recommended acceptance of the offer of Mr. LaChance. The Engineer and Chief Counsel concurred therein. The Commission approved the recommendation unanimously.

The Right of Way Engineer also reported the following sales of miscellaneous properties:

Building formerly owned by Anna McDonald, on Ferry Street, Eugene, sold to Tom Lillebo, contractor, for the sum of	$ 100.00
Frick ammonia compressor, 10 HP Century motor, and all ice machinery, pipes, etc., acquired from Standard Brands on Williams St., Portland, sold to the Oregon State Penitentiary for the sum of	300.00

He recommended confirmation of these sales. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Right of Way Engineer reported a controversy with F. G. and Jean Minnie Huntley, owners of the Green Lantern Cafe at Gold Beach, arising out of the moving of the building in connection with the improvement of the Oregon Coast Highway through Gold Beach. He said that this controversy is of long standing, and that the Huntleys have finally agreed to release the state from further obligation if paid the sum of $265.00. He recommended payment of such sum. The Commission approved the recommendation.

The Commission discussed a report from the Right of Way Engineer on a request from Bonneville School District No. 46, Multnomah County, that the State Highway Commission contribute the sum of $3,500 toward the purchase of a new site for their school near Dodson, on the upper Columbia River Highway. The Right of Way Engineer stated that the school presently is located in the easterly part of Bonneville and that the Commission acquired a narrow strip off the northerly side of the school grounds in connection with the reconstruction of the Columbia River Highway. In exchange for this strip, he said, the Commission deeded to the school district, at its request, right of way of the old Columbia River Highway adjacent to the school property, but since the deal was consummated, the school officials have changed their attitude and now allege that the school as presently located is too close to the highway, and they want to move it to a new site. He pointed out that the center line of the present road (old highway) is 60 feet from the main part of the school building and 40 feet from the closest corner, whereas the center line of the new highway will be 160 feet away from the building, so it is apparent that their objections are not well founded. He gave as his feeling that the Commission has fulfilled its obligation to the school district and recommended that its request be denied. The Commission approved the recommendation unanimously.

The Right of Way Engineer requested instructions as to the amounts of insurance to carry on properties that have been acquired by the Highway Commission in connection with the acquisition of right of way for the Sullivan Gulch Project in Portland, particularly the amount to be carried on industrial buildings which are of no value whatsoever to the state, although they might be of considerable value to others were it possible to move them. He recalled previous instructions from the Commission to insure the properties up to the amount of their true value. Commissioner Reynolds suggested that, if the buildings are of no value to the state, they not be insured, and if they are presently insured, the policies be allowed to lapse. As a result of discussion, the Commission unanimously adopted Commissioner Reynolds' suggestion and so ordered.

The Commission discussed and, upon recommendation of the Chief Counsel, unanimously approved an agreement with Roy Swenson and wife clarifying certain questions of reversion which will arise when vacation proceedings now underway with respect to the vacation of an alley in Block 7 of the Amended Plat of Fairmount in Eugene are consummated. He said that in addition to straightening out the title to these reversions, the agreement will give to the State complete restriction of access to the Pacific Highway across the entire northerly boundary of this Block. (The agreement was signed on the following day.)

The Engineer brought up for discussion a request from the U. S. Army Engineers that the Highway Commission make available to them certain state-owned properties in the vicinity of Sanderson bridge over the Santiam River on the Albany-Lyons Highway. He stated that the Army Engineers wish to use this property in connection with a flood control project. He presented a form of easement deed prepared by the Army Engineers which will effect their purpose, and recommended approval of this instrument, notwithstanding that the provisions therein are rather severe, in view of the fact that the proposed revetment will definitely be of benefit to the state in its settlement of the damage claim of Mr. Barclay who owns property fronting on the north side of the river at this point. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously. (The easement deed was signed by the Commission on the following day.)

The Commission discussed a request from Mr. William M. Munkers for a permanent easement to construct and operate a private roadway over a portion of Cascadia State Park. The Engineer advised that Mr. Munkers' residence is located very close to the boundary line between his property and the park, on the south side of the Santiam Highway, and that the most practical location for a road allowing access to the highway from his property is along the easterly boundary of the park. From an engineering standpoint, he said, there is no objection to the construction and operation of a roadway on the park premises, and he accordingly recommended approval of the request. The Commission approved the recommendation unanimously, and ordered the matter covered by a revocable easement in favor of Mr. Munkers.

The Engineer presented a request from the State Forester for the acquisition of a 4.089-acre tract of state-owned land on the Ochoco Highway about one and one-half miles east of Prineville, which he wishes to use as a site for a district headquarters. He stated that the tract is a portion of a 14.42-acre tract which was originally acquired as a source of gravel and for

which the Commission paid $101. He also said that a field investigation reveals that the Highway Department has no further use for the four acres that the Forest Service wants, and he recommended that the property be deeded to the Forest Service without charge. The Commission approved the recommendation.

The Secretary presented a letter from Mr. J. R. Frum, Assistant Vice President, Crown Zellerbach Corporation, requesting permission to remove a number of old growth hemlock trees growing along the boundary line of two small tracts of state-owned property in Clatsop County where they border on land owned by the corporation. Mr. Frum offers to pay the sum of $4 to $5 per M for this timber. The Engineer advised that the two properties mentioned by Mr. Frum are quarry sites that are on or adjacent to the located route of the Fishhawk Falls Secondary Highway, and he recalled that the Commission previously approved the sale to the corporation of all down timber and snags on the property at a price of $3 per M. He recommended sale of the timber to the Crown Zellerbach Corporation at $5 per M, which is the value placed on it by the State Forester. The Commission approved the recommendation.

The Commission discussed a request from the State Game Director for permission to drain Waverly Lake, Albany, and other small lakes formed in borrow pits along the Pacific Highway between Albany and Eugene, in connection with a program for the destruction of trash fish and the restocking of the lakes with bass and other warm water fish. The Engineer stated that Waverly Lake can be drained, but the others can not. He recommended approval of the Game Director's request. The Commission approved the recommendation.

In this connection the Commission also discussed the question of whether or not to allow the operation of motor boats on Waverly Lake and the other lakes along the Pacific Highway, because of the hazards created to bathers. The Chief Counsel advised that the Commission has full control of the lakes and can prescribe such rules and regulations as it deems necessary for their proper use. He was instructed by the Commission to render a full report on this subject at the next meeting so the information will be available to the Commission in establishing a general policy with respect to such matters.

The Right of Way Engineer presented a request from the Warren Packing Company to repurchase a portion of a tract that it sold to the state as right of way for the Dodson-Bonneville Section of the Columbia River Highway. He said that an extra-wide strip was acquired from the company with the idea of constructing an "outer" highway, but due to the nature of the terrain the plans were changed, leaving a strip of land about 40 feet wide which is of no value for highway purposes. He recommended that the strip, which contains about 9,000 square feet of land, be reconveyed to the Warren Packing Company for $392.40. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously. (The deed of conveyance was signed on the following day.)

The Chief Counsel reported briefly the status of the claim of the Southern Pacific Company against the Kuckenberg Construction Company, which amounts to about $26,000 and arises out of a Forest Highway Contract on the North Santiam Highway, Marion County. He stated that the state is obligated to pay the full amount of this claim, but he is negotiating with the Kuckenberg

Construction Company through its attorney in an endeavor to get the company to assume fifty percent of the expense, which would reduce the state's obligation to about $13,000. He asked the Commission to authorize settlement of the claim on such basis. The Commission unanimously approved such settlement of the case, it appearing to the Commission that the state is obligated to pay the full amount of the claim if the compromise arrangement can not be effected.

The Commission discussed a written report from the Chief Counsel dated May 9, 1950, with respect to the claim of the Union Pacific Railroad Company, et al, against the Highway Commission arising out of the construction of the Oneonta Slide Project on the upper Columbia River Highway, State Highway Contract No. 2688. The Chief Counsel in his report recalls that this matter is now pending in the Circuit Court and that the railroad company is seeking to recover the sum of $134,120.58, including costs. He suggests, because of the uncertainties in the controversy and because of equities which are with the railroad company, that the Commission approve settlement of this case on a fifty-fifty basis, and that the case of the Western Union Company which arises out of the same project and is in the amount of $14,000, be settled on the same basis. The Commission unanimously approved settlement of both claims on a fifty-fifty basis as recommended. (For details see copy of Chief Counsel's report to the State Highway Commission in general files.)

The Chief Counsel submitted for the Commission's consideration a form of resolution amending a previous resolution which was adopted by the Commission at its meeting on September 19, 1949, in which the Chief Counsel is authorized to settle certain claims. He explained the details. The matter was discussed by the Commission but no action was taken thereon.

The Chief Counsel presented a written report on the obligations of the State Highway Commission concerning the maintenance of city streets. The Commission deferred action on this matter for study.

The Chief Counsel reported a request from the City Attorney of Salem for information with respect to parking regulations on Summer Street between Court Street and Chemeketa Street, in Salem. He said that the City of Salem has a parking problem which it is making every possible effort to solve and it is proposed that on a portion of Summer Street which abutts the sunken garden angle parking be provided, and that on the opposite side of the street parallel parking be required, such regulations to be effective on both the east and west legs of Summer Street. He advised that the last Legislature enacted Chapter 338, Laws of 1949, by which certain authority is vested in the Secretary of State concerning the parking of vehicles on grounds owned by the State adjacent to the State Capitol and other buildings of the State Capitol Group, in view of which he advised that in his estimation the Commission should raise no issue with respect to its authority to exercise any jurisdiction or control over the parking of vehicles on the city streets at these locations. This matter, he said, was discussed with the Secretary of State, who has accepted the responsibility and will take appropriate action. The Commission considered that under the circumstances there is nothing for it to do at this time.

There was brought to the attention of the Commission a report from the Chief Counsel, dated May 2, 1950, with respect to financing construction

of the State Highway Department office building in Salem. The Commission ordered the report filed without action.

There was brought to the attention of the Commission a letter from Mr. Tom S. Farrell, Attorney at Law and Justice of the Peace in the Lakeview district, concerning the imposition of fines on violators of the laws regulating weights and dimensions of loads that are transported over state highways. Judge Farrell states in his letter that frequently cases appear in his court which involve only the lack of a permit from the State Highway Department, and that as soon as the operator secures such a permit he is allowed to proceed without interruption. He complained of delays caused the operators in securing their permits and stated that unless the Highway Commission will provide for the issuance of permits in Lakeview his inclination will be not to penalize an operator for failure to have a permit, unless it can be shown that the highway has been damaged. The Assistant Highway Engineer, W. W. Stiffler, explained details of the requirements. He also said that operators in Lakeview can obtain a permit on one day's notice to the highway office in Klamath Falls. It was the feeling of the Commission that the attitude expressed by Judge Farrell in his letter is not very cooperative, and unless something is done to change it, highways in the vicinity of Lakeview will suffer. District Engineer T. M. Davis of the Bureau of Public Roads stated that he will not approve an allocation of federal funds to finance highway work in Lake County unless full cooperation is received from the county officials. As a result of discussion the Commission ordered that the county court of Lake County be advised that it is the feeling of the Highway Commission that the expenditure of public funds for highway construction within Lake County cannot be justified unless full cooperation is received from trucking industries, and unless the justice courts in the county will enforce motor vehicle laws, particularly as to weights and dimensions. The Commission also ordered that a copy of Judge Farrell's letter be forwarded to the county court for its information.

The Chief Counsel brought up for discussion claims filed by Mr. Derendorff and Mr. Smith, Port Orford, for damages which they allege occurred to their property by reason of the raising of the highway grade in this town. The Engineer advised that this is a long-standing controversy, having arisen by virtue of the complaint of a former owner of the property. It appears that a motel is operated on the premises and that the new grade of the highway obstructs the view of the ocean. It also appears that the Bureau of Public Roads, which is constructing this highway, endeavored to satisfy the owners by filling in the property, and in so doing damaged a wall on the premises. The Engineer pointed out that the Highway Commission does not have jurisdiction over the highway as yet, because it is still under construction by the Bureau of Public Roads as a Forest Highway Project. The Chief Counsel advised that the state has no legal liability in the case. As a result of discussion, the Commission concluded that the state is not liable for the damages and thereupon unanimously denied the claim.

The Chief Counsel requested authority to retain on the Highway Department payroll Mr. William J. Minkiewitz, an employe of the Right of Way Department who will have reached the end of his extended retirement period on July 1, 1950. He explained the details. The Commission unanimously approved retaining Mr. Minkiewitz on the payroll for 600 hours in the second half of the year 1950.

The Engineer brought up for discussion the award of the contract for the Coos Bay (Fir Avenue-Ingersoll Avenue) Section of the Oregon Coast Highway in Coos County, bids for which were received by the Commission on April 24, 1950, the proposal of Coos Bay Dredging Company being low at $241,480.44. He said that the award of this contract has been held pending a release from the Southern Pacific Railroad Company, which is involved. Such release, he said, has now been received from the company in the form of a letter. He read the letter aloud in which the railroad company states its approval for the state to proceed with the highway work with the understanding that the state will furnish the company a letter to the effect that the Highway Commission will sign an agreement covering the situation when it is presented by the railroad company. The railroad company also requests that the state's contractor furnish the Company a letter to the same effect. The letter also points out that the railroad company's approval is based upon the cutting off of piling at the ground line at low tide, and placement of a fill thereon compacted with grading equipment; also that the approval is based on the understanding that the state will protect the bay side of the fill with rip rap consisting of old broken up concrete pavement. The Engineer advised that the original plan for this improvement provided for the rip-rapping work, and he recommended approval of the terms outlined in the letter. The Commission approved the recommendation unanimously and authorized the Engineer to prepare a letter to the railroad company stating that the Commission will sign the agreement when received if the provisions thereof are in conformity with previous understandings on the matter and with those outlined in the letter just received from the railroad company. This matter was discussed further on the following day, at which time the Engineer was authorized to award the contract to the Coos Bay Dredging Company pursuant to authority previously given him. (See additional paragraph ahead.)

The Engineer reported the result of investigations of a request from the City of Aumsville for the improvement of the North Santiam Highway through this city. He estimated that it will cost about $66,000 to widen the highway to 44-foot width between curbs, but it will cost only $15,000 to widen the present pavement to a width of 20 feet. He recommended that the Commission give consideration to the $15,000 project. The Commission deferred a decision in the matter pending receipt of information as to whether or not the City of Aumsville will be satisfied with such an improvement. The Engineer was instructed to ascertain such information and report at the next meeting.

The Commission discussed a notice from the City of Grants Pass to the effect that the city has approved resolutions to create a small improvement district for the improvement of city streets, which district includes property owned by the State Highway Commission as a district maintenance headquarters, and that the assessment which has been levied by the city on the Highway Commission's property, described as Lot 1 in Block "A", amounts to $375.30 for 174 lineal feet of curb and gutter, and for drainage. The Engineer advised that this street improvement will benefit the state's property and he recommended payment of the assessment. The Commission approved the recommendation.

Pursuant to previous instructions from the Commission, the Engineer reported that the signal installation at Mosier Tunnel on the upper Columbia

River Highway as presently arranged appears to be working out satisfactorily for all parties concerned. The arrangement, he said, consists of a stop light installation for eastbound traffic at a point 900 feet west of the west portal of the tunnel to eliminate hazards from falling rock, and the installation of an additional light for eastbound traffic midway between the stop light and the tunnel portal, which automatically clears eastbound vehicles without stopping, provided they conform to the speed of 15 miles per hour which is indicated and for which the signals are set. The Commission approved the report and ordered it filed.

The Engineer reported on a study that has been made for widening the north entrance of the Pacific Highway into Grants Pass, particularly from the city limits to "A" Street, a distance of 4,215 feet. He estimated the cost of such widening work to provide 56 feet width between curbs, which corresponds to the downtown portion of the street, at $179,000, of which $119,000 represents the cost of construction and $60,000, the cost of right of way. The Commission deferred action on this matter pending personal inspection of the project on its next visit to that district. The project is to be considered in the formulation of the next construction program.

A letter was presented from the Seaside Chamber of Commerce requesting construction of the Oregon Coast Highway along Roosevelt Drive, at least between Broadway and the south city limits. The Commission deferred action on this matter pending rendition by the Engineer of his economic report on highways in the vicinity of Astoria, investigations for which are now underway.

The Engineer asked the Commission to confirm authority previously given him by letter to provide ventilation for inside rooms in the new State Highway Department office building at Salem, at an estimated cost of $10,373. The Commission unanimously approved the expenditure.

In this connection the Engineer reported receipt of a suggestion from the Board of Control that the State Highway Commission provide a tunnel connecting the highway building and the new state office building. He estimated the cost of such tunnel construction at $30,000 and advised that in his estimation there is no justification for the expenditure. The Commission decided unanimously not to construct the tunnel.

The Commission discussed and denied a petition from citizens of Lake Creek and Brownsboro, Jackson County, for improvement of the Little Butte Secondary Highway from the end of the present improved section to McAllister Soda Springs.

The Commission unanimously confirmed the authority previously given the Engineer by letter to advertise for bids for the reoiling of 62 miles on seven state highways in Division No. 3, estimated cost $117,000, which work it was originally intended to perform by state forces as a maintenance proposition. The Commission also authorized the transfer of $117,000 from the General Maintenance Budget to the Special Maintenance Budget to finance the work.

The Engineer requested authority to contract the following reoiling projects which were originally scheduled for performance by state forces, and

to transfer funds from the General Maintenance Budget to the Special Maintenance Budget to pay the cost involved, as indicated:

54.64 miles on five state highways in Benton and Lincoln Counties, Division No. 2, estimated cost, $110,000.

Recoiling 20.37 miles on the Nehalem and Sunset Highways, Troutdale east and on the old route of the Columbia River Highway from Crown Point east, all in Division No. 1, estimated cost, $33,000.

Recoiling 35.4 miles on four state highways in the vicinity of The Dalles, Division No. 4, estimated cost, $71,500.

The request was approved by the Commission unanimously.

The Commission unanimously confirmed the authority previously given the Engineer to increase the amount of funds previously allotted for the following projects:

Broadway Bridge-Steel Bridge Section, Harbor Drive, Portland, original allotment, $366,000 - increased to $720,000.

Brookings-California Line Section, Oregon Coast Highway, original allotment, $200,000 - increased to $242,000.

The Commission discussed with the Engineer projects that are to be presented by delegations scheduled to appear on the following day, but deferred action pending appearance of the delegations.

The meeting adjourned at 5:15 p.m., to reconvene at 9:00 a.m. the following morning in the same room.

Portland, Oregon
May 26, 1950

The meeting of the State highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

Ben. R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Auditor
H. B. Glaisyer, Secretary

Bids as follows for highway construction were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Chandler announced that the awards of contracts would be made at 3:00 p.m.

BAKER COUNTY

Powder River Bridge. Federal Aid Project No. S-97(2). Construct 80' reinforced concrete bridge over Powder River on Sumpter Valley Highway. Involves following approximate quantities: 110 cu.yds. excavation; 130 cu.yds. concrete; 24,000 lbs. metal reinforcement and 3,300 lbs. miscellaneous metal.

Meade & Hobson, Grants Pass	$ 11,539.00
McWaters & Bartlett, Boise, Idaho	14,060.00
Valley Constr. Co., Portland	14,165.00
Erick Enquist, Troutdale	14,395.00
Geo. E. Berry, Beaverton	14,860.00
Archie R. Averill, Portland	18,450.00

BENTON COUNTY

Alsea-Alder Creek Section of the Alsea Highway. Federal Aid Project No. S-229(2). 8.00 miles of paving. Requires approximately 3,500 cu.yds. crushed rock or gravel; 130 tons emulsified asphalt; and 23,000 tons asphaltic concrete.

The Central Heating Co., Eugene	154,589.50
Porter W. Yett, Portland	155,540.00
Parker-Schram Co., Portland	157,902.50
J. C. Compton Co., McMinnville	162,090.00
K. F. Jacobson Co., Inc., Portland *	167,725.00
Warren Northwest, Inc., Portland	168,796.60
Acme Constr. Co., Eugene	196,655.00
Rogers Constr. Co. & Babler Bros., Portland	203,350.00

* Bidder will accept award of only one project.

CURRY COUNTY

Brookings-California State Line Section of the Oregon Coast Highway. Federal Aid Project No. F-119(3). 5.64 miles of grading and paving. Requires approximately 134,800 cu.yds. excavation; 110 cu.yds. concrete; 14,000 lbs. metal reinforcement; 25,000 cu.yds. pit-run gravel topping; 5,000 cu.yds. crushed gravel; 14 tons RC-3 asphalt; 66 tons emulsified asphalt; and 14,000 tons asphaltic concrete.

Parker-Schram Co., Portland	243,894.50
K. F. Jacobsen & Co., Inc., Portland *	256,963.00
Floyd Grahm Constr. Co., Lebanon *	257,638.00
Rogers Constr. Co. & Babler Bros., Portland	282,651.00
J. C. Compton Co., McMinnville	289,314.00
Porter W. Yett, Portland	319,779.00
G. D. Dennis & Son, Portland	328,725.50

* Bidder will accept award of only one project.

DOUGLAS COUNTY

Myrtle Creek (Oak Street) Section. City Project. 0.10 mile of grading and paving. Requires approximately 500 cu.yds. excavation; 770 cu.yds. rock or gravel base materials; and 630 tons asphaltic concrete.

Roseburg Paving Co., Roseburg	$ 15,862.00

(Previous low bid $19,164.00 - 8/19/49)

GILLIAM AND MORROW COUNTIES

Heppner Junction-Jordan and Ione Sections on the Heppner Highway and on "H" and Main Streets in the city of Ione. State and City Projects. 0.65 mile of rock base; and 32.61 miles of oiling. Requires placing approximately 7,270 cu.yds. state-furnished rock; and approximately 510 tons 200-300 asphalt.

J. C. Compton Co., McMinnville	27,385.00
D-H Paving Co., Vancouver, Wn.	29,141.20
Russell Olson Constr. Co., Pendleton	29,749.00
Tom McCorkle Constr. Co., Boise, Idaho	29,907.95
Harr & Horton, Portland	30,690.85
Babler Bros., Portland	31,461.60
Loyd Calkins Co., Ocean Lake	31,853.20
Acme Constr. Co., Eugene	34,352.10
Morrison & Fisher, Walla Walla, Wn.	36,738.60

GILLIAM AND WHEELER COUNTIES

Morrow County Line-Condon-Service Creek Section of the Wasco-Heppner and John Day Highways. State Project. 53.78 miles of reoiling. Requires placing approximately 9,900 cu.yds. state-furnished aggregates; and approximately 810 tons 200-300 asphalt.

D-H Paving Co., Vancouver, Wn.	44,920.00
Harr & Horton, Portland	45,242.00
Russell Olson Constr. Co., Pendleton	47,220.00
Babler Bros., Portland	47,370.00
J. C. Compton Co., McMinnville	48,180.00
O. D. Yocom Co., McMinnville	48,470.00
Acme Constr. Co., Eugene	52,506.00
Tom McCorkle Constr. Co., Boise, Idaho	53,137.00

JACKSON COUNTY

Phoenix ("C" Street) Section on "C" Street in Phoenix. City Project. 0.26 mile of grading, surfacing and bituminous macadam. Requires approximately 2,060 cu.yds. excavation; 2,600 cu.yds. crushed or pit-run gravel or rock; and 740 cu.yds. crushed gravel or rock; and 24 tons 120-150 asphalt.

Osborn Construction Co., Medford	12,265.40

JOSEPHINE COUNTY

Cave Junction-California State Line Section of the Redwood Highway. State Project. 10.53 miles roadbed widening; 12.73 miles of rock base; and 13.20 miles of paving. Requires approximately 26,600 cu.yds. excavation; 39,000 cu. yds. pit-run gravel topping; placing approximately 14,100 cu.yds. state-furnished materials in base, shoulders and binder course; 155 tons MC-2 asphalt; 134 tons emulsified asphalt; and 27,000 tons asphaltic concrete.

J. C. Compton Co., McMinnville	$ 239,859.50
K. F. Jacobsen & Co., Inc., Portland *	258,180.70
Pieler Constr. Co., Seattle, Wn.	267,600.92
Porter W. Yett, Portland	271,206.00
Parker-Schram Co., Portland	271,789.75
Warren Northwest, Inc., Portland	275,230.50
Floyd Grahm Constr. Co., Lebanon *	293,132.00
Babler Bros., Portland	293,536.00
J. H. & M. J. Conley, Portland	300,731.80

* Bidder will accept award of only one project.

LAKE, HARNEY AND DESCHUTES COUNTIES

Hampton-Gap Ranch Section of the Central Oregon Highway. State Project. Rock Production. Requires approximately 14,000 cu.yds. crushed cinders or crushed rock in stockpile.

Grover C. Pomeroy & C. R. Badger, Salem	22,680.00
Oscar E. Joelson, Eugene	28,000.00
Inter City Sand & Gravel Co., Eugene	29,260.00
Rogers Constr. Co., Portland	29,372.00
N. A. Toole Constr. Co., Ontario	31,220.00
Barney B. Helser, Portland	31,500.00
F. L. Somers, Klamath Falls	41,720.00

LANE COUNTY

Neptune State Park Latrine. State Project. Construct latrine in Neptune State Park south of Yachats at Cummings Creek on Oregon Coast Highway. Involves construction of 11'6" x 22' frame building, plumbing for and installation of 4 water closets, 2 urinals and 2 lavatories, septic tank, wiring building, and other miscellaneous work.

Meade & Hobson, Grants Pass	5,288.00
Kenneth Dodd, Newport	6,772.00

MARION AND POLK COUNTIES

Marion Street (Salem) Bridge Piers. Federal Aid Project No. U-322(1). Construct five piers for Marion Street Bridge over Willamette River. Involves following approximate quantities; 2,600 cu.yds. excavation, 9,700 lin.ft. foundation piling, drive 298 piles, 1,840 cu.yds. concrete and 220,000 lbs. metal reinforcement.

(Cont.)

Marion Street (Salem) Bridge Piers (Cont.)

State Constr. Co., Seattle, Wn.	$ 228,282.00
Lee Hoffman, Portland	246,570.00
General Constr. Co., Portland	250,320.00

(Previous low bid - $172,699.00)

UNION COUNTY

Willow Creek Bridge. Federal Aid Project No. S-75(3). Construct 75' reinforced concrete slab bridge on treated pile bents over Willow Creek on Imbler-Dry Creek County Road. Involves following approximate quantities: furnish 650 lin.ft. treated timber piling; drive 20 piles; 80 cu.yds. concrete; 21,000 lbs. metal reinforcement; 3,400 lbs. miscellaneous metal; 1.2 M-FBM treated lumber.

Valley Constr. Co., Portland	13,825.00
Geo. E. Berry, Beaverton	16,745.00

UNION COUNTY

La Grande Storage Building. State Project. Construct 18' x 40' frame storage building at La Grande Shops.

Bechtel Bros., Elgin	2,640.00
Walter Rohde, Pendleton	2,989.00
Erick Enquist, Troutdale	4,020.00

WALLOWA COUNTY

South Unit, Joseph-Wallowa Lake Section of the Joseph-Wallowa Lake Highway. State Project. 4.72 miles of grading, surfacing and oiling; also constructing of reinforced concrete slab span bridge on treated timber pile bents. Requires approximately 110,000 cu.yds. excavation; 14,800 cu.yds. crushed rock or gravel; 1,050 lin.ft. treated piling; 160 cu.yds. concrete; 30,000 lbs. metal reinforcement; 30 M-FBM treated lumber; and 180 tons 150-200 asphalt.

Durbin Bros., Eugene	111,283.50
C. J. Eldon, Portland	122,194.00
Rogers Constr. Co., Portland	127,058.00
Allen E. Sackett, Hood River	129,626.00
Clifton & Applegate, Spokane, Wn.	138,398.90

WASCO COUNTY

The Dalles Storage Building. State Project. Construct 22' x 48'6" frame storage building at The Dalles Maintenance Station.

Mid-State Constr. Co., The Dalles	4,120.00
Bemis & Co., Portland	4,459.70

WASHINGTON COUNTY

Hillsboro (North 10th Avenue) Section on North 10th Avenue in Hillsboro. City Project. 0.32 mile of paving. Requires approximately 8 tons emulsified asphalt; and 1,850 tons asphaltic concrete.

Parker-Schram Co., Portland	$ 14,584.00
Cascade Constr. Co., Portland	14,630.00

Mr. Neil R. Allen, Grants Pass, headed a delegation from Southern Oregon composed of representatives of the Chambers of Commerce of Grants Pass, Medford, Ashland and Cave Junction, which presented to the Commission a four-point highway program for the Josephine-Jackson County area. Others in the group were Hon. Franklin J. VanDyke, State Representative, Medford, representing the Jackson County Chamber of Commerce; Lynn W. Newbery, Ashland, representing the Ashland Chamber of Commerce; John Dillard, Cave Junction, representing the Illinois Valley Chamber of Commerce, and Charles MacLean, Grants Pass, representing Grants Pass and Josephine County Chambers of Commerce. Mr. Allen stated that this group has been working together for the past two and one-half years in coordinating a highway program for their district, and have agreed to limit their present request to the elimination of the two most intolerable sections on inter-regional highways and two on state highways. Their unified request, he said, consists of the following:

1. A four-lane highway between Ashland and Central Point in Jackson County.

2. Widening of the facilities for the crossing of the Rogue River at Caveman Bridge to four lanes, and the widening of the north approach to Grants Pass from the city limits to "A" Street in Josephine County.

3. Improvement of the Crater Lake Highway between Union Creek and Cascade Gorge so as to permit year-round heavy hauling in Jackson County.

4. Improvement of Highway 199 (Redwood Highway) from the California Line to Grants Pass, special attention being given to Hayes Hill and Applegate Bridge in Josephine County.

He presented a list of the projects and a tear sheet from the Grants Pass Daily Courier of Saturday, April 15, 1950, which contains a report rendered to the Legislative Highway Interim Committee at a meeting in Grants Pass at that time. Mr. VanDyke spoke in behalf of the Jackson County Chamber of Commerce and the City of Medford. He stated that the groups that he represents heartily endorse the four-point program as presented by Mr. Allen. He stressed the need for a four-lane highway between Central Point and Ashland because of the traffic congestion that obtains along this section, particularly in the vicinity of Medford. Mr. Newbery endorsed the program, also, in behalf of the Ashland Chamber of Commerce. He urged all possible consideration of the projects and advised that

whichever one of the projects the Commission considers has priority status his community will approve. Mr. Dillard stated that his group is fully in accord with the program as presented. Mr. MacLean stated that the people whom he represents are in complete harmony with the program presented by Mr. Allen, and that the people of each community in his district endorse it one hundred percent.

In concluding the presentation, Mr. Allen stated that their group is now conducting an economic survey of highway needs in their communities, and will make the results available to the Commission as soon as the survey is completed so the Commission will have the benefit of the information in promulgating future work in that part of the state. He suggested that the four Chambers of Commerce represented at this meeting be contacted by the Commission when it is arranging future programs.

Chairman Chandler stated that the Commission is cognizant of the entire situation in Southern Oregon and has given it a lot of thought — in fact, has already taken steps to do some of the things that are requested in the four-point program. He pointed out that the Commission at its meeting today received bids for the improvement of the Cascade Gorge-Prospect Section of the Crater Lake Highway, and for the improvement of the Cave Junction-California State Line Section of the Redwood Highway; also, that the Commission expects to receive bids at its next meeting for improvement of the Pacific Highway near the underpass at the north city limits of Ashland. As to the requested improvement of the Redwood Highway over Hayes Hill, Chairman Chandler advised that the Federal Bureau of Public Roads is now conducting a survey of this section preparatory to contracting the work which is to be done as a Forest Highway Project under supervision of the Federal Government. He assured the group that the Commission will give careful consideration, in the formulation of future programs, to the projects which have been requested by the group, and that the Southern Oregon District will receive its fair share of available funds.

Messrs. I. M. Gray and Lawrence Boyle, City Councilmen, Canyonville, were present and urged the Commission to make provision, in its plans for the improvement of the Pacific Highway through Canyonville, for access to the new highway from First Street. Mr. Gray was spokesman. He urged the granting of access at First Street for the convenience of local residents in going to their business district, and for increased efficiency of their fire and police departments. He gave as his understanding that the plans do not provide for any approaches to the highway in Canyonville, except at the north and south city limits. The matter was discussed at some length, during which the Engineer explained details of the project. As a result thereof the Commission instructed the Engineer to make further investigations and report back to the Commission.

A delegation from Eugene, representing the River Road Safety Committee and headed by Mr. John Scheidt, Chairman, was present and requested certain improvements to the Eugene-Santa Clara Section of the Junction City-Eugene Secondary Highway. Others in the group were Harry H. Rice, Principal of River Road School, and Henry L. Meyers, merchant, Eugene. They requested the following:

1. Reconstruction of the highway with provision for curb cuts and better drainage.

2. Construction of four-foot walks on both sides of the highway.

(Cont.)

3. Maximum speed limit of 30 miles per hour with strict enforcement of the requirements and prosecution of violators.

4. Erection of appropriate signs to inform the traveling public of the congested areas.

Mr. Scheidt stated that the present footpath along the west side of the highway is located in the drainage ditch and in the rainy season is full of water so the children are forced to walk on private lawns or on shoulders of the highway, which is hazardous. He mentioned that there are 400 pupils who must use the River Road daily in going to and from school, and he declared that these children need sidewalks for their protection. 70 of these pupils, he said, must cross the highway daily and he suggested as a safety measure the establishment of one crossing area in front of the school, which could be used by the students under direction of teachers who would be held responsible for escorting them. Mr. Meyers complained that certain business establishments have been constructed very close to the highway right of way line, and in some instances the right of way ditches have been filled in at the front of their premises without provision for drainage, so that during the rainy season water accumulates and mud holes develop. He urged action to remedy the situation, including the construction of sidewalks. Following discussion the Commission referred the entire matter to the Engineer with instructions to investigate the situation further and render a complete report thereon.

Mr. W. E. Tegart, Secretary of the Multnomah County Fire District No. 9, Troudale, was present and urged the Commission to install traffic safety facilities at the intersection of Highway 30 (Columbia River Highway) and Fairview Avenue, east of Parkrose. He was accompanied by Hon. Burton Walard, State Representative, Gresham, and Mr. M. M. Wood, Chief, Gresham Fire Department. Mr. Tegart gave as his understanding that their previous request for traffic signals at this intersection was refused because the volume of traffic that passes through the intersection does not meet the standard requirements for such signals. He declared that the traffic counts were taken during a period of inclement weather, so do not reflect true conditions. He urged another count which, he said, would reveal more justification for signal installation at this point than for the existing signal at 112th Avenue. He suggested that the signal at the latter point be moved to Fairview Avenue. Chairman Chandler advised that requests for signal installations are carefully investigated by Engineers who are trained in such matters, and who base their recommendations to the Commission on nationally accepted standards. The Commission, he said, must abide by the recommendation of these experts, but in view of the feeling of Mr. Tegert that the traffic counts heretofore taken do not reflect true conditions another count will be taken on a clear, dry day. The Engineer was thereupon instructed to make such new traffic count at this intersection and also at 112th Avenue so that a comparison can be had of the traffic movements at both places.

A delegation representing the Roseburg City Council and business interests of Roseburg, and consisting of the following, were present regarding the improvement of the Pacific Highway in the northern part of Roseburg: Hon. Albert G. Flegel, Mayor; Percy Croft, Chairman, Street Committee; Walter Olmschied, Planning Commission; Buckley Bell, Chairman, Chamber of Commerce

Highway Committee; D. E. McKenna, Clarence Landis, William Clarenbaugh and Henry Darby, representing business interests in north Roseburg. Mayor Flegel headed the group. He recalled that some months ago a delegation representing their city appeared before the Commission and requested a survey for the establishment of a one-way traffic plan in Roseburg, and the study of the overall highway needs of their city. The people of Roseburg, he said, are still very much interested in this project and will appreciate anything that the Highway Commission will do to expedite what they have in mind. Mayor Flegel declared that Roseburg is a fast-growing city and that their traffic problem is becoming increasingly difficult. Future plans of the city, he said, include construction of a new bridge across the south Umpqua River at Oak Street to replace the existing structure, over which 3,000 cars pass daily during a nine-hour period compared with 300 cars daily in 1939, and the city is concerned with the type of connection that will be used between Oak Street and the highway. He questioned the adoption of Pine Street as a one-way route for southbound highway travel. He suggested retention of Stevens Street for two-way traffic and advised that if this is done, the city will adopt necessary ordinances to prohibit parking of vehicles on that street, which would then become a four-lane highway facility. Mayor Flegel also mentioned a proposed rerouting of the highway at the north city limits and urged the acquisition of right of way along such new route, which, he said, can be obtained now at far less cost than later on.

Chairman Chandler advised that the Highway Commission has given the Roseburg situation a lot of thought and that the members of the Commission recognize the traffic situation that exists. He pointed out that the worst congestion is on the present road at the north city limits, and advised that the Commission has authorized an expenditure of $200,000 to widen this section for four lanes of travel from Roseburg northerly to the Garden Road intersection, at which point facilities are being arranged, consisting of widening, constructing "hide-outs", and installing signals, so traffic entering Garden Road can do so with safety. The estimated cost to construct a new highway east of the present one, he said, is about $1,500,000, which the Commission does not have available, so it appears that such project is one for a long time in the future, although the Commission is still giving the location serious study. As to the city's plan as presented by Mayor Flegel, he stated that the Commission is in no position presently to make a definite statement, but instructions will be given to the Engineer to consult with the City Council to see what can be done for the best interests of the city and the state. The Engineer was thereupon instructed to discuss the matter with the City Council and report back to the Commission.

The State Parks Superintendent reported receipt of a communication from Mr. Alfred G. Collier, Klamath Falls, regarding the expenditure of $2,000 which he deposited with the Commission to assist in financing construction of a museum in Collier State Park. Nothing has ever been done about constructing the building, the Superintendent said; moreover, $2,000 will not pay for it, so Mr. Collier has decided to erect it on his own account at a cost of $3,000 to $4,000 and has requested the return of the $2,000 check to apply on the expense. He recommended that Mr. Collier's check be returned to him. The Commission approved the recommendation.

Commissioner Reynolds inquired as to the status of removal of cinders from Round Butte in The Cove State Park. The Parks Superintendent stated that he referred to the county court of Jefferson County the alternate sites from which cinders could be removed without doing any damage to the park, and that these sites are now being investigated by the county to determine whether or not they are suitable for local use. Commissioner Reynolds gave as his feeling that the state should not hinder the economic development of any community, and that if the alternate sources do not prove satisfactory then perhaps the Commission should permit the removal of cinders from the Round Butte location in the park. Chairman Chandler expressed himself to the same effect. No further action was taken.

The Engineer again brought up for discussion matters pertaining to the award of the contract for the construction of the Coos Bay (Fir Avenue-Ingersoll) Avenue) Section of the Oregon Coast Highway in Coos Bay, particularly the controversy with the Southern Pacific Company arising out of the re-establishment of the company's tracks, necessitated by this improvement. He recalled that the Commission at its meeting on February 6th discussed this matter, at which time the cost to replace the track facilities was estimated at $25,000, and the feeling was expressed that this expense should be shared equally between the railroad company and the state. The estimated total cost, at that time, of the re-establishment of these facilities was about $65,000, payment of which the Commission reluctantly approved if the railroad company cannot be induced to share a portion of the expense. Subsequent negotiations with the company, he said, have not been very successful, the company having allowed a reduction of only $2,000 -- from $65,000 to $63,000 -- and it appears that it will do no good to negotiate further. He pointed out that the thirty-day time limit within which the Commission must award the contract has expired, and he recommended approval of the payment of $63,000 to the railroad company, and that he be authorized to award the contract. It appeared to the Commission that further negotiations with the railroad company would be of no avail, whereupon the Commission unanimously approved the Engineer's recommendation.

The Commission had under discussion two easement agreements submitted by the Union Pacific Railroad Company concerning two properties located at the east end of the Steel Bridge, Portland, one of which is wholly owned by the Union Pacific Railroad Company and the other of which is owned jointly by the Union Pacific and the Southern Pacific Railroad Companies. The Engineer pointed out that the agreements, as prepared, call for payment of $1,258 for the use of the property which is owned wholly by the Union Pacific Railroad Company, and payment of $2,610 for the use of the property which is owned jointly by the two companies. He said that there is ample justification for payment of the charge for use of the property that is owned solely by the Union Pacific Company, as this is property which is not being used as railroad right of way. But the situation is different with respect to the other property, which was acquired by both companies as right of way for the railroad bridge, the case being exactly parallel with one on the west bank of the river where railroad property is being used without any particular easement agreement and without payment to the companies for the use of the railroad right of way. He recommended payment of the sum of $1,258 for the use of the property owned solely by the Union Pacific Railroad Company, and approval of the agreement covering that property, but requested instructions from the Commission with respect to the other. The Commission unanimously approved the arrangement as recommended with respect to the property

owned solely by the Union Pacific Railroad Company, and instructed the Chief Counsel to negotiate further with both companies with respect to the elimination of the charge for the use of the property owned jointly by both.

The meeting adjourned for luncheon at 12:00 noon and reconvened at 1:30 p.m. with the same persons present and participating.

The Engineer reported the necessity to remodel Mack's store building in connection with the highway improvement at the east end of the Steel Bridge, Portland. The work involved, he said, consists of cutting off the front of this building and redesigning it. He suggested that because of the importance of the project a competent architect be employed to handle the design so that the work can be advertised for bids to be received at the meeting in July. The Commission unanimously approved the suggestion and so ordered.

In this connection the Engineer also recommended the employment of an architect to prepare designs and specifications for construction of buildings in state parks, et cetera. He mentioned the name of an architect in Salem, Mr. James L. Payne, who he said has stated a willingness to do this work for 3½% of the cost of the project, based on the low bid which is received and accepted as the result of advertising, with the understanding that he would expect payment at the rate of $3.50 per hour for his services for any revision after the plans are completed. The Commission approved the recommendation and authorized the Engineer to employ Mr. Payne to do this work subject to the condition that he be paid a flat sum for his services up to the point of approval of the plans, rather than on a percentage basis.

The Commission discussed a letter from Mr. John M. Coke, Attorney for the Glens Falls Indemnity Company, surety on the bond furnished by Albert W. Denton, dba Denton Construction Company, in connection with the contract awarded to Mr. Denton for the construction of the Gardiner Section of the Oregon Coast Highway, State Highway Contract No. 2944. Mr. Coke recites the history of this project which the Glens Falls Indemnity Company was forced to take over and complete, and requests relief from the payment of $3,665.68 which has been charged the contractor as a penalty for failure to complete the project within the specified time limit. The Engineer read aloud Mr. Coke's letter and he also read aloud a report from Construction Engineer H. G. Smith, who points out that the state's costs for engineering supervision were greatly increased by failure of the contractor to carry on the work properly, and who recommends that the amount of the penalty be collected from the contractor's bond. The Engineer declared that the state's claim is a legitimate one and in his estimation is very reasonable. He recommended that Mr. Coke's request be denied. The Commission approved the recommendation unanimously and ordered that Mr. Coke be informed accordingly.

The Engineer requested approval of allotment increases for the following construction projects, which are scheduled for contracting at the next regular meeting of the Commission:

PROJECT		PRESENT ALLOTMENT	REQUIRED ALLOTMENT
Little Nestucca River Bridge (Yach Bridge)	'48 Maj. Bett.	$ 30,000	$ 55,000
Joseph Section	'50 Maj. Bett.	25,000	30,000
North Yamhill River (Carlton) Bridge	'50-'51 FAS	75,000	119,000
Salisbury-Mill Gulch	'50-'51 FAS	200,000	253,000
Drake Creek-Adel	'50-'51 FAS	200,000	or (231,000 (291,000

The Engineer explained that the present estimated cost of the Little Nestucca River Bridge is $25,000 more than that originally estimated so an increased allotment in that amount is necessary, and for a similar reason it has been necessary to increase the allotment for the Joseph Section from $25,000 to $30,000. With respect to the North Yamhill River Bridge the Engineer advised that this bridge is on a county road which has been designated a Federal Aid Secondary Highway, and that it was originally estimated to cost $75,000 but the current estimate indicates that the work cannot be done for less that $119,000, an increase of $44,000. Concerning the Salisbury-Mill Gulch Project, for which an increased allotment of $53,000 is requested, the Engineer stated that the extra expense is required to provide a facility that meets present-day standards. The increase requested for the Drake Creek-Adel Section, he said, is required for similar reasons, the $231,000 allotment being based on constructing a six-inch rock base and a O-9 oil surface, whereas the $291,000 figure is for a ten-inch rock base and a O-11 oil surface. As a result of discussion, the Commission unanimously approved the increases requested for the Little Nestucca River Bridge Project, the Joseph Project, and the Salisbury-Mill Gulch Project, but deferred final action on the remaining two projects. The Engineer was instructed to ascertain from the county court of Yamhill County whether or not the county will contribute county funds to pay the $44,000 increase. The Commission decided to inspect the Drake Creek-Adel Section personally, in company with the Engineer, before taking definite action on the allotment increase proposed for that project.

The Secretary presented a letter from Mr. William R. Manion, President, Oregon Coast Association, Tillamook, in which Mr. Manion advises that it is the recommendation of the Executive Board of the Association that Mr. Verne H. Tinnerstet, Manager of the Association, be appointed a member of the Highway Commission's Travel Advisory Board replacing Mr. Arch B. Sanders, Coos Bay, former manager of the Association. He was instructed by the Commission to refer this matter to the Travel Advisory Board for recommendation.

A delegation representing the Condon Commercial Club and headed by Hon. Steward Hardie, State Senator, appeared before the Commission in the interests of the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway.

Others in the group were: Messrs. Frank Mercer and Charles Quinn, members of the Road Committee; R. W. Potter, Carrol Barker and Bob Patching, farmers, all of Condon. Other members of the group were County Judge C. A. Tom, Sherman County; County Judge J. A. Burns, Gilliam County; and County Judge W. R. Webber, Wasco County; together with F. M. Sexton of the Chamber of Commerce, and George Kaseburg, farmer, both of The Dalles. Senator Hardie stated that their visit was prompted by a letter received from the State Highway Engineer to the effect that the Highway Commission plans to spend $75,000 for grading and gravelling the existing dirt road from the head of Cottonwood grade toward Condon. Such an improvement, he said, while appreciated, will not satisfy local people, who much prefer that the Commission spend its money for construction on permanent alignment. He urged the Commission to spend the $75,000 on new alignment as far as it will go, starting at either end, and advised that such an improvement is endorsed by adjacent counties. Judge Webber stated that Wasco County wants this road improved as a permanent proposition. He alleged that all counties concerned prefer such improvement. Judge Burns declared himself similarly, as did also Judge Tom. Judge Tom also urged construction of the 4½ mile section between US30 and the town of Wasco. He said that this section is badly in need of improvement, particularly several bridges thereon, one of which is in the town of Wasco, and that the county is absolutely unable to finance the work.

Chairman Chandler advised that the Commission personally inspected this road a short time ago, so noted its condition firsthand. The Commission, he said, gathered the impression from previous delegations that what was wanted was improvement of the existing road for year-round travel, so the Commission approved the expenditure on such basis. The Commission also plans, he said, to provide for the improvement of the Canyon Section in its next two-year program, and for improvement of a 1¼ mile section on the west side of the John Day River next year. He pointed out that it would take several years to complete the entire improvement, which is quite costly, considering the small volume of traffic which uses it. The Highway Commission, he said, cannot make a definite commitment for the present, and does not want to commit future Highway Commissions to the improvement of this road. Commissioner Reynolds pointed out that construction of a new road is estimated to cost more than $1,000,000, which is a lot of money for the amount of traffic that will use it. Judge Burns again urged the expenditure of the available funds for new construction on permanent alignment rather than for repairing the old road. He alleged that their project was one time promised by a former Highway Commission. He also stated that traffic counts that have been taken on the road do not disclose the true picture because of the condition of the road when the counts were taken. Chairman Chandler concluded the conference by stating that the Commission will take the group's request under advisement.

Mr. J. R. Pierson, Eugene, was present and asked the Commission to authorize certain changes at the intersection of Agate Street and Franklin Boulevard (Pacific Highway) in Eugene that will allow eastbound vehicles to make a U-turn and proceed westerly on the north side of the highway. He advised that considerable traffic wants to make a U-turn at this intersection, but cannot do so under present conditions, so are obliged to travel about three blocks further east before a turning point is available, and the result is that traffic is encouraged to make the turn at Agate Street, against the

traffic lights. The Engineer advised that this matter has been investigated and it has been determined that the condition referred to by Mr. Pierson is substantially correct. A U-turn at the Agate Street intersection, he said, is not a desirable move, but it can be accomplished without any material hazard if properly arranged. He estimated the cost, which involves the cutting of a medial island and the constructing of a left-turn lane, at about $2,425, and he recommended that the work be done if the property owners who desire the opening will pay the entire cost. Mr. Pierson stated that he would ascertain the attitude of the local group that he represents, but he doubted very much that they would assume an obligation of $2,425.

County Judge C. A. Tom, Sherman County, reappeared before the Commission and urged the improvement of the connection between the old Columbia River Highway and the new Columbia River Highway in the town of Rufus. He said that the grade of the new highway is about 3½ feet lower than the old highway, and because of a 90° angle turn which has resulted at this intersection, numerous accidents occur. He asked that the highway frontage at this point be restored to at least as good condition as it was before the new highway was built. Judge Tom also complained of the appearance of the highway maintenance premises in the town of Rufus, which, he said, are in a deplorable condition. He asked the Commission to order a clean-up of these premises. He was assured by Chairman Chandler that both matters would be investigated and that appropriate action would be taken. The matter was thereupon referred to the Engineer for investigation and report.

The Commission discussed with the Engineer the bids received at the morning session for highway construction, and at 3:00 p.m. Chairman Chandler publicly announced the Commission's decision with respect to each project, as follows, the action of the Commission being by unanimous vote:

"Construction of the bridge over Powder River on the Sumpter Valley Highway, Baker County. The Commission received six bids for this work, the low one being that of Meade & Hobson, Grants Pass, at $11,539. The Commission has accepted the bid, and has awarded the contract to Meade & Hobson at their bid price.

"Paving the Alsea-Alder Creek Section of the Alsea Highway, Benton County. The Central Heating Company, Eugene, submitted the low bid for this work at $154,589.50. There were seven higher bids. The contract has been awarded to the low bidder, The Central Heating Company, at its bid price.

"Grading and paving the Brookings-California State Line Section of the Oregon Coast Highway, Curry County. Parker-Schram Company, Portland, submitted the low bid for this job at $243,894.50. There were six higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Parker-Schram Company, when certain conditions have been satisfied.

"Grading and paving the Myrtle Creek (Oak Street) Section in the town of Myrtle Creek, Douglas County. The Commission received only one bid for this work, it being that of Roseburg Paving Company, Roseburg,

at $15,862. The Commission has awarded the contract to the Roseburg Paving Company at its bid price.

"Oiling on the Heppner Junction-Jordon and Ione Sections of the Heppner Highway in Gilliam and Morrow Counties. The low bid for this work was submitted by J. C. Compton Company, McMinnville, at $27,385. There were eight higher bids. The Commission has awarded the contract to J. C. Compton Company, the low bidder, at their bid price.

"Recoiling on the Morrow County Line-Condon-Service Creek Section of the Wasco-Heppner and John Day Highways in Gilliam and Wheeler Counties. The Commission received eight bids for this work, the low one being that of D-H Paving Company, Vancouver, Washington, at $44,920. The contract has been awarded to D-H Paving Company at its bid price.

"Grading, surfacing and construction of bituminous macadam on the Phoenix ("C" Street) Section in the town of Phoenix, Jackson County. The Commission received only one bid for this work, being that of Osborn Construction Co., Medford, at $12,265.40. The contract has been awarded to the Osborn Construction Co. at its bid price.

"Roadbed widening, construction of rock base and pavement on the Cave Junction-California State Line Section of the Redwood Highway, Josephine County. The low bid for this work was submitted by J. C. Compton Co., McMinnville, at $239,859.50. There were eight higher bids. The contract has been awarded to the low bidder, J. C. Compton Co., at its bid price.

"Hampton-Gap Ranch Rock Production Project on the Central Oregon Highway in Lake, Harney and Deschutes Counties. Seven bids were submitted for this work, the low one being that of Grover C. Pomeroy & C. R. Badger, Salem, at $22,680. The contract has been awarded to Messrs. Pomeroy & Badger at their bid price.

"Construction of a latrine in Neptune State Park at Cummings Creek, south of Yachats on the Oregon Coast Highway, Lane County. The Commission received two bids for this work, both of which are considered too high and have been rejected.

"Construction of five piers for the Marion Street Bridge over the Willamette River at Salem, Marion and Polk Counties. State Construction Company, Seattle, submitted the low bid for this work at $228,282. Lee Hoffman, Portland, submitted the next low bid at $246,570. There was one higher bid. The Commission has awarded this contract to the second low bidder, Lee Hoffman, at his bid price of $246,570.

"Construction of a reinforced concrete slab bridge over Willow Creek on the Imbler-Dry Creek County Road, Union County. Valley Construction Co., Portland, submitted the low bid at $13,825. Geo. E. Berry, Beaverton, submitted the only other bid at $16,745. The Commission has awarded the contract to the low bidder, Valley Construction Company at its bid price.

"Construction of a frame storage building at the highway shops in La Grande, Union County. The low bid for this work was submitted by Bechtel Bros., Elgin, at $2,640. There were two higher bids. The contract has been awarded to Bechtel Bros. at their bid price.

"Grading, surfacing, oiling, and the construction of a bridge on the South Unit, Joseph-Wallowa Lake Section of the Joseph-Wallowa Lake Highway in Wallowa County. Durbin Bros., Eugene, submitted the low bid for this work at $111,283.50. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Durbin Bros., when certain conditions have been satisfied.

"Construction of a frame storage building at the highway maintenance station in The Dalles, Wasco County. Mid-State Construction Co., The Dalles, was the low bidder for this work at $4,120. Bemis & Co., Portland, submitted the next low and only other bid at $4,459.70. The contract has been awarded to the low bidder, Mid-State Construction Company, at its bid price.

"Paving the Hillsboro (North 10th Avenue) Section in the City of Hillsboro, Washington County. The low bid for this work was submitted by Parker-Schram Co., Portland, at $14,584. Cascade Construction Co., Portland, submitted the only other bid at $14,630. The Commission has awarded the contract to the low bidder, Parker-Schram Co., at its bid price."

The Chief Counsel requested authority to advertise for bids for the sale of a 22-acre tract of land that was acquired from Mr. Herman B. Jacobs in connection with a right of way settlement on the Tillamook-Pleasant Valley Section of the Oregon Coast Highway, Tillamook County. He explained that in negotiating with Mr. Jacobs it was found to be in the state's best interest to acquire considerably more acreage than was absolutely needed for right of way, and an offer has been received to purchase the excess area. He further stated that the property is appraised at $15,665, and that because the appraised value is more than $1,000 it is necessary to formally advertise the property for sale. The appraised value, he said, is somewhat less than the actual value of the property, but that is due to the fact that the owner will have no access to the highway. He also suggested that the property be paid for either in cash or in five equal annual payments. The Commission unanimously approved the request by the adoption of the attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from the Hon. B. J. Spencer, Mayor of the City of Garibaldi, reiterating the city's request for the improvement this year of the Oregon Coast Highway through Garibaldi. The Engineer recalled that a group of citizens from Garibaldi appeared before the Commission at the previous meeting and requested the widening of the highway through their town, and that the Commission ordered an investigation and survey. Such survey has been made, he said, and it has been determined that the improvement will cost about $60,000. He also said that the highway through Garibaldi is in very poor

condition at this time and he recommended in view thereof that the Commission authorize the improvement to be paid for with state funds so that bids for the work can be received at the next meeting of the Commission, provided the city will adopt necessary ordinances prohibiting the parking of vehicles on the highway. The Commission unanimously approved the recommendation.

The Commission confirmed arrangements heretofore effected with the California-Oregon Power Company for the re-establishment of its power poles along the Barkley Springs-Algoma Section of The Dalles-California Highway. (See copy of previously executed agreement in Miscellaneous Contracts and Agreements File No. 1204 for details.)

The Commission had under consideration a proposed agreement with the Spokane, Portland and Seattle Railroad Company covering a revision in the Sherars Section of Sherars Bridge Secondary Highway to accommodate the tracks of the Oregon Trunk Railway in Deschutes Canyon. The Engineer advised that subsequent to the construction of the railroad, the road down the canyon was taken over by the county, but apparently in the meantime the road had been moved out so that it occupied a narrow shelf between the Deschutes River and the railroad company's fill, and when the road was widened and reconstructed as a state highway in 1946, nearly all of this shelf was occupied. Thereafter the railroad company decided to fill in one of its trestles and found that the slopes would cover a considerable portion of the highway roadbed, which the railroad company alleges encroaches upon railroad property. The Engineer further advised that the railroad company insisted that the state pay for retaining walls to keep the fill off the highway, which work was estimated to cost about $20,000, but it was determined by surveys that desired results could be obtained by shifting the highway somewhat toward the river, which would cost only about $2,500. Thereupon, a tentative agreement was reached with the railroad company whereby the state would do its own widening and the railroad company would build its retaining walls, which are estimated to cost about $7,000. He recommended settlement with the railroad company on such basis, on the condition that the railroad company will assume full responsibility for construction of its retaining walls. The Commission approved the recommendation unanimously.

The Engineer reported that the Bureau of Public Roads has approved the designation of the Powell Butte State Secondary Highway No. 371 as a Federal Aid Secondary Highway throughout its entire length. He asked the Commission to confirm the designation for the official record. The Commission approved the request unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from the Oregon Coast Association urgently requesting the improvement of the road which extends from Dolph to Hemlock in Tillamook County, via the Little Nestucca River, Pacific City and Sand Lake. The Engineer recalled that requests for this improvement have been before the Commission on several occasions in the past and each time the Commission has denied them. The Commission unanimously confirmed its previous action.

The Commission discussed a comprehensive report from the Engineer on the necessity to construct an adequate equipment storage headquarters at Government Camp, suitable to accommodate the personnel and equipment necessary to maintain the summit section of the Wapinitia Highway, the Mt. Hood Highway and the Timberline Lodge Highway which is scheduled for completion this year. In his report the Engineer pointed out the inadequacies of the present storage facilities located on two small lots in the center of Government Camp, and the impossibility to extend or expand these facilities because of the development of the surrounding property. He estimated the cost of providing new headquarters at approximately $192,940, and he recommended approval of the overall plan and the allocation of $40,000 to finance construction contemplated in 1950, if the Commission cannot see its way clear to authorize funds for the entire project. The matter was given very careful consideration by the Commission, during which the feeling was expressed that inasmuch as the facilities are required to maintain the highways satisfactorily in this district, there is no good reason why they should not be provided at once rather than piece-meal over a period of years. Accordingly, the Engineer was authorized by a unanimous vote of the Commission to proceed at once with the construction of all the facilities outlined in his report. (For details see copy of Engineer's report to the Commission dated May 15, 1950, in general files.)

The Commission discussed a request from the City of Eastside, Coos County, for the installation of lights on that section of the Coos River Secondary Highway which extends from the east end of the Isthmus Slough Bridge to the south city limits of Eastside. The Commission denied the request as a matter of policy.

The Commission discussed briefly, and referred to the Engineer for investigation and report, a request from the City of Rockaway for the installation of a "stop light" on the Oregon Coast Highway at its intersection with the main street that leads to the ocean beach at this place.

A letter was presented from Mr. L. P. Hopkins, Superintendent, Southern Pacific Company, reviewing a previous request for the installation of signals at the grade crossing of the Southern Pacific Company's railroad tracks and the Springfield-Creswell Secondary Highway, about one-half mile south of the McKenzie Highway, Lane County. The Engineer estimated the cost of the installation at $4,808, and advised that the company has stated a willingness to pay fifty percent of this cost if the state will pay the balance; moreover, the company will make the installation and will bear the maintenance and operating cost thereafter. He recommended approval of the project on such basis. The Commission approved the recommendation.

A petition was presented from residents on the Fox Hollow Secondary Highway south of Eugene, in which request is made for paving on this highway between Eugene and North Spencer County Road. The Commission deferred a decision in the matter pending inspection of the road on its next trip through the Eugene district. The Secretary was instructed to include this project in the list of unfinished business.

The Engineer reported a total of $1,070,000 unallocated funds remaining in the 1950-51 Federal Aid Account, which amount consists partially of

funds that were never programmed by the Commission and partially of savings that have accrued by reason of contracting work for amounts less than had been allotted to them. He recommended the immediate programming of additional work in an amount sufficient not only to take up the $1,070,000, but also to allow some latitude for underruns on contracts remaining to be contracted, and also for further prospective underruns on projects already contracted. He gave as his opinion that projects totaling $1,500,000 should be approved at this time, so as to avoid the necessity to select additional projects later on, and that this amount should be divided thus: $1,250,000 for Primary Federal Aid Projects, and $250,000 for Secondary Federal Aid Projects. He suggested the following projects:

Primary Federal Aid

Hood River-Mosier Section of Columbia River Highway in Hood River and Wasco Counties. 7 miles of grading	$ 1,250,000

Secondary Federal Aid

Dolph Corner-Buell Section of the Dallas-Coast Highway in Polk County. 10.0 miles of asphaltic concrete resurfacing	150,000
Yamhill River-Dayton Section of the Three Mile Lane Highway in Yamhill County. 6.0 miles of asphaltic concrete resurfacing	100,000

The Commission unanimously approved the Engineer's recommendation and the projects suggested by him to take up the funds available.

The Engineer requested authority to advertise for bids for the construction of an extension to the shop building at the highway division headquarters in La Grande. He estimated the cost of such extension at $50,000 and advised that provision for it is contained in the 1950 budget heretofore approved by the Commission as to principal. This extension consists of a small office addition on the east end of the present shop, four additional 24-foot bays on the west end of the building, and the readjustment of an open storage building immediately west of the shop building. The Commission unanimously approved the request.

The Engineer reported that the cities of Phoenix and Shaniko have fulfilled the legal requirements with respect to the expenditure of State Tax Street Funds that accrued to them during the first six months of 1949, and that the plans for the projects which they propose to finance with these funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "E-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the following cities and towns have fulfilled the legal requirements with respect to the expenditure of

State Tax Street Funds that accrued to them during the second six months' period of 1949:

Bay City	Empire	Manzanita	Shaniko
Canyon City	Gearhart	Maupin	Sherwood
Columbia City	Gold Beach	Oakridge	Summerville
Cornelius	Gold Hill	Port Orford	Turner
Dayville	Imbler	Richland	Waldport
Dundee	Ione	Rogue River	Yamhill

He said that the plans for the projects proposed to be financed with such funds have been examined and found satisfactory, and he recommended approval of the plans by the Commission. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "E-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a written report from the Engineer dated May 2, 1950, regarding the utilization of materials that have been dredged from the Willamette River channel by U. S. Army Engineers at Salem, for construction of an embankment for the west approach to the new Willamette River Bridge at Salem. According to the report, the Army Engineers are now piling up about 30,000 cubic yards of gravel along the river bank upstream from the existing Center Street Bridge, and close to the area which the new bridge approach embankment will occupy. It appears that the material is not in the exact position for use in the highway embankment, but will require only a short haul to be placed there, which the Engineer estimates will cost about 50¢ per yard, about one-half the amount that it would cost were the embankment constructed of borrow materials. The Engineer points out that if this material can be moved before August the Army Engineers can then deposit additional materials in their second dredging operation, but they cannot do so unless the first pile of material is taken away. The Engineer recommended that, if the Commission sees fit to take advantage of this material and the savings that will accrue, he be authorized to advertise for bids to be received at the July meeting of the Commission for the moving of this material. He estimated the total cost involved to secure 50,000 cubic yards of material at $25,000. The Commission unanimously approved the recommendation.

Consideration was given by the Commission to a request from the City of Empire for the widening and paving of the Cape Arago Secondary Highway between Market Street and Commercial Street in the town of Empire. The Engineer advised that investigation reveals that the city has constructed concrete sidewalks, curbs and a storm sewer, the curbs being 56 feet apart, whereas the present highway pavement is only 30 feet wide. Moreover, the city has also graded the shoulders and constructed a six-inch compacted base thereon. He estimated the cost to complete the work, which consists of three inches of asphaltic concrete pavement, at $10,500, and recommended approval of the project for state funds, bids to be received at the July meeting of the Commission. The Commission approved the recommendation.

The Commission discussed a request from the Engineer for authority to conduct surveys for primary and secondary highway projects listed in the

Engineer's letter to the Commission dated May 18, 1950. As the result of discussion, the Commission unanimously authorized the undertaking of surveys for projects located on the Pacific Highway (US99), but deferred a decision with respect to the remaining surveys for further study and action at its next meeting. The surveys authorized by the Commission at this time are as follows:

Section of Pacific Highway	Miles in Length	Estimated Cost	Estimated Cost of Survey
White School-Brooks	14.0	$ 1,400,000	$ 40,000
Salem-Brooks	6.0	600,000	15,000
Salem Bypass (Four Corners-Pacific Highway)	5.75	910,000	15,000
Harrisburg-Junction City	5.0	1,350,000	10,000
Canyonville-Tri City	6.0	600,000	9,000
Eugene-Anlauf (Reconnaissance)	30.0		7,000

The Engineer reported that the survey for the relocation of the Siletz-Logsden Section of the Logsden County Road in Lincoln County has been completed. He presented a map showing the proposed alignment and explained details. He requested approval of the survey so that the grading and surfacing improvement on the four-mile section of the location, for which $100,000 of 1950-51 Federal Aid Funds have been allocated, can go forward. After careful consideration, the Commission unanimously approved the location as recommended by the Engineer, and authorized the Engineer to advertise the project for bids to be received in the immediate future. The attached resolution relative thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Commission discussed a request from the City of Hillsboro for a survey to determine the most practical and feasible routes for one-way traffic through their city, and to determine the costs for right of way, construction, et cetera. The Engineer advised that the city is greatly concerned over the increasing traffic problem on Baseline Street, route of the Tualatin Valley Highway, and is contemplating establishment of a system of one-way streets which will include the route of the Tualatin Valley Highway. The Traffic Engineer, he said, has investigated conditions, which indicate that something should be done to relieve the traffic problem. He estimated the cost of the traffic engineering study requested by the city at $500 and recommended approval of the expenditure. The Commission approved the recommendation unanimously.

The Engineer reported that the grading of the Nehalem Hill Project on the Oregon Coast Highway just west of the town of Nehalem, which work it is contemplated to contract at the July meeting of the Commission, will disturb about 1,000 feet of four-inch water main belonging to the City of Nehalem, and that the city is asking the state to pay the cost of re-arranging and rebuilding this pipeline, which is estimated to cost $807. He gave as his feeling that this is a legitimate claim and recommended that the city be reimbursed for the

full amount of its expenditure in connection with these alterations when the work has been completed. The Commission approved the recommendation.

The Engineer reported that pursuant to authority previously granted him by the Commission, he has awarded contracts as follows, and requested confirmation thereof:

> Construction of the Crook County Line-Bend Airport Section of the Powell Butte Secondary Highway, Deschutes County, bids received April 24, contract awarded May 17 to F. L. Somers, low bidder.
>
> Construction of piers for proposed bridge over Willamette River, Marion Street, Salem; bids received April 24, contract awarded May 5 to State Construction Co., low bidder.

The Commission unanimously approved the awards as reported.

In connection with its consideration of the award of the contract for the construction of piers for the Willamette River Bridge at Salem, the Commission ordered, inasmuch as the State Construction Co. has refused to accept the award, that the amount of the bid bond be collected. The matter was referred to the Chief Counsel to handle details.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction:

1. D. W. Voreis, Contract No. 3230, for boat channel and clearing work in Wallowa Lake State Park, Wallowa County, requested an extension of time of thirty days from December 31, 1949 to January 31, 1950, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions and injury to his dragline operator, which necessitated training of a new man to replace him. The Engineer advised that the reasons given by Mr. Voreis for overrunning the time limit are correct. The delay, he said, has caused no interference with the traveling public and has not increased the cost to the state for engineering supervision. He recommended, in view thereof, that the extension of time as requested be approved without penalty. The Commission approved the recommendation.

2. Trowbridge & Flynn Electric Company, Contract No. 3226, for installation of traffic signals in Roseburg, requested an extension of time of twenty-five days from March 31, 1950 to April 25, 1950, within which to complete this job. They stated that all signals were completed as of March 15, but during final inspection the control for a blinker light proved to be defective, which necessitated ordering a new one, and resulted in an overrun of the specified time limit. The Engineer stated that the reason given by the contractor for overrunning the time limit is correct. He recommended that the extension of time as requested be granted without penalty because the delay has caused no extra expense to the state for engineering supervision. The Commission approved the recommendation.

3. Trowbridge & Flynn Electric Company, Contract No. 3215, for installation of traffic signals in Medford, requested an extension of time of 21 days from March 31 to April 21, 1950, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to the fact that the manufacturer of pole hands for "walk-wait" signals, delivered the wrong equipment and the proper set did not arrive until April 4th. The Engineer advised that the completion of this contract was delayed for reasons stated by the contractor. He further stated that the state has incurred no extra engineering expense thereby, and he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

4. City Electric, Inc., Contract No. 3219 for installation of traffic signals in Cottage Grove, requested an extension of time of 18 days from March 31, 1950 to April 17, 1950, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays in delivery of materials needed for the work. The Engineer advised that the additional time was necessary because of delays incurred in the delivery of materials from the manufacturer and is in no way the fault of the contractor. He recommended in view thereof, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

5. Homer G. Johnson, Contract No. 3121 for rock production on the Rainrock-Alderwood Park Section of the Siuslaw and Alsea-Deadwood Secondary Highways, Lane County, requested an additional extension of time of 90 days, from January 30, 1950 to May 1, 1950, within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to adverse weather conditions. The Engineer advised that the contractor was unable to operate during the extremely bad weather between December 20, 1949 and February 5, 1950, and that the highway was saved from considerable damage by virtue of the contractor's not being able to haul over the highway during that period. The public, he said, has not been inconvenienced by the delay, in view of which he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

6. City Electric, Inc., Contract No. 3209, for installation of traffic signals at Main and Esplanade Streets in Klamath Falls, requested an additional extension of time of 25 days, from April 15 to May 10, 1950, within which to complete this job. They alleged that the additional time is required because of the failure of their painting contractor to paint the poles as instructed, notwithstanding he was repeatedly told to do it. The Engineer advised that all work in connection with this job was completed prior to April 15, except for the painting of the poles. He said that the state has incurred no extra engineering expense because of this delay and he recommended that the additional extension of time as requested be granted without penalty. The Commission approved the recommendation.

(The Commission in discussing the requests for extensions of time as listed above considered but did not necessarily adopt the recommendations

of the Engineer and/or the reasons given by the contractors for failure to complete their projects within the specified time limits.)

The Engineer reported that Contracts Nos. 3123, 3215, 3219, 3226, 3230 and 3263, have been completed according to the requirements of the contracts or modifications thereof, and that said projects are now ready for acceptance. After due consideration the Commission by unanimous vote accepted said contracts by adopting the attached resolution relative thereto, marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Consideration was given by the Commission to the record of violations committed by George Bristol Eddy, log hauler, Springfield, Oregon, in connection with the truck-hauling of logs over state highways in Lane County. The Engineer submitted a written report on the subject, dated May 18, 1950, in which he pointed out that a large percentage of the loads hauled by Mr. Eddy and his drivers during the period 1945-1950, weighed in excess of the requirements, thus placing him in a very low classification. It appears that Mr. Eddy has been warned on a number of occasions that his record would be brought to the attention of the State Highway Commission unless he corrected his ways, and that very likely the Commission would cancel his permit, but such warnings have proven of no avail. Moreover, Mr. Eddy has been guilty of by-passing scales and of "laying out" in order to avoid having his equipment weighed by state weighmasters. The Engineer recommended that Mr. Eddy's permit be suspended for a period of not less than thirty days, and that it not be reinstated at the end of that period unless he submits to the Commission a written statement to the effect that hereafter he will comply with the rules and regulations governing his operations, particularly with respect to weights and dimensions of his loads, and that he will also readily submit his loads to weighing when requested to do so by weighmasters. As a result of careful consideration, the Commission unanimously approved the recommendation with the understanding that Mr. Eddy's permit will be cancelled on a permanent basis for a further violation, in the event the Commission has seen fit to reinstate his permit after the thirty-day period expires. The Secretary was instructed to convey to the Public Utilities Commissioner a recommendation in conformity with the action taken.

In this connection, the Assistant State Highway Engineer, Mr. W. W. Stiffler, reported three cases of overloading of logging trucks in Curry County. He said that the operators were cited to Justice Court but pleaded "not guilty," and it appears that the Justice of the Peace will not prosecute them. The Commission referred the matter to the Chief Counsel to consult with the District Attorney of Curry County in an endeavor to correct the shortcomings of the Justice. The Commission also ordered the cancellation of the P.U.C. plates of these three operators in the event they are again apprehended for violation of the rules.

The Engineer reported that since the last meeting of the Commission he has ordered the lifting of reduced load limit signs heretofore posted on certain sections of highways, because conditions which necessitated the restriction of the weight of loads no longer obtain. He presented a list of highway sections affected, as follows, and asked the Commission to confirm his action in restoring the maximum load limit thereto:

Highways Listed in Resolutions of December 19, 1949

Name of Highway	and No.	County	Section of Highway (by mile point)	Date Lifted 1950
Alsea	27	Lincoln	14.63 to 18.53 (Resolution #15)	May 26
Warm Springs	53	Wasco	0.00 to 13.20 (Resolution #16)	June 1

Highways Listed in Resolution of February 6, 1950

Alsea	27	Lincoln	12.22 to 18.53	May 26
Crater Lake	22	Jackson & Klamath	54.60 to 69.70	May 11
Monmouth	194	Polk	Entire Length	April 30
Little Butte	270	Jackson	14.15 to 30.33	May 11

Highways Listed in Resolution of March 21, 1950

Little Sheep Creek	350	Wallowa	0.00 to 8.00	April 28
Warm Springs	53	Wasco	0.00 to 11.30	June 1
Warm Springs	53	Wasco & Jefferson	13.70 to 25.30	June 1

Highways Listed in Resolution of April 25, 1950

John Day	5	Grant & Baker	176.00 to 207.00	May 7

Highways Listed in Resolution of April 3, 1950

Warm Springs	53	Jefferson	28.00 to 30.00	April 10
Warm Springs	53	Jefferson	25.30 to 28.00	June 1

The Commission unanimously approved the Engineer's action by the adoption of the attached resolution relative thereto, marked EXHIBIT "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that pursuant to authority heretofore granted him by the Commission, he has changed the classification of the following highways from Group II Highway to Group I Highway status, observation of test and trial runs having revealed that it is possible to operate over them, with safety, vehicle combinations 60 feet overall in length:

Madras-Prineville Secondary Highway No. 360, Jefferson and Crook Counties,

Cape Arago Secondary Highway No. 240, Coos County, and

Empire-Coos Bay Secondary Highway No. 243, Coos County.

The Engineer asked the Commission to confirm these reclassifications. The Commission approved the reclassifications as reported, by unanimous vote.

May 26, 1950

The Commission discussed a report from the Engineer dated May 18, 1950, on a request from the Oregon Motor Transport Association for the classification of the Sunset Highway as a Group I Highway, to make this highway eligible by permit from the Highway Commission for loads having weights and dimensions authorized under Chapter 450, Oregon Laws, 1949. The Engineer recalled that restricted loads were ordered by the Commission for this highway between Portland and Davies Overcrossing, because of the weakness of the subgrade, it being the feeling of the Commission when the matter was discussed that the highway should not be subjected to heavy loads for a period of at least a year following final construction of the highway. He said that it is the opinion of Mr. A. G. Skelton, Division Engineer who has charge of this road, that the highway will now accommodate loads authorized under permits for Group I Highways. He expressed his concurrence with Mr. Skelton's opinion and recommended reclassification of the highway for Group I loads. The Commission approved the recommendation.

A letter was presented from the Depoe Bay Chamber of Commerce, recommending to the Commission a location under the north end of the state highway bridge at Depoe Bay as a possible site for public restrooms, and advising that the Depoe Bay Chamber of Commerce at its meeting on April 26, 1950, unanimously adopted a motion to the effect that the Chamber of Commerce will undertake to maintain these restrooms in any manner that the Oregon State Highway Commission desires. They urged the Commission to give this matter its careful and prompt consideration, as the need is most urgent. A letter was also presented from the Booster Club, Depoe Bay, endorsing the request of the Depoe Bay Chamber of Commerce. The Engineer advised that pursuant to previous instructions of the Commission, investigations are underway to determine the cost to provide restroom facilities at this place, and when they are completed he will render a full report to the Commission. The Commission deferred action in the matter pending rendition of the report.

A request was presented from Fort Klamath Grange, Fort Klamath, Oregon, for snow removal on Sun Mountain Secondary Highway as an accommodation to laborers and residents of Fort Klamath and vicinity who are obliged to use this road going to and from their work. The Engineer advised that this highway was opened to travel on May 22nd, after two days of plowing in four feet of snow. The Commission took no action on the matter.

The Engineer requested approval of the following changes in the highway route descriptions for ORE23, ORE50 and ORE52, necessitated by the opening of the Warm Springs Highway for general public use.

ORE23 - Over The Dalles-California Highway from its junction with the Columbia River Highway, US30, approximately 2 miles east of The Dalles southerly via Dufur, Tygh Valley, and Maupin to its junction with the Sherman Highway, US97, at the head of Cow Canyon.

ORE50 - Over the Mt. Hood Highway from its junction with the Pacific Highway West, US99W, in Portland easterly via Powell Boulevard, Gresham, Sandy, and Government Camp to its junction with the Wapinitia Highway approximately 3 miles east of Government Camp; thence southeasterly over the Wapinitia Highway to its junction with the Warm Springs Highway, approximately at Bear Springs; thence southeasterly over the

Warm Springs Highway via Warm Springs Agency to its junction with The Dalles-California Highway, US97, at Madras.

ORE52 - Over the Wapinitia Highway from its junction with the Warm Springs Highway, ORE50, near Bear Springs; easterly to its junction with The Dalles-California Highway, ORE23, approximately 3 miles northeast of Maupin.

The Commission unanimously approved the changes as recommended by the Engineer, by the adoption of the attached resolution relative thereto, marked EXHIBIT "I", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed briefly, and referred to the Memorials Committee of the Oregon Historical Society for recommendation, a request from Mrs. Serena Norton, Portland, for permission to erect on the right of way of the Corvallis-Newport Highway, a marker in memory of her great great grandfather, Nahum Amos King, who was a veteran of the War of 1812 and an Oregon Pioneer of 1845.

The Engineer submitted for the Commission's approval a tabulation showing the details of 518 monthly employees of the State Highway Department who are eligible under the Civil Service rules and regulations for salary step increases on July 1, 1950. He recommended approval of the annual step increases for the employees listed, whose merit ratings are average or above. He estimated the net cost for the balance of the calendar year 1950 at $30,000, which he said was anticipated and included in the approved budget. The Commission approved the recommendation unanimously. (For details see copy of tabulation in general files.)

The Commission discussed a claim presented by W. C. Campbell, McMinnville, for damages in the amount of $50 to his veatch crop, which Mr. Campbell states was injured when a state truck was driven over his field in connection with an investigation of foundation conditions at the Yamhill River Bridge in McMinnville. The Engineer stated that Mr. Campbell was contacted before the trespass on his property occurred, and was told at that time that the state's truck would be brought in over land purchased from him as right of way, but that proved to be impractical, and the truck was driven along the edge of Mr. Campbell's field, causing damage for which he now seeks reimbursement. He recommended payment of the claim. The Commission approved the recommendation.

Consideration was given by the Commission to a request from the School Board of Colton, Oregon, for the painting of a cross walk lane for school children who are obliged to walk across the Woodburn-Estacada Secondary Highway in Colton, and a request for the establishment of a "No Parking" zone along the north side of this highway. The Engineer advised that this matter has been investigated by the Traffic Engineer, and it is his recommendation, based on his report, that a "No Parking" zone be established on the northerly side of the highway from Engineer Station 459+10, where the highway intersects with Wall Street within the town, to a point 150 feet easterly thereof, and that a crosswalk be painted on the pavement, as requested. The Commission

approved the recommendation. The attached resolution, marked EXHIBIT "J", establishing the "No Parking" zone as recommended, which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Engineer reported a request from the Portland Union Stockyards Company that a study be made of traffic congestion which they allege is regularly experienced at the stockyards on Monday of each week, to determine the need for the establishment of a "No Parking" zone to prohibit the parking of vehicles on Swift Secondary Highway adjacent to, and opposite the entrance to the stockyards. The Engineer said that this matter has been investigated by the Traffic Engineer, whose report indicates that the average daily traffic at this point during 1950 is 6,500 motor vehicles. The report also indicates that during the four-year period between 1946 to 1949 inclusive, there were twenty-two accidents on the section investigated, resulting in injury to two persons, but with no fatalities, and that 13 of the vehicles involved were either entering or leaving the highway at this point. The Engineer said that the ultimate solution to this traffic congestion is additional off-street parking, which the company is now studying but probably cannot put into effect for a year or so because the plan contemplates the removal of a number of buildings, including a hotel. He recommended, in the meantime, that curb parking on the southerly side of the highway between M.P. 2.13 and M.P. 2.26 be prohibited and that parking on the highway shoulders be prohibited between M.P. 2.13 and M.P. 2.43. The Commission approved the recommendation as a temporary expedient and authorized the same for one year's duration with the understanding that if there is need to extend the period, the Commission will consider the company's request for such extension. The attached resolution relative thereto, marked EXHIBIT "K", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Commission discussed a letter from Mr. Ralph Walstrom in behalf of numerous residents of the West Highlands District, adjacent to Canyon Road near Sylvan, Portland, requesting that the State Highway Commission assume the maintenance of, and responsibility for, a wooden stairway which provides access from the West Highlands District to a bus stop on the Sunset Highway. The Engineer advised that the stairway is 78 feet long and is in very poor condition, that it was constructed about eight or ten years ago, partly on the highway right of way and partly on property owned by Mr. L. B. Menefee, Jr. On December 2, 1948, he said, the Highway Commission acquired from Mr. Menefee all of the property between the old route of Canyon Road and the original right of way of the present route, so at the present time the entire length of the stairway is on state property. He pointed out the contention of the petitioners that the elimination of the stairway would make it necessary for some thirty to fifty persons from their community to walk about 0.4 mile to reach the present highway. He suggested as a solution for the problem the elimination of the stairway completely, and the rerouting of the Oregon Motor Stage bus line to serve this community over the old highway route with connections to the present highway at the Sylvan intersection and at the Highland Road intersection, and he recommended that the Oregon Motor Stages, Inc. be asked to reroute its buses accordingly by means of petition to the Public Utilities Commission. As

a temporary expedient, he said, signs have been installed at both ends of the stairway reading "Stairway Unsafe - Use At Your Own Risk." As a result of discussion, the Commission approved the Engineer's solution of the problem and instructed him to so inform Mr. Walstrom, and to tell Mr. Walstrom that the Highway Commission will assist in securing the rerouting of the Oregon Motor Stages if the Stage Company will initiate the matter with the Public Utilities Commission.

The Commission unanimously approved the Engineer's request for authority to purchase additional equipment, as follows:

	Estimated Cost
Traffic Engineering equipment	$ 5,780.00
Maintenance Department rental equipment	36,000.00
Testing Laboratory equipment	1,700.00
Office furniture and equipment	1,100.00

(For details see copy of Engineer's report to the State Highway Commission dated May 18, 1950, in general files.)

The Commission also discussed and upon recommendation of the Engineer approved and signed a form of application and contract agreement with the Pacific Power and Light Company pertaining to the furnishing of electrical energy for operation of a flood light on the Oregon Coast Highway at its junction with Roosevelt Drive, just north of the Seaside city limits.

The Engineer presented a form of proposed agreement with Frank W. Bittner and William H. Bittner, Sandy, Oregon, covering removal by the Bittners of earth materials from a location on the Alsea Highway about 7.4 miles east of Waldport. He said that the Bittners want to use these materials to raise the grade of their lumber storage yard adjacent to their mill, near the highway at this location. He explained that the agreement provides that the Bittners may remove these materials from the highway right of way on the condition that theywill conduct their operations in conformity with the provisions of the agreement and will furnish a bond in the amount of $1,000 to insure faithful performance of all of the terms and conditions thereof, and to protect the state against any loss which the state may sustain by reason of these operations. He requested approval of the agreement, which he said has been carefully investigated by the Maintenance Engineer, District Maintenance Superintendent, and Division Engineer, all of whom recommend the granting of the permit. The Commission approved the recommendation unanimously. (The agreement was signed later in the session.)

The Engineer requested authority for Mr. Val Johnson, Traffic Control Engineer, to attend, at state expense, the Twelfth Annual Western Safety Conference which is to be held in Boise, Idaho, June 18 to 21, 1950. He estimated the out-of-state expense at $15.75. The Commission approved the request unanimously.

The Commission had under discussion the setting of dates for its next two regular meetings, and decided unanimously to hold such meetings in

Portland on Monday and Tuesday, July 10 and 11; and on Thursday and Friday, August 17 and 18, 1950. The Secretary was instructed to make the usual arrangements for the use of the Green Room in the Imperial Hotel, Portland.

The Engineer reported that a drive-in theater is being constructed on the north side of Sandy Boulevard (US30) near its intersection with N. E. 92nd Avenue, Portland, and that a request has been made for authority to cut the curb so as to provide public entrance to the premises. The matter has been investigated, he said, and a plan has been devised for the proper handling of traffic. He exhibited a sketch map showing the proposed access treatment which he estimated would cost $6,000, including traffic islands and installation of lights. He recommended approval of the request on the condition that the theater owner will agree to the construction of protective facilities as planned, and will pay the entire cost involved, the work to be done by state forces. The Commission approved the recommendation unanimously and authorized the Engineer to negotiate with the theater owner on such basis.

The Commission discussed a report from the Engineer dated May 22, 1950, on the subject of truck scales installations. The report reveals that there are 53 existing truck scales on the state highway system, some of which were installed in 1930 and do not now adequately serve present-day requirements. The Engineer presented a map showing locations of pit scales and loadometer stations as presently installed, and showing also proposed new locations for seven existing truck scales, and for eleven new scales. He estimated the total capital outlay to provide a system of scales as indicated on the map at $67,500, and the extra expense this year for twelve additional weighmasters is $22,500, making a total estimated cost of the entire setup this year approximately $90,000. The matter was given very careful consideration by the Commission, and as a result thereof the Commission unanimously approved the overall project as outlined by the Engineer, it appearing to the Commission that the changes and additions contemplated therein are necessary to expedite the weighing of vehicles, and to curb the overloading of trucks, which under present conditions is seriously damaging highway surfaces.

The Commission discussed a request from Mr. H. J. Andrews, Regional Forester, U. S. Forest Service, for a contribution of $1,500 to pay the cost of providing additional fire control protection along the Columbia River Highway where highway construction is underway between Dodson and Bonneville. It appears that the headquarters for the fire-fighting equipment is located about two miles east of Cascade Locks and that the Forest Service standards require that equipment dispatched from this headquarters shall reach any fire near the highway within one-half hour, which schedule is upset by reason of temporary road blocks on the section of highway that is under construction. To handle this situation the Forest Service plans to augment its protection force by basing one man with suitable equipment on the west side of the highway construction which it is estimated will cost about $1,500. The Engineer questioned the justification for the expenditure. Action on the matter was deferred by the Commission until its next meeting.

The Engineer requested authority for expenditure of about $16,000 to finance placement of an asphaltic concrete surfacing on certain city streets in Portland where streetcar tracks are being eliminated. He explained that

since all streetcars in Portland have been replaced with either electric or gas buses, the Portland Traction Company has been required by the city to cover up its tracks, which work is being performed by the city at the expense of the traction company. The obligation of the company, he said, stops abruptly two feet outside of each rail and the reconditioning work beyond that point is the obligation of the state where the work is done on a state highway route. There are five city streets in this category, he said, and the cost to recondition them is estimated at $16,000. He recommended that the city be reimbursed in such amount when the work is completed. The Commission approved the recommendation unanimously.

The Engineer presented a letter from the Bureau of Public Roads requesting the Commission's approval of the reclassification of highways which comprise the Forest Highway System. He explained that such reclassification is of no particular interest to the state because no change is made either in the mileage, termini or routing of any forest highway, but it is simply a revision to conform with revised rules and regulations promulgated by the Federal Government for administering forest highways. He said that heretofore forest highways have been classified as follows:

Class I - on the Federal Aid System,
Class II - on state highways not on the State Highway System,
Class III - other forest highways.

The new classification is:

Class I - on Federal Aid Primary System,
Class II - on Federal Aid Secondary System,
Class III - other forest highways.

He recommended approval of the reclassification. The Commission approved the recommendation unanimously and thereupon signed the following letter with respect thereto:

Chief, Forest Service
Commissioner, Bureau of Public Roads
Washington, D. C.

Gentlemen:

The Forest Highway System selected and submitted by the Oregon State Highway Commission, pursuant to the Rules and Regulations for administering Forest Roads and Trails under the provisions of the Federal Highway Act was approved by the Department in accordance with the recommendations of the Bureau of Public Roads and the Forest Service under date of March 19, 1924 and certain revisions were approved by subsequent letters.

In accordance with the Rules and Regulations for Administering Forest Highways (Revised), approved by the Secretary of Agriculture and the Secretary of Commerce, and published in the Federal Register of March 22, 1950, it is now recommended that the approved Forest Highway System for the State of Oregon be revised to conform with current correct classifications, as follows:

Route No.	Name	Termini	Approved Length	Class
1	McMinnville-Tillamook	Hebo-East For.Bdry.	13.9	1
2	Salmon River	Oregon Coast Hwy.-West Polk County Line	13.7	1
3	Oregon Coast	Neskowin-Siletz River	22.8	1
4	Siletz	Oregon Coast Hwy.-Forest Bdry.	6.0	2
5	Oregon Coast	Yaquina Bay-Umpqua River	68.7	1
6	Alsea	Waldport-Benton County Line	28.4	2
7	Siuslaw	Blachly-Oregon Coast Hwy.	45.1	1
8	Umpqua	Scottsburg-Reedsport	15.6	1
9	Oregon Coast	Hauser-Douglas County Line	9.7	1
10	Oregon Coast	Port Orford-Gold Beach	31.3	1
11	Redwood	O'Brien Schoolhouse-State Line	5.4	1
12	Redwood	Summit Hayes Hill-Love Station	2.0	1
13	Oregon Caves	3 mi. West of For.Bdry. to Caves	11.5	2
14	Applegate	Ruch-Watkins	17.0	3
15	Pacific	Canyonville- 2-3/4 mi. south of Forest Boundary	11.0	1
16	Tiller Trail	Tiller to Trail	26.3	3
17	Crater Lake	Trail-Park Boundary	44.0	2
18	Crater Lake	Dalles-Calif. Hwy. to Park Bdry.	7.7	2
19	Dalles-California	Crescent-Old Ft. Klamath	57.8	1
20	Sand Creek	Dalles-Calif. Hwy. to Park Bdry.	4.3	3
21	Willamette	Lowell to Dalles-Calif. Hwy.	73.3	1
22	McKenzie	Blue River to Sisters	51.2	1
23	Santiam	1 mi. east of Foster to Sisters	69.5	1
24	North Santiam	Niagara-Santiam Hwy.	44.6	2
25	Mt. Hood	Wapinitia Jct. to West Bdry.	15.4	1
26	Wapinitia	Mt. Hood Hwy. to 1 mi. north of Wapinitia	32.6	1
27	Ochoco	West For.Bdry. to north For.Bdry.	19.6	1
28	Columbia River	West For.Bdry. to east For.Bdry.	27.3	1
29	Fremont	East For.Bdry. to west For.Bdry.	16.2	1
30	Klamath Falls-Lakeview	West For.Bdry. to east For.Bdry.	29.4	2
31	Fremont	4 mi. south of Valley Falls to 6 mi. north of Lakeview	13.0	1
32	Heppner-Spray	Mouth of Chapin Creek to John Day Highway	26.3	3
33	Pendleton-John Day	2½ mi. northwest of Albee to Range	30.7	1
34	Pendleton-John Day	Long Creek-South For. Bdry.	20.4	1
35	John Day-Burns	John Day to Burns	70.2	2
36	John Day	Prairie City-Unity	42.6	1
37	Weston-Elgin	McDougall's Camp to Summerville-Elgin Road	23.2	2
38	Flora-Enterprise	Oregon-Wash. State Line to south For. Bdry.	30.3	2
39	Little Sheep Creek	Imnaha to West For. Bdry.	8.8	2
40	Baker-Cornucopia	Carson to Cornucopia	5.0	2
41	Loop-Dalles	Mt.Hood Hwy.to east For.Bdry.	15.0	3
42	Warm Springs	Wapinitia Hwy. to For. Bdry.	6.9	1

May 26, 1950

The Engineer presented for the Commission's consideration and approval several 1950 Special State Tax Street Fund Projects, as follows:

No.	City	Previous Projects 1948	Previous Projects 1949	Estimated Cost of 1950 Proposed Projects State	City	Total
Division II						
21	Scio	None	None	$14,000	$ - -	$14,000
22	Sweet Home	$22,931.20	$8,796.12	$15,000	$12,500	$27,500
Division III						
23	Cave Junction	None	None	$ 8,400	$ - -	8,400

No.	City	Previous Projects 1948	Previous Projects 1949	Estimated Cost of 1950-51 Proposed Projects State	City	Total
Division II						
24	Willamina	$6,500	None	$15,000	$ 2,200	$17,200
Division III						
25	Canyonville	None	None	$ 8,600	$ - -	$ 8,600

NOTE: In event that the 1950 reserve of $19,750 is not used, the above are programmed at this time as 1950-1951 projects. However, construction will not be started until it is definite that the reserve will not be used.

He recommended approval of the projects in the cities of Scio, Cave Junction, Willamina and Canyonville, and deferment of action with respect to the project in Sweet Home. The Commission unanimously approved the recommendation.

The Engineer requested authority for an expenditure of $50,000 to reinforce the east end of the Monument-Hamilton Section of the Kimberly-Long Creek Secondary Highway in order to eliminate costly maintenance. This section, he said, is 3.44 miles in length, and the proposed improvement consists of a six-inch crushed rock base and an O-9 oil mat surface. He explained that during the past two years it has cost about $20,000 to maintain this section, and indications are that the cost in future years will increase, unless this stabilization work is undertaken. The Commission approved the expenditure unanimously.

The Engineer requested authority to re-advertise for bids for the construction of a maintenance building at Prospect on the Crater Lake Highway, Jackson County; for construction of a dwelling at Blue Mountain Maintenance Patrol Station on the I.O.N. Highway, Malheur County; and for construction of a latrine in Neptune State Park on the Oregon Coast Highway, south of Yachats in Lane County. He recalled that these projects were advertised for bids to be received at this meeting, that no bids were received for the construction of the

Blue Mountain Patrol Dwelling, and the Commission considered the bids received for the other two projects too high and rejected them. The Commission approved the request unanimously.

Commissioner Reynolds inquired as to the status of the economic survey which was ordered some time ago in connection with the proposed improvement of the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway. He gave as his feeling that the report should be available to the Commission when it passes on the request presented today by the Condon Delegation. The Engineer was instructed to expedite the report, and a similar report with respect to highways in the vicinity of Astoria, which was also ordered by the Commission.

Commissioner Reynolds also inquired as to the status of the survey for a proposed re-alignment of the Columbia River Highway in the vicinity of Boardman. He was informed by the Engineer that the survey is now underway and indications are that it will be completed in the near future.

The Chief Counsel presented for the Commission's approval a form of permit in favor of Pope and Talbot, Inc., authorizing construction, operation and maintenance of a private truck road and a grade separation structure on the Willamette Highway at Highway Engineer Station 2516+18.15 in the Northeast quarter ($NE\frac{1}{4}$) of the Southwest Quarter ($SW\frac{1}{4}$) of Section 22, Township 21 South, Range 3 East, W. M., Lane County. He explained that this permit is prepared in compliance with the requirements of an order of the Public Utilities Commissioner, who held a hearing on this subject, and that it includes provisions specified by the Highway Engineer. He recommended approval of the permit. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously and thereupon signed the permit.

The Chief Counsel also presented for the Commission's approval a form of agreement with the City of Pendleton and the County of Umatilla concerning the disposition of state-owned property lying adjacent to the Pendleton Airport Secondary Highway, and a small tract adjacent to the Old Oregon Trail in Pendleton which has been proposed as a site for a building to be occupied by the Secretary of State. He recalled that the form of the agreement previously was approved by the Commission, and advised that it now has been signed by officials of the city and the county. He recommended execution of the agreement by the Commission. The Commission approved the recommendation and thereupon signed the agreement.

The Chief Counsel also presented and recommended approval of a form of agreement between the State Highway Commission and the California-Oregon Power Company covering use by the state of some of the company's poles and facilities within the city of Klamath Falls in connection with the installation of two flashing beacons at that place. The Commission approved the recommendation and thereupon signed the agreement.

The Commission considered and upon recommendation of the Chief Counsel approved and signed an "Indenture of Access" authorizing a revision in the point of access to the Willamette Highway heretofore granted to Reese Wingard and Irma Wingard in Lane County.

The Commission approved and signed agreements, et cetera, as follows:

Agreement with Roy Swenson and wife clarifying question of reversion arising out of the vacation of an alley in Block 7, amended Plat of Fairmont, Eugene.

Application and contract with Pacific Power & Light Company pertaining to the furnishing of electrical energy for operation of a floodlight in Seaside.

Agreement with Frank W. Bittner and Wm. H. Bittner, Sandy, Oregon, covering removal of earth material from Alsea Highway 7.4 miles east of Waldport.

Letter directed to Chief, Forest Service, and Commissioner, Bureau of Public Roads, Washington, D. C., approving revisions in forest road classifications.

Easement deed granting to the United States of America perpetual right to use an old gravel bar located near Sanderson Bridge, Linn County.

Agreement with City of Pendleton and Umatilla County concerning disposition of state-owned land adjacent to the Pendleton Airport Road and abutting the Old Oregon Trail within the Pendleton city limits. (Previously approved by Commission in principal on April 3, 1950.)

Permit granting Pope and Talbot permission to construct and operate a log hauling road across the Willamette Highway in Lane County. (Authorized by P.U.C. Order No. 21165)

"Indenture of Access" authorizing revision in poirt of access to the Willamette Highway hereto granted Reese Wingard and wife, Lane County.

Agreement with California-Oregon Power Company covering the use of company poles on The Dalles-California Highway in the City of Klamath Falls, in connection with installation of two flashing beacons. This agreement merely extends previous agreement dated April 23, 1950.

Bargain and Sale Deed reconveying to Warren Packing Co. a small parcel of land acquired as right of way for Columbia River Highway between Dodson and Bonneville but which is not needed for such purpose.

Agreement with California-Oregon Power Company covering use of a tract of land on Cascade Gorge-Prospect Section of Crater Lake Highway upon which to erect a crushing plant.

Petition re leasing of U. S. Government lands situate in the Cove State Park, Jefferson County.

"Indenture of Access" authorizing revision in point of access to the Willamette Highway heretofore granted Reese Wingard and wife, Lane County.

Project Agreement. North Dillard Bridge Section.

(Cont.)

Agreements, et cetera, signed by Commission (Cont.)

Easement granting O. W. R. & N. Co. right of access to 40.6-acre tract of land that the state acquired from O. W. R. & N. Co. for right of way and park purposes near Bonneville. (Easement not to be delivered to Company until deed to 40.6-acre tract has been received.)

The meeting adjourned at 5:00 p.m.

EXHIBITS "A" through "K"

Minutes of May 25 and 26, 1950

EXHIBIT "A"

Minutes of May 25 and 26, 1950

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SULLIVAN GULCH HIGHWAY - UNIT #2

15805- Doernbecher Manufacturing Company (Witt)
Right of Way
Have executed deed

600 sq.ft. at 25¢ per sq.ft.	$ 150.00	
Amount to be paid owner		$ 150.00
Amount chargeable to Right of Way		150.00

Access not controlled

15798- Schade, Mildred (Witt)
Right of Way
Option expires October 25, 1950

6970 sq.ft. at 25¢ per sq.ft.	1,742.50	
Amount to be paid owner		1,742.50
Amount chargeable to Right of Way		1,742.50

Access not controlled.

EXHIBIT "B-1"

Minutes of May 25 and 26, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the Sullivan Gulch Highway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation of motor vehicles promoted, and highway travel in general safeguarded, the parcel of real property hereinafter described is necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required, and is being appropriated for right of way of the Sullivan Gulch Highway, for the purpose of establishing, constructing and maintaining a throughway, the following-described parcel of real property, to-wit:

File No. 14694
Owner: Myrtle Standley Miller

All of the South half (S½) of Lots 1 and 2, Block 41, Laurelhurst Addition to the City of Portland, Multnomah County, Oregon, containing 5,198 square feet.

(Cont.)

May 25, 1950

2. That the highway facility for which the aforesaid parcel of real property is required and is being taken, has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said parcel of property, as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcel of real property.

4. That upon the trial of any suit or action instituted to acquire the said parcel of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owner.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fifth day of May, 1950.

EXHIBIT "B-2"

Minutes of May 25 and 26, 1950

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Pacific Highway East is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen the N. E. Union Avenue Section of Pacific Highway East, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Pacific Highway East is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, construction, and maintenance of the N. E. Union Avenue Section of the Pacific Highway East a parcel of real property located in Multnomah County, Oregon, and described as follows:

> A parcel of land lying in Lots 3, 4, 5, and 6 in Block 21 of Love's Addition to Portland of Section 10, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon; the said parcel being all that portion of Lots 3, 4, 5, and 6 of Block 21 of Love's Addition to Portland lying easterly of a line parallel to and 85 feet westerly of the center line of N. E. Union Avenue as said highway has been relocated over and across or adjacent to the said property, which center line is described as follows:

(Cont.)

EXHIBIT "B-2" (Cont.)

Beginning at a point which is Engineer's center line Station 114+97.12; said point being 948.67 feet North 71° 37' 10" West of the northeast corner of the Lewis Love D. L. C.; thence South 22° 03' 30" East a distance of 1302.88 feet to Station 128+00, the westerly line of said parcel crossing the north and south lines of said Block 21 approximately at Station 125+50 and Station 127+68 respectively.

The parcel of land to which this description applies contains 0.18 acres.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to acquisition to fee simple title to the aforesaid described property it is necessary that there be acquired all easements, and rights of access, and all rights of ingress, egress, and regress, except easements and rights of access for pedestrian use only, from and to the remaining land of the larger tract, of which the above-described property is a part, and the above-described property and any highway now or hereafter constructed thereon.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fifth day of May, 1950.

EXHIBIT "B-3"

Minutes of May 25 and 26, 1950

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Columbia River Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate, construct, and improve the Cascade Locks-Hood River Section of the said highway, and for such purpose, and in connection therewith, the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Columbia River Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation, construction, improvement, and maintenance of the Cascade Locks-Hood River Section of the Columbia River Highway two parcels of real property located in Hood River County, Oregon, and described as follows, to-wit:

Parcel No. 1:

A parcel of land lying in the Northwest quarter ($NW\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 35, Township 3 North, Range 9 East, W. M., Hood River County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to R. Wesley Scoggin and Blanche Scoggin recorded in Book 41, Page 222 of Hood River County Record of Deeds; the said

parcel being all that portion of the foregoing described property included in a strip of land 100 feet wide on the northerly side and 150 feet wide on the southerly side of the center line of the Columbia River Highway as said highway has been relocated over and across or adjacent to the said property; which center line is described as follows:

Beginning at a point which is Engineer's center line Station 784+00.49; said point being 691.6 feet south and 14.6 feet west of the west quarter corner of Section 35, Township 3 North, Range 9 East, W. M.; thence on a 2864.79 foot radius curve right (the long chord of which bears North 70° 42' 30" East 765.2 feet) a distance of 767.5 feet; thence on a spiral curve right (the long chord of which bears North 80° 33' East 399.92 feet) a distance of 400 feet to Engineer's Station 795+67.99, said center line crossing the west and east lines of said property approximately at Stations 789+53 and 792+68 respectively.

The parcel of land to which this description applies contains 1.09 acres, of which 0.48 acre lies within the existing right of way, title to which hereby is alleged to be in the public, and 0.61 acre lies outside of the existing right of way.

Parcel No. 2:

A parcel of land lying in the North half ($N\frac{1}{2}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 35, Township 3 North, Range 9 East, W. M., Hood River County, Oregon, and being a portion of the following-described property: Tracts 1 and 2 which were conveyed by that certain deed to Wesley Scoggin, et us., recorded in Book 30, Page 419 of Hood River County Records of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 100 feet wide on the northerly side and 150 feet wide on the southerly side of the center line of the Columbia River Highway as said highway has been relocated over and across or adjacent to the said property, which center line is described as follows:

Beginning at a point which is Engineer's center line Station 792+20 opposite and 150 feet distant from which point the southerly line of the said strip of land intersects the west line of Tract 1 of said property; said point being 434.1 feet south and 750.6 feet east of the west quarter corner of Section 35, Township 3 North, Range 9 East, W. M.; thence on a spiral curve right (the long chord of which bears North 80° 52' 30" East a distance of 347.99 feet; thence North 81° 53' East a distance of 832.01 feet to Engineer's Station 804+00.

The parcel of land to which this description applies contains 4.86 acres, of which 0.40 acre lies within the existing right of way, title to which hereby is alleged to be in the public, and 4.46 acres lie outside of the existing right of way.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed and located, and will be

constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to acquisition of fee simple title to the aforesaid described property, it is necessary that there be acquired all easements and rights of access, and all rights of ingress, egress, and regress from and to the remaining land of the larger tract of which the above-described property is a part, and the above-described property, and any highway now or hereafter constructed thereon, except that there shall be reserved unto the owners of said remaining property right of private access for one approach not to exceed twenty-five (25) feet in width on the north side of the Columbia River Highway opposite Engineer's center line Station 791+50.

Private access as hereinabove referred to is defined as a right of access from and to land abutting the highway; said access to be for ordinary travel to and from the abutting land only and shall not be used in connection with any commercial institution or activity established or conducted on the adjoining property, which, in any manner caters to, invites, solicits from or is dependent upon the users of said highway.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fifth day of May, 1950.

EXHIBIT "B-4"

Minutes of May 25 and 26, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Sumpter Valley Highway is a highway under the jurisdiction and control of the State, and is in addition a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission has relocated in part, and proposes to construct, widen, straighten, and improve the Salisbury Junction-Poker Creek Section of the Sumpter Valley Highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, the Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation in part and the widening, straightening, construction and maintenance of the Salisbury Junction-Poker Creek Section of the Sumpter Valley Highway a parcel of real property located in Baker County, Oregon, and described as follows, to-wit:

A parcel of land lying in Section 36, Township 10 South, Range 39 East, W. M., Baker County, Oregon; the said parcel being all that portion of said Section 36 included in a strip of land of variable feet in width, lying on each side of the center line of the Sumpter Valley Highway as said highway has been relocated, except that part of said strip of land lying within that tract of land conveyed to Orval V. Hindman by deed recorded in Book 149, Page 139 of Baker County Deed Records, said relocated center line being described as follows:

Beginning at a point which is Engineer's center line Station 4+ 11.0; said point being 1219 feet south and 570 feet west of the northeast corner of Section 36, Township 10 South, Range 39 East, W. M.; thence South 42° 10' 20" West 127 feet; thence on a spiral curve right (the long chord of which bears South 42° 50' 20" West) 200 feet; thence on a 2874.79 foot radius curve right (the long chord of which bears South 58° 10' 20" West) 1400.0 feet; thence on a spiral curve right (the long chord of

which bears South 74° 02' 50" West) 150 feet; thence on a 1637.02 foot radius curve right (the long chord of which bears South 87° 40' 45" West) 650.24 feet; thence on a spiral curve right (the long chord of which bears North 76° 51' 20" West) 350 feet; thence North 74° 48' 50" West, 328.63 feet; thence on a spiral curve left (the long chord of which bears North 77° 48' 50" West) 300 feet; thence on a 954.93 foot radius curve left (the long chord of which bears South 83° 14' 40" West) 431.39 feet; thence on a spiral curve left (the long chord of which bears South 64° 18' 10" West) 300 feet; thence South 61° 18' 10" West 159.14 feet; thence on a spiral curve right (the long chord of which bears South 62° 38' 10" West) 400 feet; thence on a 2864.79 foot radius curve right (the long chord of which bears South 69° 45' 55" West) 446.30 feet to Station 56+53.7 opposite and 40 feet distant from which Station the southerly line of said strip of land intersects the west line of said Section 36.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to Station	Width on Southerly Side of Center Line	Width on Northerly Side of Center Line
4+11	33+50	40	40
33+50	35+00	50	40
35+00	41+50	40	40
41+50	50+00	60	40
50+00	56+53.7	40	40

The parcel of land to which this description applies contains 9.76 acres, of which 6.91 acres lie within the existing right of way, title to which hereby is alleged to be in the public, and 2.85 acres lie outside of the existing right of way.

2. The Commission does hereby find and declare that there is needed and required for a gravel pit for use in connection with the relocation in part and the widening, straightening, construction and maintenance of the Salisbury Junction-Poker Creek Section of the Sumpter Valley Highway a parcel of real property located in Baker County, Oregon, and described as follows, to-wit:

A parcel of land lying in the Southwest quarter ($SW\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) and the Southeast quarter ($SE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 36, Township 10 South, Range 39 East, W. M., Baker County, Oregon, the said parcel being described as follows:

Beginning at a point which is Engineer's Station 17+00 on the relocated center line of the Sumpter Valley Highway, said point being 2025 feet south and 1564 feet west of the northeast corner of said Section 36; thence along the relocated center line of the Sumpter

Valley Highway as follows: On a 2864.79 foot radius curve right (the long chord of which bears South 67° 47' 30" West) 438 feet; on a spiral curve right (the long chord of which bears South 74° 02' 50" West) 150 feet; and on a 1637.02 foot radius curve right (the long chord of which bears South 87° 40' 45" West) 650.24 feet; thence North 51° 30' 10" East 301.95 feet; thence South 85° 44' 40" East 178.8 feet; thence North 47° 32' 40" East 685.66 feet; thence South 34° 08' 20" East 489 feet to the point of beginning; except that part of said described parcel lying within 40 feet of the relocated center line of the Sumpter Valley Highway, and also except that part lying within the existing right of way of said highway.

The parcel of land herein conveyed contains 5.7 acres.

3. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fifth day of May, 1950.

EXHIBIT "B-5"

Minutes of May 25 and 26, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS the Santiam Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen and improve a section of said highway within the corporate limits of Sweet Home, Oregon, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Highway Commission is authorized to take fee title to said real property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, improving, construction, and maintenance of a section of the Santiam Highway within the corporate limits of the City of Sweet Home, located in Linn County, Oregon, parcels of real property described as follows, to-wit:

Owner: Hazel Truitt and Joe Truitt
File No. 14292

A parcel of land lying in Government Lot 5 of Section 31, Township 13 South, Range 1 East, W. M., Linn County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to Joe Truitt and Hazel Truitt, recorded in Book 191, Page 197 of Linn County Record of Deeds; the said parcel being described as follows:

Beginning at the northwest corner of said property, said point being on the southerly right of way line of the Santiam Highway and 30 feet distant from (when measured at right angles to) said highway center line at Engineer's Station 1517+18.6, said point also being 199.7 feet north and 1290.3 feet west of

(Cont.)

the northeast corner of the John T. Ames D. L. C. No. 46 in said Township and Range; thence south on the west line of said property a distance of 16.6 feet to a point which is 46.17 feet distant from the center line of said highway; thence North 76° 53' East parallel with said highway center line a distance of 60.5 feet to the east line of said property; thence North 0° 05' East along said property line a distance of 16.6 feet to the southerly right of way line of said highway; thence South 76° 53' West along said right of way line a distance of 60.5 feet to the point of beginning, containing 978 square feet.

Owners: Harry Swager and Rose M. Swager
File No. 15830

A parcel of land lying in the Northeast quarter ($NE\frac{1}{4}$) of Section 31, Township 13 South, Range 1 East, W. M., Linn County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to Harry L. Swager and Rose Marie Swager, recorded in Book 213, Page 44 of Linn County Record of Deeds; the said parcel being all that portion of the foregoing described property lying north of a line 46 feet 2 inches southerly from and parallel to the center line of the Santiam Highway.

The parcel of land to which this description applies contains 1,262 square feet.

Owners: John Gilbert and Margaret Gilbert
File No. 15831

A parcel of land lying in the Northeast quarter ($NE\frac{1}{4}$) of Section 31, Township 13 South, Range 1 East, W. M., Linn County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to John and Margaret Gilbert, recorded in Book 185, Page 797 of Linn County Record of Deeds; the said parcel being all that portion of the foregoing described property lying north of a line 46 feet 2 inches southerly from and parallel to the center line of the Santiam Highway.

The parcel of land to which this description applies contained 1,027 square feet.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as

to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fifth day of May, 1950.

EXHIBIT "B-6"

Minutes of May 25 and 26, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof and additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, or donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes, and for the preservation of scenic places and other objects of attraction or scenic value adjacent to or along, or in close proximity to state highways, or which may be conveniently reached from or by a public highway, and the Commission is also authorized and empowered to acquire land and ground necessary for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds, or other places of attraction and scenic value which in the judgment of the Commission are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road users; and

WHEREAS, the Columbia River Highway is a highway under the jurisdiction and control of the State, and is in addition a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate and improve the Viento-Hood River Section of said highway, and plans and proposes to enlarge, develop, and maintain the Viento State Park for public park and recreational purposes for the convenience of the public and general welfare and pleasure of the motoring public using said Columbia River Highway, and for such purposes and in connection therewith the real property hereinafter described is necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation, improvement, construction, and maintenance of the Viento-Hood River Section of the Columbia River Highway two parcels of real property located in Hood River County and described as follows, to-wit:

Parcel No. 1:

A parcel of land lying in the Northwest quarter ($NW\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 35, Township 3 North, Range 9 East, W.M., Hood River County, Oregon; the said parcel being all that portion of said Northwest quarter ($NW\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 35 included in a strip of land 100 feet wide on the northerly side and 150 feet wide on the southerly side of the center line of the

(Cont.)

Columbia River Highway as said highway has been relocated over and across or adjacent to the said Northwest Quarter (NW¼) of the Southwest Quarter (SW¼) of Section 35, which center line is described as follows:

Beginning at a point which is Engineer's center line Station 784+00.49; said point being 691.6 feet south and 14.6 feet west of the west quarter corner of Section 35, Township 3 North, Range 9 East, W.M.; thence on a 2864.79 foot radius curve right (the long chord of which bears North 70° 12' 30" East 765.2 feet) a distance of 767.5 feet; thence on a spiral curve right (the long chord of which bears North 80° 33' East 399.91 feet) a distance of 400 feet to Station 795+67.99, said center line crossing the west line of a tract of land conveyed to Wesley Scoggin, et ux., by deed recorded in Book 30, Page 419 of Hood River County Deed Records, which line is the easterly line of said strip of land, the west line of said strip being along the west line of said Section 35. Except that part of said strip of land lying within those tracts conveyed to J. O. Jones by deeds recorded in Book 18 at Pages 409 and 639. Also, except that part of said strip of land lying within that tract of land conveyed to George L. and Gene I. Jett by deed recorded in Book 34 at Page 375.

The parcel of land to which this description applies contains 2.96 acres, of which 0.72 acre lies within the existing right of way, title to which hereby is acknowledged to be in the public, and 2.24 acres lie outside of the existing right of way.

Parcel No. 2:

All that portion of the Northeast quarter (NE¼) of the Southwest quarter (SW¼) of Section 35, Township 3 North, Range 9 East, W.M., Hood River County, Oregon, lying south of the existing Columbia River Highway and north of a line parallel to and 150 feet southerly of the center line of said highway as said highway has been relocated, said relocated center line being described as follows:

Beginning at Engineer's center line Station 795+67.99, said Station being 373 feet south and 1102 feet east of west quarter corner of Section 35; thence North 81° 53' East 1632 feet to Station 812, said center line crossing the east line of the Southwest quarter (SW¼) of Section 35 approximately at Station 811, containing 2.15 acres.

2. The Commission does hereby find and declare that there is needed and required for public park and recreational purposes for use in connection with the enlargement, development, and maintenance of the Viento State Park two parcels of real property located in Hood River County and described as follows, to-wit:

EXHIBIT "B-6" (Cont.)

Parcel No. 3:

A parcel of land lying in the Northwest quarter (NW¼) of the South west quarter (SW¼) of Section 35, Township 3 North, Range 9 East, W.M., Hood River County, Oregon; the said parcel being all that portion of said Northwest quarter (NW¼) of the Southwest quarter (SW¼) of Section 35 lying south of the O. W. R. & N. Co. right of way, west of a tract of land conveyed to George L. and Gene I. Jett by deed recorded in Book 34, Page 375, east of a tract of land conveyed to J. O. Jones by deed recorded in Book 18, Page 409, and lying north of a line parallel to and 100 feet northerly of the relocated center line of the Columbia River Highway, as said center line is described in parcel No. 1 herein, except that tract of land conveyed to Gordon G. Brown and Margaret E. Brown by deed recorded in Book 21, Page 344 of Hood River County Deed Records, containing 4.1 acres.

Parcel No. 4:

A parcel of land being all that portion of the Southwest quarter (SW¼) of Section 35, Township 3 North, Range 9 East, W.M., Hood River County, Oregon, lying east of a tract of land conveyed to J. O. Jones by deed recorded in Book 18, Page 639 of Hood River County Deed Records and lying south of a line parallel to and 150 feet southerly of the relocated center line of the Columbia River Highway, as said center line is described in parcels 1 and 2 herein, except that part of a tract conveyed to Wesley Scoggin, et ux., by deed recorded in Book 30 at page 419, which lies south of said line parallel to and 150 feet southerly of the relocated center line of the Columbia River Highway, containing 107.0 acres.

3. That the highway and park facilities for which the aforesaid property is required and is being taken has been planned, located, and will be constructed, developed, and maintained in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fifth day of May, 1950.

EXHIBIT "B-7"

Minutes of May 25 and 26, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Coast Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen and straighten the Brookings-California State Line Section of said highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, straightening, construction, and maintenance of the Brookings-California State Line Section of the Oregon Coast Highway real property located in Curry County, described as follows, to-wit:

A parcel of land lying in Block 27, Town of Brookings as platted and recorded December 1, 1920, situated in the Southwest quarter ($SW\frac{1}{4}$) of Section 5, Township 41 South, Range 13 West, W.M., Curry County, Oregon, the said parcel being described as follows:

Beginning on the westerly line of Lot 7, Block 27, Town of Brookings, at a point 10 feet northerly of the southwest corner of said Lot 7, Block 27; thence along the westerly line of said Lot 7, North 22° 20' West 20.47 feet; thence North 67° 19' East 208.02 feet to the easterly line of said Block 27; thence South 22° 20' East 21.78 feet to a point 10 feet from the southeast corner of said Block 27; thence parallel to and 10 feet northerly of the south line of Block 27 South 67° 40' West 208 feet to the point of beginning.

The parcel of land to which this description applies contains 4,394 square feet.

(Cont.)

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fifth day of May, 1950.

EXHIBIT "C"

Minutes of May 25 and 26, 1950

RESOLUTION

WHEREAS, the State of Oregon, by and through its State Highway Commission, is the owner of a parcel of land along and adjacent to the Oregon Coast Highway described as follows, to-wit:

A parcel of land lying in the Southwest quarter ($SW\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) and in the Southeast quarter ($SE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 31, Township 1 South, Range 9 West, W.M., Tillamook County, Oregon, and being a portion of the following described property: Those tracts of land which were conveyed by those certain deeds to Barnhard Jacob, recorded in Book 22, Page 72, to Barnhard Jacob, recorded in Book 30, Page 128, and to Ben Jacob and Rosetta Jacob, recorded in Book 40, Page 102, Tillamook County Record of Deeds. The said parcel being described as follows:

Beginning at the southeast corner of the foregoing described tract described in deed recorded in Book 30, Page 128, said corner being 653.4 feet South 88° 59' 30" East of the southwest corner of the Southwest quarter ($SW\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 31; thence North 0° 37' East, 631.5 feet to the northeast corner of that tract described in deed recorded in Book 22, Page 72; thence North 89° 22' 30" West, 280.41 feet to the southeast corner of that tract described in deed recorded in Book 40, Page 102; thence North 0° 29' 30" East, 492.96 feet to the northeast corner of the last mentioned tract; thence North 89° 24' West, 1269.2 feet along the north line of said tract to a line which is parallel to and 60 feet northeasterly from the relocated center of the Oregon Coast Highway; thence South 44° 17' East 1582.8 feet, parallel to said relocated center line to the south line of that tract described in deed recorded in Book 30, Page 128; thence South 88° 59' 30" East, 433.44 feet along the south line of said tract to the place of beginning, containing 22.377 acres, and

WHEREAS, after consideration, this Commission hereby finds and declares that the said property is no longer needed, required, or useful for highway purposes, and

WHEREAS, the said property has been appraised by competent and experienced appraisers and the reasonable market value thereof found and estimated to be the sum of $15,665.00, and the Commission is desirous of selling and disposing of said property, at a price not less than the said appraised amount, upon the basis of complete restriction of access to the abutting Oregon Coast Highway.

(Cont.)

NOW, THEREFORE, Be it Resolved that the Secretary of the Commission be, and he hereby is, authorized and instructed, to advertise the said property for sale in accordance with the terms and provisions of Chapter 437, Oregon Laws, 1949. Sealed bids for the sale of the said property shall be received by the said Secretary in the offices of the Commission in Salem, Oregon, at 2:00 P.M. DST on July 13, 1950, and shall be opened in the presence of the Commission's Chief Counsel or his authorized representative. The results and tabulations of the bids received shall be reported to the Commission at its next succeeding regular or special meeting.

The published notice for the receiving of bids shall fix a minimum price of $15,665.00 for which the property shall be sold and shall further provide that the sale shall be made for cash, or upon terms of 20% of the bid price as an initial payment, with the balance payable in ten (10) equal annual installments on principal, accompanied by payment of 6% accrued interest on unpaid balances.

EXHIBIT "D"

Minutes of May 25 and 26, 1950

R E S O L U T I O N

WHEREAS, the Highway Commission on July 30, 1945, submitted to the Public Roads Administration a proposed Federal Aid Secondary System in the State of Oregon which included all of the Powell Butte State Secondary Highway No. 371; and

WHEREAS, the Public Roads Administration on January 29, 1946, deferred approval of a portion of the Powell Butte State Secondary Highway No. 371 as part of the Federal Aid Secondary System; and

WHEREAS, the County Courts of Deschutes and Crook Counties have passed resolutions requesting the Oregon State Highway Commission to resubmit to the Commissioner of Public Roads for approval this portion of State Secondary Highway No. 371; and

WHEREAS, subsequent thereto the United States Bureau of Public Roads, successor in name to the Public Roads Administration, was again requested to approve and did approve the designation of the entire length of the Powell Butte State Secondary Highway as a part of the Federal Aid Secondary Highway System;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE OREGON STATE HIGHWAY COMMISSION, all members being present and affirmatively voting as follows:

1. That the portion of the Powell Butte State Secondary Highway No. 371 generally described as follows, to-wit:

> From a junction with F.A.S. Highway No. 397 near the section corner common to Secs. 17, 18, 19 and 20, T. 17 S., R. 13 E., W. M., northerly and easterly to a junction with F.A.S. Highway No. 404 near the section corner common to Secs. 16, 17, 20 and 21, T. 16 S., R. 14 E., W.M., the total length of which is approximately 9.48 miles,

be and hereby is designated as Federal Aid Secondary Highway No. 542, and is shown colored in yellow on the accompanying map marked Exhibit 'A'. **

2. That this resolution be entered in the minutes and records of the Commission as of the 26th day of May, 1950.

FOOTNOTE: **

The exhibit mentioned in the above resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, said resolution being Item No. 4 under the heading "Federal Highway Designations, Secondary," and said exhibit by this reference is made a part of this minute entry to the same extent as if copied in full herein.

Minutes of May 25 and 26, 1950

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the first six month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Phoenix	$ 1,360.63
Shaniko	116.75

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 26th day of May, 1950.

Minutes of May 25 and 26, 1950

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the second six month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Bay City	$ 1,519.93	Manzanita	$ 618.71
Canyon City	881.44	Maupin	754.31
Columbia City	923.82	Oakridge	2,799.71
Cornelius	2,206.44	Port Orford	2,132.98
Dayville	384.22	Richland	717.59
Dundee	590.45	Rogue River	1,339.12
Empire	1,997.37	Shaniko	155.38
Gearhart	1,734.64	Sherwood	1,590.55
Gold Beach	1,607.50	Summerville	226.01
Gold Hill	1,802.44	Turner	1,565.13
Imbler	514.18	Waldport	1,779.84
Ione	740.19	Yamhill	1,180.91

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 26th day of May, 1950.

EXHIBIT "F"

Minutes of May 25 and 26, 1950

R E S O L U T I O N

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a county road, to-wit:

SILETZ-LOGSDEN SECTION of the LOGSDEN COUNTY ROAD (Federal Aid Secondary Highway No. 150) in LINCOLN COUNTY;

and in connection therewith to prepare a map showing the route and location of said highway section and to file said map, reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, map and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the Siletz-Logsden Section of the Logsden County Road, particularly between Highway Engineer's Station 0+10 and Highway Engineer's Station 375+50, together with the map, which for identification purposes bears Map File No. 5B-36-15, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission in Salem, Oregon; and,

2. It is further ordered that the said route and the survey of the same hereby is adopted as the route and location of the LOGSDEN COUNTY ROAD (Federal Aid Secondary Highway No. 150) between the above described points.

3. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

4. That this resolution be entered in the minutes and records of the Commission as of the 26th day of May, 1950.

RESOLUTION ACCEPTING COMPLETED CONTRACTS

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3123 with O. & S. Painters for painting the Harrisburg, Springfield and Creswell Bridges in Lane County, completed April 29, 1950.

Contract No. 3215 with Trowbridge & Flynn Electric Co. for installing traffic signals in Medford, Jackson County, completed April 21, 1950.

Contract No. 3219 with City Electric, Inc., for installing traffic signals in Cottage Grove, Lane County, completed April 17, 1950.

Contract No. 3226 with Trowbridge & Flynn Electric Co. for installing traffic signals in Roseburg, Douglas County, completed April 25, 1950.

Contract No. 3230 with D. W. Voreis for constructing a boat channel and clearing in Wallowa Lake State Park, completed January 20, 1950.

Contract No. 3263 with Snook Brothers for constructing the Mountain States Power Company Canal Bridge on the Santiam Highway in Linn County, completed May 9, 1950.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

RESOLUTION LIFTING REDUCED LOAD LIMITS

ON VARIOUS STATE HIGHWAYS

WHEREAS, on the 19th day of December, 1949, and on the 6th day of February, 1950, and on the 21st day of March, 1950, and on the 3rd day of April, 1950, and on the 25th day of April, 1950, at meetings of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted resolutions reducing the maximum load limit on various state highways and sections of state highways; and

WHEREAS, subsequent to the passage of said resolutions, conditions have changed so that it no longer is necessary or desirable and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolutions.

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit as set forth in the said resolutions of December 19, 1949, February 6, 1950, March 21, 1950, April 3, 1950, and April 25, 1950 on various state highways or sections thereof, to-wit:

be and the same hereby are rescinded and cancelled as of this date, and the maximum load limit on such highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and to the superintendent of the Department of State Police for his information.

Dated this 26th day of May, 1950.

OREGON STATE HIGHWAY COMMISSION

By Ben. R. Chandler, Chairman

Chas. H. Reynolds, Commissioner

M. K. McIver, Commissioner

R. H. Baldock
State Highway Engineer

ATTEST:
H. B. Glaisyer

May 26, 1950

EXHIBIT "I"

RESOLUTION

WHEREAS, the Highway Commission, pursuant to law, is vested with full power and authority to select, establish, locate, construct, improve, maintain, operate and administer all state highways, and said Commission is further required and is vested with power to designate state highways by number and by the point of beginning and the terminus thereof; and

WHEREAS, the Commission is vested with power and authority to erect and maintain suitable directional road signs on state highways within the State of Oregon at such places and of such material and design as the Commission may select and determine; and

WHEREAS, for the purpose of conforming with the provisions of said statutes and for the further purpose of making it possible to more efficiently direct traffic using state highways and also for the purpose of making available to the traveling public needed information relative to routes and destinations served by the state highway system, the Highway Commission has heretofore provided and put in operation and practice a system of routes and route numbers; and

WHEREAS, as a part of said highway route system, the route No. ORE 23 has been assigned to the following state highway:

> Over The Dalles-California Highway from its junction with the Columbia River Highway, US30, approximately 2 miles east of The Dalles southerly via Dufur and Tygh Valley to its junction with the Wapinitia Highway, ORE50, approximately 3 miles northeast of Maupin; and

WHEREAS, as a part of said state highway route system the route No. ORE50 has been assigned to the following state highway:

> Over the Mt. Hood Highway from its junction with the Pacific Highway West, US99W, in Portland easterly via Powell Boulevard, Gresham, Sandy, and Government Camp to its junction with the Wapinitia Highway approximately 3 miles east of Government Camp; thence southeasterly over the Wapinitia Highway via Bear Springs to its junction with The Dalles-California Highway, ORE23, approximately 3 miles northeast of Maupin; thence southerly over The Dalles-California Highway via Maupin to its junction with the Sherman Highway, US97, at the head of Cow Canyon; and

WHEREAS, recent highway construction and improvement has made it desirable to revise, assign and reassign certain route numbers; and

(Cont.)

EXHIBIT "I" (Cont.)

WHEREAS, the State Highway Commission has given due and careful consideration to the matter, based upon reports and recommendations of members of its staff;

NOW, THEREFORE, based upon the foregoing recitals of existing facts, it is hereby resolved by this Commission as follows:

1. That traffic on the highways of the state highway system may be more efficiently directed by revising, assigning and reassigning certain route numbers as hereinafter set forth.

2. That from and after the date of this resolution, route number ORE23 be and hereby is assigned to a route described as follows:

Over the The Dalles-California Highway from its junction with the Columbia River Highway, US30, approximately 2 miles east of The Dalles, southerly via Dufur, Tygh Valley and Maupin to its junction with the Sherman Highway, US97, at the head of Cow Canyon.

3. That from and after the date of this resolution, route number ORE50 be and hereby is assigned to a route described as follows:

Over the Mt. Hood Highway from its junction with the Pacific Highway West, US99W, in Portland, easterly via Powell Boulevard, Gresham, Sandy, and Government Camp to its junction with the Wapinitia Highway approximately 3 miles east of Government Camp, thence southeasterly over the Wapinitia Highway to its junction with the Warm Springs Highway, approximately at Bear Springs; thence southeasterly over the Warm Springs Highway via Warm Springs Agency to its junction with the The Dalles-California Highway, US97, at Madras.

4. That from and after the date of this resolution, route number ORE52 be and hereby is assigned to a route described as follows:

Over the Wapinitia Highway from its junction with the Warm Springs Highway, ORE50, near Bear Springs, easterly to its junction with the The Dalles-California Highway, ORE23, approximately 3 miles northeast of Maupin.

5. That the State Highway Engineer be, and he hereby is instructed to locate, relocate, change and add highway signs, revise and change official highway maps, and do such other things as are necessary or proper in order to make effective the revision, assignment and reassignment of highway route numbers set forth in this resolution.

6. That this resolution be entered in the minutes and records of the Commission as of the 26th day of May, 1950.

May 26, 1950

EXHIBIT "J"

RESOLUTION

WHEREAS, the Woodburn-Sandy Highway, (State Highway 211) is a state highway which passes through the town of Colton, and that said highway is intersected by Wall Street in said town at Highway Engineer's center line station 459+10.

WHEREAS, it has been demonstrated that the parking of vehicles along the northerly side of said highway between the aforesaid intersection and a point 150 feet easterly of said intersection impairs the vision of the operators of motor vehicles traveling both upon said highway and upon said street, and constitutes and is a hazard to traffic upon said Woodburn-Sandy Highway.

WHEREAS, it is the opinion and judgment of this Commission that public welfare and public safety require that the parking of motor vehicles be prohibited along the northerly side of said highway between the aforesaid intersection and a point 150 feet easterly of said intersection.

NOW, THEREFORE, Be It and It Hereby is Resolved by this Commission, all members being present and affirmatively voting as follows:

That the Commission does hereby find and declare, based upon investigation, reports and recommendations of its staff, that the parking of motor vehicles along the northerly side of the Woodburn-Sandy Highway between the intersection of said highway and Wall Street within the town of Colton, Oregon, at Engineer's Station 459+10 and a point 150 feet easterly thereof is and constitutes a hazard to traffic.

That the parking of motor vehicles between the above described termini be and the same hereby is prohibited.

That the State Highway Engineer be and hereby is instructed to erect a sign at the easterly terminus, and at such other points as in the judgment of said Engineer are necessary to accomplish the purpose of this resolution and action of the Highway Commission as herein declared, on which signs shall be printed in plain legible type "No Parking Here To Corner".

That a certified copy of this resolution be mailed to the Superintendent of State Police.

That this resolution be entered in the minutes and records of the Commission as of the 26th day of May, 1950.

May 26, 1950

EXHIBIT "K"

R E S O L U T I O N

WHEREAS, the Swift Secondary Highway, otherwise known and designated as State Highway No. 120, is a state highway under the jurisdiction and control of the State Highway Commission; and

WHEREAS, on property abutting on said highway, large stockyards are maintained by the Portland Union Stock Yards Company, and employees of said company and other persons park their vehicles within the right of way limits of said highway and leave said vehicles so parked for extended periods of time; and

WHEREAS the parking of vehicles on the said highway and on the shoulders thereof tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission there is created a hazard not only to through traffic but also to the owners and drivers of said parked vehicles; and

WHEREAS, in the opinion of this Commission public welfare and public safety require that the use of the said highway and the shoulders thereof for parking purposes be prohibited within the area hereinafter set forth;

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendations of members of its staff, that the parking of motor vehicles on the southerly side of the Swift Secondary Highway between Mile Post 2.13, which is Engineer's Station 113+00, and Mile Post 2.26, which is Engineer's Station 119+80, covering a distance of 0.13 mile in Multnomah County, Oregon, creates a hazard not only to through traffic but also to persons owning and using said parked vehicles.

2. The Commission does hereby find and declare, based upon investigation, reports and recommendations of members of its staff, that the parking of motor vehicles upon the northerly side of the Swift Secondary Highway or the shoulders thereof between Mile Post 2.13, which is Engineer's Station 113+00, and Mile Post 2.43, which is Engineer's station 129+00, covering a distance of 0.30 mile in Multnomah County, Oregon, creates a hazard not only to through traffic but also to persons owning and using said parked vehicles.

3. That in the opinion of the Commission the right of way of said highway at the described locations is not of sufficient width to permit parking and at the same time provide the degree of safety and convenience which in the opinion of this Commission should be provided the motoring public.

EXHIBIT "K" (cont.)

4. That this Commission does hereby further find and declare that the parking of vehicles on said highway, or the shoulders thereof, between the points above set forth, should be prohibited.

5. That the State Highway Engineer hereby is instructed to erect signs at said points, and at such places between said points, as in the judgment of said Engineer are necessary to accomplish the purpose of this resolution and the action of the Highway Commission as herein declared, on which signs shall be printed in plain legible type the words, "NO PARKING" or "NO PARKING ON HIGHWAY SHOULDERS".

6. That the prohibition against parking herein declared and set forth shall be effective only until such time as facilities for off-street parking have been provided, and, in no event, shall the said prohibition be effective for more than one year from the date of this resolution.

7. That the Secretary be and he hereby is instructed to send a certified copy of this resolution to the Portland Union Stock Yards Company, and to send a like copy to the Superintendent of State Police.

8. That this resolution be entered in the minutes and records of the State Highway Commission as of the 26th day of May, 1950.

May 26, 1950

Salem, Oregon
June 5, 1950

The State Highway Commission met in special session at 2:00 p.m. in the office of the State Highway Engineer, Room 325, State Office Building, for a discussion of matters pertaining to the operation of the Columbia River Ferry between Astoria, Oregon, and Megler, Washington. Present were:

Ben. R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Present representing the Astoria Navigation Company, contractors for the operation of the ferries, were T. R. Williams, President, and his attorney, Mr. Gordon Sloan, both of Astoria. Representing the surety on the bond furnished by Astoria Navigation Company in connection with this operation were Calvin N. Souther and John F. McGinty, Attorneys. Mr. Floyd H. Simon, District Maintenance Superintendent of the State Highway Department, Astoria, who is supervisor of the ferry operations, was also present.

This meeting was called for the particular purpose of arriving at some definite conclusion with respect to the operation of the ferry which has been "tied up" for several days because of labor difficulties. The contract for the operation was awarded to Astoria Navigation Company by the State Highway Commission as a result of competitive bidding therefor on March 21, 1950. The contract provides that the Astoria Navigation Company commence operating on June 1, 1950, but because of labor difficulties the company did not comply therewith. Mr. Williams stated that his men are striking because of the unions' refusal to accept the terms of a settlement the company has offered; the wage scale offered is considerably above that in effect in the Puget Sound area, but is under the scale demanded by the unions. He asserted that the company does not intend to meet the unions' demands.

In reply to an inquiry from Chairman Chandler as to what the company wants the state to do, Mr. Williams stated that they have not asked the state to do anything as yet, and do not expect to. He recalled that he had brought the situation to the attention of the Highway Commission previously with the idea in mind that the Commission might have some suggestion to offer. He gave as his feeling that the unions are "out to break the state;" that they want the contract cancelled. The present attitude of the unions, he said, is against arbitration, but he gave as his belief that they would consent to arbitration, probably in about thirty days. He also said that the company intends to negotiate further with the unions, but not up to the extent the unions demand. At the request of Chairman Chandler the Chief Counsel explained the legal features involved. He pointed out that the Highway Commission is endeavoring to render public service, which has been stopped for the past few days, and that the Commission must act within a few hours to restore such service, and apparently the only way that can be done is for the state to take over the

operation temporarily. He suggested that the Astoria Navigation Company be given forty-eight hours' time within which to commence operating in conformity with the provisions of the contract, and that the company be disqualified and the contract cancelled if service is not restored within such time limit. He advised Mr. Williams that if the state takes over this operation it will not be "camouflage" — it will be an actuality, and the operation will be placed under Civil Service regulations.

Chairman Chandler advised that the Commission will not be in position to take definite action until the Astoria Navigation Company has voided its contract, but the Commission now knows what it has to do if the company fails to perform pursuant to the provisions of the contract. This ferry, he said, must be operated. If necessary to secure the service, the Commission will declare the contractor in default and will take over. He also said that public demandwill not allow the controversy between the company and the unions to continue. His statement was confirmed by Commissioners Reynolds and McIver, Commissioner Reynolds pointing out that the state is obligated to provide this ferry service, and is under heavy pressure to get it in operation. Mr. Williams requested fifteen days' time within which to confer with the unions involved, but his request was denied by the Commission.

This matter was discussed further at considerable length, and as a result a motion was made by Commissioner Reynolds that "if the ferries are not operating according to the contract within forty-eight hours from 3:00 p.m., Daylight Saving Time, Monday, June 5, 1950, the state take over the operation on a permanent basis and declare the Astoria Navigation Company in default." The motion was seconded by Commissioner McIver and carried by the unanimous vote of the Commission.

Following the departure of the group, the Commission ordered that a telegram, as follows, be sent to the Astoria Navigation Company confirming the decision made at this conference:

JUNE 5, 1950

ASTORIA NAVIGATION COMPANY
ASTORIA, OREGON

ATTENTION: T. R. WILLIAMS

THIS IS TO CONFIRM THE DECISION MADE AT TODAY'S CONFERENCE RELATIVE TO YOUR CONTRACT WITH THE STATE OF OREGON, BY AND THROUGH ITS HIGHWAY COMMISSION, BY WHICH ACTION YOU WERE ORALLY ADVISED BY THE COMMISSION THAT SAID CONTRACT WILL, WITHIN FORTY-EIGHT HOURS FROM 3:00 P.M., DAYLIGHT SAVING TIME, MONDAY, JUNE 5, 1950, BE RESCINDED UNLESS THE FERRIES ARE IN FULL OPERATION WITHIN THE TERMS AND MEANING OF SAID CONTRACT.

H. B. GLAISYER
SECRETARY

In this connection the Engineer was instructed by the Commission immediately to make arrangements as may be necessary for operation of the ferries as a state project, including insurance coverage and provisions that the Civil Service Commission may require.

The Engineer brought to the Commission's attention the need to purchase a power plant to furnish power and light at the Megler terminal of this ferry. He stated that he has endeavored without success to secure electrical energy from local concerns, so it is necessary for the state to own its own plant, which he estimated would cost about $3,300. The Commission unanimously approved the expenditure.

The Commission also considered routine matters as follows:

The Engineer reported that a serious traffic hazard is created every Friday, Saturday and Sunday evening on the Pacific Highway East (US99E) by reason of the parking of automobiles on the shoulders of the highway near establishments known as "Super Cafe" and "Antler Inn," north of Jennings Lodge. He said that cars park on both sides of the highway and in so doing block vision and endanger the lives of pedestrians who cross the highway at these locations -- in fact, two accidents occurred during the past week. He further stated that the conditions were investigated by the Traffic Engineer in company with Captain Gurdaine of the State Police, both of whom recommend as a solution of the problem the designation of a "NO PARKING ON HIGHWAY SHOULDERS" zone on both sides of the highway between M.P. 9.32, north of Super Cafe, and M.P. 9.63, south of Antler Inn. He stated his concurrence in the recommendation. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission had under discussion the question whether or not to take part in the controversy that exists relative to the use as a service station site of the vacant lot situate at the southeast corner of the intersection of Capitol Street (US99E) and Center Street in Salem, which property lies directly across Capitol Street from the new Highway Department building now under construction, and is within the "fringe" area adjacent to the Capitol Group. It appears that the State Highway Commission has been asked to register protest against the use of the property for the purpose intended by the owners of the same. The Commission decided unanimously not to become a party to this controversy.

The Engineer reported the necessity to post, on June 3, 1950, the West Diamond Lake State Secondary Highway for a fifty percent reduced load limit, allowing a maximum gross load of 36,000 pounds. He asked the Commission to approve this action. The Commission unanimously approved such posting by the adoption of the attached resolution relative thereto, marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a resolution from the Board of County Commissioners of Multnomah County requesting the designation as a state secondary highway of that portion of the Columbia River Primary Highway which extends easterly from its junction with the revised and newly constructed highway, about one mile west of Troutdale, to a point where the old and new highways connect near a place known as Dodson, a distance of 23.98 miles. After due consideration the Commission unanimously approved the request by

the adoption of the attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter from Mrs. Lela Lambert, President, Oregon Roadside Council, to Honorable Douglas McKay, Governor of the State of Oregon, with respect to the appointment of a State Parks Superintendent upon retirement of the present Superintendent, Mr. S. H. Boardman, had the attention of the Commission. The Commission indicated its appreciation for the interest displayed by the Roadside Council, but took no action on the communication.

The Commission discussed briefly and referred to the Engineer for investigation and report, a letter from the Baker County Chamber of Commerce requesting improvement of the Haines-Anthony Lakes State Secondary Highway.

The Commission also considered and referred to the Engineer for report, requests from a number of Granges in Clackamas County for reconstruction of the Woodburn-Sandy State Secondary Highway between Estacada and Springwater, along what they called the "Dubois Creek Survey," in order to avoid the present "steep, narrow and crooked" road, known locally as "Hilltop Road."

The Chief Counsel reported receipt of a resolution from the Common Council of the City of Tillamook, wherein the Highway Commission is requested to make available to the Secretary of State a triangular tract of land situate between Second Avenue and Third Avenue East, near the south highway entrance to Tillamook, as a site for a regional state office structure. The Commission referred the matter to the Engineer for investigation and recommendation.

The Commission considered the date for its next regular meeting. It was recalled that the Commission at its meeting on May 25 and 26, set Thursday and Friday, August 17 and 18, as the date for its next regular meeting, but it now appears that such date is not convenient. After discussion, the Commission decided to hold its next meeting on Monday and Tuesday, August 21 and 22, 1950, and so ordered.

The Commission also decided tentatively to make its Eastern Oregon inspection trip during the week commencing Monday, July 17. (This was later changed to the week beginning Monday, July 24.)

The meeting adjourned at 4:30 p.m.

EXHIBITS "A" THROUGH "C"

Minutes of June 5, 1950

EXHIBIT "A"

Minutes of June 5, 1950

R E S O L U T I O N

WHEREAS, the Pacific Highway East is one of the major state highways of the state and is likewise a part of the Federal Highway System, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that in the vicinity of Jennings Lodge, a short distance north of Oregon City, Clackamas County, there is located on property adjacent to the said highway a cafe known as "Super Cafe" and an inn known as "Antler Inn", and that patrons of said establishments park their cars within the right of way limits of said highway and leave said cars so parked for extended periods of time; and

WHEREAS, the parking of said cars on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission a hazard is created not only to thrcugh traffic but to pedestrians who desire to cross the highway and to the owners and occupants of said parked cars; and

WHEREAS, in the opinion of this Commission, public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of cars should be prohibited.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare, based upcn investigation, reports and recommendation made by and under the supervision of the State Highway Engineer, that the parking of motor vehicles along the Pacific Highway East (US99E) between Mile Post 9.32 (Highway Engineer's Station 141+00), north of "Super Cafe," and Mile Post 9.63 (Highway Engineer's Station 125+00), south of "Antler Inn," a distance of 0.31 mile, in Clackamas County, creates a hazard not only to through traffic but to pedestrians who desire to cross the highway and to persons owning and using said parked cars.

2. That in the opinion of this Commission the right of way of said highway at said location is not of sufficient width to permit parking facilities for cars and at the same time to provide the degree of safety and convenience which in the opinion of this Commission should be provided pedestrians and the motoring public.

3. That this Commission does further find and declare that the parking of cars for long periods of time on the right of way of said highway between said Mile Post 9.32 and said Mile Post 9.63 should be prohibited.

(Cont.)

4. That the State Highway Engineer be and he hereby is instructed to erect NO PARKING ON HIGHWAY SHOULDERS signs at said termini and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as herein declared.

5. That a certified copy of this resolution be sent to the owner and operator of said "Super Cafe" and to the owner and operator of said "Antler Inn", and that a like copy be mailed to the Superintendent of State Police.

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the fifth day of June, 1950.

EXHIBIT "B"

Minutes of June 5, 1950

ORDER REDUCING MAXIMUM LOAD LIMITS

ON WEST DIAMOND LAKE SECONDARY HIGHWAY

WHEREAS, the West Diamond Lake State Secondary Highway has been duly designated and declared to be and is a state highway and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway; and

WHEREAS, said highway is in the judgment of the State Highway Commission being subjected to a kind and character of traffic which will damage and injure the said highway during the present period of freezing and thawing, and in order to protect the highway against such damage and injury it is deemed and is the judgment of the Highway Commission and said Highway Commission finds that it will be for the best interests of said highway that the maximum weights permitted and authorized by law be reduced during such period; and

WHEREAS, the State Highway Commission has after due investigation determined and found and it is the judgment of the Commission that the maximum weights which shall be permitted upon said highway during said period shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission being of the opinion that said West Diamond Lake State Secondary Highway was not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interest of said highway that the maximum total weight of the load and vehicle which shall be permitted upon said highway during the said period commencing on the dates hereinafter specified shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED that the maximum weight of combined load and vehicle or combination of vehicles which shall be permitted upon the following described highway shall not exceed 11,000 pounds gross on any single axle nor 20,000 pounds gross on any pair of tandem axles nor a maximum of 36,000 pounds gross on all axles of the vehicle or combination of vehicles.

Name of Highway and No.		County	Section Restricted (by mile point)	Date Effective 1950
West Diamond Lake State Secondary	233	Douglas and Jackson	Entire Length. (Junction Crater Lake Hwy. to Junction Crater Lake North Hwy.)	June 3

(Cont.)

June 5, 1950

EXHIBIT "B" (Cont.)

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394, O. C. L. A., shall be in full force and effect from the effective date hereinabove specified until modified, annulled, or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the highway and at important crossroads on said highway so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of the counties affected by this order, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this fifth day of June, 1950.

EXHIBIT "C"

Minutes of June 5, 1950

R E S O L U T I O N

WHEREAS, by legislative act, a certain state highway designated as a highway beginning at a junction with the Oregon Coast Highway in Astoria, thence easterly by way of Rainier, Portland, Hood River, The Dalles, Arlington, and Umatilla to the Oregon-Washington State Line near Wallula, Washington, is declared to be and is defined as a state highway, and has been given the name Columbia River Highway and the number 2, and is otherwise designated as U. S. Route No. 30, and

WHEREAS, by virtue of the provisions of Section 100-115, O. C. L. A., the Highway Commission is vested with authority to make such changes in the location of state highways as in its judgment and discretion will result in better alignment, more advantageous and more economical highway maintenance, or as will contribute to and afford a more serviceable system of state highways than is possible under present or existing locations, and

WHEREAS, the Highway Commission has found it necessary and desirable to relocate a section of the said Columbia River Highway No. 2 in Multnomah County, which section is more particularly hereinafter defined, and

WHEREAS, by reason of the relocation of said section of said highway, a portion or unit of the right of way of said highway as originally located has been eliminated and will no longer be needed as a part of the right of way of said section of the Columbia River Highway, and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the facts with respect to the relocation of a portion of the route of the Columbia River Highway, and to likewise impress upon said records the disposition to be made of the section of said highway or right of way eliminated by reason of said relocation,

NOW, THEREFORE, Be it and it hereby is resolved by this Commission, all members being present and voting affirmatively as follows:

1. That the route which begins at Engineer's Station 438+00, which beginning point is otherwise described as approximately one mile west of Troutdale, and extends easterly by way of Columbia River water level route a distance of 19.14 miles to Highway Engineer's Station 1450+00, which point is identified and described as Dodson, hereby is selected, designated, adopted and approved as the route and right of way of said Columbia River Highway between said termini, and said route and right of way location hereby is made a part of the Columbia River Highway and shall have the State Highway No. 2 and U. S. Route No. 30.

(Cont.)

2. That the section of said highway which is described as beginning at the intersection of the original Columbia River Highway with the revised Columbia River Highway at a point approximately one mile west of Troutdale and running thence easterly along the original route of said highway a distance of 23.98 miles to a connection with the revised route of said highway at Dodson, hereby is eliminated as a part of the right of way and route of the Columbia River Highway proper, and hereby is designated, selected and adopted as a secondary state highway, to be known as Crown Point Secondary State Highway No. 125, and shall be maintained by the State as a part of the secondary highway system for the use of persons living thereon and communities served thereby, and for the use and enjoyment of the public in general. (This section is shown colored in red on the attached map, marked Exhibit "A", which map by this reference is made a part of this resolution.) **

3. It is recognized that the Board of County Commissioners of Multnomah County, Oregon, has by formal resolution, duly and regularly adopted and entered in its official records and minutes, requested the Oregon State Highway Commission to select, designate and adopt as a state secondary highway and thereby make and constitute a part of the secondary highway system of the state, the route of and the right of way location above defined, and which, until the relocation of said section of the Columbia River Highway, was a part of the route of said Columbia River Highway, a copy of which resolution has been delivered by said County to the state.

That this resolution shall be entered in the minutes and records of the Highway Commission as of the fifth day of June, 1950.

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being File No. 14 under the heading "Resolutions Adopting Primary Highways," and File No. 16 under the heading "Resolutions Adopting Secondary Highways," and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

Portland, Oregon
July 10, 1950

The State Highway Commission met in regular session in the Green Room of the Imperial Hotel at 9:00 a.m. Present were:

Ben. R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Auditor
H. B. Glaisyer, Secretary

The Commission unanimously approved the minutes of the meetings of the Commission held on April 24 and 25, 1950, and on May 25 and 26, 1950.

The State Parks Engineer, Mr. C. H. Armstrong, reported on the following state parks matters:

1. Proposed agreement with Rolland F. and Evelyn A. Nohlgren re operation of a concession in Silver Falls State Park: The Parks Engineer advised that pursuant to authority previously granted by the Commission he has effected an arrangement with the Nohlgrens to operate this concession and that the arrangement has been set forth in agreement form prepared by the Chief Counsel. He presented the form, the provisions of which were approved by the Commission by unanimous vote. (The agreement was signed by the Commission on the following day.)

2. Overnight camping in Wallowa Lake, Silver Falls and Sunset Bay State Parks: The Parks Engineer presented an outline of the tentative plans of development at each location to provide necessary accommodations, and explained details. He estimated the cost of the proposed development at Wallowa Lake at $37,500; Silver Falls State Park at $42,900; and Sunset Bay at $25,700. He also said that if the Commission approves the projects, the plan is to conduct surveys, prepare plans and specifications, and contract the work this year so that the facilities will be available to the general public in 1951. In the discussion of this matter the Commission expressed the feeling that a demand for overnight camping privileges at these three parks fully justifies the expenditure of the funds required to provide them. Accordingly, the Parks Engineer was authorized to prepare the plans and specifications, and advertise for bids at the earliest possible time for construction of all three projects.

3. Proposed extension of present Vista House concession on the Columbia River Highway at Crown Point: The Parks Engineer advised that the present arrangement with Mr. Jack Flaucher expires on March 31, 1951, and that Mr. Flaucher has made inquiry whether or not

he is going to have the privilege of operating this concession another year, it being necessary for him to have the information this far in advance to allow him to order supplies. He said that Mr. Flaucher has operated the concession in a very fine manner and has returned considerable revenue to the state, amounting to $8,000 in 1948, and $6,300 in 1949. He also said that if this contract is extended, Mr. Flaucher would like to close up the establishment during the months of January and February when business is very slack and there is no particular demand for the service that he renders. He recommended that Mr. Flaucher be granted a one-year extension of this present contract, and that his request to close the concession during January and February be granted. The Commission approved the recommendation unanimously.

4. Report on a fire which occurred in Humbug Mountain State Park, Curry County: The Parks Engineer advised that this fire started from the burning of slashings on adjoining private property and got out of control because of a change in the wind. Very little damage was done to the large timber in the park, he said -- in fact, the park benefited to the extent that some of the undesirable brush was destroyed. The Commission took no action.

5. Construction of latrines in state parks located at Port Orford, Cascadia and Lava Caves; and the re-covering of the upper and lower outside decks of the Vista House: The Parks Engineer requested authority to contract such work, which is estimated to cost about $15,000 and provision for which is contained in the 1950 budget. The Commission approved the request unanimously.

6. Extension of existing agreement with Denny Logging Company covering removal of down-timber and snags in VanDuzer Corridor on the Salmon River Highway: The Parks Engineer advised that the present contract with this concern provides that the company shall pay $4.00 per M-FBM for this timber, which is to be salvaged in connection with the company's operations on adjoining property which it owns, and specifies that the company shall not operate on the highway. The company, he said, is extending its operations westerly about one and one-quarter miles, and has asked that the agreement be extended to cover the removal of similar materials from the state's property along this additional section, at the same rate. He gave as his understanding that the company is a "pretty fair" operator, although he does not have firsthand information because the company has not yet started removal of the timber under its first contract. He recommended approval of the company's request for the extension. As a result of the discussion, the Commission decided to defer action in the matter pending completion of the first contract arrangement. If the operation under the first contract is satisfactory, then the Commission will grant the extension as requested.

7. Request of C. L. Snider, Wilderville, to construct and operate a logging road across state park property in Josephine County: The Commission unanimously confirmed the oral authority previously given the Engineer to allow Mr. Snider to truck-haul logs across this property, which is described as wayside property in Mackin Gulch adjacent to the Pacific

Highway in Sections 26 and 35, Township 33 South, Range 6 West, W.M. (An agreement covering the matter was previously signed by the Commission.)

8. Report on accident that occurred at Silver Falls Youth Camp in Silver Falls State Park, resulting in the death of Harold L. Taylor, Jr.: The Parks Engineer submitted a written report on this subject and explained details. In the discussion he advised that Mrs. Taylor is not satisfied with the arrangements that have been made with the State Industrial Accident Commission to provide for her future welfare, and there is a possibility that she will refuse a settlement and will institute suit to recover a greater amount. The Chief Counsel advised that Mrs. Taylor has two alternatives, viz: she can either accept the allowance that the Industrial Accident Commission gives her, or she can reject the offer and seek to recover from her husband's employer. He advised that were Mrs. Taylor to seek recovery by litigation, suit could not be brought against the state, and if she were successful, the action would be in the nature of a tort, which could not be paid out of state highway funds. He gave as his feeling that it would be necessary for the legislature to pass on her case and to provide monthly payments to be made to her during her lifetime, or the payment of a lump sum. He suggested that Mrs.Taylor be advised to postpone any action that she has in mind until she knows just what the legislature will do for her The Commission referred the matter to the Chief Counsel to follow through, inasmuch as there is nothing that the Commission can do about it at the present time.

9. The Commission discussed briefly and ordered filed, a letter signed by 43 residents of Cascadia and vicinity, stating their appreciation for the work accomplished by Mr. S. H. Boardman as Superintendent of State Parks, and expressing their desire that he be retained in such capacity.

The Right of Way Engineer presented for the Commission's consideration a number of options that have been negotiated in connection with the acquisition of real property needed for state highway improvements. After careful consideration of the provisions of each option, the Commission unanimously approved acquisition of the properties at the prices mentioned therein. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

In the consideration of options obtained for right of way needed for the proposed Pine Street Project in Salem (Item 16158, and those immediately following in the attached resolution marked EXHIBIT "A") a question arose whether or not the Commission previously had authorized construction of this project and an allocation of funds therefor. Chairman Chandler advised that he had been unable to find anything in the records to indicate that the Commission had authorized the taking of bids for the work, or had programmed funds to finance it, notwithstanding that the project is included in the overall agreement with the City of Salem. He gave as his feeling that to clarify the record the Commission should at this time authorize the project and an expenditure of $280,000 of state funds to finance it and an additional improvement in the North Hollywood District when the City has made provision for "off-

street" parking of vehicles. As a result of discussion, the Commission unanimously approved an allocation of $280,000 of state funds to finance both projects, and authorized the Engineer to advertise for bids for construction of the North Hollywood Project when the City of Salem has provided for the off-street parking of vehicles.

The Commission also authorized the financing of the Marion Street Bridge piers project in Salem with state funds, in view of the refusal of the Bureau of Public Roads to approve an allocation of Federal Aid Funds for the purpose as was originally contemplated.

In this connection the Commission also discussed the matter of advertising for bids for construction of the steel spans for the Marion Street Bridge in Salem, and decided unanimously to defer the calling for bids for such work until all matters pertaining to right of way have been disposed of satisfactorily.

In his explanation of matters pertaining to the Salem Project, the Engineer also mentioned the necessity to provide for a new bridge over White River on the Mt. Hood Highway. The Commission deferred a decision in this matter pending inspection of this project during the progress of its proposed trip later in the month.

The Chief Counsel requested authority to institute condemnation proceedings to acquire certain parcels of real property that are needed for various highway improvements and which he has not been able to acquire by negotiation. He submitted the list of such properties, as follows, together with the offers that he recommended in connection with the condemnation proceedings:

		Recommended Offer
Vista Avenue-Multnomah County Line Section of the Sunset Highway		
R 14182 A. J. Paris		
Appraisal of dwelling	$ 18,772.00	
Appraisal of land:		
0.61 acre - 26,572 sq.ft. at 25¢ sq.ft.	6,648.00	
	$ 25,420.00	$ 25,500.00
Unit #2, Sullivan Gulch Highway		
R 14883 R. K. D. Co.		
Value of taking	$ 10,500.00	
Severance damage to remainder	1,500.00	
	$ 12,000.00	12,000.00
Redmond (5th Street) Section of The Dalles-California Highway		
R 16344 John Malick		
0.08 acre - 3485 sq.ft. at 25¢ sq.ft.	$ 871.25	
Damages to remaining property	1,500.00	
	$ 2,371.25	3,000.00

The Commission unanimously approved the request and the recommended offers. The attached resolutions relative thereto, marked EXHIBITS "B-1", "B-2", and "B-3", which resolutions by this reference are made a part hereof with like effect as though extended in full herein, were thereupon adopted by the Commission by unanimous vote.

The Right of Way Engineer requested authority to negotiate acquisition of right of way needed in connection with a street improvement in the town of Bly. He stated that the Commission previously authorized this construction project, but when the right of way was investigated it was found that there are three building encroachments, two of which are of a minor nature, but the third, a loggers' club, will have to be removed at an estimated cost of $2,500. The Chief Counsel was instructed by the Commission to give the owners of all three properties official notice to move their buildings off the highway right of way. He was authorized to obligate an expenditure of $2,500 of state funds in connection therewith if absolutely necessary.

The Commission discussed, and upon recommendation of the Engineer approved deeding to Umatilla County a 2.64-acre tract of state-owned land which was originally acquired as a quarry site but no longer is needed for such purpose.

The Right of Way Engineer reported the results of taking bids in Salem on June 29 for the purchase of a number of buildings in the town of Canyonville. He submitted a list of the high bids received, as follows, and recommended acceptance of all of them at the prices quoted:

Item No.	Item	High Bidder	High Bid	Engrs. Est.
1.	Bldg. No. 15553	No Bids	$ - - -	$ 50.00
2.	Bldg. No. 15554	Mrs. Elmer Stanley, Canyonville	1,705.00	500.00
3.	Bldg. No. 15557	No Bids	- - -	200.00
4.	Bldg. No. 15561	Geo. Stevens, Canyonville	59.00	50.00
5.	Bldg. No. 15563	No Bids	- - -	100.00
6.	Bldg. No. 15085	Alvin Smith, Canyonville	51.00	50.00
7.	Bldg. No. 15086	" " "	201.00	50.00
8.	Bldg. No. 15473	" " "	31.00	25.00
9.	Bldg. No. 15090	Lynn L. Cloud	50.00	25.00

The Engineer and Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Right of Way Engineer also reported negotiated sales of miscellaneous properties, as follows, and recommended confirmation of the sales by the Commission:

File #	Location	High Bid or Sales Price	High Bidder or Purchaser	Items and Remarks
12611	Coos Bay	$ 400.00	Lawrence G.Carrol, Jr., Coos Bay	Buildings in way of construction.
9426	Judkins Point-Springfield Junction	25.00	Walter Lebold, Salem	Cash register in basement since 1942.
15090	Canyonville-Johns Highway 99	30.00	Walter Lebold, Salem	30# computing scale.
14767	Union Avenue-Portland Highway 99E	1,100.00	McCall Oil Co., 2710 SE 50 Ave. Portland	tanks, pumps & other service station equipment

The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Commission discussed a proposed agreement with Edwin and Rosella Norbeck relative to encroachment of their building upon the right of way of the Pacific Highway East in the town of Milwaukie. The Right of Way Enginner advised that the property on which the building is located was acquired by condemnation, and only a portion of the building, a glassed-in porch, is on highway property. He said that the owners of the building have requested the privilege of leaving the building as it is until the property is actually needed for state highway purposes, and they have stated that they will vacate the premises upon thirty days' notice. He recommended approval of the request. The Chief Counsel concurred therein. He also recommended execution of the agreement, which, he said, is simply to protect the state against adverse possession. The Commission unanimously approved the recommendation. (The agreement was signed by the Commission on the following day.)

A request was presented from Beddingfield and Grant, Attorneys, Coos Bay, in behalf of their client, R. H. W. Leathers, to purchase a portion of the old right of way of the Cape Arago State Secondary Highway at the east end of South Slough Bridge in the town of Empire, Coos County. The Engineer recommended against the sale of the property because it will be needed for future highway purposes, particularly in connection with the replacement of the present bridge structure. The Commission approved the recommendation.

The Engineer brought up for discussion the acquisition from the State Land Board of an 80-acre tract of land situate adjacent to the Cow Canyon-Glendale Juntion Section of the Pacific Highway. He stated that this property contains a source of water which is vitally needed in connection with the operation of the section maintenance headquarters located at that place. The State Land Board, he said, refuses to let the Highway Department use any of the water from the spring because it is the only water available for its property, and the Board is fearful that disposal of its water right will adversely affect the sale of its land; however, the Board is willing to sell the entire 80-acre tract to the Highway Department at a cost of about $1,200. He recommended purchase of the property at such figure in order to insure a water supply for the section maintenance headquarters. The Commission approved the recommendation.

The Engineer brought up for discussion a proposed agreement with Hazel Dolan covering the lease of an equipment storage headquarters at Seaside for a period of two years, ending May 1, 1952, at the rate of $25 per month. He advised that this is simply an extension of the prior lease which expired April 30, 1950, the only difference being that the rental rate has been increased from $15 to $25 per month, and that the lease is subject to cancellation by either party upon 60 days' written notice. He recommended approval of the agreement. The Commission approved the recommendation. (The lease agreement with Mrs. Dolan was signed by the Commission on the following day.)

The Commission had under discussion the purchase of private insurance covering buildings owned by the State Highway Department. At the request of Commissioner Reynolds, Mr. C. W. Parker, Property Manager, reported the results of investigations and study he had made of this subject. He particularly pointed out that the State Restoration Fund, which is provided to insure replacement of buildings destroyed by fire, etc., presently contains only $250,000, which would be entirely inadequate should a serious conflagration occur. He mentioned that he has discussed this matter with Mr. Robert B. Taylor, Insurance Commissioner, who suggests after viewing the shop premises in Salem, that the buildings located there should be insured for approximately $600,000 instead of $406,000 as presently listed in the inventory. Mr. Taylor, he said, suggests that the insurance rating bureau be asked to establish a fair insurable value of the buildings at the earliest possible time, and the insurable value of other important highway buildings located throughout the state, with the view of carrying private insurance on the main buildings, such as the shop buildings in Salem, La Grande, Klamath Falls, Coquille and Roseburg, the remaining buildings to be insured as in the past under the State Restoration Fund. Commissioner Reynolds mentioned that the State Restoration Fund would be sufficient to take care of small losses, but not the large ones. He expressed the feeling that private insurance should be purchased to cover the more important structures, and that the remaining buildings, or such of them as is considered advisable, be declared in the inventory that is presented to the Board of Control for coverage under the State Restoration Act. The Engineer recommended purchase of private insurance coverage immediately for the buildings at La Grande, Salem and Klamath Falls, and for the new State Highway Department office building when it is completed. The matter was discussed at considerable length, and as a result thereof the Commission referred the matter back to Commissioner Reynolds with full power to act as he considers advisable. (Commissioner Reynolds reported further on the subject the following day, at which time he made certain recommendations which the Commission approved unanimously. See ahead for additional paragraph.)

The Right of Way Engineer presented a number of small claims against the State Highway Department arising out of right of way settlements, as follows:

1. Claim of the Hardisty Estate, Grant County, for moving right of way fence on the Crow Flat-Grant County Line Section of the John Day-Burns Highway. The Right of Way Engineer explained that this fence was constructed on the highway center line rather than on the edge of the right of way by mistake, through no fault of the owners of the adjacent property who have agreed

to release the state from further obligation if paid the sum of $225. He recommended approval of the settlement. The Commission approved the recommendation.

2. Claim of Farrell E. Lindley for damages which he alleges resulted to his property by reason of construction of the Ladd Canyon Project. The Right of Way Engineer explained that Mr. Lindley's property is located in the town of North Powder and that his house is located in close proximity to the highway right of way; also, that when the right of way was negotiated it was thought that Mr. Lindley would not have to relinquish any of his front yard, which proved to be erroneous. Moreover, the right of way takes in part of Mr. Lindley's chickenhouse. Mr. Lindley, he said, has agreed to give the state a release from further obligation if paid the sum of $300. He recommended approval of such settlement. The Commission approved the recommendation.

3. Claim of Harold Craig in the amount of $400 for construction of a new water system to replace a well located on right of way that was acquired from him for the Ladd Canyon Project. The Right of Way Engineer stated that when this right of way was negotiated it was thought that Mr. Craig's well was beyond the right of way limits, but it was found later that the well was within the right of way, so it was necessary for Mr. Craig to construct a new water system, which he did, at a cost of $400. He recommended that Mr. Craig be reimbursed in such sum. The Commission approved the recommendation.

4. Claim of W. H. Gillinwater for moving a building on the Crescent Section of The Dalles-California Highway. The Right of Way Engineer explained that the land on which the building is located was acquired by the Commission some time ago for the proposed widening of The Dalles-California Highway in the town of Crescent, but the owner was allowed to leave his house on the property pending construction of the highway improvement. It now appears that Mr. Gillinwater, the owner of the house, has plans to improve it but does not want to proceed with the work until the house has been moved to its proper location, which is the obligation of the state. He further stated that there is no housemover available in the town of Crescent and that investigations reveal that it would cost an exorbitant sum to engage a mover from either Klamath Falls or Bend, so Mr. Gillinwater has finally consented to do the moving himself if paid the sum of $600. The Right of Way Engineer gave as his feeling that such sum is fair and reasonable and he recommended approval of the payment. The Commission approved the recommendation.

The Chief Counsel reported settlement of condemnation cases, as follows:

1. State of Oregon vs. Morris Rubenstein, et al, File L 1700. This case involves acquisition of a parcel of land containing 4,395 square feet on the Front Street Project in Coos Bay. The Chief Counsel advised that the original offer in this case was $5,000, which the owners rejected but later accepted. Of such sum, he said, $3,250 has been paid for a warranty deed, but the state has withheld the sum of $1,750 pending removal of the balance of Mr. Rubenstein's property located on the premises, and in the event that any of this personal property remains on the premises after August 15, 1950, the state is authorized to remove it and to deduct the cost thereof from the balance due Mr. Rubenstein. The Commission approved the settlement unanimously.

2. State of Oregon vs. Noyes E. Tyrell, et al, File L 1597.
This case involves the purchase of property needed as right of way for the Dodson-Bonneville Section of the Columbia River Highway. The Chief Counsel advised that the original offer authorized by the Commission was $4,500, which the owner refused. Subsequent thereto, additional appraisals were made by independent appraisers, which appraisals range from $5,000 to $6,200. The Chief Counsel further advised that after considerable negotiations with the attorney for the Tyrells, a stipulation was made and a form of judgment prepared and approved wherein the state agrees to pay the owners the sum of $6,300 for the property plus the sum of $200 attorney's fees; and the Tyrells are not to be given direct access to the highway from their remaining property, but such access shall be by a connection with the existing Bonneville Road. The Commission approved the settlement.

3. State Highway Commission vs. Jacob M. Siglin, et al, File L 1564.
The Chief Counsel advised that this case involves purchase of property necessary for right of way for the Delmar-China Camp Creek Section of the Oregon Cast Highway. The original offer, he said, was $2,800, which was refused. Subsequent to the filing of the complaint and prior to the trial, the property was re-appraised by independent appraisers and the highest appraisal was $3,500, which sum the jury in the case allowed, together with an additional sum of $29.10 as costs and $350 attorney's fees. The Commission approved the settlement unanimously.

The Commission discussed a report from the Chief Counsel on the encroachment of a building owned by Mr. J. Ross Smith, Portland, on Powell Boulevard (Mt. Hood Highway) in Portland. The Chief Counsel advised that the building is located on S. E. Powell Boulevard just east of the intersection with 85th Avenue, and that it encroaches on the highway right of way about six feet. He also said that Mr. Smith has come into ownership of the property only recently, but knew at the time he purchased it that the encroachment existed. He also said that Mr. Smith has been ordered to remove the building from the state's property but has requested permission to maintain it in its present location until such time as the right of way is needed in connection with the proposed improvement of the highway at this point, which improvement, incidentally, is not planned for any time in the near future. The Chief Counsel recommended, in view thereof, that Mr. Smith's request be approved and the matter be covered by appropriate written agreement to protect the state's interests. The Commission approved the recommendation.

The Chief Counsel requested instructions whether or not to continue to seek recovery on the bid bond furnished by State Construction Company in connection with its proposal for the construction of the Salem Bridge piers, in view of the Supreme Court's decision with respect to the Rushlight Case in Portland, which is similar and which was decided in favor of the contractor. He said he did not believe, in view of the decision of the Supreme Court, that the Highway Commission could recover the amount of the bid bond. He is gathering additional information and if that information is not favorable he will recommend to the Commission at its next meeting that the Commission not sue to recover on the bond. As a result of the discussion, a motion was made by Commissioner Reynolds, in view of the far reaching effect of the Supreme

Court's decision, that the Chief Counsel be instructed to do everything in his power to recover the amount of the bid bond. The motion was seconded by Commissioner McIver and carried unanimously.

The Commission discussed a written opinion from the Chief Counsel relative to its authority to control the use of motor boats on lakes and other bodies of water in the state. According to this opinion, the Commission has full control over lakes that it owns, such as Waverly Lake at Albany, but it does not have control over others, such as Wallowa Lake. The Engineer recommended, in view of this opinion, that the use of motor boats be prohibited on lakes which are under control of the State Highway Department, and that appropriate signs bearing such information be erected on the borders of such lakes. The Commission approved the recommendation unanimously and so ordered.

The meeting recessed for luncheon at 12:00 noon and reconvened at 1:45 p.m. with the same persons present and participating. At 2:00 p.m. bids as follows, for highway construction, were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Chandler announced that the awards of contracts would be made at 5:00 p.m. in the same room:

CITY OF SEASIDE IN CLATSOP COUNTY

12th AVENUE BRIDGE PROJECT

Lindstrom Bros., Inc., Portland	$ 33,205.00
Geo. E. Berry, Beaverton	34,930.00

Newport Constr. Co., Portland	69,052.40

Messrs. Ray L. Schee and Orin C. Mills, property owners, Prineville, were present and urged improvement of the Crooked River Highway for a distance of four blocks along South Main Street in their city. Mr. Schee was spokesman. He said that this street, which is the route of the Crooked River Highway, passes through a highly developed portion of their city, and presently consists of a dirt road which is very dusty during the dry season. He urged the oiling of the street and advised that the property owners will cooperate in every way possible. Chairman Chandler advised that this project is a new one to the Commission, but it will be given serious consideration and an engineering investigation will be made to determine just what is necessary. He suggested that the request be made in writing. The Engineer was authorized to make such investigation and report his findings. Following the departure of Messrs. Mills and Schee, discussion of this matter was resumed, during which it was pointed out by the Engineer that the Crooked River Highway is a Primary State Highway, but carries very little traffic. It was the feeling of the Commission that inasmuch as the road is a primary highway route, perhaps something should be done to alleviate the dust nuisance. The Engineer was again instructed to investigate the matter and report his findings at the next meeting.

The Chief Counsel brought up for discussion and requested instructions for the handling of highway funds due a city or town which has disincorporated, with particular reference to the City of Draperville, Linn County. He pointed out that because of its incorporation the City of Draperville became entitled to an allowance of state highway funds which, according to law, were to be expended for street construction, reconstruction, et cetera. He also pointed out that according to the provisions of the law, the amounts to be appropriated to the several cities are certified by the

Commission to the Secretary of State who is required to remit to the cities their allocated share on June 30 and December 31 of each year. It appears, he said, that the City of Draperville disincorporated on May 31, 1950; therefore, insofar as street construction is concerned, jurisdiction lies with the county court of Linn County, and the question now arises whether or not the city is entitled to receive, subsequent to June 30, any part of the highway revenues pursuant to appropriation either by the legislature or by the Highway Commission. He gave as his opinion that the City of Draperville is not entitled to receive or to have allocated to it any highway revenues subsequent to May 31, 1950. As a result of considerable discussion of this matter, the Commission ordered action taken to stop further payments to the City of Draperville, if necessary. The Chief Counsel was instructed to follow through on the matter. (For additional details with respect to the Chief Counsel's opinion on the subject, see copy of his written report to the Commission, dated June 26, 1950, in general files.)

The Chief Counsel requested instructions with reference to a drive-in theater's electric sign, which is being maintained on the westerly side of the Oregon Coast Highway near the city of Gearhart. He said that the sign's removal has been a matter of controversy for some time. He was instructed by the Commission to take necessary steps to have the sign removed.

The Chief Counsel brought up for discussion a claim made by Frank Hall, Eugene, for reimbursement for damage caused to sewer facilities on his property in Eugene by highway construction. He explained that Mr. Hall owns his home, which is adjacent to the recently constructed highway, and during the progress of the highway construction the sewer line, of which the city had no record, was damaged to such an extent that it cost Mr. Hall $117 for repairs, and he has asked reimbursement of such sum. It was the Counsel's opinion that the state is liable for this expense, and he recommended approval of the payment of such sum to Mr. Hall. The Commission approved the recommendation.

The Chief Counsel reported results of collections made through his department for the costs of repairing miscellaneous damage to the state highway equipment and facilities. He said that this function was assigned to Mr. Robert May, one of his attorneys, who has been very successful in the collection of the amounts due, and his purpose in bringing the report to the Commission's attention at this time is simply to let Mr. May have the credit for a job well done. The Commission expressed appreciation for Mr. May's efforts and ordered the report filed.

The Chief Counsel brought up for discussion the application of the Sportsmen Pilots of Oregon for the designation of a beach area near Netarts, Tillamook County, as a private aircraft landing field. He recalled that several months ago the Commission, at the request of this group, set aside temporarily for such purpose a section of beach about one mile long on the sand spit three miles southwest of Netarts, the legal requirements having been satisfied, and that he was instructed to prepare an appropriate form of permit covering the matter. Since then, he said, it has developed that Tillamook County has its own landing field and that a local commission, which serves under the county court, polices the area. It has been proposed, he

said, that the Sportsmen Pilots group withdraw its application, and that the permit be issued in favor of Tillamook County, such permit to contain a special clause to the effect that the State Board of Aeronautics will police the area with the help of the local commission. The Commission indicated its approval of such arrangement and instructed the Chief Counsel to present it to the parties concerned. Further report on the subject is to be rendered by the Chief Counsel at the Commission's next meeting.

The Commission discussed a resolution from the Clatsop County Court relative to the operation of vehicles on the ocean beach in the vicinity of Cannon Beach. The Chief Counsel pointed out that this resolution does not authorize the State Highway Commission to prohibit the operation of vehicles on the beach area, but simply indicates that the County Court wants the Highway Commission to regulate such traffic on the beach, which the Court alleges can be done under existing statutes. He also pointed out that the County Court by its resolution states that it is absolutely not necessary to prohibit vehicular traffic on the beach and that if such traffic were prohibited it would set up a condition which would practically ruin the beach area for resort purposes. In view of this information the Commission decided unanimously to do nothing further about the matter unless and until the County Court will present an unqualified request that this beach area be entirely closed to vehicular traffic. The Chief Counsel was instructed to convey the action to Mrs. Henry Mason, Portland, who represents about thirty property owners in Cannon Beach who petitioned the Highway Commission to prohibit the operation of vehicles on this beach area.

The Chief Counsel reported receipt of a letter from Attorneys Freed and Failing, Portland, regarding settlement of the claim of the Western Union Telegraph Company, amounting to $15,840.38, for the cost of repairing its facilities which were damaged by the Oneonta slide on the upper Columbia River Highway. He said that according to this letter the Western Union Company will settle the claim on the basis of the state's paying one-half of this expense; moreover, the Company will let the Highway Commission examine its records if the Commission wants the figures checked. The Commission approved such settlement unanimously subject to examination of the Company's records by the Commission's Auditor.

The Engineer reported the results of a further study of the need of a traffic signal at the intersection of Fairview Road with US30 (Columbia River Highway), Multnomah County. He recalled that a delegation from Parkrose appeared before the Commission at its last meeting and alleged that traffic counts previously taken at this intersection do not disclose actual conditions, and that there is more need of a traffic signal at this intersection than there is for the existing one at 112th Avenue, near the eastern edge of Parkrose. Recent investigations, he said, reveal that the maximum volume of traffic for any hour is 436 and that the count at the 112th Avenue intersection is 648. He pointed out that the nationally accepted warrant for a signal is 500 vehicles per hour, which indicates that a signal at the Fairview Road intersection is not warranted, but the other one is. In view of the circumstances he recommended that the request for the signal at Fairview Avenue be denied. The Commission approved the recommendation.

The Commission discussed a written report from the Engineer dated June 4, 1950, on a request from the Parkrose Chamber of Commerce for the widening of Sandy Boulevard between "the end of the present improvement and Troutdale." In his report the Engineer advised that the existing highway between 99th Avenue and 108th Avenue, through Parkrose, consists of a concrete pavement 36' wide, with an oiled surfacing on each side extending from the pavement to the existing curbs, thus providing a clear width of 60'. The pavement, he said, was laid in 1927 and the oiled surfacing in 1942, and it should be resurfaced with asphaltic concrete, which would cost about $25,000. The report also revealed that between 108th Avenue and 122nd Avenue, which is the eastern limit of Parkrose, the existing pavement is 27' wide, and that the cost of widening this section to provide a clear width of 60' would be about $90,000. He estimated the cost to widen Sandy Boulevard for four traffic lanes between Parkrose and a connection with the new Columbia River Highway one mile west of Troutdale, a distance of 6.004 miles, at $700,000. The Engineer recommended consideration by the Commission of the first two projects, at an estimated total cost of $115,000, in the formulation of the next construction program, but indefinite deferment of the request for widening between Parkrose and Troutdale. In the discussion of this matter, Commissioner Reynolds expressed his feeling that the improvement is unnecessary at the present time. Commissioner McIver stated that at times the traffic congestion on this section is very bad. The Commission deferred action on the matter pending further inspection of the section by Commissioners Reynolds and McIver. (A delegation from Parkrose appeared the following day regarding this project. See ahead for additional paragraph.)

The Engineer reported on requests from Nehalem Valley Grange and from Jewell Grange #876 for improvement of the Elsie-Jewell Road in Clatsop County, which they declared is closed to traffic during flood periods. He said that this is a county road which presently is being used as the route of the Fishhawk Falls State Secondary Highway, that it is nine miles in length and contains two short sections where the grade line is low at the crossings of Nehalem River. These sections, he said, are subject to flooding for a period of one or two days whenever there is a severe continuous storm which raises the water in the river. To eliminate the flooding condition, he said, will necessitate the raising of the grade line and construction of relief openings, which will cost several thousand dollars. He recommended against the improvement because the road serves only about 250 motor vehicles daily, and because there are short sections on other state highways which likewise are subject to flooding, and which are, in his estimation, far more important than this county road. The Commission approved the recommendation.

The Engineer presented a letter from County Judge H. M. Hoskins, Yamhill County, in reference to an inquiry whether or not Yamhill County is able and willing to contribute an additional $44,000 to assist in financing the construction of a bridge over the Yamhill River on a county road at Carlton. Judge Hoskins advised that it is impossible for the County to provide the additional funds because of the failure of its recent proposed bond issue for highway purposes. He also pointed out that the County is contributing toward this project about $25,000 of County money, which is the limit that it can go without disrupting its program. The Engineer recommended, in view of the circumstances, that the Commission authorize payment of the

extra expense with Federal Aid Secondary Highway funds. As a result of the discussion, the Commission decided unanimously to postpone this project until next year, and to release the County from payment of the extra expense. The funds previously allocated to it are to be kept intact and augmented by sufficient funds from the next apportionment to pay the costs involved, except those that the County has previously agreed to pay. The Commission ordered that the County Court be advised of the action taken.

Consideration was given by the Commission to the recommendation of the Memorials Committee of the Oregon Historical Society with regard to a request from Mrs. Serena Norton for permission to erect a marker on the right of way of the Corvallis-Newport Highway in memory of her great great grandfather, Nahum Amos King, who was a veteran of the War of 1812, and an Oregon Pioneer of 1845. The Committee recommended that the request be denied. The Commission approved the recommendation.

The Engineer reported on the cost to conduct an economic study to determine the feasibility of a new highway extending easterly from Hillsboro along Baseline, to a connection with the Sunset Highway near Portland, which survey was previously requested by a delegation from Hillsboro. He estimated the cost to conduct such study at $1,500. The Commission unanimously approved the expenditure. (Mr. E. J. McAlear, Hillsboro lawyer, appeared before the Commission on the following day with respect to this matter, at which time the Commission's action was conveyed to him.)

The Commission discussed a written report from the Engineer dated June 27, 1950, on the subject of engineering costs incurred in connection with contract projects completed during 1949. In his report the Engineer points out that the average cost of engineering for the entire year, based on almost $19 million dollars worth of construction, is 6.65%, also that engineering costs are rising, so that it is apparent from the 1949 costs that engineering expense no longer can be held to the present 6% limit, but will be very close to 7%. He recommended in view thereof that the Commission authorize an increase in the allowance for engineering and contingencies in connection with all future contracts from 10% to 12½% so as to avoid overruns. The allowance would be applied 8% for engineering and 4½% for contingencies. In support thereof he advised that the Bureau of Public Roads in setting up its budgets allows 15% for engineering and contingencies, and that inquiries reveal there has been a major increase in engineering costs in the past several years in other states in the Pacific Coast area. (For details see copy of Engineer's written report in the general files.) In view of the facts disclosed by the Engineer, the Commission unanimously approved the increase recommended by him.

The Engineer reported the results of taking bids in Salem on June 26 for the sale of merchantable dead timber on the Sunset Highway in Clatsop County, as follows:

F. C. Hathaway, Seaside	$ 6.00 per M-FBM
Gerald Johanson, Astoria	4.30 per M-FBM
VanVleet Logging Company, Cannon Beach	3.10 per M-FBM

He recommended acceptance of the high bid submitted by Mr. F. C. Hathaway, Seaside, at $6.00 per M-FBM. The Commission approved the recommendation.

The Engineer also reported the results of receiving bids in Salem on June 29 for the sale of used equipment and scrap materials located at Salem. He presented a list showing the high bid for each item, as follows:

Item No.	Item	High Bidder	High Bid	Engr's. Est.
1.	Studeb.sedan,Dept.40-177	E. F. Henker, Aumsville	$ 162.50	$ 200.00

The Engineer recommended acceptance of the high bid in each instance with the following exceptions:

1. That all bids received for Item No. 57 be rejected because the high bid is considerably under the value of the equipment.

2. That the bids received for Item No. 39 be rejected and that this item be sold to Oregon State College for the amount of the high bid, $156.75.

3. That the successful bidders for Items No. 13 and 32 be determined by the toss of a coin, inasmuch as two identical offers were received for each of these items.

4. That Item No. 63, Chevrolet pick-up #37-100, be sold to Mr. Ivan R. Thornton, Brownsville, at his offer of $157, inasmuch as the offer of Mr. Leo A. Seamster, Salem, for this item was submitted by mistake,

Mr. Seamster having inadvertently inserted the amount of his bid under item No. 63, whereas he really intended for his bid to apply on Item 62, a Buick sedan #41-178, which information was substantiated by his discussion with the Secretary prior to and subsequent to the opening of bids.

The Commission unanimously approved the recommendations. To determine the successful bidder for Items 13 and 32, for which tie bids were received, the Secretary flipped a coin. John Schweitzer, Portland, won the toss in each instance. The Commission approved the sale of these two items to Mr. Schweitzer at his bid price.

The Engineer reported on the complaints registered by County Judge C. A. Tom, Sherman County, at the previous meeting of the Commission, particularly with respect to a deposit of scrap materials, et cetera, on a vacant lot adjacent to the maintenance headquarters at Rufus, and an alleged hazardous condition that exists at the junction of the old and the new routes of the Columbia River Highway at the westerly end of this town. He said that on June 21, Mr. W. W. Stiffler, Assistant State Highway Engineer, in company with Mr. L. V. Koons, District Maintenance Superintendent, inspected the premises, and as a result instructions were given to remove all scrap iron, steel and building materials from the lot and to take them to the district headquarters at The Dalles, and instructions were also given to eliminate the unsightly appearance of the property by blading. As to the connection between the old and new highway routes, he said instructions had been given to the Division Engineer at Bend to make a survey and submit his recommendation as to what should be done to remove the hazard. Commissioner Reynolds remarked that none of the things mentioned by the Engineer had been taken care of when he drove through the town of Rufus a day or two before the meeting. The Engineer was instructed to see that the matter is taken care of immediately.

The Engineer reported receipt of a communication from the Bureau of Public Roads stating its approval of the removal from the Federal Aid Secondary Highway System of a 1.8 mile section of Federal Aid Secondary Highway No. 538 near Summerville in Union County, and substitution therefor of a county road 2.9 miles in length which extends southerly from the town of Island City to a connection with the Old Oregon Trail (US30). He gave as his feeling that the latter mentioned road is of such importance that it should be improved in the next Federal Aid Secondary Highway Program. The Commission deferred its decision in the matter pending inspection of the road on its trip to the La Grande district later in the month.

Consideration was given by the Commission to a report from the Engineer on a request from the River Road Traffic Safety Committee, Eugene, that a footpath be constructed on the Junction City-Eugene Secondary Highway for the benefit and safety of school children and other pedestrians. The Engineer advised that the present footpath which is built over a portion of the area follows the ground undulations, and a considerable portion of it is covered by water in the wintertime. The delegation, he said, requested construction of a footpath on each side of the highway; however, since then agreement has been reached that the proposed work shall be limited to improvement of the present footpath on one side of the highway, which will be given a fair trial before a second footpath is constructed on the other side. He

estimated the cost to construct such a footpath, consisting of a grade four feet wide with an asphaltic wearing surface, at $10,000 for the two-mile section extending north from Eugene, and he recommended approval of the expenditure, the work to be performed by contract and bids to be taken at the August meeting of the Commission. In the discussion of this matter the question arose whether or not the highway right of way is of sufficient width to accommodate a footpath and if so, whether it is all clear or encumbered with building encroachments, et cetera. The Engineer gave as his understanding that the right of way is 60 feet wide, although in some places residents along the highway have extended their lawns onto the right of way. As a result of this discussion, the Commission unanimously authorized the contracting of the sidewalk construction as recommended, on the condition that there is sufficient width right of way for it and that the abutting property owners offer no objections. The Engineer was authorized and instructed to conduct a survey and stake the right of way limits. The Chief Counsel was instructed to contact the property owners and secure releases from them in writing. The Engineer was authorized to advertise this project for bids to be received when these matters have been satisfactorily disposed of.

The Engineer rendered a status report on the West Portland-Hubbard Highway. He exhibited a map showing the location of the highway, and showing also the estimated cost to construct the highway on a four traffic-lane basis and on a two traffic-lane basis. He pointed out that to complete the project will require 17.33 miles of construction on a four-lane basis, compared with 9.37 miles of construction on a two-lane basis. He pointed out that the estimated cost to complete a two-lane standard highway is $3,260,000, and to construct a four-lane facility is estimated to cost $5,215,400 including right of way, which is approximately the same in each instance. He recalled that the Commission previously approved and adopted a survey for this road and he gave as his understanding that the Commission also previously authorized negotiations for the right of way on the condition, however, that no commitment whatsoever was to be made as to construction of the project. The Commission unanimously confirmed the authority previously given the Right of Way Department to negotiate the right of way. The Chief Counsel was instructed to carry on such negotiations on the basis of a 220 foot right of way, which is required for a standard four-lane highway improvement on the interstate highway system.

The Engineer reported that pursuant to previous instructions from the Commission he made a personal inspection of the Warner Valley Secondary Highway to determine the adequacy of construction completed last year, and the type of surfacing that should be used on the section that is proposed for construction this year. He said that he found there has been some ravelling of the section completed last year but he did not consider it necessary to add additional surfacing at this time. He gave as his belief, however, that a thicker base and a heavier oil mat wearing surface should be provided on the new section, which will increase the cost of the proposed project about $74,000, making a total estimated cost of $274,000. He recommended that the project authorization for this improvement be increased $74,000 to permit construction of the heavier type surface. The Commission approved the recommendation unanimously and so ordered.

The Engineer requested instructions regarding the installation of a traffic signal at the intersection of Arlington Street and US99E in Gladstone.

He recalled that the Commission at its February meeting authorized the installation of this signal, which is estimated to cost $4,000, on the condition that the City of Gladstone pay fifty percent of the expense. The city, he said, was informed of the Commission's action, and has just recently advised that it does not have the money to pay its share and their budget committee does not wish to include the item in its budget for 1951. On the other hand, the city is inclined to the belief that the state should pay the entire cost because it is now issuing permits for truck-hauling of logs which cross the highway at this point. He recommended that nothing further be done with reference to this installation until the city agrees to pay its proportionate share of the cost involved. The Commission approved the recommendation unanimously.

The Engineer requested authority to enter into an agreement with Gas Heat, Inc., Salem, for the rental of one 575-gallon propane tank and one krug hand-pump with accessories, for a period of not to exceed six months, as a trial to determine the practicability of using propane gas for heating asphalt. He gave as his opinion that this method of heating asphalt is better and cheaper than the system now in use, and he recommended that the Commission authorize the renting of this equipment, which he said can be secured at the rate of $4.00 per month, with the idea of purchasing it later on if it proves to be satisfactory. The Commission approved the request unanimously. (A lease agreement with Gas Heat, Inc., covering the matter was signed by the Commission on the following day.)

Pursuant to previous instructions from the Commission, the Engineer reported on his investigations of sites for the construction of restroom facilities at Depoe Bay. He gave as his feeling that the best location for the restrooms is on the seaward side of the stone wall on the west side of the highway, where the top of the restrooms could be constructed flush with the top of the ground so as to maintain an unobstructed view of the ocean from the highway. He estimated the total capital investment involved at $18,000 and the annual maintenance operation cost at about $1,500. Commissioner McIver stated that he recently inspected this place in company with the State Parks Superintendent and that it is his opinion that this spot is and probably always will be one of the most interesting along the coast, and a very important place as a tourist attraction. He pointed out that the federal government is spending a lot of money improving the port facilities at this place, and he gave as his feeling that the people of this community should provide public facilities at their own expense. He also pointed out that at certain times high water from the ocean covers the location proposed for the restrooms, which feature, together with the high cost involved for construction and maintenance, are against the facility as a state proposition. In fact, he said, it would be a shame to desecrate the area with an installation of this kind. Chairman Chandler expressed himself similarly, adding that he personally is not in favor of the state's constructing the facilities. The Commission decided unanimously to postpone indefinitely further consideration of the restrooms.

In this connection the Engineer also reported on his investigations of the request of Mrs. Beulah Moore for public access to her premises through a stone wall on the west side of the highway, near the north end of the Depoe Bay Bridge. The Engineer stated that there are no objections from the highway

standpoint to allowing Mrs. Moore a connection from the present landing under the bridge, where a passageway has been provided for pedestrians to cross under the roadway at the bridge structure. He pointed out that it will be necessary for Mrs. Moore to build a reinforced concrete slab walk from the bridge to the rock bank on her property in accordance with the design of the State Highway Department, and he suggested, if the Commission allows Mrs. Moore to have this connection, that she be required to maintain the facility in perpetuity. The State Parks Superintendent who was present remarked that the construction of a restaurant building on Mrs. Moore's property, as she proposes, would obstruct the ocean view, and would be decidedly adverse to the best interests of the adjacent park. As a result of discussion the Commission decided that another attempt should be made to purchase Mrs. Moore's property. Accordingly, the Chief Counsel was authorized and instructed to carry on negotiations for it.

The Commission discussed with the Engineer matters concerning which delegations are scheduled to appear on the following day, as follows:

1. Request of Parkrose Chamber of Commerce for widening Sandy Boulevard (US30): The Commission decided to postpone action on this matter pending re-inspection of the project by Commissioner McIver.

2. Request of the Philomath City Council for widening the pavement of the Corvallis-Newport Highway full width between curbs through this town: The Engineer estimated the cost of the work at $40,000. The Commission took no action.

3. State Parks Superintendent and State Forester, re disposition of excess waysides along the Sunset and Wilson River Highways: The State Parks Superintendent explained that in the acquisition of some of the right of way for these highways, large tracts were acquired, resulting in the State Highway Department's owning considerably wider right of way than is absolutely necessary. He further stated that the State Forester wishes the Highway Commission to deed to the Forestry Department the excess acreage, which he proposes to reforest; and if the Highway Commission will grant his request, the Forestry Department will deed to the Highway Commission acreage that is needed in connection with Short Sand Beach State Park. He said that no cash outlay is involved, and he recommended the exchange. The Commission deferred a decision pending a discussion of the matter with the State Forester.

4. Request of the Moreland Commercial Club, Portland, for traffic controls on southeast McLoughlin Boulevard (US99E) Portland: The Engineer explained details and recommended approval of an arrangement with the City of Portland for the signalization of this highway on a fifty-fifty cost basis. The Commission deferred a decision pending a discussion of the matter with the delegation.

5. Request of the Southern Oregon Sugar Pine Corporation for permission to operate trucking equipment having four-wheel trailers and an overall length of 56 feet on the Tiller-Trail and Crater Lake Highways from Tiller to White City, near Medford: The Engineer explained details and recommended that the Commission join with the company on a fifty-fifty basis in the widening of the Tiller-Trail Highway so that loads of

such size may be transported over it with safety. He estimated the total cost of the work at $15,000, of which the state's share would consist of paying the cost of furnishing two or three trucks for hauling and fifty percent of the expense of flagmen. The Commission approved the recommendation. (For details see copy of Engineer's written report dated July 6, 1950, in general files.)

6. Roger L. Dick, Attorney, The Dalles, in behalf of residents of the City of Boardman regarding plans of the Commission to reroute the Old Oregon Trail through the Boardman district: The Engineer reported that the survey for this improvement, extending from Heppner Junction to Boardman, has been completed. He exhibited a map showing three alternate locations and explained details in connection with each. He recommended adoption of the center alternate location, colored blue on the map, with a connecting road between the Boardman-Stanfield Highway and the existing Columbia River Highway at Coyote overcrossing so as to eliminate the sharp turn in the present highway at the latter mentioned point. He requested the Commission's approval of the survey as recommended, and authority for the Right of Way Department to carry on negotiations for acquisition of needed right of way. As a result of careful consideration the Commission by unanimous vote approved the survey as recommended. The Chief Counsel was authorized to negotiate immediately for needed right of way, and the Engineer was authorized to advertise the project for bids as soon as right of way matters have been clarified, the understanding being that construction shall start at the Boardman end of the section and extend westerly as far as it is possible to go with the $590,000 which has been budgeted for this purpose.

In this connection the Engineer also reported that the survey for the location of the Mehama-Mill City Section of the North Santiam Highway in Marion County, is completed. He exhibited a map showing the located alignment and he explained details in connection therewith. He asked the Commission to approve the survey and to authorize the Right of Way Department to negotiate for the needed right of way. After careful consideration, the Commission by unanimous vote adopted this survey as recommended by the Engineer. The Chief Counsel was authorized to negotiate immediately for right of way. The Engineer was authorized to advertise for bids when right of way matters have been clarified. The attached resolution, marked EXHIBIT "C", approving both surveys as reported by the Engineer, which resolution by this reference is made a part hereof with like effect as thou h extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Commission discussed with the Engineer the bids received at the 2:00 p.m. opening for highway construction, and at 5:00 p.m. Chairman Chandler publicly announced the Commission's decision with respect to each project, as follows, the action of the Commission being by unanimous vote:

"Construction of the 12th Avenue Bridge in the city of Seaside, Clatsop County. The Commission received nine bids on this project, the low one being that of Lindstrom Bros., Inc., Portland, at

$33,205. The Commission has awarded the contract to Lindstrom Bros., Inc., at their bid price.

"2.10 miles of grading and paving on the Chrome Plant-Cedar Point Section of the Oregon Coast Highway north of Coquille, Coos County. E. L. Gates & Co., Inc., Medford, was the low bidder on this job at $379,324. There were five higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to E. L. Gates & Co., low bidder, when certain conditions have been satisfied.

"Construction of a maintenance building at Prospect on the Crater Lake Highway, Jackson County. R. H. Jones, Hillsboro, submitted the low bid for this project at $11,897. The Commission received four higher bids. The contract has been awarded to R. H. Jones at his bid price.

"Pavement widening and resurfacing on the Ashland Undercrossing Section of the Pacific Highway, Jackson County. The Commission received three bids on this job, the low one being that of Valley Concrete Co., Independence, at $26,213. The Commission has accepted the bid and awarded the contract to the low bidder, Valley Concrete Co. at its bid price.

"Construction of a latrine in Neptune State Park on the Oregon Coast Highway south of Yachats, Lane County. Robert C. Wilson, Corvallis, submitted the low bid for this project, at $3,220. There were three higher bids. The Commission has awarded the contract to the low bidder, Robert C. Wilson, at his bid price.

"Rock Production Project on the North Santiam Secondary and Santiam Highways, about 80 miles east of Albany, Linn and Jefferson Counties. The Commission received two bids on this project, the low one being that of A. H. Saxton & Sons, Corvallis, at $20,580. Grover C. Pomeroy & C. R. Badger, Salem, submitted the other bid at $23,275. The Commission has awarded the contract to the low bidder, A. H. Saxton & Sons at their bid price.

"Construction of a dwelling at the Blue Mountain or Basque Patrol Station on the I.O.N. Highway, Malheur County. Wm. B. Hickey, Burns, submitted the low bid on this job, at $6,964. There were three higher bids. The contract has been awarded to Wm. B. Hickey at his bid price.

"13.2 miles of bituminous pavement seal on the Crown Point-Dodson Section of the Crown Point Secondary Highway (old Columbia River Highway) Multnomah County. The low bid for this work was submitted by D-H Paving Co., Vancouver, Washington, at $7,350. There were three higher bids. The Commission has awarded the contract to D-H Paving Company at its bid price.

"Construction of the "Yach" Bridge over Little Nestucca River on the Little Nestucca Highway, Tillamook County. The Commission received eight bids on this project, the low one being that of Wall & Son, Portland, at $25,660. The contract has been awarded to the low bidder, Wall & Son, at their bid price.

"Recoiling project in Division No. 4-A on four state highways in the vicinity of Hood River, The Dalles, Maupin and Wasco in Wasco, Hood River and Sherman Counties. Babler Bros., Inc., Portland, was the low bidder on this project, at $47,611.60. Six higher bids were received. The Commission has awarded the contract to the low bidder, Babler Bros., Inc., at their bid price."

The meeting adjourned at 5:05 p.m. to reconvene the following morning in the same room.

Portland, Oregon
July 11, 1950

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the following persons present and participating:

Ben. R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Auditor
H. B. Glaisyer, Secretary

At 9:00 a.m. bids as follows for highway construction were opened and read aloud by the Secretary pursuant to previously published notice, following which Chairman Chandler announced that the award of contracts would be made at 4:00 p.m. in the same room.

WOODSON AND OAK STREETS SECTION

O. C. Yocom Co., McMinnville	19,197.00
Warren Northwest Inc., Portland	21,610.00

Mr. H. E. Nordlund, Safety Engineer for the General Casualty Company, appeared before the Commission concerning employment of a full-time safety engineer for the State Highway Department. He pointed out that the General Casualty Company is now entering its second year as carrier of equipment accident insurance for the State of Oregon and that during the past year the insurance company has employed three full-time engineers to work with the various state agencies, including highway engineers, foremen and equipment

operators, in an educational program to prevent accidents. He said that fine cooperation has been received from the various employes contacted and much good has been accomplished, including a reduction of $20,000 in premium expense. The insurance company representatives, however, not being employed by the Highway Department, lack authority to place any definite program into effect. He gave as his feeling that the Highway Department would receive further benefits and premium reductions were the Commission to employ a full-time safety engineer, and he so recommended. The matter was discussed at some length but no action was taken. Following Mr. Nordlund's departure, the discussion was resumed and as a result thereof the Engineer was instructed to prepare a report containing his recommendations on the employment of a safety engineer, and to include therein the names of qualified personnel.

A delegation representing the Mohawk Valley Improvement Association, Lane County, was present concerning the improvement of the Marcola County Road (FAS Highway No. 228). This group was headed by Mr. T. L. Elvins, President, and included Murry Nedean, Claude Downing, Russell Campbell and Henry Page, officers of the Association, all of Mohawk. Mr. Elvins was spokesman. He stated that the Marcola Road is in very bad condition and that they were promised its improvement by a member of the Lane County Court who stated that such improvement would be financed with some of the first federal aid funds allotted to Lane County. He urged the Commission to proceed with the improvement, not on the present alignment, but in a new location that would coincide with a proposed highway extending northerly from the Willamette Highway at Goshen through Marcola, Holley, Stayton, Woodburn and on to Kelso, Washington. He exhibited a map showing the route of the proposed road and advised that their purpose is to secure a good road that can be traveled during their lifetime. He suggested that it be constructed as a toll road, if necessary. The group was informed by Chairman Chandler that the State Highway Commission has made no promise whatsoever, or indication to the Lane County Court that it would build the Marcola Road. According to the Engineer's estimate, he said, it would take about $500,000 to finance the work, which is entirely too costly for the Highway Commission to handle at the present time. He pointed out that the road is a county road under the jurisdiction of the county court, although it has been designated as a Federal Aid Secondary Highway and is eligible for federal funds, but it is not in the current construction program and indications are that its improvement is for a long time in the future, in view of which the Commission can make no promises now. As to Mr. Elvin's suggestion that the road be constructed as a toll road, Chairman Chandler advised that the Commission is opposed to toll road construction. This concluded the conference.

A delegation representing the Parkrose Chamber of Commerce and consisting of Harry H. Pearce, Director; Cliff Curry, Secretary; Robert A. Freeman, Treasurer, and Harry Cosgrove and W. M. Bowerman, members, appeared before the Commission regarding the improvement of Sandy Boulevard (US30) from the end of the presently improved section at 108th Avenue to Troutdale. Mr. Pearce headed the group. He particularly urged construction of a four-lane highway between 108th Avenue and 122nd Avenue, the existing highway being, in his estimation, entirely inadequate to handle present-day traffic, and much less able to handle the traffic there will be when heavy production is resumed at the Aluminum Plant near Troutdale. The group was informed by Chairman Chandler that as a result of this delegation's previous appearance before the Commission the

Engineer was instructed to investigate the section between 108th Avenue and 122nd Avenue, including the installation of curbs, but nothing was said at the time about extending the improvement to Troutdale. To improve the section between 122nd Avenue and Fairview, he said, is a costly project which the Commission is financially unable to undertake -- the only improvement the Commission can consider now is the project that was previously requested. The Commission will, he added, bear such project in mind in formulating its next construction program, although no definite promise or commitment can be made at this time. He inquired whether or not the people of Parkrose will construct sidewalks along this section if the state constructs a full width pavement, and stated that the Commission must have assurance that the local people will construct the sidewalks if the Commission proceeds with this project. Mr. Pearce replied that from inquiries he has made, he believes the people will cooperate to that extent. The matter was discussed at considerable length, but the Commission made no promise or commitment with respect to the project, other than to state that it will be given consideration in the formulation of the next construction program.

Mr. Freeman asked for the oiling of the shoulders along this highway between 108th and 122nd Avenues, and the cleaning out of debris that was left in the drainage ditches by the state's contractor, and from last winter's storms. The matter was referred by the Commission to the Engineer to investigate.

Following departure of the group, the Commission decided to make a personal inspection of the premises before making a definite decision.

The meeting recessed at 12:15 p.m. and reconvened at 1:30 p.m. with the same persons present and participating.

The following persons representing the City Council of the City of Philomath were present and urged the widening of the pavement on the Corvallis-Newport Highway, full width between curbs, through their city: Hon. Clifford Gee, Mayor, and Councilmen Gordon T. Larson, R. E. Scott and Pete Baker. Mr. Gee was spokesman for the group. He urged this improvement from the standpoint of traffic volume and gave figures showing the volume of traffic that passed over this street during the period 4:00 p.m. to 8:00 p.m. on July 10, as follows: passenger cars, 1,334; commercial vehicles, 430; loaded logging trucks, 130. Mr. Gee also stated that the city has under contemplation the construction of a sewer system next year, which will be installed along the edge of the present highway pavement. He urged the improvement of the highway, including drainage and construction of curbs, immediately following their sewer pipe installations. He also said that if it would be of any help to the Commission, three blocks of the proposed improvement could be done now without interfering with their plans for the sewer installation. As a result of discussion, the Engineer was instructed by the Commission to study the project and report his findings.

Mrs. Marion Y. Malston, Manager, Allen's Press Clipping Bureau, Portland, was present and asked the Commission to reconsider its previous action discontinuing the services of their bureau. The Commission indicated that it does not care to continue this service, but informed Mrs. Malston that the matter would be discussed.

Mr. S. H. Boardman, State Parks Superintendent, and George Spaur, State Forester, Salem, appeared before the Commission concerning a proposed exchange of excess wayside areas along the Sunset Highway and the Wilson River Highway, for timber areas adjacent to Short Sand Beach State Park. Mr. Boardman explained that the State Highway Department in connection with the acquisition of right of way for these two highways also acquired large acreages of burnt-over wayside land which is of no particular value for highway purposes, and that the State Forester desires to secure title to this acreage so he can rehabilitate it in connection with other reforestation work that he now has underway in that vicinity. He said that there are about 2,230 acres of excess property along the Sunset Highway and 2,062 acres along the Wilson River Highway, in exchange for which the Forestry Department will deed to the State Highway Commission two timber tracts containing 156 acres of land, which are essential for the proper development of Short Sand Beach State Park, and can not be obtained in any other manner. He recommended approval of the exchange, subject to retention by the Highway Commission of a right of way 400 feet wide along both highways, and areas that contain materials that are needed for highway construction. Mr. Spaur confirmed the statements made by Mr. Boardman, and said that he has the money and the manpower immediately available to perform the reforestation work, which he will extend onto the highway right of way where possible, if the Commission so desires. The Parks Superintendent exhibited maps showing the location of the properties involved in the exchange.

As a result of discussion, the Commission unanimously approved the exchange of the areas outlined by the Parks Superintendent.

Mr. Boardman also presented for the Commission's consideration a proposal for the development of a state park along the Columbia River about five miles upstream from McNary Dam. He said that there are available at this location two tracts of government-owned land, one of which contains 22 acres located near what is known as Cold Springs, and that either one is suitable for recreational purposes. He also said that the Army Engineers have funds available for construction of roadways and water supply, and perhaps for partial development of the area, so the cost to the state will be very little. He recommended that a study be made with the view in mind of acquiring one of the tracts for the purpose intended. The Commission approved the recommendation unanimously.

The Parks Superintendent brought to the Commission's attention the desirability of acquiring additional land for the John Day Fossil Beds State Park on the John Day Highway in Grant and Wheeler Counties. He recalled that a few years ago negotiations were carried on for the acquisition of 886 acres of land from the owner, Mr. James Cant, but the matter was dropped due to a difference of opinion concerning the value of the property, Mr. Cant having demanded $5.00 per acre whereas the state could not justify more than $2.50 per acre. He advised that this area is the only place in the world where erosion has made visible earth formations dating back millions of years, and is of great importance from the geological standpoint. He recommended that authority be granted to renew the negotiations, and he advised that an amount has been included in the 1950 budget to acquire the property in the event a satisfactory settlement can be reached, and if the Commission approves. The Commission unanimously authorized the negotiations as requested. The Parks

Superintendent was instructed to report the results thereof at the next meeting of the Commission.

A delegation from Portland representing the Moreland Commercial Club and the East Moreland Community Club appeared before the Commission in the interests of an improved access to the Pacific Highway East (McLoughlin Boulevard) at the Bybee Avenue underpass in Portland. Included in the delegation were Messrs. W. J. Prendergast, E. E. Alford and William R. Coon representing the Moreland Commercial Club, and Messrs. William McAlister, Del Milne and Glenn McCarty representing the East Moreland Community Club. Mr. Prendergast was principle spokesman for the group. He declared that the present connection facility at this location is dangerous and entirely inadequate due to the extremely heavy traffic on the state highway which makes it almost impossible at times for city-bound traffic from Bybee Avenue to enter the highway, and for highway traffic from the south to enter Bybee Avenue at this point. He said that a number of accidents have already occurred at this intersection and he urged that some sort of traffic control be provided to prevent additional accidents. Mr. McCarty endorsed the remarks of Mr. Prendergast, particularly pointing out the hazards that obtain because of existing conditions.

In the discussion that followed, Mr. Prendergast stated that they brought this matter to the attention of the City Traffic Engineer, who disclaimed responsibility on the part of the city and declared that such responsibility lies entirely with the state. Chairman Chandler replied that it is as much the city's duty to provide proper traffic control along this thoroughfare as it is the state's duty. He also said that the Highway Commission is willing to join with the city in providing necessary traffic control along this highway if the city is willing to pay fifty percent of the costs involved, subject only to the recommendation of the Engineer, who, he said, might recommend allowing no traffic whatsoever to enter the highway at this point. He authorized the delegation to carry to the city officials a message to that effect. The Engineer was instructed to give the matter further study and to consult with the members of the delegation, particularly Mr. Prendergast, in connection therewith.

Mr. Elton V. Jackson, Manager, Southern Oregon Sugar Pine Corporation, Medford, was present and urged certain improvements to the Dead Horse Canyon Section of the Tiller Trail Secondary Highway No. 230, Douglas County, so that trucking equipment having four-wheel trailers and overall length of 56 feet can operate over this highway with safety. Chairman Chandler advised that the Commission on the previous day discussed this matter with the Engineer, and at that time authorized the improvements in conformity with the tentative arrangement that the Engineer has effected with the company to do certain widening work, estimated to cost about $15,000, on the basis that the company and the state will share the expense approximately equally. The Commission's approval, he said, was given with the understanding that the operation of such trucking equipment over this highway, after the work is completed, will be subject to and depend upon the results of a test run. Mr. Jackson expressed his approval of the arrangement and stated that he is ready to proceed with the work the following Monday. He was told to consult with Mr. W. W. Stiffler, 2nd Assistant State Highway Engineer, concerning details.

A delegation from the town of Boardman, Morrow County, representing the City Council and interested citizens was present regarding the proposed revision of the Old Oregon Trail through this town. The delegation was headed by Mr. Roger L. Dick, The Dalles, Attorney for the group, and included the following: Royal B. Rands, Mayor; Councilmen Dewey W. West, Jr. and R. A. Parker; Arthur Allen, citizen, and Newton P. Lesh, Assistant Secretary, Northwest Oil Company, Portland. Mr. Dick, who was spokesman for the group, gave as their understanding that the State Highway Commission proposes to reroute the Old Oregon Trail so that it will bypass the town of Boardman. He said that he does not know the reason why the change is being made, but he presumes that some emergency exists which he believes could be corrected if the Commission were fully cognizant of the effect that the change will have on the people of this town. He asked the Commission to give careful consideration, in its deliberation of this subject, to the financial losses the people of Boardman will suffer. Because, he said, the people rely on the state to protect them and their property. He asked the Commission to give due consideration to the problem from what he stated is the "human standpoint" as well as the practical standpoint, and he suggested that a satisfactory solution would be the widening of the existing highway rather that the relocation of the highway. He presented a brief in support of his oral arguments, signed by all members of the City Council, in which the following reasons were given for their request that the highway be retained and improved in its present location:

1. A change in the highway as proposed would require a very large expenditure of funds, which could be avoided by improvement of the present highway.

2. Were the highway changed as proposed, it would result in a diminution of the present safety factor on the highway as it is now located, because there are no crossroads within the area, except within the city limits of Boardman where a restricted speed zone has been designated.

3. The proposed change would destroy much of the scenic value of the highway.

4. The relocation of the highway as proposed would result in the economic destruction of the City of Boardman where several hundred thousand dollars' worth of private property would be rendered almost valueless.

Mr. Dick also presented a resolution adopted by the Boardman City Council requesting improvement of the highway at its present location. A resolution was also presented from the Morrow County Court proclaiming its desire to have the highway retained in the present position as being in the best interests, welfare and safety, not only of the citizens of Boardman but also of the general public which passes through Boardman. A petition by property owners of the city of Boardman requesting the retention of the present highway route and offering right of way along such route was also presented by Mr. Dick. In this connection he filed executed options secured from all the property owners within the city of Boardman whose property would be needed in connection with widening of the present highway. In further

support of their request, Mr. Dick presented an agreement signed by a number of citizens of Boardman whereby they guarantee contributions totalling $8,760 for the purchase of additional right of way in the city of Boardman if the Highway Commission will retain the highway in its present location.

Chairman Chandler complimented the group on its presentation. He advised that the Commission has given this matter very careful study for some time and has considered it from all standpoints. Moreover, surveys have been made of several routes, and it was only on the previous day that the Commission finally decided to adopt a revised route as recommended by the Engineer, which route bypasses the town of Boardman but provides for a convenient connection into the town. He also said that the Engineer has been authorized to prepare descriptions of the right of way and that the Right of Way Department has been authorized to acquire the right of way as soon as the descriptions are made available. As to the safety factor, he said that in the acquisition of right of way the Highway Commission will also acquire access rights, so traffic will be allowed to enter the highway only at designated points. This matter was discussed further, but the Commission made no change in the action taken on the previous day.

Mr. E. J. McAlear, lawyer, Hillsboro, came before the Commission regarding a proposed highway extending due east from Hillsboro along Baseline to a connection with the Sunset Highway near Portland. He particularly inquired whether or not the Commission has acted on a request presented by a Washington County delegation some time ago for a survey to determine the feasibility of such a road. He was informed by Chairman Chandler that the Commission on the previous day authorized the Engineer to make an economic study of the situation, and an expenditure of $1,500 for the purpose. Mr. McAlear thanked the Commission for its consideration.

Mr. J. R. Pierson, Eugene, was present regarding his previous request for an opening in the median strip on Franklin Boulevard (US99) at its intersection with Agate Street in Eugene to permit highway traffic to reverse direction at this point. He stated that pursuant to the Commission's previous instructions he contacted certain businessmen in Eugene who are interested in this matter, and was successful in ra'sing the sum of $540.00 to assist in financing the project, which is estimated to cost $2,425.00. He asked the Commission to accept this sum as payment in full on the part of the local people, and to proceed with the work. The Commission took the matter under advisement.

Following Mr. Pierson's departure, the Commission again discussed the matter and at that time unanimously accepted the $540.00 contribution as payment in full of the obligation of the local people. The Engineer was instructed to proceed with the work.

The Commission had under discussion the appointment of a State Parks Superintendent to fill the vacancy caused by the retirement of Mr. S. H. Boardman on July 1, 1950. It was recalled that two years ago at the request of Mr. Boardman, Mr. C. H. Armstrong, who had been an employe of the State Highway Department in an engineering capacity since 1919, was appointed as his

understudy, with the understanding that, if his services proved satisfactory, he would succeed Mr. Boardman as State Parks Superintendent upon Mr. Boardman's retirement. It was the feeling of the Commission that this decision should be carried out, whereupon a motion was made, duly seconded and carried unanimously that Mr. C. H. Armstrong be appointed State Parks Superintendent as of July 1, 1950, at a salary to be determined by Civil Service regulations.

In this connection the Commission also discussed the employment status of Mr. S. H. Boardman. It was the feeling of the Commission that Mr. Boardman's services should be retained in some capacity, if possible, because of his intimate knowledge of park matters in this state gathered through the many years that he served as Superintendent of State Parks. In view thereof, the Commission decided unanimously to retain Mr. Boardman as State Parks Consultant, subject to regulations of the State Retirement Board, which allows year oy year appointment with pay for 600 hours of work. Chairman Chandler conveyed such information to Mr. Boardman and informed him that the matter of his salary will be decided later.

The Chief Counsel brought up for discussion a proposed settlement of the controversy with Mr. Wade F. Palmer, who at one time did business in Eugene under the name "Golden Fir Lumber Company." He explained that in November, 1948, the Commission leased to Mr. Palmer a tract of state-owned land on which Mr. Palmer proposed to stockpile lumber, and under the terms of that agreement Mr. Palmer agreed to pay $400 annually as rent. He was also required to furnish the state a bond in the amount of $1,000 to guarantee payment of the rent and cleanup of the premises. Mr. Palmer, he said, became involved financially and neglected to pay the rental charge. Moreover, he has disposed of his property so he has nothing left to pay off his indebtedness to the state. He further explained that due to the circumstances, demand was made upon Mr. Palmer's bond for two years' rental ($800) but the company refused to pay it, indicating, however, that it will consider a compromise settlement. He suggested settlement for the amount of $400, with the understanding that the company either will clean up the premises or will pay the state $100 to do the work. The Commission unanimously approved such settlement.

The Commission discussed and upon recommendation of the Engineer unanimously denied a request from numerous citizens of the city of Pendleton, transmitted through the Pendleton City Council, for the reopening of the Southwest 20th Street grade crossing of the Union Pacific Railroad tracks in Pendleton.

A letter was presented from R. T. Tuttle, Road Committee Chairman, Associated Businessmen of the McKenzie Highway, urging improvement of the McKenzie Highway to take care of the increased traffic which he declared this road carries. The Engineer advised that the average through-traffic on this highway is approximately 400 vehicles per day, although it increases rapidly toward Springfield. At Blue River the average is 1,000 vehicles daily, and near Springfield it approximates 3,500 vehicles daily. He further stated that no survey of the highway has been made to determine the cost to reconstruct it, but other studies indicate that a modern two-lane standard highway with adequate surfacing cannot be built for less that $60,000 per mile, or about $2,700,000 for the 45-mile section between Springfield and Willamette National Forest Boundary. He gave as his belief that there are more critical sections

on the primary highway system which should be given consideration before the McKenzie Highway is improved. The Commission concurred in the viewpoint of the Engineer and accordingly denied the request.

A letter was presented from Robert N. Dove, Salem, pointing out that a dangerous condition exists at the Four Corners intersection on the North Santiam Highway east of Salem, and suggesting some means of traffic control at this point. The Engineer advised that this matter has been investigated by the Traffic Engineer, who reports that fourteen accidents have occurred at this intersection during the past four years, practically all of them the result of uncontrolled turning movements. The intersection, he said, is a very busy one, approximately 6,500 vehicles passing through it daily. He also said that the Traffic Engineer recommends as a correction of the condition, the installation of a flashing beacon which will flash red on the non-highway legs of the intersection and amber on the highway legs, with a green arrow which will allow right-turn movements at all times. He estimated the cost of the installation at $264.00 and recommended approval of the expenditure. The Commission approved the recommendation unanimously.

A letter from the Baker County Chamber of Commerce requesting early improvement of the Haines-Anthony Lakes Secondary Highway, was presented. The Engineer stated that this highway is 12.6 miles in length and is surfaced with intermittent sections of gravel and/or decomposed granite. Also, that the road is difficult to travel during the winter months and is dusty and becomes corrugated during the dry season. He estimated at approximately $250,000 the cost to provide an oil surface highway that meets modern standards.

In the discussion of this matter the Engineer pointed out that the tentative construction program for 1952-54 contains an item of $300,000 of federal secondary monies for the improvement of the Baker-Salisbury Section of the Baker-Unity Highway. He suggested that the people of Baker might prefer improvement of the Haines-Anthony Lakes Highway, and, if so, the Commission might consider such project in lieu of the other. The Commission deferred a decision in the matter pending inspection of the highway on its trip through Eastern Oregon later in the month.

The Engineer brought up for discussion a request from the U. S. Army Engineers that the state, in its call for bids for the oiling of a 1.39 mile section of the Willamette Highway around Meridian Dam (bids opened at this letting), include the surfacing and oiling of detours at the expense of the government. He said that there are 2.69 miles of detours involved, of which the estimated surfacing cost is $39,000, and he advised that the Army Engineers have agreed in writing to reimburse the state for the actual cost of the work, plus ten percent for engineering and contingencies. He recommended approval of the request. The Commission approved the recommendation unanimously.

A petition was presented bearing the signatures of 752 residents of the town of Dexter and other nearby cities and towns in Lane County, requesting modification and improvement of the proposed means of access which will be made to and from the Willamette Highway east and west from the town of Dexter. The Engineer advised that this matter has been investigated, and the facts disclose the following:

1. That the access between the new and old highways, west of Dexter, which is now only 17 feet wide, should be widened to a surface width of 22 feet.

2. That the connection between the old and new highways east of Dexter should also be widened, and provision made for separation of traffic on the old road as traffic leaves and enters.

3. That the petitioners' request that all approach roads be widened to at least 30 feet is not justified, particularly in view of the fact that the surfacing on the main highway is only 24 feet wide.

4. In addition to the improvements requested in the petition, he said, the people of Dexter have asked for the lowering of a culvert under the old highway, and that this old highway be repaired before it is turned over to the county for maintenance. He gave as his feeling that the culvert should be lowered, if the town of Dexter will improve the outlet and inlet ditches, and that the old highway should be patched before it is turned back fo the county.

He recommended approval of the improvements as outlined above, which he estimated would cost about $1,000. The Commssion approved the recommendation unanimously.

The Engineer presented for the Commission's consideration a compromise settlement of the claim of Contractor Del R. Beebe for extra compensation arising out of the construction of the Delmar-Coaledo Section of the Oregon Coast Highway, Coos County. The Engineer stated that Mr. Beebe's original claim in the amount of $64,674 was for a line revision to avoid displacing the Southern Pacific Railroad, resulting in an increase of 103,600 yards of excavation, a considerable amount of which was in rocky material. The claim, he said, was entirely out of reason when compared with the overall cost, but a careful analysis reveals that the payment of $19,684 is justified, and Mr. Beebe has agreed to accept said sum as payment in full. He recommended approval of such settlement. The Commission approved the recommendation unanimously.

The Commission had under discussion a request from the City of Warrenton for an extension of the present highway contract at this place to include certain construction to eliminate a hazardous condition that exists on the adjoining section. The Engineer advised that this matter has been investigated and it has been determined that the present improvement should be extended about one-quarter of a mile. He estimated the cost of the additional improvement at $7,000 and recommended approval of the work, and that he be authorized to advertise the project for bids to be received at the August meeting of the Commission, in view of the fact that it is illegal to extend an existing contract. The Commission approved the recommendation and so ordered.

A petition was presented from residents and property owners along the Elkton-Sutherlin Secondary Highway requesting the oiling of a portion of such highway extending from its junction with US99 south of Sutherlin to its junction with the Umpqua County Road. The Engineer stated that this road is quite dusty during the summer season, and is also unstable during the winter; that

it has never been improved, and is not in a satisfactory condition to receive an oil treatment. He recommended that no attempt be made to oil the existing road until funds are available to reconstruct it properly. The Commission approved the recommendation, and agreed to give the project consideration in the formulation of future construction programs.

The Engineer reported a request from the Hood River County Court for the replacement of the Dee Bridge over the middle fork of Hood River, as a Federal Aid Secondary Highway project. He advised that the existing bridge is a 126-foot timber span structure, built in 1917, and now is in a bad state of repair. In fact, the truss is in such condition that it is being retained in service only by reason of temporary repairs, and the structure is in danger of failing at any time. He estimated the cost to replace the bridge at $40,000, and recommended that the project be given serious consideration by the Commission in the formulation of its next construction program. The Commission deferred a decision in the matter pending personal inspection of the bridge during the progress of its Eastern Oregon trip later in the month.

The Commission unanimously confirmed verbal authority given the Engineer on June 29, 1950, to spend $40,000 for the widening of eleven curves on the Oregon Coast Highway between Buena Vista Park, a short distance south of Gold Beach, and Carpenterville. This work, which is necessary to permit operation of truck and full trailer equipment having an overall length of 60 feet, is to be done as a minor betterment project.

The Engineer requested authority to spend $8,500 of state highway funds to widen the Union Creek Bridge on the Crater Lake Highway, in Jackson County. He explained that the existing bridge is only 20 feet wide, and is entirely too narrow to accommodate vehicular traffic and pedestrians at the same time with safety. He recalled that a number of years ago a footbridge was constructed adjacent to this highway structure, but this has now decayed to the extent that it is unsafe and has been blocked off to pedestrian use. The proposed widening, he said, will include the widening of the vehicular roadway, and the construction of a sidewalk on each side. He recommended approval of the expenditure because of the large volume of pedestrian traffic that crosses this structure during the recreational season. The Commission approved the expenditure unanimously.

The Engineer presented a list of sixty-seven cities and towns which have fulfilled the legal requirements for the expenditure of State Tax Street Funds accruing to them during the last six months' period of 1949. He said that the plans for the improvements proposed to be financed with such funds have been examined and found satisfactory, and he recommended approval of the plans by the Commission. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed and approved a proposed agreement with the City of Redmond providing for a one-way street plan for state highway traffic on The Dalles-California Highway. By this agreement Sixth Street is designated a one-way street for southbound traffic, and Fifth Street is

designated a one-way street for northbound traffic. The agreement also provides that the state shall do certain things, including construction of the Fifth Street route, and that the city shall do certain things. (The agreement was signed by the Commission later in the session.)

In this connection the Engineer advised that when the plans for the Redmond project were prepared it was not contemplated that curbs or sidewalks would be constructed along the northerly portion of the Fifth Street route where there is no existing development. The city now advises, however, that it plans to construct sidewalks throughout the entire length of the project this year, and has requested that the construction of curbs be included in the Highway Commission's contract. He estimated the cost of the curb construction at approximately $10,000 and recommended approval of the expenditure. The Commission approved the recommendation unanimously, and authorized a $10,000 increase in the project authorization.

The Commission considered and approved an agreement with the City of Amity providing for the improvement of certain city streets as a Special State Tax Street Fund Project. (The agreement was signed later in the session.)

The Commission also discussed a proposed agreement with the City of Helix, covering the improvement of Columbia Street in that town as a Special State Tax Street Fund Project. The agreement provides that the state shall pay the entire cost, which was originally estimated at $14,500; however, a review of the bids received at this meeting reveals that the project will cost approximately $16,500. The Commission unanimously approved a maximum expenditure of $15,000 of state funds for this purpose and agreed to award the contract to the low bidder, Newport Construction Company, if the City of Helix will pay the costs over and above such sum. The matter was referred to the Engineer to ascertain the attitude of the city with respect thereto.

The Commission discussed a petition signed by approximately 250 residents of Tigard, Beaverton and vicinity, requesting the installation of automatic electric railroad signals at the grade crossing of the Southern Pacific Railroad and the Beaverton-Aurora Secondary Highway No. 141 at M.P. 2.55, Washington County. The Engineer advised that this matter has been investigated by the Traffic Engineer, who states that the sight distance at this crossing is not obstructed and gives as his opinion that speeding is the principle reason why accidents have occurred at this crossing during the past fifteen years. The Engineer also stated that he consulted with the Superintendent of the Southern Pacific Company, Mr. L. P. Hopkins, concerning the matter, and it is Mr. Hopkins' opinion that the installation of signals at this crossing would not result in any benefit to the Southern Pacific Company, so if the signal is installed it should be paid for by the county. The Engineer recommended that the request be denied insofar as the State Highway Department is concerned. The Commission approved the recommendation.

The Engineer reported that a check of the quantities in connection with the contract for the construction of the Luder Creek-Murphy Camp Section of the Umpqua Highway, Douglas County, indicates that the project authorization will overrun approximately $18,000, or 9.5 percent. The main reason for the

overrun, he said, is an increase in general excavation caused by "overbreak" and slides. He requested approval of an $18,000 increase in the project authorization for this job. The Commission approved the request.

The Engineer also requested authority to proceed with the preparation of a design for a proposed bridge over the Coquille River at a place known as Bullard's Ferry, near Bandon, in view of information received from County Judge L. D. Felsheim to the effect that Coos County has approved a bond issue to pay its share of the cost of this proposed structure, which was the condition imposed by the Highway Commission for the construction of the bridge. He estimated that it would cost about $8,000 to make the design. The Commission approved the expenditure.

The Engineer requested authority for an expenditure of $30,000 to finance construction of an equipment storage building and two cottages at the Flora Maintenance Headquarters on the Enterprise-Lewiston Highway. He said that the Highway Department has been renting quarters at this place on a month-to-month basis, but recently the owner of the building served notice that the building no longer would be available and that the property must be vacated before July 10, 1950, so it is necessary for the state to furnish its own buildings as there are no others available at this place. He explained that the estimated cost is distributed as follows:

Equipment storage building 32' x 52'	$13,500
Two cottages to house members of the maintenance crew - $7,000 each	14,000
Grading and surfacing grounds and supplying gas pump and septic tank	2,500
	$ 30,000

He advised that the 1950 budget contains an item of $15,000 for this purpose, so if the Commission approves the project it will be necessary to double the budgeted amount. He exhibited a floorplan of the proposed cottages. The Commission unanimously approved the request, subject to the review of the plans for the cottages by Commissioner McIver to whom they were referred with full power to act for the Commission. The Commission also authorized the transfer of $15,000 from the capital fund to the building fund in the maintenance account to take care of the extra expense.

The Engineer requested authority to enter into a contract agreement with General Construction Company to make wash-boring tests, as are necessary, to determine whether or not materials in the bed of the Columbia River are suitable for the construction of embankments in connection with the proposed improvement of the Columbia River Highway between Hood River and Mosier. He said that he has discussed this matter with the company, which has agreed to perform the work at a complete cost of $276 a day, plus $500 lump sum for towing their equipment to and from the job. He estimated that it would take approximately 15 days to do the work and that the total cost would be about $4,640. He presented for the Commission's consideration a form of agreement with the

company covering the matter. The Commission approved the arrangement unanimously and thereupon signed the agreement, which previously had been signed by the General Construction Company.

The Engineer reported that pursuant to authority previously given him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission on April 24 and 25, and on May 26, 1950, the conditions of the awards having been satisfied:

Construction of Coos Bay (Fir Avenue-Ingersoll Avenue) Section of Oregon Coast Highway, Coos County. Bids received April 24, contract awarded May 26 to Coos Bay Dredging Company, low bidder.

Construction of Salisbury Junction-Poker Creek Section of the Sumpter Valley Secondary Highway, Baker County. Bids received April 25, contract awarded June 7 to Allen E. Sackett, low bidder.

Construction of Brookings-California State Line Section of Oregon Coast Highway, Curry County. Bids received May 26, contract awarded June 28 to Parker-Schram Company, low bidder.

Construction of the South Unit, Joseph-Wallowa Lake Section of the Joseph-Wallowa Lake Secondary Highway, Wallowa County. Bids received May 26, contract awarded June 8 to Durbin Bros., low bidder.

The Commission by unanimous vote confirmed such contract awards.

The Commission had under consideration the allocation of additional funds to finance construction of the Siletz-Logsden Road in Lincoln County from the end of the construction presently proposed, to the town of Logsden, which is the end of the designated Federal Aid Secondary Highway. The Engineer advised that the distance between Siletz and Logsden is 7.59 miles. He recalled that the Commission at this meeting opened bids for construction of the westerly four mile section, the low bid for the same being in the amount of $112,326, and he estimated the cost to complete the grading of the remaining section, 3.59 miles in length, at $95,000, including a small bridge across Scott Creek. He pointed out that there are not sufficient secondary highway funds available in the 1950-51 program in Division No. 2 to finance the additional project, in view of which he suggested that, if the Commission wants to go ahead with the work, the $95,000 be allocated from the first-year Federal Aid Secondary Funds in the Commission's next program, which funds he predicted should be available this fall. As a result of discussion of this matter, the Commission decided unanimously to reject the bid received today for the construction of the Siletz-Bentilla Creek Section, and to combine that project with the Bentilla Creek-Logsden Section so as to complete the two sections simultaneously in the next construction program. The Commission ordered that the funds set up for the Siletz-Bentilla Creek Project be held intact until the new federal monies are available.

A letter was presented from the County Court of Clatsop County requesting the elimination of a dangerous hazard which the court alleges exists on the lower Columbia River Highway in the vicinity of the Big Creek Logging

Company's railroad overcrossing. The Commission deferred a decision in this matter pending rendition by the Engineer of the results of a reconnaissance and economic survey of this highway, and others in Clatsop County, which survey is now being carried on.

There was presented for the Commission's consideration a form of a proposed agreement with James L. Payne, Architect, Salem, covering preparation by him of designs for highway department buildings, which agreement was authorized by the Commission at the previous meeting. It appeared to the Commission that the agreement had been prepared in conformity with the ideas expressed at such meeting, so the Commission approved it unanimously. (The agreement was signed later in the session.)

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

1. Erick Enquist, Contract No. 3077, for construction of Long Tom River Bridges on the Siuslaw Highway, Lane County, requested an additional extension of time from October 31, 1949 to April 23, 1950, within which to complete this job. He gave the following reason for failure to complete the project within the previously extended time limit: "To comply with the policy of the Highway Commission and the request by the Engineering Department." The Engineer advised that this job was completed within the previously extended time limit, except for some repainting of steel handrails and the removal of some forms. Moreover, the structures were open to traffic before the expiration of the extended time limit. He pointed out that the first extension of time was granted with the understanding that engineering costs incurred after August 31, 1949, were to be assessed against the contract. He recommended that the extension of time now requested be granted without additional penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

2. Leslie W. Stoker, Contract No. 3188, for construction of a reinforced concrete viaduct over the John Day River, and 0.56 mile of city street on the Prairie City (Bridge Street) Section in Grant County, requested an additional extension of time of 13 days, from April 30 to May 13, 1950, within which to complete this job. He alleged that he failed to complete the project within the previously extended time limit because of cold, damp weather. The Engineer advised that all work on this structure with the exception of painting of handrail and finishing of concrete surfaces was completed prior to November 30, 1949, the completion date specified in the contract; further, that the contractor was directed to discontinue the painting and surface finishing work until suitable weather obtained in the spring. Weather conditions were such, he said, that it was necessary to postpone the work again, so it was not completed until May 13, 1950. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

3. F. O. Laws, Contract No. 3268, for rock production on the Lincoln County Line-Alsea Mountain Section of the Alsea Highway in Benton and

Lincoln Counties, requested an extension of time of 20 days, from June 20 to July 20, 1950, within which to complete this job. He alleged that the reduced load limit placed by the Commission on this highway in the early spring did not permit him to transport his heavy equipment to the job, so he could not commence the work as soon as anticipated. The Engineer advised that the reason given by Mr. Laws for overrunning the time limit is correct. He further stated that the state has suffered no inconvenience by the delay, and he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

4. Jed Wilson, Contract No. 3254, for rock production on the Klaskanie Summit-Columbia County Line Section of the Nehalem Secondary Highway, Clatsop County, requested an extension of time of 30 days from June 30 to July 30, 1950, within which to complete this job. He gave the following reasons for overrunning the specified time limit: working on other state projects; adverse weather conditions which delayed completion of his obligations at Seaside; insufficient area on which to stockpile materials at the Jewell site, and his desire to dry-screen rock prior to crushing, which could not be done during wet weather. The Engineer advised that this contractor has been furnishing stockpile materials for the state under a purchase order, and his operations under the contract were delayed by reason thereof. He also said that the contractor's operations to a certain extent were handicapped by bad weather conditions. The delay, he added, has not inconvenienced the state nor increased engineering costs, in view of which he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

5. Fred Lemery, Contract No. 3259, for rock production on the Trail and Eagle Point Sections of the Crater Lake, Tiller-Trail and Little Butte Highways in Jackson County, requested an extension of time of 60 days from June 30, 1950, to August 30, 1950, within which to complete this project. He advised that he was unable to move his equipment onto the job until February 20, due to icy conditions of the highways, and for this reason was unable to complete the project within the specified time limit. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time is correct. Moreover, it was of advantage to the Highway Department not to have this heavy equipment moved on the highway. He also said that the state has suffered no inconvenience by reason of the overrun of time limit, in view of which he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

6. E. C. Swaggart, Contract No. 3207, for grading and oil mat surfacing on the Forest Boundary-Unity Junction Section of the John Day Highway, Baker County, requested an extension of time of 30 days, from July 31 to August 31, 1950, within which to complete this job. He stated that he was compelled to overrun the specified time limit because he could not work during the winter months, and the grading operations were held up by a long wet spring season. The Engineer stated that the state has not suffered any serious inconvenience by reason of the delay, except that it has incurred some extra engineering expense. He recommended that the extension of time as requested be granted, subject to the condition

that the contractor shall reimburse the state for the engineering charges from July 31, 1950, up to the date of completion of the job. The Commission approved the recommendation.

7. Rogers Construction Co., Contract No. 3082, for construction of bituminous macadam surfacing on the Troutdale-Dodson Section of the Columbia River Highway, Multnomah County, requested an extension of time of 229 days from October 31, 1949, to June 17, 1950, within which to complete this job. They stated that the project overran the time limit because they were instructed by the Assistant Division Engineer to discontinue crushing operations at Tunnel Point on August 13, 1949, and to set up a crushing plant at Coopey Quarry in May, 1950. The Engineer advised that the contractor had completed all bituminous macadam surfacing on the project within the specified time limit, and that the only work remaining was the stockpiling of maintenance materials. The traveling public, he said, has not been inconvenienced by the delay, neither has the state incurred any extra expense for engineering. He recommended in view thereof that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

8. R. & M. Construction Company, Contract No. 3273, for re-decking the Sandy River Bridge on the Columbia River Highway (old route), Multnomah County, requested an extension of time of 68 days, from June 30 to September 7, 1950, within which to complete this job. They gave as a reason for overrunning the time limit, a request from the State Bridge Engineer, Mr. G. S. Paxson, that construction on the project be postponed until after the smelt run in the Sandy River. The Engineer advised that this contract was scheduled for completion by June 30, 1950, and that the contractor normally would have started work early in the spring; however, the Fish and Game Commission requested that commencement of the work be postponed until after the smelt run in the Sandy River, which request was granted, and as a result thereof the work was delayed some 68 days. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

9. R. & M. Construction Company, Contract No. 3221, for construction of guardrail and sight posts on the Troutdale-Dodson Section of the Columbia River Highway, Multnomah County, requested an extension of time of 61 days, from June 15 to August 15, 1950, within which to complete this job. They attributed their failure to complete the project within the specified time limit to unfavorable weather conditions which did not allow necessary painting. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct. He further stated that the state has suffered no inconvenience by virtue of the delay, and for that reason it is his recommendation that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

The Commission in discussing the requests for extensions of time as listed above considered but did not necessarily adopt either the recommendations of the Engineer or the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that Contracts Nos. 2788, 2984, 3006, 3113, 3119, 3213, 3224, 3243, 3249, 3266, 3271, 3278, 3317, 3077, 3149, 3178, 3188, 3209, and 3298, for construction of state highway projects, have been completed according to the requirements of the contracts, or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Bids received at the morning session, for highway construction projects, were discussed with the Engineer by the Commission, and at 4:00 p.m. Chairman Chandler announced the Commission's decision with respect to each project, as follows, the action of the Commission being by unanimous vote:

"Grading and paving the 5th Street Section of The Dalles-California Highway in the city of Redmond, Deschutes County. F. L. Somers, Klamath Falls, was the low bidder for this job at $139,905, using metal sewer pipe, and $133,730, using concrete pipe. There were five higher bids. The bids have been referred to the Engineer with authority to award the contract to the low bidder, F. L. Somers, using concrete pipe, when certain conditions have been satisfied.

"0.31 mile of paving on Locust Street in the City of Oakland, Douglas County. The Commission received no bids for this project.

"Grading, surfacing and oiling on "B" Street in the city of Yoncalla, Douglas County. No bids were received for this project.

"Rock Production Project on the Mt. Vernon-Prairie City Section of the John Day Highway in Grant County. The Commission received three bids for this work, the low one being that of E. H. Itschner, Molalla, at $18,980. The Commission has referred the bids to the Engineer with authority to award the contract to E. H. Itschner, low bidder, when certain conditions have been satisfied.

"Surfacing and oiling the Hamilton Hill Section of the Kimberly-Long Creek Highway in Grant County. The low bid for this project was submitted by E. H. Itschner, Molalla, at $67,708. The Commission received five higher bids. The award of this contract has been made to the low bidder, E. H. Itschner, at his bid price.

"0.25 mile of paving on West Main Street in the City of Eagle Point, Jackson County. Valley Concrete Co., Independence, submitted the low bid on this job at $12,900. The next high and only other bid was submitted by Central Heating Co., Eugene, at $15,120. The Commission has awarded the contract to Valley Concrete Co. at its bid price.

"Surfacing and oiling the Meridian Dam Detours Section of the Willamette Highway, about 24 miles southeast of Eugene, Lane County. The Commission received only two bids for this work, the low one being that of Roy L. Houck & Son, Salem, at $68,549 using asphalt. Leonard & Slate, Ore. Ltd., submitted the only other bid, it being $77,913 using asphalt. Neither of the contractors submitted a bid based on the use of tar. The contract has been awarded to the low bidder, Roy L. Houck & Son, at their bid price.

"Grading and surfacing the Siletz-Bentilla Creek Section of the Siletz-Logsden County Road near Siletz, Lincoln County. Five bids were received for this project, the low one being that of Groesbeck & Hickson, Eugene, at $112,326. The Commission has rejected all the bids as being too high.

"Grading and paving the Scio-Thomas Creek and Scio Sections on the Albany-Lyons Secondary Highway near Scio; and on Main, North and West Streets in Scio, Linn County. K. F. Jacobsen Co., Portland, submitted the low bid for this project at $152,109 using asphalt. They submitted no bid based on the use of tar. The Commission received three higher bids. The contract has been awarded to the low bidder, K. F. Jacobsen Co., at their bid price using asphalt.

"0.59 mile of grading and paving on Kirk Avenue in the City of Brownsville, Linn County. The Commission received only two bids for this project, being those of Porter W. Yett, Portland, at $23,300, and Warren Northwest, Inc., Portland, at $26,837.50. The bids have been referred to the Engineer with authority to award the contract to the low bidder, Porter W. Yett, when certain conditions have been satisfied.

"Grading, surfacing and oiling on 7th Street in the City of Harrisburg, Linn County. Harrisburg Sand & Gravel Co., Harrisburg, submitted the only bid received for this project, at $5,619.78. The Commission has awarded the contract to the Harrisburg Sand & Gravel Co. at their bid price.

"Reoiling project on the Tudor Ranch-McDermitt Section of the I.O.N. Highway, Malheur County. Three bids were received for this job, the low one being that of J. C. Compton Co., McMinnville, at $24,633.50. The Commission has awarded the contract to the low bidder, J. C. Compton Co., at its bid price.

"Grade widening, paving and furnishing crushed materials in stockpile on the Ontario-Nyssa Section of the Old Oregon Trail Highway, Malheur County. The bid of Rogers Construction Co. & Babler Bros., Inc., Portland, was low on this job, being $229,812. The Commission received three higher bids. The contract has been awarded to Rogers Construction Co. & Babler Bros., Inc., low bidders, at their bid price.

"Grading and paving on Pine, Commercial and Liberty Streets in Salem, Marion County. Warren Northwest, Inc., Portland, submitted the low bid for this project at $215,080 using asphalt, and $215,048 based on

the use of tar. There were three higher bids. The Commission has awarded the contract to Warren Northwest, Inc. at its bid price based on the use of tar.

"Grade widening and paving the Garibaldi Section of the Oregon Coast Highway, Tillamook County. The Commission received three bids for this job, the low one being submitted by Warren Northwest, Inc., Portland, at $51,848.30. Award of this contract has been made to Warren Northwest, Inc., low bidder, at its bid price.

"0.45 mile of grading, surfacing and oiling on the West Nehalem Section of the Manzanita-Wheeler County Road (present route of the Oregon Coast Highway) Tillamook County. Stevenson Construction Co., Salem, submitted the low bid for this project at $38,717, based on the use of asphalt. They submitted no bid based on the use of tar. There were seven higher bids. The Commission has awarded the contract to Stevenson Construction Company, low bidder, at their bid price based on the use of asphalt.

"Grading, surfacing and oiling on Columbia Street in the city of Helix, about 16 miles northeast of Pendleton. Three bids were submitted for this work, the low one being that of Newport Construction Co., Portland, at $14,904. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Newport Construction Co., when certain conditions have been satisfied.

"Grading and roadbed topping on the Hilgard Junction-Red Bridge Section of the Starkey Secondary Highway in Union County. Groesbeck & Hickson, Eugene, submitted the low bid for this project at $71,004.50. They qualified their bid by stating that they would accept the award of only one project at this letting. The Commission received thirteen higher bids for this job. The contract has been awarded to Groesbeck & Hickson, low bidders, at their bid price.

"0.82 mile of grading, surfacing and oiling on the Wallowa Lake Highway and on Park and Alamo Streets in Enterprise, Wallowa County. Russell Olson Construction Company, Pendleton, submitted the low bid for this project at $34,850. There were two higher bids. The Commission has awarded the contract to Russell Olson Construction Company at its bid price.

"Grading, surfacing and oiling project on the Joseph-Wallowa Lake Secondary Highway and on McCully Avenue and Alder Street in Joseph, Wallowa County. Only one bid was submitted for this job, it being that of Rush Construction Company, Enterprise, at $48,442. The Commission has rejected the bid as being too high.

"0.23 mile of grading and paving on the Broadway Avenue Section of the Beaverton-Hillsdale Highway in the city of Beaverton, Washington County. Three bids were received for this project, the one of Parker-Schram Co., Portland, being low at $8,896.50. The Commission has awarded the contract to the low bidder, Parker-Schram Co., at its bid price.

"Grading and paving on Woodson and Oak Streets in the city of Amity, Yamhill County. The Commission received two bids on this project, that of O. C. Yocom Company, McMinnville, at $19,197, and that of Warren Northwest, Inc., Portland, at $21,610. The contract has been awarded to O. C. Yocom Company, low bidder, at its bid price."

A letter was presented from Arthur R. Kirkham, Vice President, K O I N, Portland, suggesting the development of picnic areas along US99E and US99W between Portland and Eugene, and along other arterial highways; also suggesting the erection of small signs pointing out to tourists special landscape features. Mr. Kirkham suggests also the need for development of viewpoints along certain highways, particularly mentioning the "rim rock" at Abert Lake on the Burns-Lakeview Highway. The Commission decided to give special attention to the things mentioned by Mr. Kirkham during the progress of its Eastern Oregon trip later in the month.

A letter was presented from the Baker County Chamber of Commerce Roads and Highways Committee requesting that the old route of the Old Oregon Trail between North Powder and La Grande be designated "US30 Alternate", and that appropriate signs be placed at each end of the new route of this highway. The Engineer pointed out that the designation of national highway routes is a function of the American Association of State Highway Officials, which he did not believe would approve such designation. He recommended that the request be denied. The Commission approved the recommendation.

Consideration was given by the Commission to the renewal of its subscription to the Highway Research Correlation Service for the fiscal year July 1, 1950 to June 30, 1951, at a cost of $1,898. The Engineer advised that this service is important, and of considerable value to the State Highway Department. He recommended that the subscription be renewed. The Commission approved the recommendation unanimously.

The Engineer presented for the Commission's consideration the type and description of the research project proposed to the Highway Research Board by the Committee on Highway Transport of the American Association of State Highway Officials, having to do with the effect of heavy axle loadings on existing pavements. He explained that the proposal is for this project to be sponsored jointly by all the State Highway Departments and be administered and directed by the Highway Research Board; also, it is expected that each State Highway Department will be asked to contribute $10,000 toward the financing of the project. He strongly recommended that the Oregon State Highway Department participate in this project. The Commission deferred a decision in this matter pending receipt of additional information from the Highway Research Board.

The Commission had under discussion the matter of extending its prior agreement with the City of Portland and the Secretary of State for a cooperative analysis of motor vehicle accidents. The Engineer recalled that the Commission, at its meeting on September 29, 1947, entered into the original agreement which expired December 31, 1949, although the participating parties have been operating under the provisions of that agreement since that expiration date. He further stated that the agreement provides that the state

and city police shall report accidents to the Secretary of State, who shall compile them and furnish copies of the compilation to the highway traffic engineer for further analysis. The City of Portland, he said, requires additional information, for which it has been paying the sum of $200 per month, but the proposal now is to get the City to increase its monthly payments to at least $300. He recommended that the agreement be renewed. The Commission approved the recommendation.

The Engineer reported that the State Speed Control Board on June 26, 1950, established a speed zone of 35 miles per hour on the westerly half of the Pacific Highway East within the corporate limits of Woodburn. The east city limits of Woodburn, he said, is common with the center line of the highway, so the action of the Speed Control Board, which has jurisdiction only within the city limits, has caused a peculiar situation -- the speed limit along the westerly half of the highway is 35 miles per hour, whereas a higher speed is allowed along the easterly half, which is outside of the city and under the control of the State Highway Commission. He recommended that the Commission take appropriate action to establish a 35 mile per hour speed limit on the easterly side of the highway. The Commission approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A request was presented from the Molalla Chamber of Commerce for such action as is necessary to reduce the speed of traffic which passes through the state highway intersection about one mile west of Molalla. The Engineer advised that on the section of highway in question the pavement is only 20 feet wide, with 6-foot shoulders, and roadside culture consists of residences, service stations and minor business establishments. He said that the average daily traffic along this section during 1948 was 2,000, and that during the three year period between January 1, 1946 and December 31, 1949, thirty-one accidents occurred, more than twice the average rate throughout the state. He recommended the designation of a 45 mile per hour speed zone for a distance of 1.27 miles, extending westerly from the west city limits of Molalla (M.P. 12.27 to M.P. 11.0), which will include the intersection referred to. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A request was presented from the Tillamook County Court for the designation of a "NO PARKING" area along the Wilson River Highway about two miles east of Tillamook where the court alleges a hazardous condition exists by reason of the parking of logging trucks on the highway right of way. The Engineer advised that this matter has been investigated by the Traffic Engineer, who states that a hazard does indeed exist at this point by reason of the parking of logging trucks, which sometimes stop partially on the paved surface of the highway. The Traffic Engineer, he said, recommends that a "NO PARKING ON HIGHWAY SHOULDERS" zone be established between M.P. 2.04 and M.P. 2.16, which is a distance of about 600 feet extending in each direction from the intersection of Schild County Road, where a highway cafe and service station are patronized by the log haulers. He stated his concurrence in the recommendation. The

Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed and upon recommendation of the Engineer approved an agreement with P. L. and Virginia Finley, wherein the Finleys are granted permission to remove a small amount of earth materials from the right of way of the Columbia River Highway at Biggs Junction, in conjunction with the removal of several thousand yards of earth materials from adjacent property, which they own and are developing. (The agreement was signed by the Commission later in the session.)

The Commission also considered and upon recommendation of the Engineer approved an agreement with Evans Products Company, Coos Bay, covering construction and operation of a log scaling station and service road on the Oregon Coast Highway at M.P. 264.78 near Manning Slough, Coos County. (The agreement was signed later in the session.)

A letter was presented from Mr. Peter Shea, Portland, requesting permission to operate a popcorn, soft drink, ice cream and hot dog wagon at "Reeds Landing" on the Columbia River Highway, near Troutdale. The Commission denied the request as a matter of policy.

The Engineer asked the Commission to confirm the oral authority given him on June 9, 1950, to reinstate the P.U.C. log hauling permit of George Bristol Eddy, Springfield, Oregon, which was cancelled by the Commission at its meeting on May 26, for consistent violation of the rules and regulations governing his operations. He presented a letter from Mr. Eddy stating that if his permit is reinstated he will hereafter comply with all the rules and regulations governing his operations in all respects, including weights, dimensions and the submission of his loads to weighing on request. Mr. Eddy also agrees that if the permit is reinstated it will be with the understanding that it will be immediately cancelled on a permanent basis for further violations. The Commission approved the reinstatement of the permit.

The Engineer reported the need to post the McKenzie Highway between M.P. 58.0 and M.P. 75.67 for a reduced load limit of 50 percent on June 16, this section being between White Branch Creek Bridge and the Deschutes County Line. He asked the Commission to approve his action. The Commission approved the posting of this highway as recommended, and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "J", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that on June 26, he ordered restoration of legal weight loads on the Weston-Elgin Highway throughout its entire length; that on July 5, he ordered restoration of the legal weight loads on the McKenzie Highway between M.P. 58.0 and M.P. 75.67; and that on July 10, he ordered the legal weight loads restored on the West Diamond Lake Highway No. 233, throughout its entire length, the conditions which necessitated the posting of these highways for reduced loads no longer existing. He asked the Commis-

sion to confirm his action. The Commission approved the lifting of reduced load limits on each of these highways. The attached resolution relative thereto, marked EXHIBIT "J", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Engineer brought up for discussion a letter from Colonel Whipple, District Engineer, U. S. War Department, Walla Walla, Washington, regarding the furnishing of a bond and insurance in connection with the construction of underpinning under a state highway bridge crossing Catherine Creek in the city of Union, Union County. According to Colonel Whipple, the War Department cannot legally require a contractor to furnish such bond and insurance, so if such protection is absolutely needed by the state, the responsibility for furnishing it rests with the Union City Council. The Engineer advised that the underpinning is being constructed by the War Department under contract, and that the bond and insurance were required as protection for highway traffic during the time construction is underway, which is in conformity with standard policy. The probability that highway traffic would be endangered by this construction, he said, is very remote, and he suggested, in view of the circumstances, that it would be satisfactory to relieve both the Army Engineers and the city from the obligation to furnish the bond and the insurance. The Commission approved the recommendation.

The Engineer requested authority to submit to the Capitol Planning Commission a proposed plan for landscaping the new Highway Department office building grounds in Salem. He exhibited the plans as presently prepared. The Commission approved the plans as presented and authorized the Engineer to submit them to the Capitol Planning Commission for its approval.

The Commission discussed and ordered filed a letter from Mr. Ralph Walstrom, Portland, criticizing the Commission for its action with respect to maintenance of a stairway that is used by residents of the Highland District, Portland, in going to and from a bus stop on the Sunset Highway (Canyon Road) in Portland.

The Engineer requested authority for an expenditure of $10,835 for the purchase of office furniture and equipment, engineering equipment and blueprinting equipment, as detailed in his letter to the Commission dated July 5, 1950. The Commission approved the request unanimously.

The Commission confirmed authority previously granted the State Parks Superintendent to attend, at state expense, a meeting of the Columbia Basin Inter-Agency Sub-committee on Recreational Planning, at Grand Coulee, Washington, June 27 - 29, 1950.

The Commission also confirmed the authority previously granted George Hester, Assistant Office Engineer, to go to San Francisco at state expense with the Highway Legislative Interim Committee for a meeting with California authorities on June 7 and 8, 1950.

The Engineer requested authority for Mr. J. Al Head, Assistant Traffic Engineer, to attend at state expense a meeting of the West Section

Institute of Traffic Engineers in Los Angeles during August 3 - 4, 1950. He estimated the out-of-state travel expense at $130. The Commission approved the request, subject to confirmation by Governor McKay.

The Commission considered and upon recommendation of the Engineer denied a request from Glencullen Community Club, Portland, that the presently designated 40 miles per hour speed restriction on the Beaverton-Hillsdale Highway between S. W. 39th Avenue and S. W. 50th Avenue be further reduced to 20 miles per hour.

The Commission considered and unanimously confirmed Monday and Tuesday, August 21 - 22, as the date for its next regular meeting. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel, Portland.

The Commission also discussed a date for its Eastern Oregon inspection trip which previously had been tentatively scheduled for the week commencing July 17. It was decided to make such trip during the week commencing on July 24, 1950. The Engineer was instructed to prepare an itinerary based upon an overnight stop at Wallowa Lake.

The Commission discussed and ordered filed a written report from the Engineer dated July 6, 1950, showing the status of surveys needed for the Second Post War Program, as of June 30, 1950.

The Commission considered and again deferred action on the Engineer's request for authority to conduct surveys for certain primary and secondary highway projects.

The Commission discussed a request from the Lower Umpqua Chamber of Commerce that a textboard be erected on the Umpqua Highway at Scottsburg, commemorating this town, which is observing its 100th anniversary this year. The Engineer advised that pursuant to established practice this matter was referred to the Memorials Committee of the Oregon Historical Society for a recommendation as to the value of the textboard from an historical standpoint, and for the preparation of a text; that a reply has been received to the effect that the textboard is warranted. The Memorials Committee, he said, has submitted a text, as follows:

FEW OREGON COMMUNITIES HAVE HAD A MORE COLORFUL HISTORY THAN SCOTTSBURG. IT WAS NAMED FOR LEVI SCOTT, A PIONEER OF 1844, WHO HOMESTEADED HERE AND FOUNDED THE TOWN IN 1850. THERE WAS A LOWER TOWN AT THE HEAD OF TIDEWATER ON THE UMPQUA RIVER WHICH BECAME THE SITE OF BUSINESS HOUSES AND MILLS. A MILE UPSTREAM WAS THE UPPER TOWN, THE DISTRIBUTING AND SHIPPING POINT FOR THE MINING REGIONS AND COMMUNITIES OF SOUTHERN OREGON. AS MANY AS 500 PACK ANIMALS COULD BE SEEN LOADING

(Cont.)

HERE AT ONE TIME. THE DECLINE OF THE COMMUNITY BEGAN WITH THE OPENING OF PORTS NEARER THE MARKET POINTS IN SOUTHERN OREGON AND NORTHERN CALIFORNIA AND IN DECEMBER, 1861 A GREAT FLOOD WIPED OUT THE LOWER TOWN. RAILROAD BUILDING FURTHER INLAND BROUGHT THE END. HERE IN APRIL, 1854 WAS PUBLISHED THE FIRST NEWSPAPER IN SOUTHERN OREGON, THE UMPQUA WEEKLY GAZETTE.

The Engineer recommended approval of the text and the installation of the marker. The Commission approved the recommendation unanimously and instructed the Engineer to have the textboard erected before July 30, the date for the centennial celebration at this place.

The Engineer brought up for discussion the matter of acquiring access rights along the Pacific Highway between Junction City and Eugene. He said that sufficient width right of way for a four-lane highway was acquired along this section before the war, prior to the time the Highway Commission started to acquire access rights; that the area along the highway is rapidly developing so it would appear that within a few years it will be practically impossible to obtain the access rights except at large expenditure. He recommended that the Commission authorize the acquisition of access rights on the west side of the highway only, between these points, none being required on the east side of the highway because of the proximity of the railroad. The Commission approved the recommendation.

The Commission discussed a report from the Engineer on traffic violations that have heretofore been cited by weighmasters to justice courts in Jackson and Coos Counties, which citations have not yet been disposed of by the courts. The Commission referred these violations to the Chief Counsel with instructions to do what appears necessary in order to get the courts to take action.

A request was presented from Franck Bros. Logging Company for an extension of their agreement with the Commission covering the removal of dead timber from state highway property along the Wilson River Highway. They requested an extension of one year's time within which to complete their present agreement, which terminates on August 1, 1950. The State Parks Superintendent and the Engineer recommended approval of the request. The Commission approved the recommendation. An agreement covering the matter was signed by the Commission later in the session.

The Commission discussed a written report from the Engineer, dated July 7, 1950, regarding a reconnaissance survey for the improvement of the Siuslaw Highway between Junction City and Triangle Lake. This report covers engineering features and includes two alternate designs, one involving a deep cut at the summit of the Coast Range, and the other indicating construction of a tunnel at this point. According to the report, the estimated cost of the

first alternate is $591,260, whereas the cost of the construction involving the tunnel is $720,643. The Engineer stated that it is his intention to render an additional report later, on the economic benefits that the improvement will create. The Commission took no action on the report except to instruct the Engineer to send a copy of it to Senator Angus Gibson, Junction City, who headed a delegation which appeared before the Commission at its meeting in March, 1950, and requested the improvement.

The Engineer reported the results of contacting the City Council of the City of Aumsville with respect to a proposed improvement of the North Santiam Highway through this town. He said that the plans for the project were explained to the members of the Council, which agreed to the $15,000 project which he previously reported to the Commission. Moreover, the City Council has enacted an ordinance to the effect that the plan for widening the highway as proposed is satisfactory. He recommended in view thereof that the Commission approve the project and authorize him to advertise it for bids to be received at the August meeting of the Commission. The Commission approved the recommendation unanimously and so ordered.

The Engineer requested authority for Mr. Haven Nutting, who is employed as "Clerk of the Works" at the new State Highway office building in Salem, to go to Seattle at state expense for inspection of a new type door sash which it is proposed to use in this building. He estimated the out-of-state expense at $40. The Commission approved the request.

The Engineer reported that the Big Y Super Market, Inc., Medford, is constructing a market building in the western part of Eugene where 6th Avenue and 7th Avenue, state highway routes, come together, the building being located within the "Y" connection. The Company, he said, has requested two fifty-foot openings to its property from 7th Avenue and one opening fifty-four feet wide from 6th Avenue. He also said that the company wishes to lease some excess right of way that is owned by the state at this location. As to the curb openings, the Engineer advised that access to the highway is not controlled at this point, in view of which the Commission cannot deny the entrances. He gave as his feeling that no undue hazard would be created were traffic allowed to enter and leave the highway at the points mentioned, because they are one-way streets and there will be no left-turn movements across traffic either entering or leaving the property. He recommended approval of the company's request subject to the condition that the width of each opening shall be limited to fifty feet. As to the leasing of the state's property, the Engineer stated that he could see no objection to this, provided the company will agree to vacate the premises when the property is needed for state highway purposes, and will pay for the use of the area, which has an appraised value of $11,500. He recommended that the property be leased to the company for ten years at $550 per year. The Commission approved both recommendations by unanimous vote.

The Engineer reported receipt of a communication from the Bureau of Public Roads, stating that arrangements have been made with the Government of Turkey for a number of Turkish engineers to visit this country and familiarize themselves with the organization and the practices followed by

the United States in highway construction. The Bureau of Public Roads, he said, inquired whether or not the Oregon State Highway Department is willing to employ two of these engineers whose services will be available without compensation. He recommended approval of the proposition. The Commission approved the recommendation.

Commissioner Reynolds reported the progress being made with respect to the purchase of insurance on state highway properties, which matter was referred to him by the Commission on the previous day. He advised that he has arranged for insurance coverage on state highway properties situate at three locations, viz: Salem, Klamath Falls, and La Grande, and that this insurance will cover the buildings, including equipment (exclusive of motor vehicles) and stock, having a total value of $1,688,000. This insurance, he said, provides that any loss is payable for an amount not to exceed 50 percent of the total insured value, and the business will be handled through the Oregon Association of Insurance Agents, which has designated as its servicing agents Cole, Clark & Cunningham, Portland. He presented binders covering the arrangement and advised that policies will be furnished later when the rating bureau has established the rates.

Commissioner Reynolds also stated that he is arranging insurance coverage for other buildings throughout the state, particularly those located in Sullivan Gulch, Portland, which it is proposed will not be subject to the State Restoration Fund. The probabilities are, he said, that this policy will call for recovery of 25 percent of the purchase price of the property. Chairman Chandler and Commissioner McIver approved without dissent the arrangements made by Commissioner Reynolds with respect to this matter. The binders were referred to the Secretary for filing.

A request was presented from the City Council of Island City for the improvement of Main Street in this town for a distance of four blocks, south of First Street (Cove Highway) as a Special State Tax Street Fund Project. The Engineer advised that this street is used as a shortcut, particularly by trucks en route from ORE82 (Wallowa Lake Highway) to US30 (Old Oregon Trail), and in his opinion it qualifies for Special State Tax Street Funds. He estimated the cost of the proposed improvement at $12,500 and recommended approval of the project for 1950-51 funds, the entire cost to be paid by the state. The Commission approved the recommendation.

The Engineer brought up for discussion a proposed agreement with the U. S. Geological Survey, covering investigation of water resources. He advised that the U. S. Geological Survey is authorized by Congress to investigate such water resources and to enter into agreements with the states or municipalities whereby the costs involved are to be paid 50 percent by the Federal Government and fifty percent by the cooperating party. He gave as his belief that such a study of the State of Oregon would be of material benefit in securing the exact data needed to determine the size of structures, flood possibilities, et cetera. He estimated the cost of such survey at $6,000, of which the state's obligation would be $3,000 and recommended that the Highway Commission enter into such an agreement for a period of one year, expiring July 1, 1951. The Commission deferred action on this matter until its next meeting.

The Commission discussed a proposed agreement with Mr. Ralph Coons, Junction City, whereby Mr. Coons is granted permission to construct, maintain and use a temporary road over and across state highway property located adjacent to the Oregon Coast Highway at Cape Creek, Lane County. The Engineer and the State Parks Superintendent recommended approval of the arrangement outlined in the agreement, on the condition that Mr. Coons will furnish a surety bond in the amount of $1,000 to protect the state's interests. The Commission approved the recommendation unanimously but deferred signing the agreement until the provisions thereof have been accepted by Mr. Coons and the required bond has been furnished.

The Commission had under discussion the disposition to be made of portions of the old route of the lower Columbia River Highway between Rainier and Goble, Columbia County, which have been rendered valueless for state highway purposes because of reconstruction of the highway on revised alignment. The Engineer exhibited a map showing both the new and the old highway locations, and the portions of the old route which should be abandoned or turned over to Columbia County for future maintenance. He recommended appropriate action by the Highway Commission for the disposition of these areas in conformity with that shown on the map. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "K", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Right of Way Engineer requested instructions regarding the acquisition of right of way that is needed for the proposed Sullivan Gulch Highway in Portland, across property owned by the Ralph B. Lloyd Corporation. Due to the lateness of the hour, the Commission deferred discussion of this matter until its next meeting. The Right of Way Engineer was instructed in the meantime to discuss the matter with Commissioner McIver in his office.

The Commission considered, approved and signed agreements, et cetera, as follows:

Agreement with Roland F. and Evelyn A. Nohlgren covering operation of concession in Silver Falls State Park.

Deed conveying to Umatilla County 2.64 acres of state-owned land in exchange for land needed from the county.

Agreement with Edwin Norbeck and wife re encroachment upon highway right of way.

Agreement with Hazel Dolan covering lease of equipment storage headquarters at Seaside for two-year period, ending May 1, 1952, at rate of $25 per month.

Agreement with City of Redmond covering one-way street designation in that city for traffic along The Dalles-California Highway.

Agreement with City of Amity providing for improvement of certain city streets as a Special State Tax Street Fund Project.

Contract with General Construction Company to make wash-boring tests to determine suitability of materials in bed of Columbia River for embankment construction on US30 between Hood River and Mosier.

Extension agreement with Franck Bros. Logging Co. covering removal of dead timber along Wilson River Highway.

Agreement with P. L. Finley and Virginia Finley granting to them permission to remove a small amount of earth materials from the right of way of the Columbia River Highway at Biggs Junction.

Agreement with Evans Products Company covering construction and operation of a log scaling station and service road on the Oregon Coast Highway at M.P. 264.78, Coos County.

Agreement with James L. Payne, architect, covering preparation of designs for highway department buildings.

Agreement with Central Pacific and Southern Pacific Railroad Companies covering use of railroad property in connection with construction of the Barkley Springs-Algoma Project on US97 in Klamath County.

Agreement with City of Enterprise covering construction of a Special State Tax Street Fund Project.

Agreement with City of Scio covering a Special State Tax Street Fund Project.

Bargain and Sale Deed conveying unto Edson R. McCanse 4.42 acres of land adjacent to Ladd Canyon Section of Old Oregon Trail, Union County.

Equipment Lease from Gas-Heat Inc. covering rental of one 575-gallon propane tank and one krug hand pump with accessories for a period of not to exceed six months, at $4 per month, for trial in use of propane gas for heating asphalt.

Agreement with Frank E. Finlayson and wife disposing of their claim with reference to repairs to their residence building on Oregon Coast Highway near Newport.

Agreement with City of Brownsville covering construction of a Special State Tax Street Fund Project heretofore authorized by Commission on February 6, 1950.

Bargain and Sale Deed conveying unto Russell K. Gray and Thelma A. Gray 0.57 acre of land on east side of Siletz Highway at Mile Post 30.8, in Lincoln County.

Resolution revising, assigning and reasigning highway route numbers ORE23, ORE50 and ORE52.

Resolutions lifting reduced load limits on certain state highways.

Resolution prohibiting parking on sections of Swift Secondary Highway adjacent to and opposite the entrance to Portland Union Stock Yards Company.

Resolution prohibiting parking on a section of the Woodburn-Sandy Highway in the town of Colton.

Agreement with City of Eagle Point covering construction of a Special State Tax Street Fund Project.

Bargain and Sale Deed conveying unto James Hayes and Audrey L. Hayes 0.39 acre of land lying in Zara Sweet D. L. C. #68 in Lane County.

The meeting adjourned at 5:00 p.m.

Commissioner

July 11, 1950

EXHIBITS "A" THROUGH "K"

Minutes of July 10 and 11, 1950

EXHIBIT "A"

Minutes of July 10 and 11, 1950

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SULLIVAN GULCH HIGHWAY - UNIT #2

14712 - McMonies, Walter W. (Mayhew)
Right of Way
Option expires December 28, 1950

0.56 acre	$ 12,000.00	
Building (old shed)	500.00	
Amount to be paid owner (chrg. Right of Way)		$ 12,500.00

(Grantor to have free possession until 1/15/51)

Confirmation of:
Personal approval by Mr. Chandler and Mr. McIver 6/27/50
Phone approval by Mr. Reynolds 6/27/50

Access controlled.

15734 - W. H. McMonies Estate (Mayhew)
Right of Way
Option expires December 28, 1950

16,700 sq.ft.	32,500.00
Reinforce concrete bldg. 140'x 50' plus 12' x 55' wing and 40' x 50' basement	42,500.00

(Cont.)

SULLIVAN GULCH HIGHWAY - UNIT #2 (Cont.)

15734 - W. H. McMonies Estate (Cont.)

Amount to be paid owner (chrg. Right of Way) $ 75,000.00

(Grantor to have free possession until 1/15/51)

Confirmation of:
Personal approval by Mr. Chandler and Mr. McIver 6/27/50
Phone approval by Mr. Reynolds 6/27/50

Access controlled.

SULLIVAN GULCH HIGHWAY - UNIT #4

14862 - Lindstrom Brothers, Incorporated (Witt)
Right of Way
Option expires November 30, 1950

14,550 sq.ft. at 25¢ per sq.ft.	$ 3,637.50	
One-storey frame warehouse & office bldg. conc. basement (1500 sq.ft. at $5 sq.ft.)	7,500.00	
Frame cut-up shed	354.50	
Storage shed 14' x 36'	1,008.00	
Amount to be paid owner (chrg. Right of Way)		12,500.00

Entire taking.

VISTA AVENUE-MULTNOMAH COUNTY LINE SECTION, SUNSET HIGHWAY

14182 - Paris, A. J. (Witt)
Right of Way
Option expires December 9, 1950

0.50 acre at $7000 per acre	3,500.00	
Amount to be paid owner (chrg. Right of Way)		3,500.00

Access controlled.

SYLVAN SECTION, SUNSET HIGHWAY

(*) 15884 - Westfall, Dorothy Helmcke (DeSouza)
Right of Way
Option expires October 19, 1950

27,878 sq.ft. at 25¢ plus per sq.ft.	6,970.00	
Allowance - 1½ frame dwelling (½ basement) 1,912 sq.ft. at $2 per sq.ft.	3,824.00	
- 800' roadway, graded & rocked	1,000.00	
- Landscaping	750.00	
- Fruit trees (10) $25 each	250.00	
- Loss of all strawberries, etc.	100.00	
- Waiver of access to Canyon Road	250.00	

(Cont.)

EXHIBIT "A" (Cont.)

SYLVAN SECTION, SUNSET HIGHWAY (Cont.)

15884 - Westfall, Dorothy Helmcke (Cont.)

(Grantor shall have 3 months free occupancy after receiving payment, after which time rent shall be $15.00 monthly unless construction commences prior thereto.)

Amount to be paid owner (chrg. Right of Way) $ 13,144.00

Access controlled.

(*) 15882 - Helmcke, Elmer R. and Faun E. (Witt)
Right of Way
Option expires November 16, 1950

436 sq.ft. at 25¢ per sq.ft.	$ 109.00	
Allowance - changing 20' of fence at $2+	41.00	
- 133 azaleas (wholesale)	115.75	
Amount to be paid owner (chrg. Right of Way)		265.75

Access controlled.

(*) 15883 - Helmcke, Wilfred and Violet (Witt)
Right of Way
Option expires November 9, 1950

10,454 sq.ft. at 25¢ per sq.ft.	2,613.50	
Allowance in lieu of moving new dwelling	3,500.00	
Amount to be paid owner (chrg. Right of Way)		6,113.50

Access controlled.

SUNSET CAMP-MANNING SECTION, SUNSET HIGHWAY

5222-B - Schram, Ethel M. (Boone)
Waysides
Option expires July 21, 1950

1 acre at $500 per acre	500.00	
5 acres at $47.70 per acre	238.50	
New building - 1789 sq.ft. at $3.50 per sq.ft.	6,261.50	
Amount to be paid owner (chrg. Waysides)		7,000.00

Access not controlled.

CASCADE LOCKS-VIENTO SECTION, COLUMBIA RIVER HIGHWAY

15952 - Parker, Edith S. (Witt)
Right of Way
Option expires December 7, 1950

(Cont.)

CASCADE LOCKS-VIENTO SECTION, COLUMBIA RIVER HIGHWAY (Cont.)

15952 - Parker, Edith S. (Cont.)

0.38 acre at $12.50 plus per acre	$ 482.00	
1-storey dwelling 48' x 24' at $2.75 sq.ft.	3,168.00	
Garage (double) and shed	150.00	
Amount to be paid owner (chrg. Right of Way)		$ 3,800.00

Entire taking.

WARRENTON JUNCTION SECTION, OREGON COAST HIGHWAY

16235 - Clatsop County (Boone)
Right of Way
Option expires November 17, 1950

5512 sq.ft. (lump sum)	1.00	
Amount to be paid owner (chrg. Right of Way)		1.00

(Grantor reserves a 25' commercial access easterly side of Lot 14, and 25' commercial access westerly side of Lot 15.)

Access controlled.

NORTH SALEM SECTION, PACIFIC HIGHWAY EAST

13881 - Woodroffe, Paul J. and Helen F. (Benson)
Right of Way
Deed signed

1872 sq.ft. (gratis)	0.00	
Amount to be paid owner (chrg. Right of Way)		0.00

Access controlled.

PINE STREET, SALEM

16158 - Gagle, Walter S. and Eleda J. (Benson)
Right of Way
Option expires December 19, 1950

0.427 acres and House (1008 sq.ft.) Lump sum	7,500.00	
Amount to be paid owner (chrg. Right of Way)		7,500.00

Grantor may remove blinds, shrubs and picket fence

Entire taking.

16167 - McKenzie, Frank E. and Dorothy C. (Benson)
Right of Way
Option expires December 19, 1950

1030 sq.ft. at 48¢ plus per sq.ft.	500.00

(Cont.)

EXHIBIT "A" (Cont.)

PINE STREET, SALEM (Cont.)

16167 - McKenzie, Frank E. and Dorothy C. (Cont.)

Amount to be paid owner (chrg. Right of Way) $ 500.00

Access not controlled

(Grantor to clear right of way of old house)

16242 - Oregon Electric Railway Company (Benson)
Right of Way
Letter of June 22, 1950

1350 sq.ft. at 15¢ per sq.ft. $ 202.50

Amount to be paid owner (chrg. Right of Way) 202.50

Access not controlled.

16165 - Seamster, Edna Pearl (Benson)
Right of Way
Option expires November 15, 1950

1002 sq.ft. at $1.00 per sq.ft. 1,002.00

Amount to be paid owner (chrg. Right of Way) 1,002.00

Access controlled.

16164 - Roeske, H. A. and Bertha (Benson)
Right of Way
Option expires November 16, 1950

697 sq.ft. (lump sum) 100.00

Amount to be paid owner (chrg. Right of Way) 100.00

Access controlled.

16166 - Atkinson, Leo D. and Betty Jean (Benson)
Right of Way
Option expires August 6, 1950

5-room house (31.3'x26.3'), 19t 54'x103', garage 7,500.00

Amount to be paid owner (chrg. Right of Way) 7,500.00

Entire taking.

16168 - Kaye, Keith S. and Dorothy E. (Benson)
Right of Way
Option expires November 21, 1950

450 sq.ft. at 30¢ per sq.ft. 135.00

Amount to be paid owner (chrg. Right of Way) 135.00

Access not controlled.

(Cont.)

EXHIBIT "A" (Cont.)

PINE STREET, SALEM (Cont.)

16154 - Anderson, Lulu D. (Benson)
Right of Way
Option expires December 7, 1950

9859 sq.ft. at 17¢ plus per sq.ft.	$ 1,766.00	
Allowance - fencing, $3.00 per rod, 28 rods	84.00	
- alteration of chicken house	150.00	
Amount to be paid owner (chrg. Right of Way)		$ 2,000.00

Grantor reserves right of access at Engr.Sta. 37+20 north side of hwy.

Access controlled.

16156 - Turner, Richard M. (Benson)
Right of Way
Option expires December 14, 1950

23,162 sq.ft. at 12¢ plus per sq.ft.	3,000.00	
Amount to be paid owner (chrg. Right of Way)		3,000.00

Entire taking.

16157 - Hauck, Theodore and Pauline (Benson)
Right of Way
Option expires October 11, 1950

9200 sq.ft. at 21¢ plus per sq.ft.	1,947.00	
5-room house 1204 sq.ft. - concrete drive and walks - carpeting	13,053.00	
Amount to be paid owner (chrg. Right of Way)		15,000.00

Entire taking.

16163 - Campbell, Ellen F.; and Murphy, Claude H. & Ethel (Benson)
Right of Way
Option expires November 23, 1950

4269 sq.ft. at 11¢ plus per sq.ft.	500.00	
Amount to be paid owner (chrg. Right of Way)		500.00

Access controlled.

SALEM-WEST SALEM SECTION, SALEM-DALLAS HIGHWAY

16382 - Wood, T. C. and Gladys C. (Benson)
Right of Way
Option expires December 18, 1950

4000 sq.ft. at 16¢ plus per sq.ft.	657.50	
Amount to be paid owner (chrg. Right of Way)		657.50

Access controlled.

EXHIBIT "A" (Cont.)

MEHAMA-MILL CITY SECTION, NORTH SANTIAM HIGHWAY

15424 - Cooke, E. D. (Nelson)
Right of Way
Option expires July 31, 1950

26,400 sq.ft. at $.05 per sq.ft.	$ 1,320.00	
Allowance - Fencing, 33 rods at $2.50 rod	82.50	
- Fruit tree	24.50	
- Moving small cabin	150.00	
Amount to be paid owner (chrg. Right of Way)		$ 1,577.00
STATE to construct commercial accesses at Engr.Sta. 778+90 north and south side of hwy. (Est.)	100.00	
Amount chargeable to Construction		100.00

Concurs in Right of Way Engineer's recommendation that it be acquired now. Commission approved the recommendation.

EXHIBIT "B-1"

Minutes of July 10 and 11, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Sunset Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission proposes to widen and straighten the Vista Avenue-Multnomah County Line Section of said highway, and for such purpose and in connection therewith, the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Sunset Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be restricted;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, straightening, construction, and maintenance of the Vista Avenue-Multnomah County Line Section of the Sunset Highway a parcel of real property located in Multnomah County, Oregon, and described as follows, to-wit:

A parcel of land lying in Section 6, Township 1 South, Range 1 East, W.M., Multnomah County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to A. J. Paris, recorded in Book 824, Page 258 of Multnomah County Record of Deeds; the said parcel being described as follows:

Beginning at the intersection of the west line of a tract described in Book 1182, Page 383, and the southerly right of way line of Canyon Road No. 1138, said point being north 1361.7 feet and east 807.1 feet from the south quarter corner of said Section 6; thence South 16° 56' 30" West a distance of 82.61 feet, thence along the arc of a 1542.5

(Cont.)

foot radius curve to the right (the long chord of which bears South 79° 20' 30" West 196.29 feet) a distance of 196.42 feet; thence continuing along the arc of a 1542.5 foot radius curve to the right (the long chord of which bears South 86° 10' 50" West 171.68 feet) a distance of 171.77 feet; thence North 25° 24' East 78.34 feet; thence along the arc of a 1472.5 foot radius curve to the left (the long chord of which bears North 85° 46' 30" East 115.98 feet) a distance of 116.01 feet; thence continuing along the arc of a 1472.5 foot radius curve to the left (the long chord of which bears North 78° 46' 20" East 243.66 feet) a distance of 243.94 feet to the place of beginning, containing 0.61 acre.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to acquisition of fee simple title to the aforesaid described property, it is necessary that there be acquired all easements and rights of access, and all rights of ingress, egress, and regress from and to the remaining land of the larger tract of which the above-described property is a part, and the above-described property, and any highway now or hereafter constructed thereon.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the tenth day of July, 1950.

EXHIBIT "B-2"

Minutes of July 10 and 11, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the Sullivan Gulch Highway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation by motor vehicles promoted, highway travel in general safeguarded, and public welfare promoted, it is the judgment of the Commission that the real property hereinafter described is necessary and that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required, and is being appropriated for right of way of the Sullivan Gulch Highway, for the purpose of establishing, constructing and maintaining a throughway, the following described parcel of real property, to wit:

File No. 14883
Owner: R. K. D. Co., an Oregon corporation

A parcel of land lying in the Terrence Quinn D.L.C., situated in Section 36, Township 1 North, Range 1 East, W.M., Multnomah County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to R.K.D. Company recorded in Book 825, Page 22, of Multnomah County Record of Deeds; the said parcel being described as follows:

(Cont.)

EXHIBIT "B-1" (Cont.)

Beginning at the intersection of the west line of said tract with the center line of Northeast Sullivan Street in the City of Portland; thence along said west line to the southerly line of the O.W.R.and N. Company's right of way; thence northeasterly along said right of way line to the east line of said tract; thence southerly along said east line to a point which is 200.0 feet from (when measured along said east line) the northerly line of Northeast Sandy Boulevard; thence southwesterly to the place of beginning.

The parcel of land to which this description applies contains 0.87 acre.

2. That, in addition to acquisition of fee simple title to the aforesaid described property, it is necessary that there be acquired all easements of access and rights of ingress, egrees and regress from and to the remaining land of the larger tract, of which the above-described property is a part, and the above-described property, and any highway hereafter constructed thereon.

3. That the highway facility for which the aforesaid real property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said parcel of property as to the compensation to be paid for the taking, including the damages, if any, and, in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcel of real property.

5. That upon the trial of any suit or action instituted to acquire the said parcel of real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owner.

6. That this resolution be entered in full in the minutes and records of the Commission as of the tenth day of July, 1950.

EXHIBIT "B-3"

Minutes of July 10 and 11, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, The Dalles-California Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen and improve a portion of the existing highway and to relocate and construct the northbound traffic lane of the Redmond (5th Street) Section of said highway and for such purpose and in connection therewith, the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, The Dalles-California Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening and improving of a portion of the existing highway and the relocating, construction, and maintenance of the northbound traffic lane of the Redmond (5th Street) Section of The Dalles-California Highway a parcel of real property located in Deschutes County, Oregon, and described as follows, to-wit:

A parcel of land lying in the South half of the North half of the Southwest quarter of the Southeast quarter of the Northeast quarter ($S\frac{1}{2}N\frac{1}{2}SW\frac{1}{4}SE\frac{1}{4}NE\frac{1}{4}$) of Section 9, Township 15 South, Range 13 East, W.M., Deschutes County, Oregon, and being a portion of that property conveyed by that deed to John Malick, recorded in Book 83, Page 318, of Deschutes County Record of Deeds. The said parcel being all of said property lying West of the center line of The Dalles-California Highway, also that portion of said property included in a strip of land 40 feet in width, lying on the East side of the center line of The Dalles-California Highway

(Cont.)

July 10, 1950

(located via 5th Street in Redmond) as said highway has been relocated, which center line is described as follows:

Beginning at Engineer's center line Station 24+14.87, said Station being approximately 517 feet North and 1325 feet West of the East quarter corner of said Section 9; thence on a spiral curve left (the long chord of which bears South 2° 46' East) 130 feet to Station 25+44.87; thence on a 409.26 foot radius curve left (the long chord of which bears South 16° 02' East) 102.86 feet to Station 26+47.73, the East line of said strip of land crossing the North line of said property approximately opposite Station 24+37, and crossing the South line approximately opposite Station 26+20.

The parcel of land to which this description applies contains 0.153 acre, of which 0.073 acre lies within the existing right of way, title to which hereby is acknowledged to be in the public, and 0.08 acre lies outside of the existing right of way.

2. That in addition to acquisition of fee simple title to the aforesaid described property, it is necessary that there be acquired all easements of access and all rights or ingress, egress, and regress from and to the remaining land of the larger tract of which the above-described property is a part, and the above-described property, and any highway now or hereafter constructed thereon, except that there shall be reserved unto the owners of said remaining property right of access for an approach not to exceed 30 feet in width on the East side of The Dalles-California Highway, opposite Engineer's center line Station 25+90.

3. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the tenth day of July, 1950.

EXHIBIT "C"

Minutes of July 10 and 11, 1950

R E S O L U T I O N

WHEREAS, the Commission heretofore authorized and directed the Engineer to make complete and final surveys of the routes and permanent locations of the following sections of state highways, to-wit:

MEHAMA-MILL CITY SECTION of the NORTH SANTIAM HIGHWAY, in MARION COUNTY; and

HEPPNER JUNCTION-BOARDMAN SECTION OF THE COLUMBIA RIVER HIGHWAY, in MORROW COUNTY,

and in connection therewith to prepare maps showing the routes and locations of said sections of highways, and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the Mehama-Mill City Section of the North Santiam Highway in Marion County, particularly between Engineer's Station 299+00 and Engineer's Station 785+00, together with the map, which for identification purposes bears Map File No. 7B-1-14, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission in Salem, Oregon; and **

2. That the relocation survey of the Heppner Junction-Boardman Section of the Columbia River Highway in Morrow County (described as follows: beginning at a point on the existing Columbia River Highway in Section 25, T 4 N, R 22 E, approximately at Highway Engineer's Station L^4 588+50, thence easterly along the Engineer's location survey L^4 line to a connection with the existing Boardman-Stanfield Highway at Engineer's L^3 location survey Station 1436+15.55, which is Highway Engineer's Station 89+00 on the Boardman-Stanfield Highway; thence easterly along said Boardman-Stanfield Highway approximately one and one-half miles to Engineer's location survey L^3 Station

(Cont.)

July 11, 1950

1504+71.36; thence northeasterly along said L^3 location survey 0.89 mile to the existing Columbia River Highway at the Messner Overcrossing at L^3 Station 1551+50), together with the map, field notes and other engineering data submitted by the Engineer, hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission in Salem, Oregon; and

3. It is further ordered that the said routes and the surveys of the same hereby are adopted as the routes and locations of the NORTH SANTIAM HIGHWAY No. 162, and of the COLUMBIA RIVER HIGHWAY No. 2 between the above described points.

4. That when said sections of said highways are permanently constructed, the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

5. That this resolution be entered in the minutes and records of the Commission as of the tenth day of July, 1950.

FOOTNOTE: **

The map mentioned in this paragraph of this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, RESOLUTIONS ADOPTING SURVEYS FILE No. 51, and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "D"

Minutes of July 10 and 11, 1950

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the last six month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Adams	$ 477.45	Florence	$1,709.21	Monroe	$ 878.62
Amity	2,003.02	Fossil	1,748.76	Mosier	610.23
Antelope	254.26	Garibaldi	2,539.80	Myrtle Creek	2,017.15
Arlington	1,720.51	Gaston	940.77	North Powder	1,062.25
Athena	2,130.16	Gervais	1,248.71	Oakland	1,675.31
Aurora	686.51	Glendale	1,573.60	Philomath	2,474.82
Banks	949.25	Granite	242.96	Pilot Rock	1,350.42
Bonanza	658.26	Grass Valley	576.33	Powers	2,152.76
Brownsville	2,712.14	Haines	1,065.08	Prairie City	1,980.42
Butte Falls	957.72	Halfway	1,175.26	Prescott	432.25
Carlton	2,723.44	Halsey	861.67	Riddle	1,757.24
Cascade Locks	1,986.07	Hubbard	1,415.40	St. Paul	517.00
Cave Junction	686.51	Huntington	2,681.06	Sandy	1,864.59
Clatskanie	2,579.35	Island City	500.05	Scappoose	1,418.22
Coburg	1,847.64	Jefferson	1,952.17	Siletz	1,644.23
Delake	1,802.44	Jordan Valley	774.09	Sisters	1,853.29
Donald	525.48	Joseph	1,675.31	Sodaville	279.69
Dufur	1,107.45	Lexington	630.01	Stanfield	1,599.03
Eagle Point	1,274.14	Lonerock	129.96	Sumpter	1,186.56
Eastside	2,505.90	Malin	1,511.45	Talent	2,022.80
Estacada	1,901.32	Merrill	1,830.69	Wasco	856.02
Falls City	2,019.98	Metolius	113.01	Willamina	2,503.07
				Yoncalla	1,067.90

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

(Cont.)

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the eleventh day of July, 1950.

EXHIBIT "E"

Minutes of July 10 and 11, 1950

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2984 with E. H. Itschner Co. for surfacing and oiling on the Washington State Line-Flora Junction Section of the Enterprise-Lewiston Highway in Wallowa County, completed October 18, 1949. Equipment removed June 6, 1950.

Contract No. 3006 with Leonard & Slate Oreg. Ltd. for grading and bituminous macadam surfacing on the Rainier-Goble Section of the Columbia River Highway in Columbia County, completed June 20, 1950.

Contract No. 3113 with Carl M. Halvorson for grading and paving on the Sundial Section of the Columbia River Highway in Multnomah County, completed June 15, 1950.

Contract No. 3119 with Arthur Gentemann for furnishing crushed materials in stockpiles on the Mosier Section on three State Highways in Hood River and Wasco Counties, completed April 15, 1950. Equipment removed May 5, 1950.

Contract No. 3213 with Baker Paving Co. for grading, surfacing and oiling four city streets in Gold Beach, Curry County, completed May 31, 1950.

Contract No. 3224 with J. C. Papin for grading and oil mat surfacing on the Table Rock Creek Section of the Baker-Homestead Highway in Baker County, completed June 21, 1950.

Contract No. 3243 with Umpqua River Navigation Co. for furnishing crushed materials in stockpiles on the Koepke Slough-Sawyers Ferry Road Section of the Umpqua Highway in Douglas County, completed May 3, 1950. Equipment removed June 1, 1950.

Contract No. 3249 with M. C. Lininger & Sons for furnishing crushed materials in stockpiles on the Murphy-Caves Camp Road Section of the Williams Secondary Highway in Josephine County, completed May 22, 1950.

Contract No. 3266 with E. C. Hall Co. for furnishing crushed materials in stockpiles on the Cow Canyon Section of The Dalles-California and Sherman Highways in Wasco and Jefferson Counties, completed May 27, 1950.

Contract No. 3271 with Acme Construction Co. for surfacing and oiling on the Noti-Elmira Section of the Richardson-Eugene Secondary Highway in Lane County, completed June 24, 1950.

(Cont.)

EXHIBIT "E" (Cont.)

Contract No. 3278 with Rush Construction Co. for furnishing crushed materials in stockpiles on the Heppner Junction-Lena Section of the Heppner Highway in Morrow and Gilliam Counties, completed June 30, 1950.

Contract No. 3317 with Babler Bros., Inc. for reoiling on the Mill City-Gates Section of the North Santiam Secondary Highway in Marion County, completed June 13, 1950.

Contract No. 3077 with Erick Enquist for construction of Long Tom River Bridges on the Siuslaw Highway in Lane County, completed April 23, 1950. Final cleanup May 25, 1950.

Contract No. 3149 with VaDare Construction Company for construction of Rock Creek and Sandy Creek Section on the Coos Bay-Roseburg Highway in Coos County, completed June 2, 1950.

Contract No. 3178 with W. R. Grasle Co. for constructing traffic signals in Eugene, Lane County, completed April 30, 1950. Signals required adjustment which was completed May 25, 1950.

Contract No. 3188 with Leslie W. Stoker, for construction of the Prairie City (Bridge Street) Section in Grant County, completed May 13, 1950.

Contract No. 3209 with City Electric, Inc. for constructing traffic signals in City of Klamath Falls in Klamath County, completed May 10, 1950.

Contract No. 3298 with Serge R. Perrin for constructing maintenance storage building near Milwaukie in Clackamas County, completed June 9, 1950.

Contract No. 2788 with C. J. Eldon for constructing the Coffey Creek Bridge on the Tiller-Trail Highway in Douglas County, completed November 24, 1947. Final settlement delayed due to claim of contractor.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "F"

Minutes of July 10 and 11, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Pacific Highway East

Highway number: 1E Route Number: US99E

Location of Termini		Established Speed
M.P. 33.90 (North limits, Woodburn)	to M.P. 34.67 (south limits, Woodburn)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

Note:

This action is corollary to resolution passed by State Speed Control Board, June 26, 1950.
This action confirms speed zone established by City ordinance June 17, 1937.

July 11, 1950

EXHIBIT "H"

Minutes of July 10 and 11, 1950

R E S O L U T I O N

WHEREAS, the Wilson River Highway is one of the major state highways of the State and is likewise a part of the federal highway system, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that logging trucks and other vehicles frequently are parked within the right of way limits of said highway, particularly near its intersection with the county road known as the Schild Road, about two miles east of the city of Tillamook, and that said vehicles are left parked on the highway for extended periods of time; and

WHEREAS, the parking of said vehicles on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission a hazard is created not only to through traffic but to the owners and occupants of parked vehicles; and

WHEREAS, in the opinion of this Commission, public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of vehicles should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports, and recommendations made by and under the supervision of the State Highway Engineer, that the parking of motor vehicles along the Wilson River Highway between M.P. 2.04 (Highway Engineer's Station 80+00) and M.P. 2.16 (Highway Engineer's Station 86+00), a distance of 600 feet, extending a short distance in either direction from Schild Road intersection, in Tillamook County, creates a hazard not only to through traffic but also to traffic which enters the highway from the County Road and to persons owning and using said parked vehicles.

2. That in the opinion of this Commission the right of way of said highway at said location is not of sufficient width to permit parking facilities for large numbers of vehicles and at the same time to provide the degree of safety and convenience which, in the opinion of this Commission, should be provided the motoring public.

3. That this Commission does further find and declare that the parking of vehicles for long periods of time on the right of way of said highway within said termini should be prohibited.

(Cont.)

EXHIBIT "H" (Cont.)

4. That the State Highway Engineer be, and he hereby is, instructed to erect "NO PARKING ON HIGHWAY SHOULDERS" signs at said termini, and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as herein declared.

5. That a certified copy of this resolution be sent to the Superintendent of the Department of State Police for his information and guidance, and a like copy to the County Court of Tillamook County.

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the 11th day of July, 1950.

EXHIBIT "I"

Minutes of July 10 and 11, 1950

ORDER REDUCING MAXIMUM LOAD LIMITS
ON A SECTION OF THE McKENZIE HIGHWAY

WHEREAS, the McKenzie Highway and the section of the McKenzie Highway hereinafter set forth or described has been duly designated and declared to be and is a state highway and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the state of Oregon as a state highway; and

WHEREAS, said highway and section of highway is in the judgment of the State Highway Commission being subjected to a kind and character of traffic which will damage and injure the said highway and section of highway during the present period of freezing and thawing, and in order to protect the section of highway against such damage and injury it is deemed and is the judgment of the Highway Commission and said Highway Commission finds that it will be for the best interests of said section of highway that the maximum weights permitted and authorized by law be reduced during such period; and

WHEREAS, the State Highway Commission has after due investigation determined and found and it is the judgment of the Commission that the maximum weights which shall be permitted upon said section of highway during said period shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission being of the opinion that said section of the McKenzie Highway was not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interest of said section of highway that the maximum total weight of the load and vehicle which shall be permitted upon said section of highway during the said period commencing on the dates hereinafter specified shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED that the maximum weight of combined load and vehicle or combination of vehicles which shall be permitted upon the following described section of highway shall not exceed 11,000 pounds gross on any single axle nor 20,000 pounds gross on any pair of tandem axles nor a maximum of 36,000 pounds gross on all axles of the vehicle or combination of vehicles.

Name of Highway and No.		County	Section Restricted (by mile point)	Date Effective 1950
McKenzie	15	Lane	58.00 to 75.67 (White Branch Creek Bridge to Deschutes County Line)	June 16

(Cont.)

July 11, 1950

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394, O.C.L.A., shall be in full force and effect from the effective date hereinabove specified until modified, annulled, or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the section of highway and at the important crossroads on said section of highway so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of the counties affected by this order, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this 11th day of July, 1950.

Minutes of July 10 and 11, 1950

RESOLUTION LIFTING REDUCED LOAD LIMITS ON VARIOUS STATE HIGHWAYS

WHEREAS, on the 21st day of March, on the th day of June, and on the 11th day of July, 1950, at regular meetings of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted resolutions reducing the maximum load limits on various state highways and sections of state highways; and

WHEREAS, subsequent to the passage of the said resolutions, conditions have changed so that it no longer is necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolutions.

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit as set forth in the said resolutions of March 21st, June 5th and July 11th, 1950, on various state highways or sections thereof, to-wit:

HIGHWAYS LISTED IN RESOLUTION OF MARCH 21, 1950

Name of Highway and No.		County	Section of Highway (by mile point)	Date Lifted 1950
Weston-Elgin	330	Umatilla, Union	Entire length	June 26

HIGHWAYS LISTED IN RESOLUTION OF JUNE 5, 1950

West Diamond Lake	233	Douglas, Jackson	Entire length	July 10

HIGHWAYS LISTED IN RESOLUTION OF JULY 11, 1950

McKenzie	15	Lane	58.00 to 75.67	July 5

be and the same hereby is rescinded and cancelled as of the respective dates listed above when the reduced load limit for each of said highway sections was lifted, and the maximum load limit permissible on such highways subsequent thereto shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said highways or sections of highways are located, and to the Superintendent of the Department of State Police for his information.

Dated this 11th day of July, 1950.

July 11, 1950

EXHIBIT "K"

Minutes of July 10 and 11, 1950

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Columbia River Highway known as the Rainier-Goble Section in Columbia County, the westerly terminus of which is at Highway Engineer's Station 557+00 of the relocated line and the easterly terminus of which is at Highway Engineer's Station 362+00 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundary of the new location, which eliminated sections or units will no longer be needed for highway purposes; and

WHEREAS, Columbia County and the Highway Commission have entered into an agreement under date of April 19, 1948, relating to the use and jurisdiction of the abandoned sections, to which agreement reference is here made; and

WHEREAS, the contract for the construction of the relocated section of the Columbia River Highway was completed on June 20, 1950, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the several sections or units of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portions of the old right of way, which by reason of the relocation of said highway are no longer within the boundaries of the new right of way, which for the purpose of this resolution are identified as Units "A", "B" and "C" and are shown colored in red on map attached hereto and marked "Exhibit A", and by this reference made a part hereof, and are more particularly described as follows: **

Unit "A"

Beginning at State Highway Engineer's Station 552+00 of the relocated Columbia River Highway in the Northwest quarter of the Southwest quarter of Section 23, Township 7 North, Range 2 West, W.M.; thence southeasterly via the former route of the Columbia River Highway to State Highway Engineer's Station 512+00 of the relocated Columbia River Highway in the Southwest quarter of the Northeast quarter of Section 26, Township 7 North, Range 2 West, W.M.

Unit "B"

Beginning at State Highway Engineer's Station 506+70 of the relocated Columbia River Highway in the Southwest quarter of the Northeast quarter of Section 26, Township 7 North, Range 2 West, W. M.; thence southerly via the former route of the Columbia River Highway to Highway

(Cont.)

Engineer's Station 495+00 of the relocated line of said highway, in the Northwest quarter of the Southeast quarter of Section 26, Township 7 North, Range 2 West, W.M.

Unit "C"

Beginning at State Highway Engineer's Station 404+50 of the relocated Columbia River Highway in the Southwest quarter of the Northeast quarter of Section 2, Township 6 North, Range 2 West, W.M.; thence southeasterly via the former route of the Columbia River Highway to the line between the Southwest quarter of the Northeast quarter and the Northwest quarter of the Southeast quarter of Section 2, Township 6 North, Range 2 West, W.M.

shall hereafter, pursuant to said State-County agreement, be maintained by the County as county roads for the benefit and service of persons living thereon and communities served thereby. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said roads may be assumed and exercised by the County Court of Columbia County, and said roads shall hereafter be maintained by the County for public use.

2. That the portion of the old right of way, which by reason of the relocation of said highway is no longer within the boundaries of the new right of way, which for the purpose of this resolution is identified as Unit "E" and is shown colored in brown on map attached hereto and marked "Exhibit A", and is more particularly described as follows: **

Unit "E"

Beginning at State Highway Engineer's Station 420+80 of the relocated Columbia River Highway in the Northwest quarter of the Northeast quarter of Section 2, Township 6 North, Range 2 West, W.M.; thence southeasterly via the former route of the Columbia River Highway to State Highway Engineer's Station 409+80 in the Northwest quarter of the Northeast quarter of Section 2, Township 6 North, Range 2 West, W.M.

shall be and hereby is abandoned as a part of said highway, and hereafter all right, title and interest which the State has in said right of way shall be permitted to revert to the owners of the abutting land.

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the relocation and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper but which are nevertheless retained by the State. In connection with all of said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for right of way and for highway construction, improvement, maintenance and other public purposes and uses. Therefore, the Commission does hereby find, declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A"

(Cont.)

shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. **

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission as of the eleventh day of July, 1950, and the Secretary hereby is directed to mail to the County Court of Columbia County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept as of this date the said abandoned sections of said old right of way and road shown colored in red on the map attached hereto and marked "Exhibit A", and by which said County shall assume, pursuant to said State-County agreement, jurisdiction and control over the same as a County road. **

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No.184 under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

Inspection Trip
July 24-29, 1950

The State Highway Commission made its first annual inspection of state highways during the week commencing Monday, July 24, and ending Saturday, July 29. This trip took the Commission through the Eastern Oregon district. Overnight stops were made at Prineville, Pendleton, Wallowa Lake, Ontario and Burns. The inspection covered construction recently completed, that underway, and sites of improvements contemplated for the future. Also inspected were parks and recreational areas in the district covered.

Those making the trip were the following:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, Assistant State Highway Engineer
C. H. Armstrong, State Parks Superintendent
C. G. Polk, Bureau of Public Roads
Ralph Watson, Public Relations Consultant
H. B. Glaisyer, Secretary

Mr. J. M. Devers, Chief Counsel, joined the group at Pendleton. Mr. E. F. Chidsey, Division Engineer, La Grande, accompanied the group from Pendleton to Burns.

On Monday morning the 24th, the Commission inspected several local projects in Portland, work underway on the Upper Columbia River Highway and on Timberline Road. Luncheon was taken at Timberline Lodge. In the afternoon the Commission inspected, among other projects, the newly constructed Warm Springs Highway. That evening the Commission held a short session at Ochoco Inn in Prineville, and the following matters were disposed of:

Mr. George H. Brewster, Redmond attorney, was present in behalf of the Central Oregon Irrigation District. He asked the Commission to allow the district to take 1,000 cubic yards of cinders annually from the Highway Department's cinder pit adjacent to The Dalles-California Highway about two miles north of the city of Redmond. This material, he said, will be used for the improvement of roads within the district and the district would like the privilege of taking material indefinitely. He said that the district recently gave the Highway Commission an easement across certain property on Fifth Street in the city of Redmond, which the state needed in connection with the improvement of that street, and he gave as his feeling that because of this concession the Commission might let the district have the cinders as requested. The matter was discussed at some length, during which the Commission explained that it particularly did not wish any more cinders taken from the pit located on Round Butte in The Cove-Palisades State Park. As a result of the discussion the Commission voted unanimously to allow the district to take 1,000 cubic yards annually out of its pits either north or south of Redmond for a period of ten years at no cost, it being strictly understood, however, that no cinders are to be taken out of the pit located in The Cove Park.

The Engineer requested authority for the expenditure of $9,800 in connection with the re-oiling contract awarded to Rogers Construction Company on the Forest Boundary-Jefferson County Line Section of the Warm Springs Highway in Wasco County, Contract No. 3335. He explained that when this contract was awarded it was contemplated to obtain materials from a quarry located on government-owned land, but the federal government did not make this quarry available, so it is necessary to obtain materials from some other source. 7,000 cubic yards of material are required, he said, and the contractor has agreed to furnish it from the newly designated quarry at the rate of $1.40 per cubic yard, a total of $9,800. He recommended approval of the expenditure in order to expedite the completion of the oiling work. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the advisability of purchasing equipment now that will be needed in 1951, in view of the international situation, which may make it difficult to obtain equipment for replacements later on. In this connection he reported receipt of a communication from the State Board of Control requesting the submission of requisitions not later than August 8, 1950 for such equipment as is deemed necessary. It was suggested that, because of war conditions, the replacement of pre-war equipment be expedited so that the Highway Department will be in a position to carry on its activities on the most economical basis. The Engineer recommended that the Commission authorize the placing of orders now covering purchases to take up the balance remaining in the 1950 equipment budget and an additional sum of $475,000 from the amount to be budgeted in 1951 for the purchase of equipment. As a result of discussion of this matter the Commission unanimously approved the recommendation and instructed the Engineer to place the order immediately.

The Secretary reported a telephone conversation with the Commission's Chief Counsel, Mr. J. M. Devers, regarding the release of the semi-final and final payments to Walter Berndt Construction Company in connection with its Contract No. 3115 for the construction of the Snyder Creek-Crater Lake Highway Junction Section of the Sams Valley Secondary Highway, Jackson County. He said that this job is completed and final payment is about ready to be made, but instructions have been given the Auditor to hold the final warrants pending satisfactory settlement of the many claims that are outstanding against this work, such procedure being in conformity with long established policy and practice. According to the Highway Department's records, he said, the outstanding claims total approximately $32,000, whereas there is due the contractor a total of $16,535.48, which is far from sufficient to take care of the claims. He further stated that the Chief Counsel in the telephone conversation advised the release of the balance due the contractor because of his urgent need of it to pay some of the claims, but he was told that it could not be done because it is the Commission's practice to see that claims are properly satisfied. Moreover, the surety on the bond has asked that the funds be held intact by the state until released by the surety. The Commission discussed this matter at some length and as a result thereof ordered that no further funds be released to Walter Berndt Construction Company until the claims have been taken care of to the satisfaction of the Commission and proof of the payment of such claims has been received, and until the contractor's surety has approved payment in writing. The Commission instructed the Secretary to send to the members of the Commission, hereafter, a copy of each claim that is filed against highway contracts. This concluded the business session for this day.

Tuesday noon, July 25, 1950

The Commission inspected the Crooked River Highway within the city limits of Prineville, the improvement of which has been requested by a delegation from that town, following which the Commission motored to Pendleton, inspecting en route the Warm Springs Secondary Highway, the Shaniko-Fossil Secondary Highway, the Condon-Heppner Section of the Wasco-Heppner Secondary Highway, and the Heppner-Nye Junction Section of the Heppner Highway, the improvement of these highways having previously been requested by interested groups. The Commission took luncheon with the Heppner Chamber of Commerce, following which a short business session was conducted. Among the local people present were the Honorable Conley J. Lanham, Mayor of Heppner; County Judge Garnet Barratt; J. W. Mahoney; Jim Hoskin, Pilot Rock; C. G. Bracher, City Recorder, Pilot Rock; and County Judge James H. Sturgis of Umatilla County. The following projects were requested by the group:

1. Oiling of the unoiled section of the Heppner Highway between Nye Junction and Lena, 22 miles;

2. Complete construction of the Heppner-Spray Secondary Highway between Chapin Creek and the John Day Highway;

3. Substitution of a certain county road for another in the Federal Aid Secondary Highway System. The Commission was informed that this request would be made later in writing;

4. Retention of the present location of the Old Oregon Trail through the town of Boardman. They gave as their understanding that the Highway is to be reconstructed so as to bypass this town, and they alleged that such routing will destroy the town;

5. Mr. Mahoney urged the raising of the grade line on the Chapin Creek Section of the Heppner-Spray Highway, which, he said, is now too low. He also urged widening of the bridge on the Heppner Highway on North Main Street in Heppner. He said that the present bridge is too narrow and a serious traffic hazard exists. Another project requested by Mr. Mahoney was the improvement of the present highway between the Courthouse turn and their high school, where there is a bad drainage condition.

Judge Barratt endorsed the projects requested by Mr. Mahoney, and also urged the widening of the highway bridge located near the Courthouse in Heppner. Mr. Hoskin spoke for the further improvement of the Pendleton-John Day Highway, over which, he said, is being transported tonnage greatly in excess of that which the road carried three years ago. He also urged the oiling of the Nye Junction-Lena Section of the Heppner Highway, particularly from the standpoint of the people of Pilot Rock who wish to go to Heppner, but prefer going a roundabout way to Pendleton and Echo because of the present condition of the Nye Junction-Lena Section. Mr. Hoskin suggested that the saving that accrued in reduced maintenance cost on the Pilot Rock-Pendleton Section be used to oil the highway west of Nye Junction. It was

his feeling that such sum would go a long way toward building the latter mentioned section. Judge Sturgis endorsed the requests of the other speakers in behalf of the Nye Junction-Lena oiling project.

Chairman Chandler thanked the group for its presentation and advised that the Commission will give their requests due consideration in the programming of future highway funds. He particularly mentioned that a change in the Federal Aid Secondary Highway System such as that proposed by one of the speakers could not be considered until a request for such change is received in writing from the County Court.

The meeting adjourned at 3:00 p.m., following which the Commission inspected a proposed special state tax street fund project in the City of Pilot Rock. Mr. C. G. Bracher, City Recorder, explained what the city has in mind. The Commission referred the matter to the Engineer for customary investigation and report.

Tuesday evening, July 25, 1950

The Commission had dinner with the Pendleton Chamber of Commerce at The Country Club, following which a short business session was held during which a number of projects were requested by the local group. County Judge Sturgis presided. He asked the Commission for information concerning the proposed bridge across the Columbia River near McNary Dam, and whether or not the state would make a contribution of funds for studies in connection therewith. He was informed by Chairman Chandler that it is the intention of the State Highway Commission to treat the people of this district in exactly the same manner as the people of Wasco County were treated in connection with their proposed bridge across the Columbia River at The Dalles. In other words, the Commission definitely promises the people of Umatilla County that it will contribute $8,000 of state highway funds to assist in financing necessary surveys, on the same basis that a like sum was contributed for surveys in connection with the proposed bridge at The Dalles. That promise, he said, is the only one that the Commission can give today. He went on to say that the Commission must look at its problems from a statewide standpoint, and as in the past, the people of Umatilla County will get their fair share of highway revenue.

Mr. E. B. Aldrich, Editor of the Pendleton-East Oregonian, in speaking of the proposed bridge across the Columbia River at Umatilla, states a preference for a free bridge, with no tolls. Brief remarks were also made by Commissioners Reynolds and McIver and by the State Highway Engineer. Local people speaking were Paul Follett; John Walker, Hermiston, who endorsed the Umatilla Bridge project; Bob Harvey, Milton; Mr. Doty of Stanfield; Jim Hoskin, Pilot Rock, and Mr. Conklin. In reply to the speakers, Chairman Chandler advised that the Highway Commission is endeavoring to develop a three-year construction program but is handicapped because it does not know how much federal money is going to become available. When such information is released by the

Bureau of Public Roads, he said, it will be the problem of the Highway Commission to allocate funds where they will do the most good to take care of some of the 'rough spots' and to clear up some of the unfinished sections. In doing this, he said, the Commission must consider the state as a whole, and it will allocate to Umatilla County as much money as it can in due fairness to other parts of the state. He gave as his feeling that some of the uncompleted highway sections in the Umatilla district will be taken care of, but he said the Commission is not in a position to make a definite commitment or promise at this time.

Mr. Conklin mentioned rumors to the effect that the rerouting of US30 is being planned so as to bypass the city of Pendleton. He was informed by Chairman Chandler that the rumor is without foundation, and he suggested that for the true facts inquiry should be directed to the Salem office of the Commission.

The meeting adjourned at 9:45 p.m.

Wednesday, July 26, 1950

The Commission inspected 20th Street in Pendleton, which the City requests be opened up across the Union Pacific Railroad tracks to a connection with the Old Oregon Trail, then motored to La Grande, inspecting enroute Blue Mountain Forest Wayside and Catherine Creek State Park near Union.

Following luncheon at La Grande as guests of the La Grande Chamber of Commerce, the Commission conferred with members of the local group. Senator Fred E. Kiddle, Island City, presided. He requested the following:

1. Construction of an extension of Starkey Secondary Highway to a connection with the Pendleton-John Day Highway at Ukiah.

2. Installation of traffic signals on state highway routes in La Grande.

3. Designation of a one-way traffic routing for highway travel on Washington Street and Adams street, requiring traffic to go in one direction only on one of these streets and the opposite direction only on the other.

4. Improvement of the Wallowa Lake Highway. Senator Kiddle stated that this highway is outmoded, is rough and in need of repair.

5. Improvement of the Cove Secondary Highway between Union and Cove, which, he said, is now in a rough condition.

Commissioner Reynolds stated that the Highway Commission is in no position at the present time to make any promises in respect to these projects but will give them fair consideration. He also stated that the Commission is

interested in the development of state parks and hopes to be able to accomplish something toward that end.

Commissioner McIver expressed pleasure at being able to meet with the group. Chairman Chandler pointed out that the Highway Commission is not in a position at the present time to make a commitment or promise with respect to any project, because the Congress has not as yet provided necessary Federal Aid funds. He gave as his feeling that some of the minor projects in the Commission's tentative construction program may have to be postponed because of the international situation. He also gave as his feeling that secondary highway improvements should have more attention, and advised that in its apportionment of funds the Commission will give the same consideration to the La Grande district as it gives to the other districts in the state. This concluded the meeting.

The Commission then motored to Wallowa Lake, where Wallowa Lake State Park was inspected, particular attention being given to the matter of increasing the area to accommodate overnight campers.

Following dinner at Wallowa Lake Lodge the Commission held a special meeting at 9:00 p.m. in a room provided by Mrs. Irene Wiggins, operator of the lodge. Present at such meeting were the following:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, Assistant State Highway Engineer
J. M. Devers, Chief Counsel
C. H. Armstrong, State Parks Superintendent
Ralph Watson, Public Relations Consultant
H. B. Glaisyer, Secretary

The following matters were discussed:

The State Parks Superintendent brought up for discussion the furnishing of telephone service in Silver Falls State Park. He said that the park is now served by a farmers' line, which is very unsatisfactory because the farmers do not maintain the line properly, but good service can be had through the facilities of Sublimity Telephone Company if the state will pay the cost of extending the present pole line a distance of about one and one-half miles from its present terminus south of the South Falls. He estimated the cost of such extension at $500 and recommended approval of the expenditure. The Commission approved the recommendation unanimously.

The Parks Superintendent also brought up for discussion the appointment of an assistant State Parks Superintendent. He said that he is in urgent need of assistance in order properly to perform the functions of his department, but he has no one particularly in mind. The matter was discussed, but action thereon was deferred until the next meeting. The Parks Superintendent was instructed to write the Commission in the meantime, stating the qualifications of an assistant and suggesting someone for the place.

Parks Superintendent Armstrong reported the status of a proposed state park in the vicinity of McNary Dam heretofore recommended by former State

Parks Superintendent S. H. Boardman. He said that the selected site lies along the Columbia River Highway between Cold Springs Highway Junction and Hat Rock, and takes in the area between the Union Pacific railroad and the Columbia River. He advised that interested parties in Pendleton contemplate meeting with the Army Engineers the following day concerning this park, and he suggested that it might be advisable to take advantage of the opportunity to suggest a plan of development for the area. It was the feeling of the Commission that a commitment at this time is not in order. The Parks Superintendent was asked to report the matter more fully at the next meeting of the Commission, when instructions will be given for his guidance.

The Parks Superintendent requested instructions concerning construction of a proposed roadway along the north side of Sand Creek from the Oregon Coast Highway to the beach at Short Sand Beach State Park. He said that such road is included in the plan for the development of the Park, and has the approval of the Tillamook County Court; however, he has just received a telegram signed by six members of the Nehalem Improvement Club who object to the roadway. He said that he has no idea what prompted the objection, but he has deferred construction of the road temporarily until he has had an opportunity to ascertain what is back of the complaint. The Commission approved the temporary suspension of this road construction.

The Chief Counsel presented for the Commission's consideration a form of agreement with the City of Portland covering the rerouting of the Pacific Highway West from S. W. Sixth Avenue to Broadway in order to fit in with the City's one-way traffic grid system. He recommended approval of the agreement. The Engineer concurred. The Commission approved the recommendation unanimously. (The agreement was signed by the Commission on August 22, 1950.)

The Chief Counsel brought up for discussion the appointment of Mr. C. H. Armstrong as State Parks Superintendent. He recalled that the Commission at the previous meeting approved such appointment and the matter was taken care of in the records by a simple minute entry. He suggested that the appointment should be by formal resolution, and he presented a form of resolution covering the matter. The Commission deferred action pending study of the resolution.

The Chief Counsel requested instructions concerning the disposition of a 22.377-acre tract of land which was acquired from Herman B. Jacobs in connection with a transaction for the purchase of right of way for the Tillamook-Pleasant Valley Section of the Oregon Coast Highway. He recalled that some time ago, pursuant to authority granted by the Commission, the property was advertised for sale at a minimum amount of $15,665, which was at the rate of $700 per acre, without access to the highway, but no bids were received. He further stated that according to the terms of the purchase, the Commission cannot lease the property and Mr. Jacobs has free use of it as long as it is not sold. He recommended that the property be re-advertised for sale on the basis of $600 per acre, or $13,425, without access to the highway, but that the bidder be permitted to submit an alternate offer for the property if granted access to the highway. The Commission deferred decision in the matter until its next meeting. The Chief Counsel was instructed to have available at that time a map showing the location of the property.

The Chief Counsel brought up for discussion the matter of releasing further payments to Walter Berndt Construction Company for work performed in connection with State Highway Contract No. 3115 for construction of the Snyder Creek-Crater Lake Highway Junction Section of the Sams Valley Secondary Highway. He recommended that monies now due and hereafter to become due to this company on this job be released to them because of the Commission's agreement with the company and with Mr. McCoy, Vancouver, Washington, who has been financing the work, which agreement, he said, prevails over the bond that was furnished by the contractor to guarantee satisfactory completion of the project and payment of the claims incurred in connection therewith. Chairman Chandler explained that the Commission had this matter under discussion when in Prineville and at that time ordered that further payments to the Walter Berndt Construction Company be held up pending satisfaction of the many claims that are on file against this job. Moreover, a letter has been received from the surety on the company's bond, requesting that further payments be held up until released by that office. He gave as his feeling that were the payments released now it would be breaking faith with the creditors who rely on the Highway Commission for protection. The Chief Counsel then advised that Mr. McCoy, a party to the agreement, is in a position to sue the State Highway Commission on this agreement if the Commission does not release the funds. The matter was discussed further and the Commission's final decision was not to release any further monies to Walter Berndt Construction Company until the claims have been satisfied and the letter has been received from the surety on the contractor's bond that it is satisfactory to release the funds. The Commission ordered that hereafter, when a contractor defaults and cannot carry on his contract according to the provisions thereof, he should be declared in default.

The Commission discussed a written report from the Engineer dated July 12, 1950, concerning weight violation cases pending in Justice Courts at Coquille, North Bend, Bandon and Medford. In his report the Engineer gives as his candid opinion that the efforts of the Commission to curb overloading are being defeated through the negligence of the various Justices of the Peace and District Attorneys in these counties in enforcing the statutes and prosecuting the cases pending. It was the feeling of the Commission that no action in the matter can be taken at this time.

The Commission also discussed briefly a report from the Engineer in respect to overheight and overlength violations in Lake County which previously had been cited to Justice of the Peace Tom Farrell, Lakeview, with particular reference to that portion of the report wherein Justice Farrell is quoted as advising weighmasters to stop writing citations involving overheight and/or overlength loads of logs, because he did not want them cluttering up his court. The Commission decided to do nothing with this matter at the present time.

The Engineer brought to the Commission's attention the need to construct a new bridge over White River on the Mount Hood Highway, the site of which was inspected by the Commission on Monday of this week enroute to Timberline Lodge. He estimated the cost of the new structure at $75,000. The Commission deferred action on this matter until its next meeting.

The Secretary presented requests from several Granges in Clackamas County for the improvement of the Woodburn-Estacada Secondary Highway between Estacada and Spring Water following the route of the DuBois Creek survey. The

Engineer advised that the survey to which they refer was made in 1936, at which time the improvement was estimated to cost about $250,000. He pointed out that the line would need modernizing at the present time, and that the cost to construct the road now would be considerably more than was originally estimated. The Commission deferred action.

The Commission considered a request from Warrenton School District, Clatsop County, for construction of a footpath along Fort Stevens Secondary Highway and US101, from Warrenton to their new high school approximately 1,000 feet south of the city limits. The Engineer estimated that it will cost about $500 to construct the footpath outside the city limits. He recommended approval of the project on the condition that the city will construct a connecting walk within the city limits. The Commission approved the recommendation unanimously.

The Commission discussed briefly and ordered filed a letter from the Mohawk Valley Improvement Association, Springfield, explaining that their appearance before the Highway Commission at the previous meeting was simply to ask for a survey of their valley so that the information would be available to the Commission in outlining a road program for this district. In this connection, the Engineer suggested that it might be advisable to inform the Association just what the prospects are for improvement of the Mohawk Valley-Marcola County Road which serves their community. It was the feeling of the Commission that this is a matter for the County Court of Lane County to handle inasmuch as the road is a county road under county jurisdiction.

The Commission discussed a request from the City of Silverton for installation of a flashing beacon at the intersection of Church Street and the Cascade Secondary Highway in Silverton. The Engineer advised that the matter has been investigated by the Traffic Engineer, who states that the signal is not warranted by the amount of traffic which passes through this intersection, and who recommends that the request be denied. He indicated his concurrence in the recommendation. The Commission approved the recommendation unanimously.

A letter was presented from Mr. G. S. Vergeer, City Manager of Milton, Umatilla County, requesting the installation of a traffic light at the intersection of Main Street in Milton with the new highway which extends from Milton to Walla Walla, Washington. The Engineer advised that a traffic study of this intersection reveals that the signal is not warranted, but that conditions could be improved by construction of a traffic island to channelize the movement of traffic, thus rendering the intersection less hazardous than it now is. He estimated the cost of the island at $350 and recommended approval of the expenditure. The Commission referred the matter back to the Engineer for a further study and report.

Consideration was given by the Commission to a letter from C. H. Demaray, Receiver for California and Oregon Coast Railroad Company, renewing his request for the installation of traffic signals at two highway-railroad crossings near Grants Pass. It was recalled that this matter was before the Commission at its meeting in April, at which time the Commission

denied the request because the company would not agree to pay fifty percent of the cost involved, and the Commission did not feel that there was justification for assumption by the state of the entire expense. The Commission again denied the request.

A request was presented from the Lake County Chamber of Commerce for construction of pavement full street width on two state highways that are in the city limits of Lakeview. The Engineer advised that this project has been investigated and it has been determined that the cost to improve the Klamath Falls-Lakeview Highway would be about $46,000, and the cost to improve the Fremont Highway would be about $118,000, a total of $164,000. He recommended that the request be denied because the present daily traffic within the city on the Klamath Falls-Lakeview Highway averages only about 1,500 vehicles, and that on the Fremont Highway 1,100; and because in his estimation there are more meritorious projects within the state than the improvement of either of these two highways at the present time. The Commission approved the recommendation.

The Engineer reported that in conformity with authority previously given him by the Commission he has awarded contracts as follows, bids for which were received by the Commission at its meeting on July 10-11, 1950:

Grading and paving Kirk Avenue in Brownsville, Linn County. Bids received July 11 - contract awarded July 19 to Porter W. Yett, low bidder.

Construction of Chrome Plant-Cedar Point Section of US101, Coos County. Bids received July 10 - contract awarded July 14 to E. L. Gates & Co., Inc., low bidder.

Grading, surfacing and oiling Columbia Street in the city of Helix, Umatilla County. Bids received July 11 - contract awarded July 14 to Newport Construction Company, low bidder.

Mt. Vernon-Prairie City Rock Production Project on the John Day Highway, Grant County. Bids received on July 11 - contract awarded July 20 to E. H. Itschner, low bidder.

Redmond (5th Street) Section of The Dalles-California Highway, Deschutes County. Bids received on July 11 - contract awarded July 21 to F. L. Somers, Klamath Falls.

The Commission unanimously confirmed the awards as reported by the Engineer.

The Commission had under discussion the request of Newport, Kern & Kibbe, Contract No. 3280, for rock production on Boardman-Cold Springs Section of the Columbia River, Hermiston, and Pendleton-Cold Springs Highways, for an extension of time of 10 days, from May 15 to May 25, within which to complete this job. They attribute their failure to complete the job within the specified time limit to time lost in repairing their equipment, and to furnishing 1,200 cubic yards of rock to the city of Umatilla for repairing

city streets. The Engineer advised that this project was actually completed on May 17, two days over the specified time limit, and that the state has been caused no inconvenience by the delay nor extra expense for engineering supervision. He recommended, in view thereof, that the extension of time as requested be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts No. 3082, 3115, 3267, 3269, 3280, 3306, 3310, 3351 and 3352, for construction of state highway projects, have been completed according to the requirements of the contracts, or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer requested authority to conduct surveys for certain primary and secondary state highway projects which are to be considered by the Commission in the formulation of future highway programs. He presented a list of such surveys, but the Commission deferred action on the same until its next regular meeting.

The Engineer asked the Commission to confirm the telephonic authority given him by Chairman Chandler and Commissioner McIver on July 13 to post both sides of the Oregon Coast Highway in the vicinity of Devil's Lake for "NO PARKING ON HIGHWAY SHOULDERS", particularly the section extending from Mile Point 123.20 (Engineer's Station 730+00) to Mile Point 123.58 (Engineer's Station 750+00). The Commission unanimously confirmed such posting by the adoption of the attached resolution relative thereto, marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A request was presented from the City of Prineville for establishment of a 25 mile per hour speed zone on a 1.22 mile section of the Ochoco Highway easterly from the east city limits of Prineville, and for establishment of a like speed zone on the Madras-Prineville Secondary Highway for a distance of 0.79 mile northwest from the city limits. The Engineer advised that this matter has been investigated by the Traffic Engineer whose studies indicate that a speed zone should be established on each section, but not as low as requested. He recommended the establishment of a 40 mile per hour speed zone at each location, particularly between Mile Points 19.45 and 20.67 on the Ochoco Highway and between Mile Points 25.32 and 26.11 on the Madras-Prineville Secondary Highway. The Commission unanimously approved the recommendation by the adoption of the attached resolutions relative thereto marked EXHIBITS "C-1" and "C-2", which resoltuions by this reference are made a part hereof with like effect as though extended in full herein.

A letter was presented from the Memorials Committee of the Oregon Historical Society recommending erection of a textboard in the John Day Fossil Beds adjacent to the John Day Highway in Grant County. The Engineer estimated the cost of such a textboard at $300 and recommended the erection of the same as requested. In this connection he presented a text for the proposed board,

which he said bears the approval of the Memorials Committee, as follows:

> THIS FORMATION TAKES ITS NAME FROM THE RIVER NAMED FOR JOHN DAY OF THE ASTOR OVERLAND PARTY OF 1811. FAMOUS THE WORLD OVER FOR THEIR WEALTH OF FOSSIL BONES, THE COLORFUL JOHN DAY BEDS WERE LAID DOWN IN LATE OLIGOCENE TIMES WHEN VOLCANIC ASH CHOKED STREAMS AND FILLED LAKE BASINS. ANIMALS OF BOTH FORESTS AND PLAINS WERE ENTOMBED. IT WAS A VARIED FAUNA INCLUDING BEAR DOGS AND GIANT CATS. RHINOS LIVED ON RIVER BANKS. TINY CAMELS AND THREE-TOED HORSES WERE ABUNDANT. THEIR BONES ARE BURIED HERE, AND WHEN BROUGHT TO LIGHT BY EROSION ILLUSTRATE ONE CHAPTER OF THE STORY OF OREGON'S ANCIENT PAST.

The Commission unanimously approved the erection of the textboard, and the text.

A letter was presented from Mr. John A. Laing, Chairman of the Travel Advisory Committee recommending the appointment of Messrs. Ralph A. Coan, recently elected President of the Oregon State Motor Association, and George M. Henderson, Assistant Vice President of the First National Bank of Portland, as members of the Travel Advisory Commission succeeding the late Dr. E. B. McDaniel and the late W.D.B. Dodson. The Commission unanimously approved the recommendation and instructed the Secretary to inform Mr. Coan and Mr. Henderson of their appointment as members of this Committee.

The Commission discussed a proposed budget for 1951 covering the activities of the Travel Department. The Engineer submitted a tentative budget prepared by Manley F. Robison, Director of the Travel Department, and approved by the Travel Advisory Committee, in the total amount of $275,000, which is $25,000 more than the 1950 budget. It was the feeling of the Commission that the 1951 budget should not exceed that approved for 1950. The Engineer was instructed to convey such information to Mr. Robison, with a request that he ascertain the attitude of the members of the Committee with regard thereto.

The Commission had under discussion the abandonment of a portion of the Sams Valley State Secondary Highway (old route) in Jackson County, which portion no longer is of value for state highway purposes in view of the fact that the highway has been re-aligned at this point. The Engineer presented a map showing the section proposed for abandonment. He pointed out that the old road is of value for county purposes to serve people residing on it and he recommended that it be turned over to the county for future maintenance. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Consideration was given by the Commission to a request from the North Forty Club of Albany for the designation of a 40 mile per hour speed zone on the Santiam Highway (US20) for a distance of two and one-half miles westerly from the Willamette River at Albany, particularly from the bridge to a road known as "Scenic Drive". The Engineer advised that this matter has been investigated by the Traffic Engineer, who reports that a reduced speed limit on this section is not justified because, with the exception of one curve at the west

end of the bridge, the alignment is good and because the pavement is 20 feet wide with six-foot gravelled shoulders. However, the Traffic Engineer does recommend the erection of an oversize "CURVE" sign at each end of the curve. He stated his concurrence in the recommendation. The Commission approved the recommendation unanimously.

The Commission had under consideration the adoption of a resolution apportioning to the cities and towns of the state their respective shares of highway revenues that accrued during the first six months of the year 1950. The Engineer presented a tabulation showing the proposed apportionment, advised that it has been very carefully checked and is accurate, and recommended its approval. The Commission unanimously approved the apportionment as recommended. The attached resolution relative there, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein was thereupon adopted by the Commission by unanimous vote.

Commissioner Reynolds brought up for discussion a letter received by him from Hon. George W. Peavy, Mayor of the City of Corvallis, in which Mayor Peavy indicates that the State Highway Commission some time ago made some sort of a commitment relative to the construction of the proposed new entrance of US99W into Corvallis from the north, if the City would take care of a certain drainage problem. It was the feeling of the Commission that no definite commitment was made with respect to such project; however, the Secretary was instructed to search the records and ascertain just what action was taken by the Commission with respect to it.

The Engineer presented a letter from W. Ovid Evans, Manager of Evans Fly Company, Bend, concerning the routing of The Dalles-California Highway through the city of Bend. Mr. Evans alleges that prior to the late war, the State Highway Department had plans for the rerouting of the highway along East 3rd Street so as to avoid right angle turns and a narrow underpass on Franklin Street. He suggests a one-way traffic system such as has been adopted by the city of Redmond. The Commission deferred action in the matter pending inspection of the situation when it passes through the city of Bend later in the week.

The Chief Counsel rendered a status report on his endeavors to recover the amount of the bid bond furnished by the State Construction Company in connection with its proposal to construct the piers for the Marion Street bridge across the Willamette River in Salem, the company having defaulted. He said that the company denies liability in the case and has hired Portland attorneys to defend them. The Commission took no action.

The Engineer presented a letter from Lofts and Son, Hood River, concerning the proposed improvement of the Columbia River Highway in Hood River which will require some of their property for right of way. Mr. Lofts advises that they have conducted a sand and gravel business at this location for many years and if the plans for the highway improvement materialize as proposed, it will put them out of business. He asked for definite information as to the proposed highway improvement so they can make their plans accordingly. In the discussion of this matter, the feeling was expressed that Lofts and Son may have brought their case to the Commission's attention in writing as an argument

to secure a bigger price for their property. The letter was referred to Commissioner Reynolds to answer.

Ralph Watson, Public Relations Consultant, discussed with the Commission matters pertaining to his proposed folio containing statistics and historical facts concerning the State Highway Department. He outlined briefly the proposed contents of the folio and advised that with the Commission's approval he will have it bound and mailed to the members of the legislature and candidates for legislative offices, for their information. Commissioner Chandler stated that he had studied the compilation of material and in his estimation it contains valuable information for the records, but there is a question whether or not it should be sent to members of the legislature. He suggested a preview of the contents by Commissioners Reynolds and McIver, and if they approve the publication and distribution of the copies as proposed, he will offer no objections.

The Commission approved and signed agreements, et cetera, as follows:

Ground lease from Frank Oliver, granting the State an area to be used as a rock crusher site in conjunction with Mt. Vernon-Prairie City Rock Production Project.

Agreement with City of Garibaldi covering the widening of the Oregon Coast Highway, within the city of Garibaldi.

Agreement with Gardiner Lumber Company granting permission to construct, maintain and use a parking lot under the Umpqua Bridge near Reedsport.

Agreement with City of Corvallis covering installation of traffic lights at eight intersections of the Pacific Highway West in Corvallis.

The meeting adjourned at 10:45 p.m.

Thursday, July 27, 1950

The Commission left Wallowa Lake at 8:00 a.m. and motored to Baker, where the members of the group were guests, at luncheon, of the Chamber of Commerce and Baker Lions Club. Enroute, the Commission inspected the county road which extends southerly from the city of Island City a distance of 2.9 miles to a connection with the Old Oregon Trail, bypassing the city of La Grande, which road was recently approved as a substitute for Federal Aid Secondary Highway No. 538 (county road near Summerville) in the Federal Aid Secondary Highway System.

The Commission also inspected construction underway on the revised location of the Old Oregon Trail, through Ladd Canyon, between La Grande and North Powder.

Following luncheon, the Commission motored to Ontario, inspecting enroute the Weiser and Payette spurs of the Old Oregon Trail, including the bridges over the Snake River at Weiser and Payette. An overnight stop was made at Ontario.

Friday, July 28, 1950

Leaving Ontario at 8:00 a.m., the Commission motored to Jordan Valley. Luncheon was taken at Madriaca's. The Commission then inspected recent construction and proposed construction on the I. O. N., the Rome-Princeton, and the Burns-Crane Highways. The Commission and its party were the guests of the Burns Chamber of Commerce for dinner, following which a short meeting was held with a local group headed by Mr. Morgan Timms, President of the Burns Chamber of Commerce. Those speaking in behalf of local projects were Messrs. Jim McConnell, Chairman of the Highway Committee of the Chamber of Commerce; Honorable R. M. Lowe, Mayor of Burns; Chester Craddock, Councilman; Ed Gens, School Director, Hines; and Honorable Elmo E. Smith, State Senator, John Day. Mr. McConnell gave as their Number One project improvement of the ports of entry into Oregon from the East. He urged completion of the 18-mile section of the Rome-Princeton Secondary Highway in the vicinity of Follyfarm, alleging that the completion of this section will reduce by some 150 miles the distance that tourists will have to travel to reach the ocean from eastern points. He also requested the re-oiling of the Burns-Sage Hen Hill Section of the Central Oregon Highway, completion of the Three Flags Highway (John Day-Burns Highway) north of the city of Burns, and improvement of the Burns-Frenchglen Highway because it passes through the Malheur Bird Refuge, a tourist attraction, and because the road serves the largest stockraising area in Oregon.

Mayor Lowe requested state aid in the re-alignment of West Monroe Street in Burns for a distance of three blocks where, he said, much development is taking place. He asked for the elimination of the curves in the existing road. Mr. Craddock endorsed the remarks of Mayor Lowe. Mr. Gens stated that the 40 mile per hour speed limit now in effect between Burns and Hines is too high for the safety of the many school children who have to walk to school along this highway. He asked the Commission to further restrict traffic to 25 miles per hour.

Senator Smith complimented the Commission on the work that it is doing, and advised the local citizens that the Commission is doing all that is possible with the monies that are available to provide a highclass road system for all parts of the state. Mr. Timms inquired what the people of

this district can expect with respect to the completion of the John Day-Burns Highway. He was informed by the Commission that the remaining work is within the national forest and will be constructed as a forest highway project, but there are no funds immediately in sight to finance it and none will be available until the Congress has appropriated the money. Chairman Chandler concluded the discussion by stating that the Commission has the projects in this district well in mind and will do the best that it can with the funds at its disposal. The meeting adjourned at 10:00 p.m.

Saturday, July 29, 1950

The Commission left Burns at 8:00 a.m. and drove to Bend. Enroute the Commission inspected the Section Maintenance Headquarters at Brothers. Arriving at Bend, the Commission inspected Pilot Butte State Park and the Division Headquarters. Luncheon was taken at Sisters, following which the Commission drove over the North Santiam Highway to Salem, thence to Portland, inspecting enroute activities at Detroit Dam and the newly constructed highway at that place.

Thus was concluded a very successful inspection trip through the eastern part of the state during which much valuable information was obtained.

Chairman

State Highway Engineer

Commissioner

ATTEST:

Secretary

Commissioner

EXHIBITS "A" THROUGH "E"

Minutes of July 24 - 29, 1950

EXHIBIT "A"

Minutes of July 24 - 29, 1950

RESOLUTION ACCEPTING COMPLETED CONTRACTS

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3082, with Rogers Construction Co., for surfacing on the Troutdale-Dodson Section of the Columbia River Highway in Multnomah County, completed June 16, 1950.

Contract No. 3115, with Walter Berndt Construction Co., for grading and surfacing on the Snider Creek-Crater Lake Junction Section of the Sams Valley Secondary Highway in Jackson County, completed June 20, 1950.

Contract No. 3267, with J. R. Taggart & Co., Inc., for surfacing on the Kings Valley-Read Creek Section of the Kings Valley Secondary Highway in Benton County, completed July 12, 1950.

Contract No. 3269, with Walter Berndt Construction Co. and Austin B. McCoy, for rock production on the Whiskey Creek-East Forest Boundary Section of the Klamath Falls-Lakeview Highway in Klamath and Lake Counties, completed July 6, 1950.

Contract No. 3280, with Newport Construction Co., and Kern & Kibbe, for rock production on the Boardman-Cold Springs Section of the Columbia River, Hermiston Secondary, and Pendleton-Cold Springs Highways in Umatilla County, completed May 17, 1950.

Contract No. 3306, with J. C. Compton Co., covering Division No. 1 Reoiling Project on four State Highways in Clackamas County, completed July 17, 1950.

Contract No. 3310, with Porter W. Yett, for grading and paving on the Sunset Highway-Cornelius Pass Road Connection of the Sunset Highway in Washington County, completed July 11, 1950.

Contract No. 3351, with Mid-State Construction Co., for construction of storage building at The Dalles in Wasco County, completed July 12, 1950.

Contract No. 3352, with Parker-Schram Co., for paving on the Hillsboro (N. 10th Ave.) Section in Washington County, completed July 13, 1950.

EXHIBIT "A" (cont.)

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

July 26, 1950

EXHIBIT "B"

Minutes of July 24 - 29, 1950

RESOLUTION

WHEREAS, the Oregon Coast Highway is one of the major state highways of the State and is likewise a part of the Federal Highway System, which highway throughout its entire length carries a large volume of traffic; and,

WHEREAS, it appears that cars and other vehicles are parked within the right of way limits of said highway, particularly near a race track located about two and one-half miles north of the town of Ocean Lake in Lincoln County; and,

WHEREAS, the parking of said vehicles on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission, a hazard is created not only to through traffic but to the owners and occupants of parked vehicles; and,

WHEREAS, in the opinion of the Commission, public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of vehicles should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows;

1. The Commission does hereby find and declare, based upon investigation, reports and recommendations made by and under the supervision of the State Highway Engineer, that the parking of motor vehicles along the Oregon Coast Highway between M.P. 123.20 (Highway Engineer's Station 730+00) and M.P. 123.58 (Highway Engineer's Station 750+00), a distance of 2,000 feet extending a short distance in either direction from the road entrance to the race track north of Ocean Lake in Lincoln County, creates a hazard not only to through traffic but also to persons owning and using said parked vehicles.

2. That in the opinion of this Commission, the right of way of said highway at said location is not of sufficient width to permit parking facilities for large numbers of vehicles and at the same time provide the degree of safety and convenience which in the opinion of this Commission should be provided the motoring public.

3. That this Commission does further find and declare that the parking of vehicles on the right of way of said highway within said termini should be prohibited.

(cont.)

EXHIBIT "B" (cont.)

4. That the State Highway Engineer be and he hereby is instructed to erect "No Parking on Highway Shoulders" signs at said termini and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as herein declared.

5. That a certified copy of this resolution be sent to the Superintendent of the Department of State Police for his information and guidance.

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the 26th day of July, 1950, effective as of July 13, 1950.

July 26, 1950

EXHIBIT "C-1"

Minutes of July 24 - 29, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonalbe under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW. THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Ochoco

Highway number: 41 Route number: US28

Location of Termini		Established Speed
M.P. 19.45 (East city limits of Prineville)	to M.P. 20.67 (7th St. Extension Intersection)	40 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

July 26, 1950

EXHIBIT "C-2"

Minutes of July 24 - 29, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Madras-Prineville Secondary

Highway number: 360 Route number: State 27

Location of Termini			Established Speed
M.P. 25.32 (One Mile Northwest of West Limits of Prineville)	to	M.P. 26.11 (North End of Traffic Interchange at West City Limits of Prineville)	40 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

July 26, 1950

EXHIBIT "D"

Minutes of July 24 - 29, 1950

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate, and therefore the Commission has relocated, the section of the Sam's Valley Secondary Highway No. 271 known as the Snider Creek-Dodge Bridge Section in Jackson County, the westerly terminus of which is at Highway Engineer's Station 446+05 of the reconstructed line and the easterly terminus of which is at Highway Engineer's Station 703+00 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway a portion or unit of the right of way of the highway, as formerly located, has been eliminated from the boundaries of the new location, which eliminated section or area is no longer needed for highway purposes; and

WHEREAS, Jackson County and the Highway Commission have entered into an agreement under date of February 28, 1949, relating to the use and jurisdiction of the abandoned section; and

WHEREAS, the contract for the construction of this relocated section of the Sam's Valley Secondary Highway No. 271 was completed on June 20, 1950, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the area and section of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portion of the old right of way, which by reason of the relocation of said highway is no longer within the boundaries of the new right of way, which for the purpose of this resolution is identified as Unit "B" and is shown colored in red on map attached hereto marked Exhibit "A", and which eliminated area is more particularly described as follows:

Unit "B"

Beginning at State Highway Engineer's Station 453+80 of the relocated Sam's Valley Secondary Highway in the Southeast quarter of the Southeast quarter of Section 28, Township 35 South, Range 2 West, W.M.; thence Northeasterly via the former route of the Sam's Valley Secondary Highway to State Highway Engineer's Station 703+00 of the relocated Sam's Valley Secondary Highway in the Northwest quarter of the Southeast quarter of Section 17, Township 35 South, Range 1 West, W.M.

(cont.)

shall hereafter be maintained by the County as a county road for the benefit and service of persons living thereon and communities served thereby. The Commission hereby surrenders all jurisdiction over said abandoned section, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Jackson County, and said road shall thereafter be maintained by the County for public use as a county road.

2. The area shown colored in green on said Exhibit "A" includes right of way acquired for the relocation and construction of the said highway, and includes also some parts or areas of the old right of way. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said Exhibit "A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.

3. The boundaries of all real properties acquired for rights of way and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Jackson County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action by resolution or otherwise, by which the County shall accept the said abandoned section of the said old right of way shown colored in red on the map attached hereto and marked Exhibit "A".

July 26, 1950

EXHIBIT "E"

Minutes of July 24 - 29, 1950

RESOLUTION

WHEREAS, by the enactment of Chapter 149, Oregon Laws 1949, it is provided as follows:

"Beginning with the year 1949 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 10 per cent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O.C.L.A.; section 15, chapter 413, Oregon Laws 1945, as amended by section 4, chapter 114, Oregon Laws 1947; and section 29, chapter 467, Oregon Laws 1947; and from fines and penalties collected for violations of the motor vehicle and transportation laws. Such appropriation shall be distributed among the several cities as provided in this act."

AND, WHEREAS, by said law it is further provided that:

"Such appropriation shall be allocated to the cities as follows: The sum of two hundred fifty thousand dollars ($250,000) shall be withdrawn from such appropriation each year and set up in a separate account to be administered by the state highway commission. Such account shall be spent each year by such commission upon streets not a part of the state highway system within cities which are receiving excessive wear through sudden increases in population in the area or heavy and unusual industrial traffic. Such commission shall determine the distribution of such expenditures after considering applications made to it therefor from the cities. The balance remaining in such appropriation after the withdrawal of said two hundred fifty thousand dollars ($250,000) shall be distributed to all of the cities. Each city shall receive such share of the balance as its population bears to the total population of the cities."

AND WHEREAS, by section 3 of said act it is provided that:

"Funds accrued and payable to cities under this act shall be remitted semiannually by the secretary of state to the financial officer of each city. The funds appropriated by this act shall be apportioned on a semiannual basis immediately following June 30 and December 31 of each year by the state highway commission who shall certify such apportionment to the secretary of state. Upon receipt of such certificate the secretary of state shall issue his warrants therefor payable to the cities in the amounts set out."

AND, WHEREAS, the moneys which have been credited to the state highway fund by the State Treasurer covering the period of January 1 to June 30,

inclusive, of the year 1950, which funds have accrued from sources designated in said legislative act, amount to $18,841,467.88 and are derived from funds accruing from the following sources:

Section 115-135, O.C.L.A. (motor vehicle license fees)	$ 6,013,347.12
Section 15, Chapter 413, Oregon Laws 1945, as amended by Section 4, Chapter 114, Oregon Laws 1947 (gasoline tax)	10,689,143.10
Section 29, Chapter 467, Oregon Laws 1947 (motor carrier fees)	2,029,470.39
From fines and penalties collected for violations of the motor vehicle and transportation laws	109,507.27
	$18,841,467.88

AND, WHEREAS, the ten percent of the $18,841,467.88 which is available for distribution among the cities amounts to $1,884,146.79; and

WHEREAS, after withdrawing the sum of $125,000 (one-half of $250,000) as provided in said act, which sum is to be administered by the State Highway Commission within the meaning of section 2 of said chapter 149, Oregon Laws 1949, there remains a balance of $1,759,146.79 which balance is, in response to the command of said statute, to be distributed among the cities of the state, each city being entitled to receive such share of said balance as its population bears to the total population of the cities; and

WHEREAS, by applying the factors of allocation or distribution provided for in said Chapter 149, Oregon Laws 1949, the State Highway Commission has determined upon an apportionment of said balance among the cities of the state as shown in the tabulation given below;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting, as follows:

1. That the Commission does hereby find and declare that the funds made available for distribution among the cities of the state pursuant to said law should be and are allocated and apportioned to the cities named below in the amounts set opposite the names of the respective cities:

Cities of Populations 1,000 or More

Portland, Oregon
August 21, 1950

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

Ben. R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
C. H. Armstrong, State Parks Superintendent
Malcolm H. Hawke, Auditor
H. B. Glaisyer, Secretary

The Commission unanimously approved the minutes of the meetings of the Commission held on June 5, 1950, and on July 10 and 11, 1950.

The State Parks Superintendent reported on the following park matters:

1. Speed limits on roadways in state parks: The Parks Superintendent advised that 15-mile per hour speed signs are now being maintained on some of the park roadways, but he has been informed by the State Police Department that they are not of much value, except from the psychological standpoint, because the State Police cannot enforce the rules or make arrests on the basis of the signs, although arrests could be made were signs such as "SLOW," "LOOK OUT FOR CHILDREN," "PEDESTRIANS," et cetera, placed in these areas. He recommended, in view thereof, that the existing speed limit signs be removed and special warning signs maintained in lieu thereof. The Commission approved the recommendation.

2. Acquisition of additional property at Wallowa Lake State Park: The Parks Superintendent recommended the purchase of an additional area at this park to accommodate people who desire to camp overnight. He suggested acquisition of the 33-acre tract adjoining the present park on the south and lying west of the Wallowa River. He stated that this property belongs to Mrs. Wiggins, from whom the original park was purchased, and he anticipated that the purchase price would not exceed $300 per acre, the rate paid for the original tract. The Commission authorized negotiations for the acquisition of this property, and ordered a status report for its next meeting.

3. Acquisition of a proposed addition to Sunset Bay State Park: The Parks Superintendent advised that the demand for camping in this park greatly exceeds the area available for such purpose. He suggested expansion of the park easterly to take in about 60 acres of land which is owned by George R. Landrith, D. H. Harding and Ralph Parker. The Commission unanimously authorized the securing of options for the acquisition of such property.

4. Acceptance of playground equipment donated by Mr. Alfred D. Collier, Klamath Falls, for use in Collier State Park: The Parks Superintendent advised that he is in receipt of many requests for the installation of playground equipment in state parks, but he has not encouraged such installations because of the possibility of accidents occurring in their use by children, which might place the Commission in the position of being liable for damages. Such facilities, he said, could be handled if a caretaker were employed to personally supervise them, and if the state were further protected by liability insurance. In the present instance, he said, Mr. Collier has stated a willingness to equip Collier State Park with suitable equipment at his own cost and expense. He questioned the advisability of accepting the offer for reasons stated. The Chief Counsel advised that the Commission could, if it saw fit, allow the installation of playground equipment if insurance were provided, and especially if a caretaker were employed to supervise its use. However, the selection of the equipment should be by the State Highway Commission. Chairman Chandler pointed out that the problem involves the establishment of a policy by the Commission. He gave as his feeling that it would be satisfactory in the present instance to accept the offer of Mr. Collier because of his generosity and public spirit, the Collier family having presented the park to the state as a gift and Mr. Collier having personally expended a considerable amount of his personal funds to equip it. All future requests for such facilities, or donations, should be denied, however, unless recommended by the State Parks Superintendent. Commissioners Reynolds and McIver concurred. A motion was thereupon made by Commissioner Reynolds that the Commission accept Mr. Collier's donation in this instance, but hereafter none shall be considered unless recommended by the State Parks Superintendent. The motion was duly seconded by Commissioner McIver and carried unanimously.

5. Appointment of an Assistant State Parks Superintendent: The Parks Superintendent advised that the magnitude of work in his department demands an assistant to take care of the many details, and to assist in the proper performance of his duties. He said that he is endeavoring to do a good job for the state, but is handicapped by the need to give his personal attention to many details that could be handled by an assistant under his direction. He recommended approval of the appointment of an assistant, and the selection of Mr. L. V. Koons for the place. He said that Mr. Koons has been connected with the State Highway Department for many years, at present being employed as District Maintenance Superintendent at The Dalles, and is well qualified for the work; and that he has secured clearance of the appointment from the State Highway Engineer. After careful consideration of this matter the Commission unanimously approved appointment of Mr. Koons to this position.

6. Parking of vehicles on shoulders of Crown Point Secondary Highway at Dabney State Park, Multnomah County: The Parks Superintendent advised that he is having considerable trouble with a certain class of people who stay all night in this park and use the park benches and tables for fire wood. Evicting them from the premises at a certain hour, he said, would not solve the problem because they would not leave, but if they were prohibited from parking their cars on the highway the probabilities are that

they would go elsewhere. He further stated that he discussed the situation with the State Police who advise that they can do nothing unless the Highway Commission will formally prohibit the parking of cars on the highway shoulders. He recommended adoption of an order to that effect. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

7. Acquisition of Government-owned property at Tillamook Head, Tillamook County: The Parks Superintendent advised that this area, which contains 50 acres of land, is surrounded by Ecola State Park and its acquisition is essential in order to fill out the park. He further stated that the property, which was used during World War II as a radar station site, has been declared surplus and can be acquired by the state either by purchase outright for the sum of $3,940, or on a rental basis. The purchase price, he said, includes payment of $2,640 for the land and $1,300 for a roadway located thereon, but does not include payment for buildings for which an additional sum of $450 must be paid if the state wants them. He urgently recommended acquisition of the property without the buildings, on the outright purchase basis. The Commission approved the recommendation unanimously.

8. Request of Roscoe Phelps Logging Company for permission to truck-haul logs over an abandoned section of the Salmon River Highway in Van Duzer Corridor: The Parks Superintendent advised that Mr. Phelps is logging on property adjacent to the highway and in connection therewith he has requested the privilege of truck-hauling the logs over the old road through this area which has been closed to traffic entirely for a long time. He gave as his belief that no harm will result if Mr. Phelps is allowed to use the road for the purpose intended and he recommended approval of the request. The Commission approved the recommendation, on the condition, however, that Mr. Phelps will not be allowed to construct any new roadway on the state's property, and that the matter is covered by an appropriate written agreement of one year's duration.

9. The Engineer presented a letter from W. C. Donahue, Albany, to Governor Douglas McKay, protesting the Highway Commission's order forbidding the use of motorboats on Waverly Lake at Albany, and requesting assistance from the Governor in having the order rescinded. The Engineer recalled that the Commission at the previous meeting adopted an order prohibiting the use of motorboats on this lake as a protection to bathers, anglers, and others who use the lake for recreational purposes. He further stated that in response to the Commission's instructions, he had appropriate signs erected on the shore of the lake notifying the public that boats equipped with motors hereafter are not allowed on the lake, and that Mr. Donahue's protest is a result of the posting.

It was the feeling of the Commission that Waverly Lake is too small to accommodate motorboats without endangering the lives of bathers and others. Accordingly, the Commission decided unanimously to adhere to its previous order prohibiting the use of the lake by such watercraft.

The Right of Way Engineer presented for the Commission's consideration a list of options obtained for the acquisition of real property that is needed for various highway improvements. As a result of careful consideration of each individual item, the Commission authorized the closing of the options at the prices mentioned therein. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

In the discussion of right of way matters, Chairman Chandler again cautioned the Right of Way Engineer to speed up negotiations for acquisition of right of way for projects which have been authorized by the Commission. He was authorized to employ additional agents, if necessary, to secure the desired results.

Also, in the consideration of right of way matters, particularly that of the Sullivan Gulch Project, Portland, the Right of Way Engineer was instructed to expedite purchases of right of way needed for Unit No. 2 and Unit No. 3 of this project. The Chief Counsel was instructed to expedite the condemnation of such properties as cannot be acquired by negotiation, so when the Commission is ready to proceed with construction of the project there will be no delays because of lack of needed right of way. The Commission ordered a full and complete report at its next meeting on the status of condemnation cases, not only for Sullivan Gulch, but also all other projects throughout the state.

The Chief Counsel requested authority to acquire by condemnation certain parcels of real property that are needed for various highway improvements. He submitted a list of such properties with the offers that he recommends in condemnation, as follows:

North Yamhill River-St. Joe Underpass Section, Pacific Highway West

		Recommended Offer
R 15162 Carl G. Gustafson		
Land	$ 2,000.00	$
House, well and orchard	500.00	
Total	$ 2,500.00	2,500.00

North Corvallis Section of the Pacific Highway West

R 14081 Joseph Francis Frank		
2.041 acres at $1,000.00	$ 1,930.00	
Residence	2,500.00	
Chicken House	100.00	
Woodshed	50.00	
	$ 4,580.00	4,000.00

Unit #2 Section of the Sullivan Gulch Highway

		Recommended Offer
R 14727 General Paint Corporation		
59,800 sq. ft. at $.40 per foot or Approximately 1.37 acres at $17,460 per acre	$ 23,920.00	
97,831 square feet of floor space at $3.00 per sq. ft. A depreciated valuation	293,493.00	
Railroad siding. American Appraisal Company - depreciated value	2,337.00	
Misc. items of damage	69,521.00	
Total	$389,271.00	$ 390,000.00

82nd and Powell Boulevard Section of the Mount Hood Highway

R 15658 Minnie C. Flanagan		
Land 399 sq. ft. at $1.50 per foot	$598.50	
Allowance for black top paving taken on the area of acquisition, sidewalk and approach areas - 50 sq. yds at $1.50 per sq. yd.	76.50	
Allowance for reduction of parking lot area, the rounding off of the corner of the corner lot. 10% of the estimated value of the corner lot at $9,000.00	90.00	
	$765.00	$1,000.00

After due consideration the Commission authorized the condemnation proceedings and the recommended offers. The attached resolutions relative thereto, marked EXHIBITS "B-1", "B-2", "B-3" and "B-4", which resolutions by this reference are made a part hereof with like effect as though extended in full herein, were thereupon adopted by the Commission by unanimous vote.

The Right of Way Engineer reported on a right of way option secured from J. C. and Ella Beals, Canyonville. He said that this option was negotiated on the basis of payment of $600, but since the option was obtained, the alignment of the new highway has been revised so the Beals property is not required. In the meantime, Mr. Beals, who is the driver of a school bus, re-arranged his garage to fit the new highway location, which work cost him $75 and was unnecessary because the Beals property was not taken. Mr. Beals, he said, feels that, under the circumstances, the state should reimburse him for his expense. The Right of Way Engineer recommended approval of the payment of such sum. The Commission approved the recommendation.

The Right of Way Engineer reported the sale or lease of several tracts of state-owned property, as follows, and requested confirmation of the same by the Commission:

1. Sale of a 0.193 acre tract of land to Rosina and Ellen F. Steffen. Property located near Silverton on Salem-Silverton Road. (Deeds previously signed by Commission)

2. Sale of a 2.75 acre tract of land in Malheur County to the Oregon Portland Cement Company, consideration $82.50.

3. Sale of a tract of land in Multnomah County to the Oregon-Washington Railroad & Navigation Company, consideration $100.00. Property located near Rooster Rock.

4. Sale of a 2.80 acre tract of land in Umatilla County to the Oregon-Washington Railroad & Navigation Company, consideration $175.00.

5. Sale of a 4.34 acre tract of land in Deschutes County, near Redmond, to A. L. Chaplin, consideration $250.00.

6. Lease of Lots 1, 2, 3, 4, 5, 6, 7, and 9, Block 30, Coos Bay Flat "B" Addition to North Bend. Term 10 years. Annual rental $250.00. Lessee, Horace T. Byler.

7. Lease of a 53.07 acre tract of land near Glendale Junction, Douglas County, to Joseph O. Meyers. Term 10 years, Annual rental $225.00.

8. Lease of a 14.25 acre tract of land near Glendale Junction, in Douglas County, to S. T. Humphrey. Term 10 years. Annual rental $75.00.

The Commission unanimously confirmed the disposition made of these properties.

The Commission also unanimously confirmed the sales of the following listed miscellaneous properties as reported by the Right of Way Engineer:

	Item	Former Owner and Location	Purchaser	Sale Price
1.	40-gal. gas hot water heater	Pioneer Auto Court, Canyonville-Johns, Pacific	C. O. Slabaugh, Roseburg	$ 40.00
2.	Bldg.-Lot 3, Block 15	J. W. Reed, Canyonville-Johns, Pacific	Thurman L. Porter, Myrtle Creek	55.00

Sales of miscellaneous properties (Cont.)

Item	Former Owner and Location	Purchaser	Sale Price
3. Bldg.-Lot 2, Blk. 3	Marion Mault, Canyonville-Johns Pacific	Mrs. Elmer Stanley Canyonville	$ 200.00
4. Bldg. on r/w	Joseph P. Garske, Goshen-Creswell Pacific	Joseph P. Garske Goshen	1,200.00
5. Fuse box	H. P. Clark, Goshen Creswell, Pacific	H. P. Clark R. 1, Box 17 Springfield	5.00
6. Building	Elmer Stanley, Canyonville-Johns Pacific	Waldo W. Ott 10 Skyline Loop Eugene	35.00
7. 3 windows-24x28	Nemic Auto Court Canyonville, Pacific	Hal W. Lehman Salem	4.50
8. House, garage & 2 poultry houses	Clayton E. Norton Redmond, TheDalles California	M. A. Lynch Redmond	2,365.00
9. House, Barn or machine shop	Arnold H. Miller Delmar-Coos Bay, Oregon Coast Hwy.	Wm. W. Cannady P. O. Box 116 Coos Bay	200.00
10. House to be moved	Walter S. Gagle Pine St.-Salem Pacific Hwy.	Harold A. Lang 5085 Portland Rd. Salem	175.00

The Right of Way Engineer reported the results of receiving bids in Salem on August 9, for the purchase of 42.48 acres of state-owned land situated adjacent to the Pacific Highway East, south of Salem. He said that this property was advertised for sale pursuant to statutory requirements and that only one bid was received, it being that of Harvey Jacobsen, Salem at $4,675.00. He advised that the minimum appraised value of the property is $4,248, and he recommended acceptance of Mr. Jacobsen's bid because it exceeds such sum. The Engineer and Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Right of Way Engineer requested authority to negotiate the private sale of a house acquired from Hans Uhrman, adjacent to The Dalles-California Highway, near Algoma, Klamath County. He said that this property was advertised for bids to be received in Salem on August 3, 1950, and that the only bid submitted was that of Fred L. Cochran, Keno, at $77., which was refused because it was considerably under the appraised value of the building. It was his belief that he will be able to obtain a satisfactory offer if permitted to conduct private negotiations. The Commission unanimously approved the request.

The Commission had under discussion the disposition of the "Mack Truck Building", located on highway right of way acquired by the state at the east end of the Steel Bridge in Portland. The Right of Way Engineer suggested rental of the building because of the possibility that the land on which it is located may be required for future development of the highway at this point. He advised that the General Electric Company is interested in renting the property and has offered to pay $4,500 annually for its use on a twenty-year basis. Commissioner McIver gave as his feeling that if the property is not needed for state highway purposes for twenty years, it should be sold. The matter was discussed at some length and as a result thereof Chairman Chandler and Commissioner Reynolds referred it to Commissioner McIver with full authority to dispose of the property, either by sale or lease, as in his judgment will be to the state's best interest.

A request was presented from the Warm Springs Indian Tribe for state cooperation in the construction of right of way fences along the northerly 7.2 mile section of the Warm Springs Highway within the Warm Springs Indian Agency. The Engineer advised that recently the Highway Commission approved construction of right of way fences through the Indian Reservation southerly from the Warm Springs River crossing to the Reservation boundary, at a cost to the state of about $30,000, and that the present request is for state cooperation in the construction of an additional seven miles, northerly from the Warm Springs River. He estimated the cost of such fence construction at $17,313 and advised that the Indian Agency will assume one-half of this expense, so the state's outlay will be approximately $8,656.50. He recommended approval of the expenditure in order to complete the fencing through this Indian Reservation. The Commission approved the recommendation unanimously.

The Right of Way Engineer reported a request from Seufert Bros., The Dalles, that the state reconvey to them two small tracts of land which they sold to the state some months ago in connection with the acquisition of right of way for the Big Eddy-Dune Section of the Columbia River Highway. He said that the option obtained from Seufert Bros. contained provision for deeding back to them, after the highway is constructed, such portion of their land as is not needed for highway purposes. He said that he has discussed this matter thoroughly with the Engineer, who approves quit-claiming the property back to the former owners. He recommended that it be done. The Commission approved the recommendation unanimously. (The Commission executed the deeds later in the session)

The Chief Counsel requested instructions with regard to the disposition to be made of land acquired from Mr. Herman B. Jacobs, in connection with a right of way settlement on the Tillamook-Pleasant Valley section of the Oregon Coast Highway. He advised that, pursuant to previous instructions from the Commission, this property was advertised for bids to be received in Salem on July 13, 1950, at a minimum offer of $700 per acre, and without access to the highway. The advertisement, he said, appeared in the local papers in conformity with the statutory requirements, but no bid was received. He also said that the arrangement made with Mr. Jacobs at the time the property was acquired from him was to the effect that he would be allowed the use of the excess area (approximately 22 acres) without charge until the property is needed for highway purposes, or until the Commission sells it. Under such condition, he said, the Commission is prohibited from renting the property should it wish to do so. This matter was discussed at considerable length and as a result thereof, the Commission ordered that the property be readvertised for sale at the rate of $600 per acre, and subject to the same condition, that no access to the highway will be allowed.

The Commission had under discussion a proposed agreement with the Union Oil Company of California affecting property at the company's distribution station adjacent to the Oregon Coast Highway between North Bend and Coos Bay. The Chief Counsel advised that under date of October 21, 1941, a former Highway Commission acquired from the company an easement for highway slopes, but later the company's distribution manager in Seattle requested a relinquishment of the easement and such relinquishment was executed by the Highway Commission on January 17, 1950. It now appears, he said, that the company's legal department in Los Angeles considers that the relinquishment was a mistake, and that the matter would be in better form if restored to the original status of the easement, which this present instrument is intended to accomplish. The Commission deferred a decision in the matter pending a recommendation from the Engineer, to whom the matter was referred for study and a report.

The Chief Counsel presented to the Commission for its consideration a form of deed conveying unto the United States of America a tract of land containing 0.63 acre, in Klamath County, consideration - $100. He explained that this property is part of a stockpile site which was acquired by a former Highway Commission in 1928; that application was made by the Bureau of Reclamation for acquisition of the area, which application was approved by the Commission on August 10, 1948, at which time the Commission entered into an agreement with the Bureau regarding the sale, and the Bureau of Reclamation was given right of entry on the property. He also said that he did not know just why the matter had not been concluded before this, unless it was due to lack of funds, on the part of the Bureau of Reclamation, to finance the purchase, but he recommends approval of the transaction. The Commission approved the recommendation unanimously. (Bargain and Sale deed was signed by the Commission on the following day)

The Chief Counsel brought to the Commission's attention invoices submitted by J. B. Bedingfield, Attorney, Coos Bay, and Marsh and Marsh, Attorneys, McMinnville, in the amounts of $100 and $150 respectively, for services rendered the State Highway Department in connection with real

property acquisitions. He said that in both instances the service rendered was in connection with securing authority of the courts for transfer to the state, by means of Guardian deeds, lands owned by minors and needed as highway right of way. He recommended payment of the invoices. The Commission approved the recommendation and so ordered.

The Chief Counsel presented to the Commission a form of agreement between Edwin A. Pease and A. O. Schilling, for the disposal of a personal obligation. He explained that this agreement has been prepared as a result of a mutual understanding between the parties involved, but it involves an assignment of a portion of Mr. Pease's wages, which assignment, by the terms of the agreement, must be approved by the State Highway Commission. The Commission expressed a reluctance to become involved in any personal affair, such as this, and accordingly referred the matter back to the Chief Counsel to work out some other arrangement.

The Chief Counsel also brought to the attention of the Commission a minor problem that has arisen in the City of Coos Bay, whereby a property owner is maintaining a gasoline tank under a newly constructed sidewalk on the highway right of way. The Chief Counsel stated that the state has control from curb to curb on streets that are designated highway routes, but the city has control of the area back of the curbline. He gave as his feeling that the Commission should permit the tank to remain in its present location. In the discussion it was brought out that the entire right of way at this point was acquired by the state, so the State Highway Commission has full control. Chairman Chandler stated that the City of Coos Bay has no objection to the tank being under the sidewalk and he suggested, in view of the fact that the Highway Department owns the property, that a revocable permit of one year's duration be given to the property owner. The Suggestion was approved by Commissioners Reynolds and McIver, and it was so ordered. The Chief Counsel was instructed to prepare an appropriate agreement covering the matter.

The Engineer presented a request from the U. S. Army Engineers to purchase a small tract of land containing 0.16 acre, adjacent to the highway near Meridian Dam, Lane County, which property is needed for fill purposes in connection with the reconstruction of the Southern Pacific Railroad. He said that the property is of no use whatsoever to the State Highway Department, and he recommended that it be deeded to the Federal Government for $25, which the Army Engineers have offered to pay for it. The Commission approved the recommendation.

The Commission discussed and upon recommendation of the Engineer and Chief Counsel, approved an agreement with the Union Pacific Railroad Company and the O.W.R. & N. Company covering encroachment of the Columbia River Highway upon railroad company property between Viento and Sonny in Hood River County. (The agreement was signed on the following day)

The Engineer brought up for discussion the matter of acquiring right of way that is needed for the improvement of the Columbia River Highway through the Celilo Indian Village, east of The Dalles. He recalled that the Commission previously authorized the payment of $3,000 for land

that is needed from the Indians for this purpose, but the transaction was never completed because the property could not be turned over to the state free and unencumbered. It appears that the Indians will not move and the Agency officials are not inclined to force them to move. Following discussion, the Commission affirmed purchase of the right of way for $3,000, but made it clear that it does not intend to take action to make the Indians vacate the premises.

Pursuant to the Commission's previous instructions, the Chief Counsel presented a form of resolution which he stated combines several resolutions heretofore adopted by the Commission designating "through-stop" highways. The Commission unanimously adopted the resolution which is attached hereto, marked EXHIBIT "D", and by this reference is made a part hereof with like effect as though extended in full herein.

The Chief Counsel reported a request from Mr. Paul Prince, Coos Bay, that the access to the Chrome Plant-Cedar Point Section of the Oregon Coast Highway, which was granted him by the Commission in connection with a right of way settlement, be changed from "private" access to "commercial" access. He recommended that the request be denied because it would be unfair to others along this section who had been granted "private" access only. The Commission concurred in the view point of the Chief Counsel, and accordingly denied the request.

The Commission discussed a written report from the Chief Counsel on the proposed purchase by the state of the upper deck of the Steel Bridge, Portland. As a result thereof, the Commission decided to do nothing further in the purchase of this upper deck, and so ordered. (For details see copy of Chief Counsel's report, dated August 4, 1950, in general files.)

The Commission also discussed a written report from the Chief Counsel on an accident which occurred at a county road grade crossing of the Union Pacific Railroad at a place known as Corbett, Multnomah County. According to the report the accident involved a Union Pacific train and a logging truck, the operator of which had no permit from the State Highway Commission to enter the Columbia River Highway at this point, as he intended to do when the accident occurred. The Chief Counsel advised that he is in receipt of a letter from the General Manager of the Union Pacific Company requesting that the State Highway Commission join with the railroad company in recommending to the Public Utilities Commissioner that further use of this county road-railroad grade crossing be prohibited by logging trucks. He recommended approval of the railroad company's request. In the discussion that followed it was pointed out that the State Highway Commission has consistently refused to allow logging trucks to enter the Columbia River Highway at this point because of the hazards such movement would create to highway traffic. The Chief Counsel pointed out that the road that was being used by the log hauler is a county road under the jurisdiction of the Board of County Commissioners of Multnomah County.

It was the opinion and judgment of the Commission that the physical conditions prevailing at this place are such that extreme hazards would be created were the truck hauling of logs allowed at this point, and that such operations should not be allowed. The Secretary was instructed to direct a letter to the Public Utilities Commissioner setting forth the attitude of the Commission with respect thereto.

The Chief Counsel requested reconsideration by the Commission of the means of formal appointment of Mr. C. H. Armstrong as State Parks Superintendent. He recalled that the Commission at its meeting in July appointed Mr. Armstrong to such position but the appointment was by a minute entry only. He gave as his feeling that the appointment should be covered by resolution for the protection of the members of the Commission as well as Mr. Armstrong. He presented a form of resolution covering the matter. The Commission decided unanimously that the matter had been taken care of satisfactorily by the previous minute entry.

The Chief Counsel reported a compromise settlement of the condemnation case of the State Highway Commission vs. Mosso, concerning acquisition of right of way and a gravel pit which are needed in connection with improvement of the Old Oregon Trail near Ontario, Malheur County. He recalled that the Commission previously authorized an offer of $10,000 in the condemnation proceedings, but indications now are that the matter can be settled out of court for an additional amount of $1,182, or a total of $11,182. He said that he is not ready to recommend acceptance of this settlement, but is bringing it to the Commission's attention at this time as a matter of information. The Commission took no action on the matter.

The Chief Counsel presented for the Commission's approval a proposed compromise settlement with the Union Pacific Railroad Company of its claim for damages to its facilities caused by a slide along the upper Columbia River Highway at Oneonta. He pointed out that the total amount of the railroad company's claim is $134,120.50, which the company alleges is the amount of its expenditures for traffic and for clearing its right of way and mainline tracks of slide materials. Also, that the agreement provides that the state shall reimburse the company for 50 percent of the total cost, or $67,060.29, upon payment of which the railroad company releases the state from further liability. He recommended approval and execution of the agreement, which, he stated, has already been signed by the President and Secretary of the railroad company. It was the feeling of the Commission that the railroad company's books should be audited and the figures checked before the agreement is accepted and payment is made of the state's share, as provided therein. Accordingly, the Auditor was instructed to make such audit within the next ten days, it being understood that if the amount of the state's share, as shown in the agreement, is correct, then the Commission will sign the agreement.

The Commission considered and approved a form of agreement with the Sandy Blvd. Drive-in Theater, Inc., covering provision for access to a drive-in theater from US30 at Northeast 92nd Ave. and Sandy Blvd., Portland. The Engineer stated that this agreement provides that the owner of the theater shall pay the entire cost of the contemplated work, which includes pavement

widening and curb construction, which is estimated to cost $2,500; also that he shall reimburse the state in the amount of $2,845.25 for installing a necessary signal and for marking the pavement for traffic control. He recommended approval of the agreement. The Commission approved the recommendation. (The agreement was signed by the Commission later in the session)

The Commission had under discussion a report from the Engineer on the cost to improve the Oregon Coast Highway through the town of Florence, as previously requested by the City Council. The Engineer recalled that when this matter first came to the attention of the Commission, he estimated the cost of a complete improvement at $99,000, but the Commission could not see its way clear to allocate such sum at the time, and accordingly referred the matter back to him for an additional report to determine what could be done to take care of the drainage situation alone, without a complete improvement. Further investigation he said, reveals that there is no practical manner in which the drainage problem can be remedied without the installation of a storm sewer, owing to the flatness of the terrain which makes drainage difficult; moreover, the storm sewer will not work satisfactorily unless curbs are provided to control the flow of water. He gave as his opinion that the only satisfactory solution of the problem is construction of a full-width pavement with curbs and storm sewer, which he estimated would cost $99,000. He recommended serious consideration of the project for undertaking in the 1951 program. Chairman Chandler pointed out that the right of way is 100 feet wide, and that there is only an 18-foot pavement down the center of it; therefore a real traffic hazard exists because of poor drainage and the situation is getting worse as time goes on. He expressed himself in favor of the project as outlined by the Engineer for construction in 1951, if funds can be arranged to finance it. Commissioners Reynolds and McIver indicated their concurrence, whereupon it was unanimously agreed to consider the project in the formulation of the next construction program.

The Commission discussed briefly a proposed revision of the Old Oregon Trail through the town of Arlington, but deferred action pending the appearance of a delegation on the following day.

In this connection, the Secretary presented a letter from Senator Stewart Hardie, in which he states that it is the wish of the people of his district that the by-passing of the town of Arlington be deferred for another two years, if possible. The Commission took no action on the communication.

Pursuant to instructions previously given him by the Commission, the Engineer reported the cost to improve the Columbia River Highway (US30) through the community of Parkrose. He estimated such cost at $84,400, and recommended approval of the project, which consists of resurfacing the existing highway 60 feet wide between curbs from 99th to 108th Avenues; the widening of the existing 27-foot pavement to 60-foot width, with curbs, between 108th and 112th Avenues, and the widening of the existing 27-foot pavement to 48 feet, four-lane highway width, without curbs, from 112th to 122nd Avenues. The Commission approved the recommendation unanimously.

Consideration was given by the Commission to a written report from the Engineer, dated August 11, 1950, covering certain projects in the City of Heppner, which was presented to the Commission on its recent inspection tour through Eastern Oregon. The projects requested are:

1. Improvement of the Heppner Highway in the vicinity of the Heppner High School where a bad drainage condition exists, and

2. Widening of two bridges across Willow Creek within the city limits. According to the report, the estimated cost to improve the drainage condition adjacent to the High School is $15,300, of which amount the city has agreed to pay the cost of curb construction, estimated at $3,750.00, which leaves a balance of $11,550 to be paid by the state. The cost to widen the two bridges to a width of thirty feet without sidewalks is estimated at $35,000; however, the city has not indicated that it will share in this expense. The Engineer recommended approval of the drainage project, provided the city will contribute its proportionate share of the expense, but that the widening of the bridges be deferred until such time as traffic congestion justifies the expense. The Commission unanimously approved the recommendations.

Pursuant to previous instructions from the Commission, the Engineer reported the results of investigations with respect to providing better access to McLoughlin Blvd. (US99E) at Bybee Underpass in Portland, which was requested by a delegation that appeared before the Commission at the previous meeting. He said that he discussed this matter with City Commissioner Wm. Bowes, City Traffic Engineer F. T. Fowler, and some of the members of the Moreland group, and as a result thereof, a plan was evolved which appears to be satisfactory to all concerned. He explained that the plan involves the closing of S. E. Glenwood Street, the present approach from Bybee Blvd. to the Highway, and the construction of a new approach about 400 feet northerly therefrom where there is room to provide for channelization and signalization sufficient to eliminate existing hazards. The City of Portland, he said, has $20,000 available for channelization on McLoughlin Blvd., and if such sum is matched by the state, making a total of $40,000, he believed that there would be more than sufficient money available to finance the improved connection at Bybee Blvd., together with the channelization and signalization at S. E. Tacoma Avenue, where another very hazardous condition exists. He recommended approval of the project and an allocation of $20,000 of state funds therefor so that the work may be started in the near future. The Commission approved the recommendation unanimously on the condition that the City of Portland will pay fifty percent of the costs involved.

A report was rendered by the Engineer on a request of the Tillamook County Court for a roadway leading to Cape Lookout State Park, Tillamook County. The Engineer advised that the proposed park entrance is located 1.8 miles beyond the end of an existing county road, and that the estimated cost to construct such 1.8 mile section, including a crushed rock surfacing but no oil, is $51,000. He predicted that were this section of road constructed, the state would eventually have to take over and improve the county road, which is about four miles in length from where it connects with the Netarts

Secondary Highway. He estimated the cost of the ultimate improvement at $120,000 and annual maintenance cost at $6,000. He recommended that the county court's request be denied because of the urgent need for the funds to finance primary highway construction. The Commission approved the recommendation unanimously.

The meeting recessed for luncheon at 12:00 noon and reconvened at 1:50 p.m. with the same persons present and participating.

The Commission had under discussion replies received from contractors pertaining to the opening of bids at 2:00 p.m., when bid openings are held on Mondays, rather than at 9:00 a.m. as has been customary in the past. The Secretary presented numerous letters from representative contractors, nearly all of whom expressed a preference for bid openings on Mondays at 2:00 p.m. The remaining contractors stated that they had no preference. In view of these replies, the Commission decided unanimously to conduct its bid openings hereafter at 2:00 p.m. on Mondays and at 9:00 a.m. when its openings are held on other days of the week. A public announcement to that effect was thereupon made by the Secretary.

Bids, as follows, were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Chandler announced that the award of contracts would be made at 5:00 p.m.

BAKER-UNITY HIGHWAY IN BAKER COUNTY

MILL GULCH-SALISBURY SECTION

Rogers Constr. Co., Portland	$ 238,932.00

Gilbert Roberts, Hood River	34,817.00

The Chief Counsel requested authority to institute condemnation proceedings to acquire right of way needed for the west approach to the Marion Street Bridge over the Willamette River at Salem, where the proposed highway crosses land owned by Mr. Earl C. Burk. He said that Mr. Burk is demanding the sum of $82,000 for his property, which is entirely out of reason. He recommended an offer of $45,000 in condemnation. In response to an inquiry by Chairman Chandler as to why this property is needed at this time, the Engineer advised that it is upon this particular tract that it is proposed to place the materials which the Army Engineers are dredging from the Willamette River. He recalled that the Commission some time ago authorized an expenditure of several thousand dollars to place the dredged materials on this right of way in order to realize a saving of one-half the cost of constructing the highway fill were materials obtained from some other source. He strongly recommended acquisition of the right of way in order to take advantage of the materials offered by the Army Engineers and to realize the savings. Chairman Chandler advised that he had no previous knowledge of this right of way transaction; moreover, he had no idea that the state would be required to offer $45,000 for the property. He requested a complete report from the Chief Counsel covering the right of way for this project, including the original estimated cost of the same, and the amount that it appears the state is now going to have to pay for it. The Engineer and the Chief Counsel were cautioned hereafter to advise the Commission fully in advance as to the right of way requirements on all jobs so that the Commission will have full knowledge of the amount that each job is going to cost and will be in position to allocate funds as may be needed for it. A decision in this matter presently under discussion was deferred by the Commission pending receipt of the information requested of the Chief Counsel. Such information was presented later in the session by the Chief Counsel who advised that the original estimated cost of the right of way needed for this project was $50,000, as compared with the presently estimated cost of $65,000. He pointed out, however, that the actual cost may be more or less, as may be determined by the condemnation trial. It appeared to the Commission that the right of way needed from Mr. Burk is essential to the undertaking of this project, and that if acquired now a considerable saving in cost of the highway fill will accrue. As a result of discussion, the Commission authorized the Chief Counsel to condemn the Burk property, and in connection therewith to offer him $45,000 for it, with instructions to proceed at once with the case. The attached resolution relative thereto, marked EXHIBIT "B-5", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

August 21, 1950

The Commission discussed and by unanimous vote approved the 1951-53 Highway Department Budget, as prepared by the Auditor and recommended by the Engineer, for use by the State Budget Director in his budget report to the 1951 Legislative Assembly. The Engineer explained that this budget is entirely separate from the Highway Department working budget which will be presented for the Commission's approval later in the year. (The budget was signed by the Commission the following day.)

The Engineer reported a revised plan for the expenditure of the $80,000 allotment contained in the present construction program for improvement of the ten-mile section of the Wasco-Heppner Secondary Highway easterly from the summit of Cottonwood Canyon, in Gilliam County. He recalled that the Commission previously ordered that this money be spent for placing rock on a section of the existing road that previously had no surfacing, so as to make that section suitable for traffic. He also recalled a request from the citizens of this district for expenditure of the money on the proposed permanent alignment so far as the money would go. The section 4.47 miles in length on the westerly end of the section proposed to be improved, he said, is on very poor alignment with numerous right-angle turns, so any surfacing placed thereon would eventually be lost as the alignment is not satisfactory, even for market road purposes. He suggested, in view thereof, that this 4.47 mile section be regraded to a suitable secondary highway standard on permanent alignment, which would cost about $30,000, and that the entire ten-mile section then be surfaced, which would cost an extra $50,000, or a total of $80,000, the amount of the present allotment. He presented a map showing the proposed plan. The Commission unanimously approved the revised plan as reported, subject to further approval by the Bureau of Public Roads.

The Commission discussed a request from the county court of Tillamook County for inclusion in the next Federal Aid Construction Program the improvement of what is known locally as the "Brickyard Road" from its junction with the Oregon Coast Highway at Clements Corner, via Trask River County Road, to Fairview Junction with the Wilson River Highway. The Engineer advised that this request has been investigated and it has been determined that the approximate cost of constructing this road, which is 2.8 miles in length, would be about $63,000. The Commission decided unanimously to give this project consideration in the formulation of its next construction program.

A request was presented from the Department of State Police for the designation of a "NO PARKING ON HIGHWAY SHOULDERS" zone along the Pacific Highway East for a distance of about one and one-half miles immediately north of the north city limits of Salem where congestion of traffic is aggravated by the parking of many cars adjacent to the pavement by patrons of restaurants, night clubs, et cetera. The Engineer advised that the highway pavement at this location is only two lanes wide; many times traffic is blocked by maneuvers incident to the parking and unparking of vehicles, and considerable hazard exists. The Traffic Engineer, he said, has investigated the matter and makes the recommendation, in which he concurs, that a "NO PARKING ON HIGHWAY SHOULDERS" area be established between M. P. 48.87 (north limits of Salem) and Hayesville Drive, M. P. 47.35, on both sides of the highway. The Commission approved the recommendation unanimously by the adoption of the attached

resolution relative thereto, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a report from the Engineer on a request from the City of Woodburn for the installation of traffic signals on US99E at its intersections with Young Street and Hardcastle Avenue in the town of Woodburn. In his report the Engineer stated that this matter has been investigated by the Traffic Engineer, who recommends the installation of a traffic signal at the Young Street intersection on the condition that the City of Woodburn will assume fifty percent of the cost involved, and who also recommends that the request for the signal at Hardcastle Avenue be denied. The Engineer stated his concurrence in the recommendation. The Commission approved the recommendation unanimously.

A letter was presented from the Douglas County Court urging that something be done to speed up the contract work of Del R. Beebe on the North Umpqua Road, Douglas County, so as to assure completion of this project this year. The Engineer advised that he has already written Mr. Beebe to expedite this project, and as a result thereof Mr. Beebe has placed additional equipment on the job, so if favorable weather obtains, it is quite likely that the job will be completed this year as planned.

A letter was presented from the county court of Deschutes County, urging improvement of the Gherking County Road No. 329, in the Commission's next construction program. The Commission decided to give this project due consideration along with others in the formulation of such program.

The Engineer reported on a request from the City of Athena, Umatilla County, for construction of a footbridge across Wild Horse Creek at the south city limits, for the benefit and safety of pedestrians who are obliged to cross this creek in order to reach the city's swimming pool and park. He advised that the park and swimming pool are located on the easterly side of the Oregon-Washington Highway and on the south bank of Wild Horse Creek, and that there is considerable volume of pedestrian traffic across the highway bridge which is only 28 feet wide. A traffic count on June 9, 1950, he said, revealed 92 pedestrians and 2,649 vehicles, which indicates a potential hazard. He estimated the cost to construct a suitable foot bridge at $800, and recommended approval of the project in the interests of safety, on the condition that the City of Athena will pay fifty percent of the costs involved, it being his opinion that the city is obligated at least to that extent. The Commission approved the recommendation unanimously.

The Commission unanimously confirmed oral authority heretofore given the Engineer for an expenditure of approximately $11,000 of state highway funds to construct a medial island along Barbur Blvd. (US99W) in front of "Rasmussen Village", Portland, in order to prevent vehicular traffic from crossing this heavily traveled highway at this point. The work involved is to be performed by the City of Portland and the state is to reimburse the city in full for its expense. (An agreement covering

the arrangement with the city was signed by the Commission on the following day.)

The Engineer reported that the City of Weston has fulfilled the legal requirements with respect to the expenditure of state tax street funds which it received in the second half of 1949 from state highway revenues accruing during the first half of that year; also, that the Cities of Boardman, Chiloquin, Condon, Hines, Mitchell, Scotts Mills and Weston have fulfilled the legal requirements with respect to the expenditure of state tax street funds which they received in the first half of 1950 from state highway revenues accruing during the second half of 1949; also, that the Cities of Idanha and Mitchell have fulfilled the legal requirements with respect to the expenditure of state tax street funds which they received in the second half of 1950, from state highway revenues accrued during the first half of this year. He also advised that the plans of the projects proposed to be financed with the funds in each instance have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission unanimously approved the recommendation by the adoption of the attached resolutions relative thereto, marked EXHIBITS "F-1", "F-2 and "F-3", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Engineer reported the results of an investigation heretofore ordered by the Commission concerning the installation of an electric-eye signal at the Greenwood Avenue undercrossing of the Oregon Trunk Railroad, on the Central Oregon Highway in the City of Bend, to indicate overheight loads and to warn operators of such loads to by-pass the structure because of the impaired clearance. The plans for the signal installation, he said, have been completed and it is estimated that the signal can be installed for $2,500 compared with an estimated cost of $20,000 to lower the roadway at this point. He recommended approval of the signal installation as a minor betterment project at a cost of $2,500 in order to avoid the expense of depressing the highway, which, he said, is not a feasible proposition because of drainage difficulties. The Commission approved the recommendation unanimously.

A resolution was presented from Columbia County Pomona Grange urging allocation of additional funds for the improvement of the lower Columbia River Highway, and that the work be started soon because of anticipated increase in traffic due to the Army's re-opening of the Beaver Ammunition Base at Clatskanie. The Commission deferred action on this matter pending rendition of the Engineer's report on his economic study of the highway situation in Clatsop County.

The Secretary presented requests from numerous cities and towns along the route of the Pacific Highway urging the widening of this highway for four lanes of traffic northerly from Salem to New Era, where the present four-lane highway terminates. The Commission deferred action on this matter pending presentations by a delegation scheduled to be present on the following day.

The Engineer asked the Commission to approve a minor revision in the plan for the relocation of the Old Oregon Trail (US30) between the towns of Heppner Junction and Boardman, particularly a slight change in the proposed alignment at Boardman. He exhibited a map showing the alignment originally approved by the Commission and the proposed change. He explained that the people of Boardman objected to the original line, but appear to be perfectly satisfied with the line as revised. He also explained that it is planned to acquire a 100-foot right of way on the city side of the highway which will allow sufficient room for business development along a frontage road to be built on that side of the highway. Access to the highway, he said, will be provided at the county roads at each end of the town, but direct access to the highway will not be allowed at any other point. He recommended approval of the revision. The Commission approved the recommendation unanimously.

The Engineer requested instructions relative to the reconstruction of the existing bridge across White River on the Mt. Hood Highway. He advised that the present bridge is a wooden structure which has decayed to such an extent that replacement is necessary. As a matter of information, he said that it is planned to raise the grade line of the new structure about 8 feet at the bridge site to permit passage of large boulders which the stream carries during periods of excessive run-off, such boulders heretofore having been blocked by the bridge, necessitating heavy expenditures to re-open the river channel and to repair damage done to the highway. He estimated the cost of the new structure, including necessary approaches, at $75,000, which is $41,000 more than the amount presently budgeted for the purpose, and he recommended approval of the expenditure using state funds only to finance it. The Commission unanimously approved the recommendation.

The Engineer requested authority to construct an additional equipment storage building 32' x 53' at the Warm Springs Maintenance Headquarters on the Warm Springs Highway, at an estimated cost of $12,000, and to construct a suitable headquarters for the storage of maintenance equipment at Estacada, which he estimated would cost about $11,800, including the building site. He advised that the capital outlay section of the 1950 budget provides for the construction of additional equipment storage buildings at the Warm Springs headquarters, but it does not provide for the building at Estacada, because when the budget was prepared a suitable building was being rented on a month-to-month basis. The owner of this building, he said, now refuses to renew the lease so equipment and small tools are now being stored in the open on a stockpile site. The need for the two buildings, he said, is urgent, and he recommended that he be given authority to construct them; also, that the Right of Way Department be authorized to negotiate the site for the building at Estacada. The Commission approved both requests unanimously.

The Commission had under consideration acceptance of the work accomplished by Deschutes County and the City of Bend in the reconstruction of a portion of the Powell Butte Secondary Highway as was required in order to permit expansion of the Bend Airport. The Engineer advised that this work was provided for in an agreement with the county and the city, dated October 1, 1948, wherein the county and the city agreed to reconstruct a portion of this

highway at their sole cost and expense. The work has now been completed, he said, and inspection reveals that it has been satisfactorily done. He recommended acceptance of the work by the Commission, as that is necessary before the Civil Aeronautics Authorities will approve it. The Commission unanimously accepted the project.

A request was presented from the City of Astoria for the installation of an overhead double-blinker sign at each of three cross-walks in Astoria, one being at the entrance to Columbia River Packers, another at Hellberg's Corner and the third at Bay Street. The Engineer advised that investigation reveals that the signs are warranted. He estimated the cost of the signs at $700 each, or a total of $2,100, and recommended approval of the installations, on the condition that the City of Astoria will pay 50% of the expense involved. The Commission approved the recommendation.

The Engineer requested authority to transfer $9,900 from the General Maintenance Budget to the Special Maintenance Budget to permit the financing of certain guard fence construction on the Coos Bay-Roseburg and Oregon Coast Highways, by contract. He explained that the Maintenance Department will be unable to complete this highly desirable work in its 1950 extra-gang maintenance program, so if the fences are to be constructed it is going to be necessary to have the work done by contract. He estimated that there would be 3,200 lineal feet of guard fence to build, and he recommended approval of the project for contracting, and transfer of the funds as requested. The Commission approved the recommendation.

In this connection the Engineer reported the desirability of constructing 3.6 miles of guard fence along the Umpqua Highway between Scottsburg and Reedsport, particularly along sections where the roadbed is very narrow and serious hazards exist for traffic. He said that he personally inspected the section, and in his opinion the guard fence is necessary to properly safeguard the traveling public. He estimated the cost of the guard fence construction at $50,000 and recommended approval of the project, because indications are that it will be some time before the highway can be reconstructed to modern standards that will not require this sort of protection. He pointed out that when the highway is reconstructed the guard fence can be moved to locations where the need is more urgent, so that considerable salvage can be made from the present investment. The Commission approved the recommendation unanimously.

Consideration was given by the Commission to a request by the Empire-Charleston Chamber of Commerce for construction of 250 feet of guard fence on the Cape Arago Secondary Highway at the Charleston Bridge and for the oiling of a triangular area at the intersection of this Highway with Broadway and Powell Streets in Charleston. The Engineer advised that this matter has been investigated in the field, but he has not had an opportunity to check the data so is not in position at this time to make a recommendation. In view of this information, the Commission deferred its decision pending the Engineer's report.

A resolution was presented from the Corvallis Women's Club requesting additional lights and signs on state highways and other arterial streets in Corvallis; the marking of pedestrian lanes at highway intersections; more rigid enforcement of speed regulations, and the installation of more appropriate signals at main intersections on 6th Street to warn motorists of approaching trains. As to the first request, the Engineer advised that the Commission previously approved the installation of 8 sets of traffic signals on the highway routes, bids for which are to be received on the following day. He also said that all stop signs covered by statute are entirely taken care of on state highway routes in Corvallis. As to observance of the rights of pedestrians, he said this is a matter of law enforcement by city officials. Concerning the second request, for the marking of pedestrian lanes at highway intersections, the Engineer stated that this function is a responsibility of the city, inasmuch as the state does not maintain pedestrian lanes within corporate limits. As to providing more rigid enforcement of speed regulations, the Engineer advised that this matter also is a matter for local regulation and enforcement, being within the city limits where the State Highway Department is without authority to act. Concerning the installation of signals to warn motorists of the approach of trains at the main intersections on 6th Street, the Engineer advised that only two of these crossings are on state highway routes, and that these two are relatively high on the railroad crossing signal priority list. The signalization of these crossings, he said, is quite complicated because of a railroad wye, and a considerable amount of train switching movements. It was his feeling that the city and the railroad company should share the expense of these installations equally with the state and he requested authority to discuss the situation with the city and the railroad officials to that end. The Commission deferred a decision in the matter pending an additional report from the Engineer as to the absolute necessity for the railroad crossing signals.

The Engineer requested authority to increase the project authorization for the construction of the Warrenton Secondary Highway Project in the City of Warrenton, from $42,825.20 to $53,000. He explained that the extra expense is required to provide a proper improvement on a portion of the job where unstable ground was encountered. The Commission approved the increase in the project authorization unanimously as requested.

The Engineer reported receipt of a communication from the City of Tillamook requesting the revival of a "special state tax street fund" project in their city which was approved by the Commission in 1949, but did not go forward because the city was unable to finance its share of the costs. The Engineer estimated the cost of the project at $42,000. He recalled that the original arrangement was for the state to contribute $15,000 and the city the balance, $27,000, but the project was dropped because the city could not finance its share. Advices from the city now he said, are to the effect that at a primary election this year the people approved a bond issue to provide the city's cooperative share of the project, in view of which he recommended that the project be revived on the original basis. The Commission approved the recommendation unanimously.

The Commission discussed a request from the City of Portland that the state join with the city on a fifty-fifty basis in channelizing and installing traffic signals on the Burnside Bridge, so as to make it possible

to reverse traffic that uses this structure during the evening and morning rush periods. The Engineer advised that the estimated total cost of the project is $7,200, and that the state's share would be approximately $3,600. He recommended approval of the expenditure. The Commission approved the recommendation.

The Commission considered and as a matter of policy denied a request from the Delake Chamber of Commerce for the construction of public rest-rooms adjacent to Dee River Bridge in Delake, it being the feeling of the Commission that the responsibility to provide such facilities is largely that of the locality in which the facilities are located.

The Commission also discussed and unanimously approved an agreement with the City of Aumsville, providing for the improvement of Main Street (North Santiam Highway) in this town, between Third Street and 11th Street, it appearing that the city has complied with the Commission's requirements by adoption of city ordinances prohibiting all parking on the paved portion of this street between the limits of the proposed improvement. (The agreement was signed by the Commission the following day.)

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

1. Perkins Brothers, Contract 3016 for construction of three bridges over Sprague River on the Sprague River County Road in Klamath County, requested an additional extension of time of 24 days from May 30, 1950 to June 23, 1950 within which to complete this job. They alleged that they had been unable to complete the job within the previously extended time limit due to high water. The Engineer advised that because of cold weather he had directed that the job be shut down last fall and an extension of time up to May 30, 1950 was granted. He also said that all of the concrete was in place and the structures were open to traffic prior to May 30th, and only a small amount of clean-up work remained which was not completed until June 23, 1950. He recommended, in view of the circumstances, that the additional extension of time to and including June 23, 1950, as requested, be granted without penalty. The Commission approved the recommendation.

2. L. H. Morris Electric Company, Contract 3262 for installation of traffic signals on the Junction City-Eugene Section of the Pacific Highway in Lane County, requested an extension of time of 31 days from June 30 to July 31, 1950, within which to complete this job. They alleged they had failed to complete the project within the specified time limit due to an error in shipment whereby the brackets for the walk-wait signals were of different diameter than the poles. The Engineer advised that the reason stated by the contractor is correct, and since the error was not the fault of the contractor he recommended that the extension of time as requested, be granted without penalty. The Commission approved the recommendation.

3. Hollywood Electric Company, Contract No. 3102, for the installation of a traffic signal system in Grants Pass, Josephine County, requested an extension of time of 209 days from December 16, 1949, to July 13, 1950, within which to complete this job. They alleged that their failure to complete the job within the specified time limit was due to a necessary change in control equipment. The original equipment was defective and it was necessary to secure special supplementary equipment from the factory. The Engineer advised that the original installation was completed within the time allowed; however, the control equipment was found to be defective and the contractor was required to make corrections which have now been accomplished and the job is in an acceptable condition. In view of these circumstances he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

4. Lindstrom Brothers, Inc., Contract No. 3095 for construction of the Trask River Bridge on the Oregon Coast Highway in Tillamook County, requested an additional extension of time of 59 days from April 30, 1950, to June 28, 1950, within which to complete this job. They alleged that high water conditions in the Trask River during the spring,which prevented removal of sheet piling around one of the water pier coffer-dams,was the reason they failed to complete the job within the specified time. The Engineer advised that all work other than removal of the coffer-dam around the steel pier was completed within the previously extended time limit. The coffer-dam, he stated, was causing no inconvenience so he had permitted the contractor to defer its removal until the water receded. He recommended that the second extension of time be granted as requested, without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

5. W. R. Grasle Company, Contract 3241 for the installation of tunnel lighting in the Arch Cape Tunnel on the Oregon Coast Highway in Clatsop County, requested an extension of time of 37 days from May 31, 1950 to July 7, 1950, within which to complete this job. They alleged that they were unable to complete the job within the specified time limit due to inability of the Westinghouse Electric Supply Company to meet the necessary delivery schedule of material. The Engineer advised that the delay was caused entirely by slowness in delivery of material by the Westinghouse Electric Supply Company and in view thereof, he recommended that the extension of time be granted as requested, without penalty. The Commission approved the recommendation.

6. L. R. Kauffman, Contract 3245 for surfacing the Cougar Creek-Preacher Creek Section of the Alsea-Deadwood Secondary Highway in Lane County, requested an additional extension of time of 60 days from June 15, 1950, to August 15, 1950, within which to complete this job. He alleged that he had been unable to complete the job within limits of the first time extension due to an unexpected amount of sand stone overburden which had to be removed in opening up his quarry. The Engineer advised that the contractor has taken an unduly long time to do the work, and because of the isolated location of the project, con-

siderable extra engineering expense has been incurred. He recommended in view of these circumstances that the additional extension of time be granted as requested, with engineering costs to be assessed as a penalty from June 15, 1950, until completion of the job. The Commission approved the recommendation.

7. George E. Corliss, Contract 3274, for grading and oil mat surfacing on the Scott Canyon Section of the Scott Canyon County Road in Sherman County, requested an extension of time of 45 days from July 31, 1950 to September 15, 1950, within which to complete this job. Mr. Corliss alleged that his failure to complete the job within the specified time limit was due to a greater percentage of rock in the work than was anticipated and the necessity to close down operations from January 13 to February 13, 1950 because of extreme cold and deep snow. The Engineer advised that the contractor was very slow in processing the work due to poor management, lack of proper financing and lack of proper organization in his crews. He recommended in view thereof that the extension of time be granted as requested with the provision that Mr. Corliss shall reimburse the state for engineering costs incurred from July 31, 1950, until completion of the job. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

8. Stoen's Rock and Landscape Company, Contract 3179, for landscaping on the Eugene (High Street-Judkins Point) Section of the Pacific Highway in Lane County, requested an additional extension of time of 44 days from June 1, 1950, to July 14, 1950, within which to complete this job. They gave no reason for requesting the second extension of time. The Engineer advised that all work, except the adjustment of some sprinkler heads, was completed within the previously extended time, and the contractor could not perfect such adjustment until State Highway forces had completed certain seeding work which was the state's obligation. The over-run of time, he said, is not the contractor's fault and he therefore recommended that the additional extension of time be granted as requested, without penalty. The Commission approved the recommendation.

9. C. and S. Electric, Contract 3287 for traffic signal installation on the Charnelton to High Street Section of the Pacific Highway in Eugene, Lane County, requested an extension of time of 61 days from July 31, 1950, to September 30, 1950, within which to complete this project. They alleged that they had been unable to complete the contract within the specified time limit due to non-delivery of signal equipment and cable which had been ordered immediately upon award of the contract. The Engineer advised that the contractor did everything that could reasonably be expected to secure the special equipment and he recommended, in consideration of this fact, that the extension of time be granted as requested, without penalty. The Commission approved the recommendation.

The Commission in discussing the requests for extensions of time as listed above considered but did not necessarily adopt either the recommenda-

tions of the Engineer or the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that Contracts Nos. 3016, 3095, 3102, 3110, 3179, 3200, 3220, 3221, 3222, 3241, 3260, 3261, 3277, 3293, 3309, 3314, 3327, 3331, 3343, 3350, 3362, 3364, 3371 and 3379, for construction of state highway projects have been completed according to the requirements of the contracts, or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed, approved and signed the following joint letter with W. H. Lynch, Division Engineer, Bureau of Public Roads, and the Regional Forester of the U. S. Forest Service, Region 6, concerning the financing of construction on the Tiller-Trail Forest Highway in Douglas County.

Chief, Forest Service,
Commissioner of Public Roads,
Washington, D. C.

Dear Sirs:

Under Oregon Forest Highway Program Letter for the Fiscal Year 1947, approved by the Acting Chief of Forest Service November 5, 1946, and revised and approved September 20, 1948, there was allocated to Oregon Forest Highway Project 16-A1,B1,D1,M the sum of $260,000 Forest Highway Funds and $165,000 Oregon State Cooperative Funds. In order to bring the allocation of funds into agreement with the currently estimated costs it is now necessary to make the following revisions:

Project No. & Account No.	Route Name and Type of Work	Length Miles	Present Program Amounts	Recommended Revised Program Amounts
16-A1,B1,D1,M (7069-01)	Tiller-Trail Hwy. Grading & Surf.	8.339	$260,000 Forest Hwy. Funds $165,000 Oregon State Cooperative Funds	$408,000 Forest Hwy. Funds $165,000 Oregon State Cooperative Funds

It is recommended that the program be revised to provide for the additional funds. There are sufficient funds in the State unprogrammed balance to finance the project as recommended above.

Very truly yours,

W. H. LYNCH
Division Engineer

U. S. FOREST SERVICE, REGION 6
By_____
Regional Forester

(cont.)

Letter to Chief, Forest Service (cont.)

OREGON STATE HIGHWAY COMMISSION

Ben R. Chandler
Chairman

Chas. H. Reynolds
Commissioner

M. K. McIver
Commissioner

Attest: H. B. Glaiyser
Secretary

Consideration was given by the Commission to violations committed by the Beale Creek Logging Company, Myrtle Creek, Oregon, and by Andreatta Trucking Company, Ashland, Oregon, in connection with truck-hauling of logs on state highways, as reported by the Engineer. A careful review of the facts as disclosed by the records of these two operators convinced the Commission that the violations were deliberate and that both operators should be penalized. As a result of discussion, the Commission ordered the suspension of the P.U.C. permits of both operators for a period of thirty days each. The Secretary was instructed to so recommend to the Public Utilities Commissioner. (For details see copy of Engineer's report to the State Highway Commission in general files.)

The Engineer reported that the Bureau of Public Roads has completed its construction work on the North Santiam Highway in the vicinity of the Detroit Dam Reservoir, and that the need for continuing the 35 mile per hour speed limit heretofore ordered by the Commission for this section no longer exists, except along the portion immediately adjacent to construction activities at the dam. He recommended cancellation of the 35 mile per hour speed zone between M.P. 34.25 and M.P. 39.10 and from M. P. 40.20 to M.P. 46.75. Also, that the 25 mile per hour speed zone between M.P. 39.10 and M.P. 40.20 be retained in effect so long as construction operations at the dam are in progress. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported an arrangement with Mr. James L. Southard for the elimination of a stock-pass located at M.P. 19.10 on the Medical Springs Secondary Highway No. 340, in Baker County. He said that the structure is 18 years old and its complete reconstruction is necessary because of decay; however, Mr. Southard, for whose accommodation the cattle pass was built, has agreed to the elimination of the structure entirely, and to convey to the state all of his rights and interest in it if paid the sum of $50. The Engineer recommended approval of the arrangement so that the structure can be re-

placed by permanent fill. The Commission approved the recommendation. (An agreement with Mr. Southard covering the matter was signed by the Commission on the following day.)

The Commission had under discussion the granting of a revocable permit to Mr. D. W. Hansen for the appropriation and use of surface waters that collect in a small pond located in a Highway Department quarry, known as Coffin Butte Quarry, adjacent to the Pacific Highway West, near Camp Adair. The Engineer advised that Mr. Hansen wishes to use the water for irrigating property which he owns adjacent to and immediately south of the quarry site. He also said that the operation will not interfere with the state's use of the quarry, and he recommended approval of Mr. Hansen's request. The Commission approved the recommendation. (The agreement was signed later in the session.)

The Engineer reported that on July 26, it was necessary to place a 50 percent reduced load limit on the Calapooya River Bridge at M.P. 9.16, on the Corvallis-Eastside Secondary Highway No. 210, because certain structural members of the bridge were damaged as a result of a collision. Repairs, he said, have been made and legal weight loads were restored on August 3, 1950. He asked the Commission to confirm the posting. The Commission unanimously approved the Engineer's action in this matter.

The Engineer requested authority for the Traffic Engineer, Mr. F. B. Crandall, to attend the annual meeting of the Institute of Traffic Engineers in New York City during September 24 - 28, 1950. He estimated the out-of-state expense at $360. He also requested authority for the Auditor, Mr. Malcolm H. Hawke, to go to San Francisco at state expense to examine the records of the Western Union Telegraph Company with respect to its claim for damages arising out of the Oneonta slide on the Columbia River Highway. He estimated the out-of-state expense at $105.15. The Commission unanimously approved both requests.

A letter was presented from Mr. N. Ray Alber, Lawyer, Portland, protesting the posting of the Tualatin Valley Highway from Portland to Beaverton for a maximum speed limit of 35 miles per hour. Mr. Alber alleges that such speed restriction is dangerous because traffic does not respect it. The Commission referred the letter to the Engineer for investigation and report.

The Engineer reported receipt of a petition from businessmen of Cascade Locks requesting that appropriate facilities be provided on the Columbia River Highway in this town for the control of traffic speed. He stated that he informed the petitioners by letter that the State Highway Commission must work with the established representatives of the people of any city or town, which is the city council, and he suggested to them that they direct their petition to the city council so that the matter can be officially presented to the State Highway Commission should the city council see fit to do so. The Commission approved the Engineer's action in this matter.

In order to complete the records, the Commission unanimously confirmed action taken during its recent inspection trip through Eastern Oregon, on the following matters:

1. The Engineer was authorized to advertise for bids for construction of the steel portion of the Marion Street Bridge across the Willamette River in Salem as soon as plans can be prepared.

2. The Engineer was authorized to purchase four additional small traffic line markers at a cost of $800 each, or a total of $3,200, so that each division of the state will be supplied with one of these markers.

3. Letter from the Hon. George W. Peavy, Mayor of the City of Corvallis, inquiring concerning the construction of a proposed revision of the northern entrance of US99W into Corvallis. In his letter, Mr. Peavy gives as his understanding that the State Highway Commission has authorized construction of this project, and he inquires when the work is to go forward. The Secretary, as requested by the Commission on its inspection trip, presented excerpts from the meetings of the Highway Commission held on December 20, 1949 and on February 6, 1950, covering this subject. According to this record the Commission has at no time made any definite commitment or promise with respect to the construction of this improvement, although, according to the record, the Commission recognizes the need of the improvement and will give it consideration as funds become available. The Commission instructed the Secretary to convey such information to Mayor Peavy.

A letter was presented from Mr. and Mrs. M. F. Lentes, Klamath Falls, objecting to the routing of trucks on Klamath Avenue as is proposed by the Klamath Falls City Council, because of their investment in a motor court on this street. The Commission deferred action on this matter pending a conference with a delegation from Klamath Falls on the following day.

The Commission had under discussion the adoption of a resolution confirming in a formal manner the action taken at its meeting on March 21, 1950, with respect to the abandonment of a short section of the Coos Bay-Roseburg Highway at its crossing of Sandy Creek in Coos County. A form of resolution relative thereto was presented. The Commission unanimously adopted the resolution, a copy of which, marked EXHIBIT "I", is attached hereto and by this reference made a part hereof with like effect as though extended in full herein.

The Secretary presented a letter from Mr. John A. Laing, Chairman of the Travel Advisory Committee, containing a recommendation with respect to the amount needed in the 1951 Budget for the Travel and Information Department. In his letter Mr. Laing gives as his opinion that the budget should not exceed $250,000, and requests that such sum be entered in the 1951 Budget for the Travel Department. The Commission approved the recommendation unanimously and instructed the Engineer to set up in the 1951 Budget the sum of $250,000 for Travel Department use.

The Commission discussed briefly matters pertaining to the purchase of insurance covering mobile equipment owned by the State Highway Department. In this connection Mr. C. W. Parker, Property Manager, who was present, explained certain details at the request of Commissioner Reynolds. Further details were explained by Commissioner Reynolds, who stated that he is not in position today to recommend to the Commission any particular plan, but he believes that he will be able to do so by the time the Commission next meets. The Commission took no action on the matter.

Commissioner Reynolds also reported the status of securing insurance coverage for buildings acquired in connection with right of way purchases. He said the policy has been purchased through the State Insurance Agents' Association, at a reduction of $2,000 in the annual premium expense for like coverage under policies which are now being cancelled. He also said that binders have been obtained covering insurance for shop buildings and their contents at Salem, Klamath Falls and La Grande, and that the policies will be forthcoming as soon as the Insurance Rating Bureau has determined a rate, which it already has been asked to do. The Commission approved the report.

The Commission had under discussion a request from Mr. Jay B. Moore, Glendale, Oregon, for permission to construct and use a roadway across a state-owned quarry site at M. P. 245.8 on the Pacific Highway, near Glendale. The Engineer advised that Mr. Moore wishes this privilege solely for the purpose of securing access to his adjoining land for farming purposes. The matter has been investigated, he said, and it has been determined that the use of the property for the purposes intended will not be detrimental to the state's use of the quarry. He recommended approval of the request on a revocable permit basis. The Commission approved the recommendation. (The permit agreement was signed by the Commission on the following day.)

A letter was presented from Mr. W. Ovid Evans, Bend, concerning the routing of The Dalles-California Highway through the City of Bend. Mr. Evans suggests a route along East Third Street, which he says is in accordance with a plan that was made before World War II, and would involve no turns whatsoever, nor the routing of through traffic through narrow underpasses. The Secretary was instructed to thank Mr. Evans for his interest in this matter, and to inform him that the plan is being studied by the State Highway Department.

The Commission had under discussion the setting of a date for its next regular meeting, and decided unanimously to hold such meeting in Portland on Thursday and Friday, September 28 and 29, 1950. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

The Secretary brought to the attention of the Commission a letter just received from Mr. Leo Adler, Chairman, Program Committee, Baker County Chamber of Commerce, in which letter the State Highway Commission is invited to be present and to take part in the dedication of the Dewey Avenue Underpass in the City of Baker, on Thursday, November 9, 1950. Chairman Chandler and Commissioner McIver expressed doubt that they would be able to attend. The Secretary was instructed to inform Mr. Adler that the members of the

Commission will be present if possible, but in any event, the Commission will be represented.

The Commission had under discussion the setting of a date for the laying of a cornerstone for the State Highway Building now under construction in Salem. All members of the Commission expressed their intention to be present at this function, but a date for the ceremony was deferred for the time being. The Commission unanimously approved Chairman Chandler's suggestion that Mr. T. H. Banfield, who was chairman of the Highway Commission when the building was planned and the contract awarded, be invited to make the dedicatory speech.

The Engineer presented a plan for the relief of traffic congestion on the ramps between Harbor Drive and the west end of the Ross Island Bridge, Portland. The plan, he said, involves the diversion of all Macadam Avenue (Oswego Highway) traffic via the Water Street Underpass, thence along Hood Street to an ultimate connection with Macadam Avenue immediately south of the Ross Island Bridge. This routing, he said, presently involves two right-angle turns, but investigation reveals that they can be eliminated by constructing a diagonal cut-over from Hood Street to Macadam Avenue under the end of the bridge. He estimated the cost of the improvement at $26,000, which amount includes $9,300 for right of way which will have to be purchased from the Oregon Electric Railway Company. He recommended the project as being very desirable because it will relieve the Harbor Drive ramps of most of the Oswego Highway traffic. He presented a map showing an outline of the project and requested authority for the Right of Way Department to negotiate an option for the right of way. The Commission deferred a decision in the matter until its next meeting, and instructed the Engineer to discuss details of the plan with Commissioner McIver in the meantime.

The Chief Counsel brought to the Commission's attention the advisability of someone being designated by the Commission to execute, in its behalf, sworn statements which are required by insurance companies in connection with damage settlements to show "proof of loss". He suggested that the Secretary be given authority to execute such papers in behalf of the Commission. After due consideration, the Commission authorized H. B. Glaisyer, Secretary for the State Highway Commission, to execute for and in the name of the State of Oregon, by and through its State Highway Commission, all receipts, releases and proofs of loss required by insurance companies as may, in the judgment of the Chief Counsel for the State Highway Commission, be necessary or desirable, in all matters pertaining to the adjustment, compromise and settlement by the said Chief Counsel, of claims for loss sustained, or to be sustained, by the State of Oregon by and through its State Highway Commission.

The Engineer brought up for discussion the reclassification of the Sunset Highway between Nehalem Secondary Highway Junction on the west, and Tualatin Valley Highway Junction on the east. He recalled that the Commission at its June meeting this year classified this highway as a Group I Highway, permitting loads 60 feet overall in length, with the understanding, however, that log hauling would be prohibited. He further advised that numerous requests for permission to transport logs over this highway have been received, the latest ones being those of B. Dewey Sanders, Forest Grove, and Wilfred Bar-

nett, Hillsboro, who haul logs from a point about four miles west of the Sunset Tunnel to an unloading dock near Holbrook on the lower Columbia River Highway. The permits presently issued to these men, he said, require that they leave the Sunset Highway at Nehalem Secondary Highway Junction and travel through Forest Grove and Cornelius to Hillsboro, thence north over the Cornelius Pass County Road to the Columbia River Highway. The Engineer pointed out that the Tualatin Valley Highway is severely congested at this time, particularly through Forest Grove and Hillsboro, and he gave as his considered opinion that the opening of the Sunset Highway for log hauling traffic would aid considerably in relieving this congestion and the traffic hazards that presently obtain, and he recommended that the Commission take appropriate action to open it. The Commission unanimously approved the opening of the Sunset Highway to log hauling traffic, as recommended by the Engineer, and instructed the Secretary to notify the Public Utilities Commissioner accordingly.

The Engineer rendered a progress report on the installation of additional truck scales, as heretofore authorized by the Commission at its meeting in May. (For details see copy of Engineer's written report to the Commission, dated August 17, 1950, in general files). The Commission approved the report and in the discussion of the matter instructed the Engineer to give it priority status so that the remaining scales will be installed and in use at the earliest possible time. He was also authorized and instructed to operate the scales on a 16-hour per day basis, as recently was done at Bandon, so that a record that cannot be refuted may be had of each operator's loads. He was also authorized to employ additional weighmasters, if necessary, to obtain the desired results.

A letter was presented from Eilene Rae Sealy, representing Jane Amherst Preserves, Portland, in which Miss Sealy requests either the reappraisal of the property that the state acquired from her in Sullivan Gulch, or relief from a clause in her agreement with the Commission having to do with the payment of rental, should she still occupy the premises after May 1, 1951. The Chief Counsel stated that Miss Sealy is laboring under a misapprehension, because the agreement provides that she is to occupy the premises free of rent until March 31, 1951, and that if she wishes to continue in the same location after that time, the amount of the rent that she will pay will be decided by mutual agreement, but she is not definitely obligated to pay $240. per month as she assumes. The Commission referred the matter to the Chief Counsel to iron out.

The Secretary presented a letter from the Hon. Raymond Coulter, State Representative, Grants Pass, requesting in behalf of the Ben Dierks Lumber Company, Murphy, Oregon, permission to truck-haul lumber, involving loads 60 feet overall in length over the Williams Secondary Highway from Murphy to Grants Pass. The Engineer advised that this highway is a Group II Highway with many curves and that it will not accommodate loads of such length. He recommended that the request be denied. The Commission approved the recommendation and instructed the Secretary to inform Mr. Coulter it is necessary to deny his request as a matter of policy.

The Engineer reported on a request from the Charleston Elementary School Board, Coos County, for sidewalk construction on the Cape Arago Secondary Highway, Charleston, for the benefit and safety of school children and other pedestrians. He said that investigation reveals that the highway at the point where the sidewalk is wanted is through a deep cut, and the question previously before the Commission was whether or not to widen the cut or to construct a footpath over the top of the cut. He recommended the widening of the cut and construction of a walk immediately back of the ditchline, which he estimated would cost about $1,000. He gave as his belief that the children would not use a footpath over the cut where it would have to be built on a very steep grade. The Commission unanimously approved the construction of the footpath through the cut as recommended by the Engineer.

The Commission discussed briefly, but deferred action until its next meeting, a request from the City of Hermiston for the widening of First Street and Gladys Avenue (state highway routes in Hermiston), the cost of which, as estimated by the Engineer, is $4,100, including construction of curbs, all of which expense the city is asking the state to assume.

Pursuant to previous instructions from the Commission, the Engineer reported on a request from the Canyonville City Council for the opening of First Street in this town so as to permit traffic to pass from one part of the town to the other without taking a roundabout course which they are required to do under the present plan which restricts passage to two points, one at each end of the town. He said that he personally consulted with the members of the City Council and a solution to the problem was mutually agreed upon. He exhibited maps showing the proposed plan which involves changing the location of First Street where it crosses the highway, and the dead-ending of Second, Third and Fourth Streets, and the construction of service road connections at First Street and at Fifth Street, the main market street leading into the town from outlying districts. He again stated that the plan was approved by the members of the City Council,who stated that they would adopt city ordinances, as may be necessary, to place the plan into effect. He recommended approval of the plan. The Commission unanimously approved the arrangement as reccmmended.

The Engineer reported the results of a special check by weighmasters of log hauling operations on the Oregon Coast Highway in the vicinity of Bandon. He said that weighmasters operated the truck scales at Bandon 16 hours daily from July 24 to 28, inclusive, and from August 3 to 4, 1950, a total of seven days, during which time 812 loads of logs were weighed, of which 147 loads, or 18.1%,were overweight. The loads, he said, involve 64 operators, 27 of whom had Class I records (violations exceeding 10%) during 1949, and 35 had Class I records for the first six months during 1950. In analyzing the seven-day operation, he said, a definite pattern appears for some operators whose records show violations nearly every day, from which it is apparent that the small fines assessed by the local Justice of the Peace at Bandon, usually $5 or $7, have no effect whatsoever in restraining or controlling the practice of overloading. He presented a tabulation showing the results of the seven-day operation, and particularly pointed out the following operators, whose records, in his estimation, justify the suspension or cancellation of their permits:

(cont.)

List of operators (cont.)

Edward R. Barr	Warren Boice	Court A. Boice
Earl F. Edwards	Donald O. Fraser	Donald A. Hansen
Archie Kerber Log Co.	N. B. March	James F. Mauzey
Elmer A. McGinnis	May Moomaw	Moore Mill & Lbr.Co.
R. L. Riley	Chas. M. Storm	Albert H. Strain
Martha E. Ward	Albert S. Wells	

He called attention to the fact that the permits of the Archie Kerber Logging Company and Albert H. Strain previously had been cancelled for overloading, but were later reinstated when these operators promised in writing hereafter to keep their loads within the prescribed limits. It was his feeling that these two operators should be dealt with more severely than the others. The matter was given very careful consideration by the Commission, and as a result thereof, the Commission ordered that the permits of the Archie Kerber Logging Company and Albert H. Strain, be suspended for thirty days each, and that the permits of the remaining operators be suspended for ten days each. The Secretary was instructed to so recommend to the Public Utilities Commissioner.

In this connection, the Engineer was again instructed to expedite the installation of the remaining truck scales heretofore authorized by the Commission. He was also instructed to conduct additional seven-day scale operations at other points throughout the state where logging operations are underway, and to employ additional weighmasters, if necessary, to accomplish the purpose intended.

The Engineer brought up for discussion the appointment of a "Safety Engineer" to supervise and direct an accident prevention campaign for the State Highway Department. He recalled that Mr. H. E. Nordlund, Safety Engineer for the General Casualty Company, which carries the liability insurance on all state equipment, appeared before the Commission at its last regular meeting in the interests of this matter, and recommended that the Commission appoint a "Safety Engineer" to supervise an accident prevention program. Following Mr. Nordlund's departure, he said, the Commission requested a definite recommendation from the State Highway Engineer in behalf of some individual who is qualified to act in that capacity. He said that he has given this matter very careful consideration and has canvassed the personnel of the Highway Department, and in his estimation Mr. W. M. Strohmeyer, who is now employed as District Maintenance Superintendent at Portland, is well qualified for the position because of his diversified experience with the Highway Department over a period of more than 31 years. He recommended that Mr. Strohmeyer be selected for this position. The Commission approved the recommendation unanimously.

The Commission discussed briefly matters which are to be presented by delegations on the following day, but took no definite action thereon.

The Commission also discussed the bids received earlier in the session for highway construction, and in this connection the Commission decided

unanimously that the state's contribution of funds for Special State Tax Street Fund Projects in cities shall be limited to $15,000, and that each city must agree to contribute cash to cover the expense over and above such sum before the contract in which it is concerned is awarded.

At 5:00 p.m. Chairman Chandler publicly announced the awards of contracts, as follows, covering the projects for which bids were received at this session, the Commission's decision being by unanimous vote:

"Grading, surfacing and oiling the Mill Gulch-Salisbury Section of the Baker-Unity Highway, about 10 miles south of the City of Baker, Baker County. The Commission received seven bids for this project, the low one being that of Rogers Construction Co., Portland, at $238,932. The contract has been awarded to Rogers Construction Co., low bidder, at their bid price.

"0.90 mile of grading and topping; construction of reinforced concrete railroad overcrossing structure, bridge over the North Powder River, and two box culverts on the North Powder River Section of the Old Oregon Trail near the city of North Powder, Baker and Union Counties. M. L. & C. R. O'Neil, North Powder, submitted the low bid for this project at $156,089.50. Eleven higher bids were received. The Commission has awarded the contract to the low bidder, M. L. & C. R. O'Neil, at their bid price.

"0.31 mile of paving on Locust Street in the City of Oakland, Douglas County. Only two bids were received for this job, being those of J. C. Compton Co., McMinnville, at $15,740., and Central Paving Co., Independence at $19,520. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, J. C. Compton Co., when certain conditions have been satisfied.

"Grading, surfacing and oiling "B" Street in the City of Yoncalla, Douglas County. No bids were received for this project.

"Widening the Union Creek Bridge at M. P. 57.29 on the Crater Lake Highway, Jackson County. Only one bid was received for this job, being that of R. & M. Construction Co., Central Point, at $9,990. The Commission has rejected the bid as being too high.

"Construction of a latrine in Cascadia State Park, Linn County. Everett M. DenHerder, Sweet Home, submitted the low bid for this work at $5,895.99. One other bid was received, being that of Santiam Ready Mix Co., Mill City, at $5,963. The bids have been rejected by the Commission as being too high.

"Grading and paving the Denver Avenue-Vanport Connection Section on the Pacific Highway East about 0.7 mile north of Portland, Multnomah County. Parker-Schram Co., Portland, submitted the low bid for this project at $15,810.90. Two higher bids were received. The Commission has awarded the contract to Parker-Schram Co., low bidder, at its bid price.

"Grading and paving on Roberts Avenue in the city of Gresham, Multnomah County. Three bids were received for this work, the low one being that of Porter W. Yett, Portland, at $18,785. The contract has been awarded to the low bidder, Porter W. Yett, at his bid price.

"Construction of a shop building extension in the city of La Grande, Union County. The Commission received two bids for this project, being those of Bechtel Bros., Elgin, at $43,998, and McCormack Construction Co., Pendleton, at $46,800. Bechtel Bros. qualified their bid by stating that they would accept the award of only one project at this letting. The Commission has awarded the contract to Bechtel Bros., low bidder, at their bid price.

"Construction of a headquarters building at Flora Junction, Wallowa County. The Commission received three bids for this work, the low one being that of Bechtel Bros., Elgin, at $31,860. They qualified their bid by stating that they would accept award of only one bid at this letting. Rohde Construction Co., Pendleton, submitted the next low bid at $32,267.20. The bids have been rejected by the Commission as being too high."

The meeting adjourned at 5:05 p.m. to reconvene the following morning in the same room.

Portland, Oregon
August 22, 1950

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the following persons present and participating:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Assistant State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Auditor
C. H. Armstrong, Parks Superintendent
H. B. Glaisyer, Secretary

Bids as follows for highway construction were opened and read aloud by the Secretary pursuant to previously published notice, following which Chairman Chandler announced that award of contracts would be made at 3:00 p.m. in the same room.

PORTLAND

Arthur Farmer	General Manager	Chamber of Commerce
V. A. McNeil		Chamber of Commerce
Floyd Martin	Chrm. Highway Committee	Chamber of Commerce

Those speaking in behalf of the improvement were: Edgar W. Smith, President, Portland Chamber of Commerce; Herbert B. Roadman, President, Oregon US99 Highway Association, Roseburg; Hon. Howard C. Belton, State Senator, Canby Chamber of Commerce; A. A. Price, Chairman of Highway Committee, Chamber of Commerce, Tualatin; Hon. Charles A. Sprague, ex-Governor, Publisher, The Oregon Statesman, Salem; Walter W. R. May, Editor, Enterprise-Courier, Oregon City; and Fred Wiedemann, Chairman of Highway Committee, Wilsonville.

Mr. Smith complimented the Highway Commission on its accomplishments and outlined briefly the purpose of the delegation's presentation. He also introduced the speakers and pointed out that the delegation represents numerous communities, towns and cities along the Pacific Highway, including Roseburg, Eugene, Albany, Salem, Woodburn, Canby, Tualatin, Wilsonville, Oregon City and Portland. Mr. Herbert Roadman, president of the Oregon US99 Association, emphasized the need for improvement due to the increase in traffic and the great number of accidents on the present highway. He declared the people residing in the five counties south of Marion County, through which this highway passes, are 100% in favor of the proposed improvement. Senator Belton alleged that this section of highway is the most heavily traveled highway in the state and he urged the widening for immediate construction. He gave as his opinion that not much additional right of way would be required and that from 50% to 75% of the highway will be a necessary part of the West Portland-Hubbard Highway through Wilsonville. Mr. May, urged widening of the highway as a part of an over-all plan including completion of the West Portland-Hubbard Highway to reduce the present congested traffic conditions on the Pacific Highway East. He declared there is desperate need for the improvement from the local traffic standpoint as well as an accommodation to through traffic because it will serve the district that contains the largest population in the state. Mr. Wiedemann stated that the people he represents are principally concerned in completion of the West Portland-Hubbard High-

way; however, they are absolutely in accord with the widening of the Pacific Highway between New Era and Salem. The Highway Commission, he said, has the necessary facts to determine in what order construction should take place and he urged the Commission to act in accordance with these facts. Mr. Price stated that the people of his district want the West Portland-Hubbard Highway completed at the earliest possible time. He gave as their feeling that the widening of US99E between New Era and Salem should be considered as a coordinated part thereof. Mr. Sprague stated that he represents the Salem Chamber of Commerce. He said that the Salem Chamber of Commerce is interested in several projects including completion of the North Santiam Highway, construction of the Salem by-pass route for the Pacific Highway East, and the widening of the Pacific Highway East between Salem and Woodburn which they consider most urgent. He cited traffic count figures showing a great increase in traffic on this highway during the past ten years and advised that the highway will "explode" unless something is done soon to relieve this congestion. He gave as his opinion that there is no competition between widening of the Pacific Highway north of Salem and completion of the West Portland-Hubbard Highway as each route has its own function to serve, and he suggested that the widening work could be done by stage construction starting at the Salem end and proceeding northerly therefrom. Mr. Smith concluded the presentation by stating that the many other delegates present undoubtedly could add many arguments in support of this highway widening if there were time to present them. He filed with the Commission a folio containing many letters from various organizations, cities and communities along the route of the Pacific Highway urging the widening of this section of highway.

Chairman Chandler stated that the Commission appreciates the sincerity of the delegation in presenting its arguments and is glad to have its viewpoints; also that the Commission would like to do what has been requested but it involves the question of funds of which there are not sufficient available at this time, particularly in Division No. 2. The Commission, he said, is giving this matter a lot of thought and study and is doing the best it can with the money available; moreover, the Engineer has been instructed to study the conditions along US99 throughout its entire length so needed information will be available when the Commission feels that it can spare the money to finance improvement of the worst sections. He also said that the Commission is equally as desirous to proceed with the improvement as is the group here today and will do so when it can.

Messrs. R. B. Logan and Val Austin, Mayor and Councilman, respectively, of the City of Arlington were present in behalf of the City Council and Chamber of Commerce concerning a proposed improvement of the Old Oregon Trail through their city. Mr. Logan gave as their understanding that the Highway Commission proposes to reroute the highway closely paralleling the main line tracks of the O. W. R. R. & N. Company, which will eliminate the present route along their Main Street. He said that such routing will 'kill' their town from the tourist standpoint, and will deprive motorists of services which they need and which have been furnished them by the people of this town for many years. He suggested modifying the plan by designating Main Street for westbound traffic only, and utilizing Columbia Street, which is one block west of Main Street, for eastbound traffic only. He alleged that such a plan would create a large saving in expense of construction. He

presented letters from the City Council and the North Gilliam Chamber of Commerce endorsing such plan, and filed with the Commission a map showing the plan they have in mind.

Chairman Chandler advised that it is the desire of the State Highway Engineer and of the members of the State Highway Commission not to injure any community in any way, but the Commission must make its plans in conformity with the facts that are shown by engineering investigation, that it must provide a facility that will serve in the best possible manner the greatest number of people. Moreover, it must comply with the requirements of the federal government in connection with construction of interregional highways because the funds that the Commission proposes to use to finance the improvement in Arlington are largely federal funds. The Highway Commission, he said, will take all factors into consideration in arriving at its decision, but it must put the right road in the right place. Commissioner Reynolds gave assurance that if the highway is reconstructed in conformity with the Engineer's plan, every consideration will be given to a connection with the new highway so that the city of Arlington will not be isolated. This concluded the presentation.

Robert A. Thompson, Mayor of the City of Klamath Falls, and Matt Finnegan, Councilman, were present. Mayor Thompson stated that they were present seeking aid and advice concerning the designation of Klamath Avenue as a truck route paralleling Main Street, and the improvement and maintenance of this street as a state highway route. He suggested (1) designation of Klamath Avenue and Main Street as one-way traffic routes; (2) installation of a traffic signal at the intersection of South Sixth and Martin Streets to provide protection for the large number of people who have to cross South Sixth Street in going to the Post Office substation; and (3) designation of the west side bypass for US97 through the city of Klamath Falls as it affects the status of city-owned lots which may be needed as right of way.

As to the first project, it was pointed out by Chairman Chandler that the Highway Commission cannot spend highway funds for the improvement and maintenance of city streets, except a limited amount which has been set up by the legislature as a special state tax street fund for improvement of city streets that are being overstressed by heavy truck traffic or where there are heavy traffic increases. But such funds are not used in communities of more than 5,000 population, and the maximum spent in any one community is $15,000. Mayor Thompson then inquired if the Commission would designate Klamath Avenue as a one-way traffic route in one direction and Main Street as a one-way traffic route in the other direction. He was informed by Chairman Chandler that this is something for the city to decide for itself. However, if the City will make an official request for assistance in the solving of its traffic problems, the Commission will, in conformity with past practice, authorize the Engineer to make studies. Commissioner Reynolds and McIver endorsed Chairman Chandler's statement.

As to the installation of a traffic signal at South Sixth and Martin Streets, Mayor Thompson stated that many people must cross South Sixth Street to reach the Post Office substation, and a traffic light is essential

to their safety. He suggested a signal of the pedestrian push-button type. The Commissioner referred this matter to the Engineer for investigation. With reference to the request for the designation of a west side bypass for US97, Mayor Thompson was advised that this project is for a long time in the future, and the Commission does not feel that the time is propitious to designate a definite route. Mayor Thompson explained that the city is expanding, and that city-owned lots, which are becoming scarce, are very much in demand. He urged the Commission to authorize the staking out of the proposed alignment for this bypass so as to allow the city to sell 'fring' lots as occasion arises. The Commission instructed the Engineer to stake the right of way limits.

The following persons representing Barbur Boulevard Boosters, Portland, appeared before the Commission in the interests of the West Portland-Hubbard Highway: Arnold C. Harris, Chairman, Tom Turner, R. A. Coucher, Fred R. Chapman and L. E. Cornelius, all of Portland and West Portland; John H. Krieger, Tigard; S. G. Anderson, Lake Grove; and C. C. Boozier, Wilsonville. The group also included R. H. Corey, Consulting Engineer, Portland; and representatives of the Civic Club of the town of Wilsonville and of the Civic Club of Tualatin, including Mayor H. A. Walrod. Mr. Harris headed the group. He urged the early completion of the West Portland-Hubbard Highway as a relief route for the presently congested highway (US99E) between Portland and Salem. Mr. Harris and other members of the group based their request on the following: that this highway will provide a shortcut route between Portland and Salem; that it will eliminate the bottleneck condition which now exists in Oregon City; that it will lessen traffic over the Willamette River bridges in Portland; that it will provide proper highway facilities for the residents of the West Portland district in connection with the marketing of their products in Portland; and it will eliminate the costly and inadequate ferry that the state is now furnishing at Wilsonville. Mr. Corey stated that he is not a member of the Barbur Boulevard Boosters but has been retained by the group to urge the construction of the West Portland-Hubbard Highway from an engineering and economic standpoint. Chairman Chandler advised that the Highway Commission has given this highway a lot of study and has authorized negotiations to secure options for the right of way so that it will be available at such time in the future when the Commission can finance construction, but construction is an impossibility at the present time because of lack of funds. He pointed out that there are many needed improvements through the state that the Engineer estimates will cost about $450,000,000 to build, which is way beyond any amount that the Commission now has in sight. This highway, he said, will be built some time in the future, but the Commission is presently in no position to state just when.

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. with the same persons present and participating.

A delegation from Hillsboro, representing the Chamber of Commerce, was present in the interests of the further improvement of the Cornelius Pass Road and the Federal Aid Secondary Highway which extends from Hillsboro to North Plains. This group was headed by Mr. Vance Weatherton, Secretary of the Chamber of Commerce, and included the following: W. C. Christensen, Tom Doyle, J. W. Barney, City Manager, and Lee McIntyre. Mr. Weatherton urged improvement of the Cornelius Pass Road for the benefit of the log haul-

ers who have to use it or are otherwise forced to transport their loads through Portland down to the unloading point at Holbrook on the Lower Columbia River Highway. He said that the two and one-half mile section immediately east of Hillsboro is satisfactory, but the four-mile section beyond that between West Union and Ray's Ranch is in a deplorably bad condition and it is beyond the financial ability of the county to maintain it. Mr. Barney pointed out that while the road is a county road, it was developed on the Federal Aid Secondary Highway system. He alleged that it has been neglected for the past twelve years. He also stated that the road is used extensively by log haulers from the Banks district, and that the volume of traffic that uses the road is ten times greater than that which uses the Nehalem Secondary Highway at Vernonia. Mr. Doyle confirmed the remarks of the other gentlemen. He added that it is a very important road and carries a tonnage that is greater than the tonnage that is moved into Portland from this district. He mentioned that the County has issued 240 permits authorizing truck hauling of logs over the road, and gave as his feeling that there is justification for expenditure for the improvement of the road of the fees that these truckers pay into the P. U. C. office. Chairman Chandler advised that the Commission has no money immediately available to finance such an improvement and will not have until Congress appropriates additional federal aid funds to finance highway work. Mr. Weatherton inquired whether or not the Highway Commission would contribute state highway funds on a matched basis with the county, in the event the federal funds should not materialize. He was informed by the Commission that the improvement of the Cornelius Pass Road is not a priority project, and it is doubtful under the circumstances if the Commission could spare the funds. In any event, there are no state funds available now. Commissioner Reynolds recalled that a group from Hillsboro appeared before the Commission recently with the request that a study be made of a proposed highway extending due east from Hillsboro along Baseline to a connection with the Sunset Highway, and the Commission authorized the Engineer to make a survey. He suggested that in his study of such matter the Engineer also make a study of a proposed connection with the Cornelius Pass Road to determine the practicability of a new road and an estimate of the cost to construct it. The Commission approved the suggestion. In concluding the conference, Mr. Weatherton stated that Washington County is financially able to maintain the Hillsboro-North Plains Road in a satisfactory condition, but is not able to keep up the Cornelius Pass Road in a satisfactory condition for the traffic that uses it.

Mr. George H. Goodrich, Attorney, Tillamook, appeared before the Commission in behalf of Mr. Glen Anderson, Sr., also of Tillamook, father of Glen Anderson, Jr., a ten-year old boy who sustained a broken arm while playing around some lumber that was piled on property leased from Mr. Anderson, about one and one-half miles west of Tillamook on Netarts Secondary Highway. Mr. Goodrich stated that the accident occurred at 6:00 p.m., July 15, 1950, while the boy was playing on lumber that was piled on this vacant lot by a Highway Department bridge crew. The lumber, he said, was not piled in good order and it toppled over on the boy, fracturing his arm. He gave as his thought that the state is liable, and he asked the Commission to reimburse the boy's parents for doctor bills etc., which, he said, amounted to $297.00. Chairman Chandler advised that in matters of this kind the Com-

mission is guided by the opinion and recommendation of its Chief Counsel, who in this instance considers that the state is not liable and who recommends that the claim be denied. He added that the Commission has adopted the recommendation.

Mr. W. H. Lynch, Division Engineer of the Bureau of Public Roads, was present and discussed with the Commission the financing of the remaining 2.4 mile section of the Pacific Highway south of Canyonville, Douglas County. He said that due to the present emergency and the importance of this interstate highway, he considers it desirable to advance this project to immediate construction when some means can be found to provide the funds to finance the work. The presently estimated cost of the construction, he said, is $934,000, but there are only $333,000 of unallocated forest highway funds available. The State Highway Engineer pointed out that a saving of $136,000 of state funds accrued in the awarding of the contracts now underway, and the Commission previously approved an allotment of $75,000 to this job when the present program was formulated, which together with the $333,000 forest highway funds makes a total of $544,000 immediately available and a balance of $390,000 to be provided. The suggestion was made that the state contribute an additional $390,000 to the work so that completion of the improvement may be expedited. Mr. Lynch stated that if the state will contribute such extra sum, he will advertise the project for bids to be received within the next thirty days and that any savings that materialize will accrue to the state. He also said that the surveys have been completed and needed right of way has been acquired, so there should be no delay on that account. As a result of the discussion, the Commission voted unanimously to contribute the extra $390,000 of state funds upon being assured by the Engineer that such sum is available, it being understood that several forest highway projects which may be deferred by reason of construction of this project will be given priority in the formulation of the next forest highway program.

The Engineer brought up for discussion a proposition submitted by Dr. H. K. Newburn, President of the University of Oregon, for the purchase of land at the intersection of Franklin Boulevard (US99) and 13th Avenue East in the city of Eugene, for park purposes and to minimize the hazard of vehicular turning movements from Franklin Boulevard into 13th Avenue. The Engineer explained that the land in question is triangular in shape and President Newburn has suggested that the state acquire two parcels at the apex of the triangle, which would cost an estimated $11,000. The balance of the property in this block, he said, is partially owned by the University and partially owned by the Williams Bakery Company of Eugene and it is the feeling of Dr. Newburn that this property will be donated for the cause. The Engineer also stated that if this property is acquired, it is the intention of the University of Oregon to develop and landscape it, and to provide for future maintenance of the area. It was the feeling of the Commission that the expense of acquiring this property is not justified by the benefits that would be realized, and accordingly the proposition was declined, notwithstanding that the Commission would like to assist Dr. Newburn in this undertaking.

The Engineer reported receipt of a request from the City Council of Oregon City that a study be made of the traffic conditions at the Willamette River Bridge on the Oswego Highway between Oregon City and West Linn. He said

there is considerable traffic congestion at this bridge at certain times of day, and it is the feeling of the City Council that this can be eliminated by the construction of a ramp from the bridge to the highway. He stated that such solution of the problem is impracticable, but there are possibilities of alleviating the trouble in some other manner. He recommended that he be authorized to make an investigation at state expense, because the bridge is on a state highway. The Commission approved the recommendation.

The Engineer also stated that the City Council of Oregon City would like a similar investigation made of the Singer Hill Road which extends from Main Street in Oregon City to the top of the bluff and is purely a city street. The City, he said, is asking for a survey at the City's expense, and he recommended granting the request on that basis. The Commission approved the recommendation.

The Commission discussed with the Engineer the bids received at the morning session for highway construction, and at 3:00 p.m. Chairman Chandler publicly announced the Commission's decision with respect to each project as follows, the Commission's decision being by unanimous vote.

"Installation of traffic signals at eight intersections on Pacific Highway West in Corvallis, Benton County. City Electric, Salem, submitted the low bid for this job at $17,689.21. There were four higher bids. The contract has been awarded to the low bidder, City Electric, at their bid price.

"Construction of 0.39 mile of service road and highway connection on the Ochoco Avenue-Milwaukie Section of the Pacific Highway East north of Milwaukie in Clackamas County. The low bid for this job was submitted by Parker-Schram Company, Portland, at $21,425.50. There were three higher bids. The Commission has awarded the contract to the low bidder, Parker-Schram Company, at their bid price.

"Grading, surfacing and oiling of 0.25 mile on the Warrenton (Hayes Street-Morton Street) Section of the Warrenton Secondary Highway in Warrenton, Clatsop County. Grimstad and Vanderveldt, Astoria, submitted the only bid received for this project at $8,412.50 using asphalt. They did not submit a bid for the use of tar. The contract has been awarded to Grimstad and Vanderveldt at their bid price.

"Paving 0.24 mile on the Empire (Broadway Street-North Commercial Street) Section of the Cape Arago Secondary Highway (Newmark Avenue) in Empire, Coos County. The Commission received two bids for this job, the low one being that of Acme Construction Company, Eugene, at $11,055. The Commission has awarded the contract to the low bidder, Acme Construction Company, at their bid price.

"Construction of 3,200 lin. ft. of metal guard rail in Division 3-B on the Coos Bay-Roseburg and Oregon Coast highways, Coos and Curry Counties. Rich and Sons Nursery, Hillsboro, submitted the low bid for this job at $8,640. Three higher bids were received. The contract has been awarded to Rich and Sons Nursery, low bidder, at their bid price.

"Construction of an extension to the maintenance building in Prineville, Crook County. The Commission received only two bids for this job, the low bid being that of Bemis and Company, Portland, at $3,177. The contract has been awarded to Bemis and Company, low bidder, at their bid price.

"Construction of a latrine in Battlerock State Park on the Oregon Coast Highway in Curry County. Gilbert Roberts, Hood River, submitted the only bid received for this job at $4,535. The Commission has rejected this bid as being too high.

"Construction of a latrine in Lava Caves State Park on The Dalles-California Highway in Deschutes County. Swendig and Son, Redmond, submitted the low bid for this job at $2,493. Three other bids were received. The Commission has awarded this contract to the low bidder, Swendig and Son, at their bid price.

"Grading, surfacing and oiling 0.5 mile on West Fillmore Street in Burns, Harney County. Russel Olson, Pendleton, submitted the only bid received for this project at $15,303. The Commission has referred this bid to the Engineer with authority to award the contract at the bid price when certain conditions have been satisfied.

"Grading, surfacing and oiling 1.16 miles on the Viento Park-Wygant Park Section of the Columbia River Highway in Hood River County. The low bid for this project was submitted by Parker-Schram Company, Portland, at $274,110. Nine other bids were received. The Commission has awarded the contract to the low bidder, Parker Schram Company, at their bid price.

"Construction of a 602-foot reinforced concrete and steel bridge and 0.57 mile of grading, surfacing and oiling on the Bybee Bridge Section of the Table Rock Market Road in Jackson County. Tom Lillebo, Reedsport, submitted the low bid for this job at $177,350. Two higher bids were received. The Commission has awarded the contract to the low bidder, Tom Lillebo, at his bid price.

"Grading and paving 0.13 mile on Lister Street in Cave Junction, Josephine County. The only bid received for this project was submitted by J. C. Compton Company, McMinnville, at $4,887. The Commission has awarded the contract to J. C. Compton Company at their bid price.

"Construction of 1.85 miles of asphaltic concrete footpath on the Maxwell Road-Eugene Section of the Junction City-Eugene Secondary Highway in Lane County. No bids were received for this project.

"Grading and paving 0.73 mile on the Sweet Home Section of the Santiam Highway in Linn County. Warren Northwest, Inc., Portland, submitted the low bid for this job at $118,248 using tar. They also submitted a bid of $118,312 using asphalt. Higher bids from two other contractors were also received on this project. The contract has been awarded to the low bidder, Warren Northwest, Inc., at their bid price using tar.

"Grading and paving 0.37 mile on the Aumsville (Main Street) Section of the North Santiam Secondary Highway in Marion County. Warren Northwest, Inc., Portland, submitted the only bid received for this job at $13,945. The contract has been awarded to Warren Northwest, Inc., at its bid price.

"3.23 miles of grading and paving on the Pudding River-Silverton Section of the Silverton County Road in Marion County. The low bid for this job was submitted by Warren Northwest, Inc., Portland, at $158,684 using tar. They also submitted a bid of $158,710 using asphalt. Three other contractors bid on this job. The Commission has referred all bids to the Engineer with authority to award to the low bidder when certain conditions have been satisfied.

"Oneonta Borrow Pit excavation project on the Columbia River Highway, Multnomah County. R. E. Steelman Construction, Milton, submitted the low bid for this job at $3,840. Thirteen higher bids were received. The contract has been awarded to the low bidder, R. E. Steelman Construction, at its bid price.

"Construction of seven reinforced concrete and steel structures and 0.37 mile grading and paving on the Broadway Bridge-Steel Bridge Section of the Pacific Highway West in Portland, Multnomah County. The low bid for this job was submitted by C. J. Montag and Sons, Portland, at $597,936. Three higher bids were received. The Commission has awarded the contract to the low bidder, C. J. Montag and Sons at their bid price.

"Waterproofing the balcony deck and porch deck on the Vista House at Crown Point on the Crown Point Secondary Highway, Multnomah County. The low bid for this job was submitted by Southwest Waterproofing Company, Portland, at $3,385. Only one other bid was received. The Commission has rejected all bids as being too high.

"Grading, surfacing and oiling 1.06 miles on Joseph city streets and on the Wallowa Lake Secondary Highway in Wallowa County. The Commission received two bids for this project, the low bid being that of Russell Olson, Pendelton, at $46,959. The contract has been awarded to Russell Olson at his bid price.

"Construction of a masonry block maintenance building at Mitchell, Wheeler County. Gilbert Roberts, Hood River, submitted the low bid for this job at $4,685. Three higher bids were received. The contract has been awarded to Gilbert Roberts, low bidder, at his bid price."

Chairman Chandler brought up for discussion the Borax Company property in Curry County, acquisition of which the Commission previously authorized as a part of the Curry County Ocean Wayside. He gave as his feeling that if the property cannot be acquired by warrenty deed, because of the in-

ternational situation, the company should be requested to transfer its interest in the property to the state by a quitclaim deed. Commissioners Reynolds and McIver indicated concurrence therein, whereupon the Chief Counsel was instructed to conclude this transaction immediately on such basis.

The Commission discussed the report from the Engineer on the status of surveys, including old surveys, recent surveys on the present construction program, and recent surveys not on the construction program, all of which have been approved; and needed surveys which the Commission has not as yet authorized. Particular attention was given to the surveys which the Engineer is now requesting authority to conduct so as to avoid delays in completing them and acquiring necessary right of way when the Commission is ready to proceed with construction of the several projects. As a result of the discussion, the Commission unanimously authorized the Engineer to conduct the surveys listed below for the suggested primary and secondary programs, and the Chief Counsel was instructed to negotiate for needed right of way when descriptions of the properties have been furnished him:

PRIMARY HIGHWAY AND SECTION	Length Miles	Estimated Cost	Estimated Cost Survey
Dalles-California:			
M.P. 182 - 198	16.0	$ 250,000	$ 15,000

Commissioner Reynolds brought up for discussion the salary paid the Commission's Secretary, H. B. Glaisyer. He said that through oversight, Mr. Glaisyer did not receive the annual step increase in salary on January 1, as did the Division Engineers and other classified personnel, in view of which he recommended that Mr. Glaisyer be given the benefit of a $20.00 a month increase in salary retroactive to January 1, 1950, and he so moved. The motion was seconded by Commissioner McIver and carried by unanimous vote.

Commissioner Reynolds reported receipt of a communication from Mr. Elmer McClure, Master of Oregon State Grange, transmitting a copy of a resolution adopted by the Grange with regard to "division of gasoline taxes." According to this resolution, the Oregon State Grange goes on record as favoring an increase in the allocation of state road and/or highway funds due the counties from the present 19% to 30% because of alleged increases in the amount of state highway revenues. Commissioner Reynolds gave as his feeling that Mr. McClure should be given a very full and complete explanation of highway matters so as to clarify apparent misapprehensions that the State Grange is laboring under. The suggestion was approved by Chairman Chandler and Commissioner McIver, whereupon the Engineer was instructed to personally contact Mr. McClure relative thereto.

Chairman Chandler brought up for discussion the naming of the recently acquired Ocean Wayside in Curry County. He gave as his feeling that this park should be named the Samuel H. Boardman Park in honor of Mr. Boardman, who was State Parks Superintendent for many years, who promoted and developed from infancy the park and recreational areas within the boundaries of this state, and through whose personal efforts the Curry County Ocean Wayside Recreational Area was brought into being. Commissioners Reynolds and McIver expressed their feelings similarly, and it was so ordered. The Secretary was instructed to formally notify Mr. Boardman of the action taken.

Chairman Chandler also brought up for discussion the naming of the proposed highway through Sullivan Gulch in Portland. It was his thought that this highway should be named in honor of Mr. T. H. Banfield, former Chairman

of the State Highway Commission, because of Mr. Banfield's early association with the selected location, because it was largely through his personal efforts that the route was adopted as a state highway route despite local opposition, and in recognition of the valuable services rendered the state by Mr. Banfield during the seven years that he was a member of this Commission. After due consideration, motion was made, duly seconded, and carried unanimously, that this highway be named "Banfield Expressway." The attached resolution relative thereto, marked EXHIBIT "J", was thereupon adopted by the Commission. The Secretary was instructed to formally notify Mr. Banfield of the Commission's action.

The Right of Way Engineer brought up for discussion the question of the disposal of Lots 17, 18, 19, 20, 21 and 22 in Block 13 of Bunker Hill Addition to the city of Coos Bay, particularly the portion of such lots which lie outside the normal right of way width. He said that these lots were acquired for two purposes, viz: to protect the bridgehead of Cold Bank Slough, and for drainage purposes. He also said that he has received a number of requests from persons who wish to purchase this parcel of land, but has consistently refused to sell the land because of its value for State highway purposes. Some of these prospective purchasers, he said, are very insistent, for which reason it would be helpful if the State Highway Commission would take action officially to remove the property from its list of surplus land, so that anyone desiring to purchase it can be told definitely that it is not for sale. The State Highway Engineer concurred in the recommendation of the Right of Way Engineer, whereupon the Commission ordered that this parcel of land be removed from the list of surplus properties for retention by the State Highway Department for future highway use.

The Chief Counsel requested authority to acquire by condemnation certain property owned by the Fred J. Kiesel Estate, which property is required as a gravel pit and haul road for use in connection with the widening and future maintenance of the Ontario-Nyssa Section of the Old Oregon Trail. He said that he has been unable to reach a satisfactory settlement by negotiation, and there is need to expedite the transaction because the highway improvement is already under contract. The Commission approved the request unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "K", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Consideration was given by the Commission to a "Summary of Unfinished Business" prepared by the Secretary as of July 26, 1950, particularly the items which were not reported on at this meeting. Action, as follows, was taken on the individual items:

1. Prohibition of bonfires on beaches and of trespassing on ocean banks of private property: The Chief Counsel advised that his study of this subject reveals that the Highway Commission does not have necessary police powers to control the situation and that he is preparing a bill for consideration of the 1951 legislature which will give the Commission authority. The Commission ordered the item deleted from the list.

2. Widening of the Pacific Highway north of Roseburg: The Engineer reported that since the last meeting of the Commission, a reconnaissance survey has been made for a highway location west of the Southern Pacific Railroad between the towns of Winchester and Shady Point, south of Roseburg and that indications are this location, which is on entirely new alignment, will prove to be a much better one than the present highway, and if so, costly reconstruction of the present highway north of Roseburg can be avoided. He exhibited maps showing the proposed location and requested authority to conduct a location survey on the route. The Commission unanimously approved the request and ordered that this item be removed from the list of unfinished business with the understanding that the Engineer's report on the survey will be considered as an entirely new subject.

3. Proposed addition to Bald Peak State Park, Yamhill County: The Commission ordered this item deleted from the list inasmuch as the price asked by the owner, as previously reported, is exorbitant.

4. Adoption of a policy with respect to granting farm crossings and limiting use thereof as access to state highways: The Commission considered this matter satisfactorily disposed of and ordered the item deleted from the list.

5. Proposed relocation of the Oregon Coast Highway across Youngs Bay between Astoria and Warrenton: The Commission ordered that this item be retained on the list of unfinished business pending receipt of the report ordered from the Engineer on right of way needed and the ownership thereof.

6. Proposed acquisition of additional parking space for automobiles at Celilo Falls Indian Village. The Commission ordered this item deleted from the list because it requires a rearrangement of Indian dwellings in which the Commission cares not to become involved.

7. Legislation which should be presented to the 1951 legislature: The Commission reiterated its desire to have a list of the matters upon which legislative action is to be sought, and accordingly instructed the Chief Counsel to prepare such list.

8. Employment of someone to replace the State Parks Historian, W. A. Langille, when he retires: The Commission decided to do nothing further with such appointment now, since Mr. Langille is still on the state payroll, and ordered this item deleted.

9. Improvement of the intersection formed by the Pacific Highway East, Pacific Highway West, and Swift Secondary Highway in North Portland: The Secretary presented a letter from Mr. F. J. Kernan with respect to his offer to donate right of way under certain conditions. The Commission ordered the letter filed and the item deleted from the list of unfinished business.

10. Request of the Umatilla County Court for the oiling of the 21-mile section of the Heppner Highway westerly from the Nye junction: The Commission decided to consider this project in the formulation of its next construction program, and instructed the Engineer to bring it to the Commission's attention at that time. This item is to be deleted from the list of unfinished business.

11. Request of the Bend Chamber of Commerce for improvement of Highway US97 south of Bend: The Commission ordered the item deleted from the list because there are no funds in sight to finance such a project.

12. Request of Beulah Moore for the re-opening of the stone wall at the north end of the Depoe Bay Bridge so as to permit access to the Oregon Coast Highway from her property. The Commission decided not to grant the request and ordered the item deleted from the list.

13. Request of users of the Fox Hollow Secondary Highway, Lane County, for the paving of this highway south of Eugene: The Commission ordered this item deleted from the list of unfinished business because no funds are available to finance the work now.

14. Proposed Special State Tax Street Fund project in the City of Milton, Umatilla County: The Commission disapproved the project, as the Engineer previously recommended they do, and ordered this item deleted from the list.

15. Obligations of the State Highway Commission covering construction and maintenance of city streets as outlined by Chief Counsel: The Commission decided to discuss this matter as an entirely new subject at a future time and ordered the item deleted from the list.

16. Encroachments on railroad company property at the east end of the Steel Bridge in Portland: The Chief Counsel stated that he is working on this matter and expects to have a favorable report to render to the Commission shortly. The Commission ordered the item removed from the list.

17. Complaints filed by County Judge C. A. Toms, Sherman County, regarding dangerous condition which he alleges exists at the junction of the old and new routes of the Columbia River Highway in the town of Rufus: The Engineer estimated the cost of the work at $500 and advised that highway forces are now working to eliminate the hazard, and that the work should be finished shortly. The Commission approved his action in the matter and ordered the item deleted from the list.

18. Request of the U. S. Forest Service for a contribution of $1,500 of state highway funds to finance the fire patrol on the Columbia River Highway due to road blocks caused by highway construction: The Commission denied the request and ordered the item deleted from the list.

19. Application of the City of Sweet Home for Special State Tax Street funds for a city street improvement: The Commission denied the request but

indicated that it would consider it when the 1951 program is arranged.

20. Request of the City of Rockaway for the installation of a traffic signal on the Oregon Coast Highway at its intersection with an important street that leads to the ocean beach: The Commission ordered this item retained on the program pending receipt of the Engineer's report on the subject.

21. Request for the widening of the Pacific Highway's north entrance into the city of Grants Pass: The Commission decided to give this project consideration in the formulation of its next construction program, and instructed the Engineer to bring it to the Commission's attention at that time.

22. Acquisition of right of way needed in connection with the Ladd Canyon project on the Old Oregon Trail, Union County, particularly across land owned by Mr. Peterson: The Commission ordered this item retained on the list of unfinished business pending receipt of the Engineer's report on the cost to widen and straighten a curve so as to avoid Mr. Peterson's property, for which he is demanding an exorbitant amount.

23. Request of Seaside Chamber of Commerce for reconstruction of the Oregon Coast Highway through Seaside, along Roosevelt Drive: The Commission deferred action on this matter pending receipt of a report from the Engineer on his economic study of the highway situation in Clatsop County.

24. Suggestion of Oregon Coast Highway Association that its manager, Mr. H. Tinnerstett, be appointed a member of the Highway Department Travel Advisory Board: The Commission ordered this item deleted from the list.

25. Request of Clackamas County Grange for reconstruction of the Estacada-Springwater Section of the Woodburn-Estacada Secondary Highway along DuBois Creek survey: The Engineer estimated the cost involved at $250,000, based on a survey conducted in 1936. The Commission ordered the item deleted from the list because there are no funds available to finance the work.

26. Request of the Tillamook City Council that certain state highway land at the south entrance of the Oregon Coast Highway into Tillamook be made available as a site for a building for use by the Secretary of State. The request was denied.

27. Request of the City of Prineville for improvement of the city street over which is routed the Crooked River Highway within the city limits: The Engineer advised that pursuant to previous instructions from the Commission, he had this matter investigated and it has been determined that a satisfactory improvement can be made for about $5,000. He recommended approval of the project for construction in 1951. The Commission approved the recommendation unanimously.

28. Request of City of Philomath for improvement of Main Street (Corvallis-Newport Highway) by paving full width, and construction of curbs and drainage facilities: The Engineer estimated that this work would cost about $21,000. He pointed out that in the tentative list of projects for the next construction program, provision has been made for the improvement of the weak section of the Alsea Highway westerly from its junction with the Corvallis-Newport Highway. He suggested that, if the Commission wishes to authorize the improvement in the city of Philomath, the work be done along with this Alsea Highway project. The Commission approved the suggestion and so ordered.

29. Proposed park site at McNary Dam: The Commission ordered this item retained in the list of unfinished business and instructed the Parks Superintendent to make additional investigation and report.

30. Proposed addition to John Day Fossil Beds State Park: The Parks Superintendent stated that pursuant to previous instructions from the Commission, he carried on negotiations with the owner of this property and reached a settlement, except that this owner is demanding retention of grazing privileges, which he cannot approve. He was instructed by the Commission to continue negotiations.

31. Request of Baker County Chamber of Commerce for improvement of the Haines-Anthony Lakes State Secondary Highway: The Commission decided to consider the project in the formulation of its next construction program.

32. Request for oiling the south end of the Elkton-Sutherlin Secondary Highway, Douglas County: The Commission decided to consider this project in the formulation of its next construction program.

33. Request of Hood River County Court for construction of a new bridge over the Middle Fork of Hood River on the Hood River Secondary Highway at Dee: The Commission decided to consider this project along with others in the formulation of its next construction program.

34. Approval by Commissioner McIver of plans and designs for Highway Department dwellings: The Commission ordered this item deleted from the list.

35. Suggestion of Mr. Arthur R. Kirkham, Portland, for development of picnic areas along highways, and installation of directional signs pointing out landscape features: The Commission ordered this item deleted from the list inasmuch as the Engineer was instructed, during the progress of the Commission's recent inspection trip through Eastern Oregon, to erect appropriate signs pointing out landscape features to tourists.

36. The question of contributing $3,000 of state highway funds in cooperation with the U. S. Geological Survey for study of stream flow in Oregon: The Commission decided unanimously not to contribute funds for this project.

37. Request that the county road extending south from the city of Island City, Union County, to a connection with US30 east of La Grande, be designated a Federal Aid Secondary Highway: The Commission confirmed the action taken during the progress of its recent trip through Eastern Oregon approving the designation of this road as a Federal Aid Secondary Highway and the construction of the same with Federal Aid Secondary Highway funds.

38. Proposal for the testing of roadway surfaces using various axle loadings. The Commission deferred action on this matter pending receipt of more information from the Highway Research Board, and ordered the item deleted from the list for the time being.

39. Request of the City of Milton for the installation of a traffic light on the Oregon-Washington Highway at its intersection with Main Street in this town. The Commission referred this matter to the Engineer for investigation and report.

The Commission considered, approved and signed agreements, et cetera, as follows:

Two deeds conveying two small tracts of land to Seufert Bros., which land was acquired from them in connection with acquisition of right of way for Big Eddy-Dune Section of Columbia River Hwy.

Deed conveying to United States of America a tract of land containing 0.63 acre, in Klamath County.

Option to purchase small triangular tract of land containing 0.16 acre, adjacent to Willamette Highway near Meridian Dam, Lane County, by Army Engineers.

Agreement with owner of drive-in theater at N.E. 92nd and Sandy Blvd. Portland.

Agreement with City of Aumsville providing for improvement of North Santiam Highway in this town.

Joint letter with Bureau of Public Roads and U. S. Forest Service wherein provision is made for additional funds for certain projects in Forest Highway Program.

Release agreement with Clarence Southard covering cattle-pass.

Revocable permit in favor of B. W. Hanson allowing the use of surface waters that accumulate on Coffin Butte Quarry Site adjacent to Highway 99W near Camp Adair.

Agreement with Jay B. Moore, Glendale, permitting construction and use of a roadway crossing state-owned quarry site at M.P. 245.8 on Pacific Highway near Glendale.

Agreement with City of Sweet Home covering improvement of Santiam Highway through this town.

Agreement with City of Cave Junction providing for improvement of Lister Street as a Special State Tax Street Fund Project.

Agreement with City of Portland changing route of US99W from 6th Avenue to Broadway, necessitated by one-way street system.

Agreement with City of Burns providing for improvement of W. Fillmore Street as a Special State Tax Street Fund Project.

Agreement to construct a medial island along Barbur Blvd. in front of Rasmussen Village, Portland, at estimated cost of $11,000.

Bargain and Sale Deed conveying unto Chas. E. Eckelman 3.77 acres of land situate near Arrata Road and Sullivan Gulch, Multnomah County.

Bargain and Sale Deed conveying unto Harvey Jacobsen & Wife 42.48 acres of land in Marion County.

Bargain and Sale Deed conveying unto A. L. Chaplin & Iris G. Chaplin 4.34 acres of land in Deschutes County.

Bargain and Sale Deed conveying to Oregon-Portland Cement Co. a 2.75 acre tract of land on Dixie-Lime Section of Old Oregon Trail Highway in Baker County.

Lease for Land with Joseph O. Meyers for 53.07 acres of land situate in Douglas County, covering a period of 10 years.

Lease for Land with S. T. Humphrey for 14.25 acres of land situate in Douglas County, covering a period of 10 years.

Lease for Land with Horace T. Byler and Margaret A. Byler (Byler Fuel Company) a parcel of land situate in Coos County.

Bargain and Sale Deed conveying to Oregon-Washington Railroad & Navigation Company a tract of land in the Troutdale-Multnomah Falls Section of the Columbia River Highway. Consideration named in instrument is $100.00.

Bargain and Sale Deed conveying to Oregon Washington Railroad & Navigation Company a tract of land in Umatilla County, Oregon

Resolution reducing maximum load limits on a section of the McKenzie Highway.

August 22, 1950

1951-1953 biennial budget estimate.

Resolution designating a 45 mph speed zone on Woodburn-Estacada Secondary Highway between a point west of its junction with Route 215 and Molalla west city limits.

Resolution designating a 35 mph speed zone on Pacific Highway East between north limits and south limits of City of Woodburn.

Resolution lifting reduced load limits on various state highways.

Resolution reducing maximum load limits on West Diamond Lake Secondary Highway.

Resolution prohibiting parking of vehicles on highway shoulders on Pacific Highway East (US99E) between mile Post 9.32 and Mile Post 9.63.

Resolution prohibiting parking of motor vehicles along Wilson River Highway between Mile Post 2.04 and Mile Post 2.16.

The meeting adjourned at 4:00 p.m.

Chairman

State Highway Engineer

Commissioner

EXHIBIT "B-1"

Minutes of August 21 and 22, 1950

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Pacific Highway West is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, the Highway Commission proposes to widen, straighten, and relocate, in part, the North Yamhill River-St. Joe Underpass Section of the Pacific Highway West, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, straightening, relocating, in part, construction, and maintenance of the North Yamhill River-St. Joe Underpass Section of the Pacific Highway West a parcel of real property located in Yamhill County, Oregon, described as follows, to-wit:

> A parcel of land lying in St. Joe Orchard Homes, situated in Section 11, Township 4 South, Range 4 West, W.M., Yamhill County, Oregon; the said parcel being part of Lots 54 and 55, St. Joe Orchard Homes No. 1 in said County and State, and beginning at the southeast corner of said Lot 55; thence in a northerly direction on the west side of the railroad right of way to the south side of the Pacific Highway West; thence following in a southwesterly direction along the south line of said right of way to a point where said right of way intersects the south line of said Lot No. 54; thence northeasterly along the south line of Lots 54 and 55 to the place of beginning, containing 2 acres, more or less.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

(Cont.)

EXHIBIT "B-1" (Cont.)

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-first day of August, 1950.

EXHIBIT "B-2"

Minutes of August 21 and 22, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Pacific Highway West is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate a section of said highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Highway Commission is authorized to take fee title to said real property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way purposes for use in connection with the proper relocation, construction, and maintenance of the North Corvallis Section of the Pacific Highway West the following-described real property, to-wit:

A parcel of land lying in the W. F. Dixon D. L. C. #50 in Township 11 South, Range 5 West, W.M., Benton County, Oregon, and being the following-described property: That tract of land which was conveyed by that certain deed to Joseph Francis Frank, recorded in Book 65, Page 367 of Benton County Record of Deeds; the said parcel being described as follows:

Beginning at a 3/4" iron rod which is 2.682 chains North 23' West of the southwest corner of the John Stewart D. L. C. No. 49, Township 11 South, Range 5 West, W. M., and running thence North 23' West along the west line of said Claim 8.652 chains to a 3/4" rod at the south side of the Corvallis & Eastern Railroad right of way, which point is 9.192 chains South 23' East of the southeast corner of Claim No. 48; thence South 36° 37' West along said right of way 3.432 chains to a 3/4" rod; thence South 18° 04' West along the east side of the S. P. R. R. right of way 5.415 chains to a 3/4" rod; thence South 78° 48' East 3.855 chains to the place of beginning, containing 1.930 acres.

Also: Beginning at a 3/4" pipe which is on the west line and 14.777 chains North 23' West of the southwest corner of John

(Cont.)

Steward D. L. C. No. 49 also 5.749 chains South 23' East of the southeast corner of Claim No. 48 in Township 11 South, Range 5 West, W. M., and running thence South 18° 04' West along the east side of S. P. R. R. right of way 3.643 chains to the intersection of the east line of said right of way with the north line of the Corvallis and Eastern R. R. right of way; thence North 36° 37' East along the Corvallis & Eastern R. R. right of way 1.912 chains to the west line of said Claim No. 49; thence North 23' West 1.927 chains to place of beginning, containing 0.111 acres.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-first day of August, 1950.

EXHIBIT "B-3"

Minutes of August 21 and 22, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the Sullivan Gulch Highway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation of motor vehicles promoted, and highway travel in general safeguarded, the parcel of real property hereinafter described is necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required, and is being appropriated for right of way of the Sullivan Gulch Highway, for the purpose of establishing, constructing, and maintaining a throughway, the following-described parcel of real property, to-wit:

A parcel of land lying in Holladay's Addition to East Portland, situated in Section 35, Township 1 North, Range 1 East, W.M., Multnomah County, Oregon; the said parcel being all that part of Lots 3, 4, 5, 6, and 7, Block 124, Holladay's Addition lying south of the O. W. R. & N. Co. right of way; all that part of Block 129, Holladay's Addition, lying south of the O. W. R. & N. Co. right of way; and all that part of N. E. 11th Avenue lying between Blocks 124 and 129, Holladay's Addition, and south of the O. W. R. & N. Co. right of way.

The parcel of land to which this description applies contains 59,800 square feet; 12,800 square feet in Block 124; 39,500 square feet in Block 129; 7,500 square feet in N. E. 11th Avenue.

2. That the highway facility for which the aforesaid parcel of real property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcel of property, as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcel of real property.

4. That upon the trial of any suit or action instituted to acquire the said parcel of real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-first day of August, 1950.

EXHIBIT "B-4"

Minutes of August 21 and 22, 1950

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Cascade Secondary Highway and the Mt. Hood Highway are highways under the jurisdiction and control of the State and are in addition parts of a federal highway system; and

WHEREAS, for the purpose of providing highways which will more adequately serve the traveling public, the Highway Commission plans and proposes to construct channelizing islands and right-turn lanes at the intersection of said highways, and for such purpose, and in connection therewith, the real property hereinafter described is necessary; and

WHEREAS, said Highway Commission is authorized to take fee title to said real property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the construction of a channelizing island and a right-turn lane at the intersection of said Cascade Secondary Highway and said Mt. Hood Highway the parcel of real property located in Multnomah County, Oregon, described as follows, to-wit:

> A parcel of land lying in Lot 7, Block 3, Grand View Heights, in Section 9, Township 1 South, Range 2 East, W. M., Multnomah County, Oregon; the said parcel being described as follows:
>
> Beginning at the northwest corner of said Lot 7, Block 3; thence south along the west boundary of said Lot 40 feet; thence east 3 feet; thence northeasterly on a 45 foot radius curve to the right through an arc of 62° 44', a distance of 49.27 feet (the long chord of which curve bears North 31° 22' East 46.85 feet) to the north boundary of said Lot 7; thence west along the north boundary of said Lot 7, a distance of 27.38 feet to the point of beginning, containing 399 square feet.

EXHIBIT "B-4" (cont.)

2. That the highway facilities for which the aforesaid parcel of real property is required and is being taken have been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said parcel of property, as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcel of real property.

4. That upon the trial of any suit or action instituted to acquire the said parcel of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owner.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-first day of August, 1950.

August 21, 1950

EXHIBIT "B-5"

Minutes of August 21 and 22, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any right or interest therein, deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Salem-Dallas Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate and improve the section of the said highway as hereinafter set forth, and for such purpose and in connection therewith the real property hereinafter described in paragraph 1, together with all rights and interest of any kind or nature therein, is necessary, and any easement, reservation, exception, or right in the nature of an easement in the real properties described in paragraph 4 is necessary; and

WHEREAS, the Commission is authorized to take fee title to the real property hereinafter described in paragraph 1; and

WHEREAS, the Commission is authorized to take and extinguish any right or interest, if any there be, by which a right or easement of access, ingress, egress, or regress may accrue to that real property, less the real property described in paragraph 1 hereinafter, which is described in that deed of conveyance from S. L. Burk to Florence Burk recorded in Book 87, Page 404, Deed Records of Polk County, Oregon, hereinafter referred to in paragraph 3; and

WHEREAS, the Commission is authorized to take any right, interest, easement, or right in the nature of an easement, if any there be, in the real properties described in those certain deeds of conveyance referred to in paragraph 4 hereinafter; and

WHEREAS, the Salem-Dallas Highway is a major highway of the State, and as such carries large volumes of traffic, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Highway Commission does hereby find and declare that there are needed and required for right of way for use in connection with the relocation and improvement of the West Salem Section of the Salem-Dallas Highway two parcels of real property located in Polk County, Oregon, described as follows, to wit:

EXHIBIT "B-5" (Cont.)

Parcel No. 1

A parcel of land lying in Sections 21 and 22, Township 7 South, Range 3 West, W.M., Polk County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Florence Burk recorded in Book 87, Page 404, of Polk County Record of Deeds; the said parcel being described as follows:

Beginning on the southerly line of Edgewater Street (State Highway No. 30) at a point which is 60.3 feet South 23° 25' East and 350 feet North 58° 05' East from the southwest corner of Block 1 of Churchmere Addition to West Salem; thence South 31° 55' East along the easterly line of a tract conveyed to A. L. and Lillian H. Cummins by deed recorded in Book 133, Page 129, a distance of 70 feet; thence northeasterly parallel to and 70 feet distant from the southerly line of said Edgewater Street 1087.66 feet; thence North 31° 55' West 70 feet to the southerly line of Edgewater Street; thence northeasterly along the southerly line of Edgewater Street 250 feet to the easterly line of said property; thence South 37° 10' East along said easterly line to the southeast corner of said property; thence westerly along the southerly line of said property to a point South 31° 55' East of the point of beginning, said course being along the easterly line of said Cummins tract; thence North 31° 55' West along said easterly line to the place of beginning.

The parcel of land to which this description applies contains 8.341 acres.

Parcel No. 2

A parcel of land lying in Sections 21 and 22, Township 7 South, Range 3 West, W.M., Polk County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Florence Burk recorded in Book 87, Page 404, of Polk County Record of Deeds; the said parcel being described as follows:

Beginning at the southeasterly corner of that tract of land conveyed to A. L. and Lillian H. Cummins by deed recorded in Book 133, Page 129; thence South 58° 05' West (parallel to Edgewater Street in West Salem) 350 feet to the southwest corner of that tract of land conveyed to Lorraine L. and Irene W. Stock by deed recorded in Book 123, Page 431; thence North 31° 55' West along the westerly line of said Stock tract 150 feet to the southerly line of Edgewater Street; thence South 58° 05' West 20 feet, more or less, to the westerly line of said Burk property; thence South 21° 25' East along said westerly line 198 feet to the southwesterly corner of said property; thence easterly along the southerly line of said property to a point which is South 31° 55' East of the beginning point of this description; thence North 31° 55' West to the point of beginning, containing 0.355 acre.

(Cont.)

EXHIBIT "B-5" (Cont.)

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to the acquisition of fee simple title to the afore-described real property it is necessary that there be acquired and extinguished such interest, if any there be, by which a right of access, ingress, egress, or regress, or any right in the nature of a right of access, ingress, egress, or regress, may accrue, by virtue of the adjacency of the relocated Salem-Dallas Highway on the real property described in paragraph 1, to that real property, less the real property described in paragraph 1 above, which is described in that certain deed of conveyance from S. L. Burk to Florence Burk recorded in Book 87, Page 404, Polk County Record of Deeds.

4. The Highway Commission does hereby find and declare that there are needed and required for the purpose of providing a highway which will more adequately serve the traveling public in the relocation of West Salem Section of the Salem-Dallas Highway all rights of reservation or interests, if any there be, existing in the southerly eighty feet of the real properties described in the following designated deeds of conveyance, all recorded in the deed records of Polk County, Oregon, in the books and at the pages hereinafter indicated, which rights of reservation or interests, if any there be, exist by virtue of such deeds of conveyance, which were from Earl C. Burk and Eunice O. Burk, husband and wife, Pearl C. Couey, a widow, and Modella May Rodgers and Clyde Rodgers, wife and husband, as grantors,

To T. C. Wood and Gladys C. Wood	Book 123, Page 428
To A. L. Cummins and Lillian H. Cummins	Book 133, Page 139
To D. R. Osborn	Book 124, Page 489
To Mark G. Gehlar	Book 124, Page 15
To Bert Picha	Book 123, Page 426
To F. Gilbert Lieser	Book 125, Page 368

5. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in the interest of said property as to the compensation to be paid for the taking, including the damages, if any, and, in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

6. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

7. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-first day of August, 1950.

EXHIBIT "C"

Minutes of August 21 and 22, 1950

R E S O L U T I O N

WHEREAS, the Crown Point Highway, otherwise known and designated as Secondary State Highway No. 125, is a state highway under the jurisdiction and control of the State Highway Commission; and

WHEREAS, Dabney State Park abuts upon said highway between Highway Engineer's Stations 5+00 and 26+39.9 upon the center line of said highway; and

WHEREAS, persons park their vehicles within the right of way limits of and upon the south side of said highway and leave said vehicles so parked for extended periods of time, both during hours of daylight and darkness, while using the facilities of Dabney State Park and for other purposes; and

WHEREAS, the parking of vehicles on the southerly side of said highway and on the shoulders thereof southerly of the travelled portion of said highway tends to restrict and impair the use of the travelled portion of the highway to such an extent that in the opinion of the Highway Commission there is created a hazard not only to through traffic but also to parked vehicles and persons therein; and

WHEREAS, in the opinion of this Commission public welfare and public safety require that the use of said highway and the shoulders on the southerly side thereof for parking purposes be prohibited within the area hereinafter set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare, based upon investigations, reports and recommendations of the members of its staff, that the parking of motor vehicles on the southerly side of the Crown Point Highway and the shoulders thereof southerly of the travelled portion of said highway between Highway Engineer's Stations 5+00 and 26+39.9 in Multnomah County, Oregon, creates a hazard not only to through traffic but also to parked vehicles and persons therein.

2. That this Commission does further find and declare that the parking of motor vehicles upon the southerly side of said highway and on the shoulders thereof southerly of the travelled portion of said highway between the engineer's stations above set forth should be prohibited.

3. That the State Highway Engineer hereby is instructed to erect signs at said engineer's stations and at such places between said engineer's

(Cont.)

stations as in the judgment of said Engineer are necessary to accomplish the purpose of this resolution and the action of the Highway Commission as herein declared, on which signs shall be printed in plain, legible type the words "NO PARKING," or "NO PARKING ON HIGHWAY SHOULDERS."

4. That the Secretary be and he hereby is instructed to send a certified copy of this resolution to the Superintendent of State Police and to send a like copy to the State Parks Superintendent.

5. That this resolution be entered in the minutes and records of the State Highway Commission as of the 21st day of August, 1950.

EXHIBIT "D"

Minutes of August 21 and 22, 1950

R E S O L U T I O N

WHEREAS, the Highway Commission, under and within the approval of provisions of Section 115-351, O.C.L.A., is authorized with respect to highways under its control and jurisdiction to designate main traveled highways as through highways, and

WHEREAS, all of the highways of the State which are known and identified as primary state highways and all of the highways of the State which are known and identified as secondary state highways are public highways under the jurisdiction and control of the State Highway Commission, and

WHEREAS, the Commission heretofore under the authority of said act designated certain primary state highways, and in some instances sections only of primary state highways; and likewise this Commission heretofore designated certain secondary state highways, and in some instances sections of certain secondary state highways, as through highways, which said acts on the part of the Commission are expressed in the following resolutions:

(1) Resolution approved and adopted April 27, 1943 and entered in Volume 28, Part 1, of the Minute Book of the Commission;

(2) Resolution approved and adopted December 14, 1945 and recorded in Volume 30, Part 2, of the Minute Book of the Commission;

(3) Resolution approved and adopted August 26, 1947 and recorded in Volume 32, Part 1, of the Minute Book of the Commission;

(4) Resolution approved and adopted November 25, 1947 and recorded in Volume 32, Part 2, of the Minute Book of the Commission; and

(5) Resolution approved and adopted September 21, 1949 and recorded in Volume 3, Part 2, of the Minute Book of the Commission, and

WHEREAS, subsequent study of all facts, conditions and circumstances gives evidence of the fact and conclusion that the volume, the kind and the character of the traffic now using said highways and the speed at which such traffic moves demonstrates that each and all of said highways constitute and are main traveled highways within the meaning and purpose of said act, and

WHEREAS, based upon the report and recommendations of State Highway Engineer and the State Traffic Engineer, and based upon a full consideration of all matters, conditions and circumstances pertinent to said highways, the kind and volume of traffic and the speed at which said traffic moves, it is the judgment of this Commission that each and all state highways are and should be declared main traveled highways and are therefore qualified to be declared through highways within the purpose and meaning of said act.

(Cont.)

EXHIBIT "D" (Cont.)

NOW, THEREFORE, be it, and it hereby is resolved and ordered by the Commission, all members being present and voting affirmatively as follows:

1. That all primary state highways and sections thereof heretofore designated by the Commission as through highways under the provisions of said section 115-351, O.C.L.A., and all highways hereafter selected, adopted and established as primary state highways hereby are designated as through highways under the provisions, purposes and meaning of said law.

2. That all secondary state highways and all sections thereof, together with all secondary state highways hereafter located, established and constructed as secondary state highways hereby are designated as through highways within the meaning and purpose of said law.

3. That there is attached hereto and by this reference made a part hereof a map or print marked "Exhibit A", on which map or print there is shown colored in red all of the highways under the jurisdiction of the Highway Commission and which under this resolution are declared to be through highways.

4. That the State Highway Engineer be, and he hereby is instructed to place or cause to be placed and thereafter maintained along all through highways at all points where streets or roads intersect or enter said highways or sections of highways, signs or markers notifying drivers of vehicles to stop before entering or crossing said highways.

5. That said Engineer be and he hereby is instructed to place such signs and markers as nearly as practicable at the place or places where said cross or intersecting roads or streets meet a prolongation of the nearest property line abutting upon such through highways, and such signs or markers so placed or installed shall indicate or disclose to all drivers of motor vehicles entering said highways from any of said cross or intersecting roads or streets the place where the stop shall be made.

6. Said signs or markers shall conform in shape, design, size, and other physical characteristics to the specifications and standards heretofore approved for such signs and markers and which have heretofore been adopted and are again here ratified.

7. That nothing in this resolution and no action hereby taken by the Commission shall in any manner or to any extent nullify or rescind the action of the Commission in and by the adoption of the resolutions hereinabove enumerated with respect to the designation of highways as through highways, but all of the highways or sections of highways enumerated in said resolutions shall be deemed as through highways from the dates upon which they were so declared in said resolutions hereinabove mentioned.

8. This resolution shall be entered in the minutes and records of the Commission as of August 21, 1950.

EXHIBIT "E"

Minutes of August 21 and 22, 1950

R E S O L U T I O N

WHEREAS, the Pacific Highway East, otherwise known and designated as US99E, is a state highway under jurisdiction and control of the State Highway Commission; and

WHEREAS, the section of said highway from the north city limits of Salem to a point 1.52 miles northerly thereof is extremely congested by vehicular traffic, which situation is aggravated by the parking of cars immediately adjacent to the paved section of said highway, which parking of cars is done by patrons of restaurants, night clubs and other commercial institutions of which there are a great number in said area; and

WHEREAS, the changing and maneuvering of vehicles within the traveled portion of said highway in connection with the parking and unparking of said vehicles tends to restrict and impair the use of said traveled portion of the highway to such an extent that in the opinion of the Highway Commission there is created a hazard, not only to through traffic moving over said highway, but to parked vehicles and the occupants thereof as well; and

WHEREAS, it is the opinion of this Commission that public welfare and public safety require and demand that the use of the shoulders of said highway within said area for the parking of vehicles should be prohibited.

NOW, THEREFORE BE IT, AND IT IS HEREBY RESOLVED and ordered by the State Highway Commission, all members being present and affirmatively voting as follows:

(1) The Commission, based upon investigation and reports now before the Commission and based upon the recommendation of its engineers, does hereby find and declare that the parking of motor vehicles along the Pacific Highway east between M.P. 48.87 at the northerly limits of Salem (which point is likewise identified as being Engineer's Station 33+00) and M.P. 47.35 at Hayesville Drive (Engineer's Station 120+00), the total distance of which is 1.52 miles, in Marion County, Oregon, creates and is a hazard not only to through traffic, but to parked vehicles and the occupants thereof.

(2) It is the opinion of this Commission that the right of way of said highway at said location is of insufficient width to permit the parking of vehicles in large numbers and at the same time provide the degree of safety and the convenience to which, in the opinion of this Commission, the motoring public is entitled to and needs.

EXHIBIT "E" (Cont.)

(3) That this Commission does further find, declare and order that the parking of vehicles for long periods of time on the right of way of said highway within said termini should be, and hereby is prohibited.

(4) That the State Highway Engineer be, and he hereby is instructed to erect and thereafter maintain NO PARKING signs at the termini of said area and at such points between said termini as in his judgment are necessary to properly inform and advise the public and as will accomplish the purpose of this resolution and order. The Engineer is further instructed to place on said sign the words, "NO PARKING ON HIGHWAY SHOULDERS." It is further ordered that the Secretary to the Highway Commission be, and he hereby is instructed to deliver a certified copy of this resolution to each of the following persons:

Superintendent of State Police;
Sheriff of Marion County;
Chief of Police of the City of Salem.

(5) It is further ordered that this resolution and order be entered in the minutes and records of the Commission as of the 21st day of August, 1950.

EXHIBIT "F-1"

Minutes of August 21 and 22, 1950

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there has been by the Oregon State Highway Commission apportioned from revenues accruing during the first six-month period of 1949 to the town hereinafter named for disbursement for street purposes as provided in said law, the amount set opposite the name of the town:

Weston - - - $ 1,496.48

AND, WHEREAS, said town has, by appropriate action evidenced by official instrument a certified copy of which has been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolution filed with the State Highway Commission by the above named town hereby is approved.

2. That the action taken by said town as evidenced by appropriate resolution by it adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said town so as to qualify it to receive and use the funds to it apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in said town a duly certified copy of the resolution adopted by the town, together with a copy of the resolution approving the plans submitted by the town.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 21st day of August, 1950.

EXHIBIT "F-2"

Minutes of August 21 and 22, 1950

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the last six month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Boardman	$ 310.77
Chiloquin	2,093.43
Condon	2,593.48
Hines	1,912.62
Mitchell	618.71
Scotts Mills	641.31
Weston	1,991.72

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 21st day of August, 1950.

August 21, 1950

EXHIBIT "G"

Minutes of August 21 and 22, 1950

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3016, with Perkins Brothers for constructing the Sprague River Bridges, completed June 23, 1950. This acceptance delayed pending receipt of request for extension of time.

Contract No. 3095, with Lindstrom Brothers, Inc., for constructing the Trask River Bridge in Tillamook County, completed June 28, 1950. This acceptance has been held pending receipt of request for extension of time.

Contract No. 3102, with Hollywood Electric Company for installing traffic signals in Grants Pass in Josephine County, completed July 13, 1950.

Contract No. 3110, with Lindstrom Brothers, Inc. for constructing the Marys River Bridge at Wren in Benton County, completed July 21, 1950.

Contract No. 3179, with Stoen's Rock and Landscape Company for landscaping on the Eugene (High Street-Judkins Point) Section of the Pacific Highway in Lane County, completed July 14, 1950.

Contract No. 3200, with Newport Construction Company and Kern and Kibbe for grading and bituminous macadam surfacing on the Big Eddy-Dune Section of the Columbia River Highway in Wasco County, completed June 24, 1950. Final cleanup completed July 20, 1950.

Contract No. 3220, with Warren Northwest, Inc., for pavement resurfacing on the Otis-Sulphur Creek Section of the Salmon River Highway in Lincoln County, completed July 20, 1950.

Contract No. 3221, with R. & M. Construction Co., for installing guard rail and sight posts on the Troutdale-Dodson Section of the Columbia River Highway in Multnomah County, completed August 9, 1950.

Contract No. 3222, with Newport Construction Company and Kern and Kibbe for grading and oil mat surfacing on the Holdman-Helix Section of the Holdman-Helix County Road in Umatilla County, completed July 22, 1950.

Contract No. 3241, with W. R. Grasle Company for installing lights in the Arch Cape Tunnel in Clatsop County, completed July 7, 1950.

EXHIBIT "G" (Cont.)

Contract No. 3260, with J. N. & M. J. Conley for oil mat surfacing on the Chiloquin-Sprague River Section on the Sprague River County Road in Klamath County, completed July 15, 1950.

Contract No. 3261, with J. N. & M. J. Conley for bituminous macadam surfacing on the Chiloquin (Chocktoot Street) Section of Chiloquin City Streets in Klamath County, completed July 31, 1950.

Contract No. 3277, with W. R. Grasle Company for installing traffic signals in Salem, Marion County, completed July 31, 1950.

Contract No. 3293, with Barney B. Helser for furnishing crushed material in stockpile on the Rome-Crooked Creek Section of the I. O. N. and Rome-Princeton Highways in Malheur County, completed July 15, 1950.

Contract No. 3309, with M. C. Lininger & Sons for furnishing crushed material in stockpile on the Moro-Kent School Section of the Sherman Highway in Sherman County, completed July 25, 1950.

Contract No. 3314, with F. L. Somers for furnishing crushed material in stockpile on the Juniper Ridge-Alkali Lake Section of the Lakeview-Burns Highway in Harney and Lake Counties, completed July 20, 1950.

Contract No. 3327, with Gilbert Roberts for constructing latrine in Ziba Dirmick Park in Hood River County, completed July 31, 1950.

Contract No. 3331, with J. N. & M. J. Conley for furnishing crushed material in stockpiles on the Klamath Agency Section of the Crater Lake, The Dalles-California, Modoc Point, Chiloquin and Klamath Lake Highways in Klamath County, completed July 1, 1950.

Contract No. 3343, with J. C. Compton Company for oil mat surfacing on the Heppner Junction-Jordon and Ione Sections of the Heppner Highway and Ione City Streets, Morrow and Gilliam Counties, completed July 31, 1950.

Contract No. 3350, with Bechtel Brothers for constructing a State Highway storage building at La Grande in Union County, completed August 10, 1950.

Contract No. 3362, with D-H Paving Company for placing a seal coat on the Crown Point-Dodson Section of the Crown Point Secondary Highway in Multnomah County, completed August 1, 1950.

Contract No. 3364, with Babler Brothers, Inc., for reoiling on the Division No. 4-A Reoiling Project in Hood River, Sherman and Wasco Counties, completed August 10, 1950.

(Cont.)

EXHIBIT "G" (Cont.)

Contract No. 3371, with J. C. Compton Company for recoiling on the Tudor Ranch-McDermitt Section of the I. O. N. Highway in Malheur County, completed August 8, 1950.

Contract No. 3379, with Newport Construction Company for grading and oil mat surfacing on the Helix (Columbia Street) Section of the Helix City Streets in Umatilla County, completed August 12, 1950.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "H"

Minutes of August 21 and 22, 1950

R E S O L U T I O N

WHEREAS, during the surfacing and oiling of the North Santiam Highway, the State Highway Commission on May 16, 1949, adopted a resolution establishing a 35-mile speed limit between M. P. 34.25 and M. P. 39.10, and between M. P. 40.20 and M. P. 46.75 on the North Santiam Highway in Marion County, Oregon; and

WHEREAS, the surfacing and oiling of said highway between the aforesaid mile posts have been completed and the Commission has caused an engineering and traffic investigation to be made, and based upon said engineering and traffic investigation has determined that no reduced speed limit is necessary within said sections of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE STATE HIGHWAY COMMISSION, all members being present and affirmatively voting as follows:

1. The Commission does hereby find and declare, based upon investigations, reports, and recommendations of the members of its staff, that no reduced speed limit is necessary between M. P. 34.25 and M. P. 39.10, and between M. P. 40.20 and M. P. 46.75.

2. That this Commission does hereby declare and order that the said resolution of May 16, 1949, fixing 35 miles as an established speed on the North Santiam Highway between M. P. 34.25 and M. P. 39.10, and between M. P. 40.20 and M. P. 46.75, be and the same hereby is rescinded.

3. That said resolution of May 16, 1949, in all particulars not expressly rescinded herein shall remain in full force and effect and hereby is reaffirmed.

4. That the Secretary be and he hereby is instructed to send a certified copy of this resolution to the Superintendent of State Police.

5. That this resolution be entered in the minutes and records of the State Highway Commission as of the 21st day of August, 1950.

August 21, 1950

EXHIBIT "I"

Minutes of August 21 and 22, 1950

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Coos Bay-Roseburg Highway known as the Sandy Creek Section in Coos County, the westerly terminus of which is at Highway Engineer's Station 910+00 of the relocated line and the easterly terminus of which is at Highway Engineer's Station 935+00 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway a portion or unit of the right of way of the highway as formerly located has been eliminated from the boundary of the new location; and

WHEREAS, Coos County and the Highway Commission have entered into an agreement under date of January 25, 1949, modified by agreement under date of March 21, 1950, relating to the use and jurisdiction of the eliminated section of the said highway; and

WHEREAS, the contract for the construction of the said relocated section of the Coos Bay-Roseburg Highway was completed on June 2, 1950, and highway traffic is now routed over said relocated section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the section or unit of the right of way of said highway which is eliminated by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That certain portion of the old right of way of the Coos Bay-Roseburg Highway lying between Highway Engineer's Station 917+80 and the eastern terminus of the old bridge over Sandy Creek at approximately Engineer's Station 922+15 of the old route of the said highway is hereby eliminated from the state highway system, and is abandoned as and for a state highway.

(a) Attached hereto, marked "Exhibit A" and by this reference made a part hereof, is a map upon which said eliminated section of the Coos Bay-Roseburg Highway is colored in red. **

2. Notwithstanding the elimination of the said section of the old Coos Bay-Roseburg Highway from the route of the highway, it is the judgment of the Commission that the said section is needed for and is valuable for public use and that the same should be preserved for public use, and should not be permitted to revert to private ownership.

3. The Highway Commission hereby surrenders all jurisdiction over said eliminated section, and hereby consents that jurisdiction and control

over said section may be assumed and exercised by the County Court of Coos County, in accordance with the terms of that certain agreement entered into by and between the State, by and through its Highway Commission, and Coos County, under date of January 25, 1949, and as modified by agreement under date of March 21, 1950, which agreements provide for the maintenance of said section by the County as and for a public way.

4. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. As to all said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and for highway construction, improvement, maintenance and other public use. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the area shown colored in green on said "Exhibit A" shall be retained and held by the State for the benefit of the public, and shall not be permitted to revert to or become the property of abutting owners. **

5. The boundaries of all real property acquired for right of way, and the boundaries of all real property to which title is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

6. The Secretary is hereby directed to mail to the County Court of Coos County a duly certified copy of this resolution, and said County Court is hereby respectfully requested to take appropriate official action for the purpose of accepting and assuming jurisdiction and control over the eliminated section of the said highway, and for establishing the same as a county road.

7. This resolution is to be entered in the minutes and records of this Commission as of the 21st day of August, 1950.

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, in Abandonment and Retention Resolution File No. 201, and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

R E S O L U T I O N

WHEREAS, T. H. Banfield during his service as Chairman of the Oregon State Highway Commission devoted his energy, his purpose, his business experience and his citizen ambition toward the accomplishment of a highway system for Oregon possessed of the utmost degree of safety, convenience and landscape value; and

WHEREAS, an example and illustration of his hoped for and desired accomplishment is the new highway now under construction through Sullivan Gulch; and

WHEREAS, it is deemed by this Commission fitting and eminently appropriate that said route, which when completed will embody the attributes of convenience, safety and scenic value, should bear the name of and be known as the "T. H. Banfield Expressway";

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERED by this Commission, all members being present and voting affirmatively:

1. That the new highway route now under construction through Sullivan Gulch, which route begins at the east city limits of the City of Portland and ends at the east end of the Burnside Bridge in said City, shall be and hereby is named and shall forever be known as the "T. H. Banfield Expressway".

2. That appropriate plaques be prepared and one erected and thereafter maintained in attractive and proper repair and condition at each entrance to said expressway, on which plaques shall be the words "T. H. Banfield Expressway".

3. That this resolution be entered in the minutes and records of the Commission as of August 22, 1950.

August 21, 1950

EXHIBIT "K"

Minutes of August 21 and 22, 1950

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Old Oregon Trail Highway is under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen, reconstruct, and improve the Ontario-Nyssa Section of the Old Oregon Trail Highway, and for such purposes and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Highway Commission is authorized to take fee title to said property for gravel pit and hauling road and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for a gravel pit and hauling road for use in connection with the widening, construction, improvement, and maintenance of the Ontario-Nyssa Section of the Old Oregon Trail Highway two parcels of real property located in Malheur County, Oregon, and described as follows, to-wit:

Parcel No. 1:
(Gravel Pit)

A parcel of land lying in Lot 1, West half of the Northwest quarter of the Northwest quarter ($W\frac{1}{2}$ $NW\frac{1}{4}$ $NW\frac{1}{4}$) of Section 3, Township 19 South, Range 47 East, W.M., Malheur County, Oregon; the said parcel being described as follows:

Beginning at a point which is 126 feet south and 102 feet east of the northwest corner of said Section 3; thence South 46° 29' 20" East, 516.3 feet; thence South 17° 52' 20" East, 778.7 feet; thence North 71° 08' 40" East, 150.4 feet; thence North 8° 33' 50" West, 592.7 feet; thence North 0° 09' 10" East, 499.8 feet; thence South 86° 45' 10" West, 670 feet to the point of beginning, containing 7.78 acres, more or less.

(cont.)

EXHIBIT "K" (cont.)

Parcel No. 2:
(Hauling Road)

A parcel of land lying in Lot 1, West half of the Northwest quarter of the Northwest quarter ($W\frac{1}{2}$ $NW\frac{1}{4}$ $NW\frac{1}{4}$) of Section 3, Township 19 South, Range 47 East, W. M., Malheur County, Oregon; the said parcel being described as follows:

A strip of land 20 feet in width, 10 feet on each side of the following-described center line: Beginning at a point which is 126 feet south and 102 feet east of the northwest corner of said Section 3; thence North 86° 14' 10" West 2,092 feet to King Avenue, containing 1.0 acre, more or less.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-second day of August, 1950.

August 21, 1950

Portland, Oregon
September 4, 1950

The State Highway Commission met in special session at 1:30 p.m. in the Arlington Club for discussion of recent developments with respect to the Commission's order of August 21, 1950, suspending the P. U. C. permits of a number of log haulers who had been found to be consistent and deliberate violators of the laws, rules, and regulations governing their operations. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
Milo K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
R. B. Sipprell, Director of Permits
H. B. Glaisyer, Secretary

The Chief Counsel reported that a temporary injunction was issued by Judge Dal M. King of the Circuit Court for Coos County permitting these operators to resume operations and that all are again hauling logs over state highways with the exception of the Moore Mill & Lumber Company of Bandon, which has challenged the authority of the Public Utilities Commissioner to cancel its permit and has taken the matter to court. This Company, he said, has retained the services of Ralph King, Attorney, Portland, and it is expected that the case will come to trial on Friday, September 8. The Chief Counsel advised that the Public Utilities Commissioner wants the State Highway Commission to intervene in the case, and he requested instructions whether or not to do so. It was the feeling of the Commission that the matter is of such importance to the State Highway Department that an active part in the case is warranted. Whereupon, the Chief Counsel was authorized and instructed to assist the Public Utilities Commissioner as requested. He was also instructed to appeal the case to the Supreme Court in the event the lower court's decision is adverse to the state's interests. In this connection the Commission decided, in view of the temporary injunction granted by Judge King, to recommend to the Public Utilities Commissioner the reinstatement of all of the permits which were suspended by his (Public Utilities Commissioner's) order of August 28, 1950, pending a decision in the Moore Mill & Lumber Company case. The Secretary was instructed to inform the Public Utilities Commissioner accordingly.

There followed a general discussion of log hauling matters, particular attention being given to ways and means of stopping the over-

loading of equipment which causes pavement failure and the expenditure of large sums for repairs. As a result of this discussion the Engineer was instructed to conduct weighing operations sixteen hours daily for seven days at each of the following locations where most of the flagrant cases of overloading occur:

Bandon
Camp White (North Medford)
Tillamook
Pilot Rock.

The Commission ordered that weighing operations be carried on during the hours of 4:00 a.m. to 8:00 p.m. at each place and that a full and complete record of the results of the weighing be kept for future reference. The Engineer was authorized to employ additional help as may be necessary to carry out these instructions. This concluded the discussion of log-hauling matters.

Consideration was given by the Commission to the setting of a date for laying the cornerstone of the State Highway Department Office Building now under construction in Salem. It was decided unanimously to hold the ceremony at 3:00 p.m. on Wednesday, September 27, 1950 (the hour was later changed to 1:30 p.m.), and to ask Governor Douglas McKay to give the cornerstone laying address. To Chairman Chandler was assigned the honor of "cementing in" the cornerstone.

The Commission discussed a request from the Engineer for authority to appoint a 'chief clerk' to assist him in the correlation of the functions of the various departments under his supervision. The Engineer recommended the appointment of Mr. George C. Hester, Jr. on a trial basis, with a classification rating of C. E. IV, which carries a salary range of $440 to $540 per month. The Commission unanimously adopted the recommendation subject to the condition that the appointment shall be on a temporary basis and that the Engineer shall be fully responsible for all acts of Mr. Hester.

The Engineer reported difficulty in acquiring two heretofore authorized scale sites, one being adjacent to the Pacific Highway in Jackson Bottom, just north of the city of Ashland, and the other adjacent to the Redwood Highway near the town of O'Brien. He explained that the owners of both sites refuse to sell the properties, so it appears necessary to acquire them by condemnation. He requested authority for the Chief Counsel to institute such proceedings. The Commission unanimously approved the recommendation.

Commissioner Reynolds inquired concerning the construction of the Willow Creek Bridge on the Imbler-Dry Creek County Road. He said that construction of the highway section on which this bridge is located has been completed, but the bridge contractor has not as yet started his work. The Engineer was instructed to look into the matter.

In this connection the Engineer advised that some of the contractors really are not qualified to perform some of the work that has been awarded to them. He expressed a feeling that the prequalification statements submitted by the contractors should be analyzed somewhat more thoroughly, particularly as to the contractors' experience in the performance of work for which they request bidding forms, and as to the equipment which is available to them to handle the work, which information is not clear in the statements that they submit to the Highway Department. He said that hereafter he would have the cost analyst check the statements from that standpoint so as to make certain that contractors are not over-rated as to those features.

The Engineer reported briefly the provisions of the Federal Aid Highway Bill that is now before the Congress. The Commission took no action.

The Engineer requested authority to attend, at state expense, a meeting of the Executive Committee of the American Association of State Highway Officials, which is to be held in Des Moines, Iowa, on September 15 and 16, 1950. He estimated that his out-of-state travel expense would amount to $187.20. The Commission approved the request unanimously.

Commissioner Reynolds inquired concerning the present status of the Federal Aid Secondary Highway projects, funds for which are provided in the current Highway Program. The Engineer advised that he has not yet received definite word from the Bureau of Public Roads whether such projects are to be eliminated from the program because of the war situation. He was instructed to write Mr. W. H. Lynch, Division Engineer, Bureau of Public Roads, and obtain as much information on this subject as is available.

In this connection, mention was made of the proposed improvement of the Shaniko-Fossil State Secondary Highway No. 291, in Wasco and Wheeler Counties. It was the feeling of the Commission that its commitment to this project is such that the work must go forward as planned if any possible way can be found to finance it.

The meeting adjourned at 3:15 p.m.

Chairman

Commissioner

Commissioner

State Highway Engineer

Secretary

September 4, 1950

Portland, Oregon
September 28, 1950

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
C. W. Enfield, Assistant Counsel
C. H. Armstrong, Parks Superintendent
H. B. Glaisyer, Secretary

Bids as follows for highway construction were opened and read aloud by the Secretary, pursuant to previously published notice, following which Chairman Chandler announced that the awards of contracts would be made at 3:00 p.m.:

CITY OF ESTACADA IN CLACKAMAS COUNTY

ESTACADA MAINTENANCE BUILDING

Foothills Constr. Co., Oswego	$ 8,310.00
Enoch I. Masrz, Salem	9,500.00
Robt. C. Wilson, Corvallis	9,695.00

Rex C. Ayres Constr. Co., Portland	59,559.50	- - -
K. F. Jacobsen & Co., Portland	61,410.50	- - -

The Commission unanimously approved the minutes of the meetings of the Commission held on July 24 to 29, 1950 (Inspection Trip) and on August 21-22, 1950.

September 28, 1950

The State Parks Superintendent reported on the following park matters:

1. Request of the Prineville-Crook County Chamber of Commerce to rename Ochoco State Park: The Parks Superintendent advised that the Chamber of Commerce would like to have this park named the "Harold M. Baldwin State Park" in honor of a gentleman of that name who was president of the Chamber of Commerce when this park was acquired. He said that he has been unable to obtain any further information concerning Mr. Baldwin that would justify the change and he recommended retention of the present name, Ochoco Park, honoring an Indian chief whose territory included this piece of land. The Commission approved the recommendation.

2. Proposed recreational area at Hat Rock near McNary Dam, in Umatilla County, in cooperation with U. S. Army Engineers: The Parks Superintendent exhibited a map showing the lands included in the proposed park area, two portions of which are owned by the federal government and some by a private party named Kick. He pointed out that the privately owned property lies between the two government-owned tracts, and he suggested that if the Commission wants to acquire this intervening area, negotiations should be commenced immediately before further development occurs. He gave as his feeling that it would be undesirable to develop the two government-owned tracts separately. He was instructed by the Commission to inform the Army Engineers that the Commission is interested in the establishment of a recreational area at this location and the development of such an area as can be accomplished by the federal government. He was also instructed to ascertain the probable amount that would have to be paid for the privately owned property.

3. Application of Carver Lumber Company, Port Orford, to construct and operate a logging road across Humbug Mountain State Park, Curry County: The Parks Superintendent exhibited a map showing the location of the proposed road which extends up Bear Creek in Section 25, Township 33 South, Range 15 West, W. M., on the site of the old fish hatchery. He said that there now exists an old road along this location and that the company wishes authority to operate over it for a period of two years. He said that the road is in the best location from the park standpoint and he recommended approval of the request. The Commission approved the recommendation unanimously.

4. Application of Stebco Logging Company for permission to construct and operate a logging road across a portion of Wygant State Park adjacent to the Upper Columbia River Highway: The Parks Superintendent advised that the company owns timber land back of the State Park which is inaccessible except across the Park. The proposed road, he said, will extend across an isolated section of the park and will not be particularly objectionable from the state park's standpoint. He recommended approval of the request. The Commission approved the recommendation.

5. Request of Central Electric Cooperative, Redmond, Oregon, for permission to construct and maintain a power line across Ochoco State Park near Prineville: The Parks Superintendent exhibited a map showing the proposed location of the power line which, he pointed out, is below the "Overlook"

so will not interfere with the scenic view from the park, although it could be seen from the highway. He recommended approval of the request. The Commission approved the recommendation, instructing the Parks Superintendent, however, to see to it that the company's facilities are placed so that they will not interfere with the scenic view from the park "Overlook" and will be as little in evidence as possible from the highway.

6. Proposed agreement with California Oregon Power Company to furnish electrical energy in Tou Velle State Park, Jackson County: The Parks Superintendent presented a standard form of agreement furnished by the power company covering this installation, and recommended approval of the same. He explained that the state will not be called upon to assume any of the cost of installing this facility, and that the state's obligation will consist simply of paying for the electricity that it uses in the park. The Commission approved the arrangement unanimously. (The agreement was signed on the following day.)

7. Proposed transfer to Portland General Electric Co. of title to the power line serving Silver Falls State Park: The Parks Superintendent exhibited a map showing the location of the power line and advised that the facility is in very poor condition and gives very poor service. The Portland General Electric Company, he said, has stated a willingness to assume full responsibility for the power line and the rendering of service to the park if the state will give the company title to the line, will pay for reconditioning it at an estimated cost of $2,716.69 and will clear out the brush along the line. He explained that, if the Highway Commission approves the transaction, the company will do all the work, will furnish three-phase power service to the park, and will assume all future expense of maintaining the facility. The state's obligation thereafter will be only to pay for the power that is used in the park. He recommended approval of the transfer on such basis in order to provide electric service in the overnight camping area. The Commission unanimously approved the recommendation, cautioning the Parks Superintendent, however, in arranging hereafter for electric service to attempt to avoid obligations of this nature.

8. Report on Curry County Ocean Waysides (Samuel H. Boardman State Park): The Parks Superintendent reported briefly on this matter, saying that the deed conveying the Borax Company's property to the State has been prepared and sent to the representatives of the company in San Francisco, who have forwarded it to their home office in London, England for execution; that the company wishes to retain administration of a certain lease of the property by Mr. Sullivan until its expiration on September 30, 1951, and for which the company is being paid $1,000 by Mr. Sullivan; that the only remaining property to be acquired is that owned by a Mr. Crook which includes property formerly owned by a Mr. Hunt. He explained that it may be necessary to institute condemnation proceedings to acquire the Crook property, but that when it has been obtained and the deed from the Borax Company has been received, acquisition of the entire park area will have been completed. The Commission agreed to the administration of the lease by the Borax Company. The report was approved unanimously.

9. Proposed purchase of a five-acre tract of land at Silver Falls State Park in order to furnish a water supply for the overnight camping area: The Parks Superintendent advised that this property which is owned by a Mr. Matheney, is located in Section 23, Township 8 South, Range 2 East, W. M., adjoining the present park, and contains a spring which apparently is the only available natural supply of water for the camping area. Tests are now being made, he said, to determine the quantity and quality of the water obtainable from this source, and if the results are not favorable a well will have to be drilled. He recommended purchase of the property if the report is favorable. The Commission deferred action on the matter pending receipt of information as to the amount and quality of the water available from the spring, and as to the price that will have to be paid for the land. The Parks Superintendent was instructed to ascertain such information.

10. Suggestion of Mr. Collier H. Buffington, Gold Beach, that an area adjoining the city of Gold Beach on the east be acquired by the Highway Commission for state park purposes: The Parks Superintendent stated that the tract contains 80 acres of land on which is a growth of white fir timber. He gave as his opinion that the property is not suitable for state park purposes and recommended that it not be acquired. The Commission approved the recommendation.

11. Suggestion of Mrs. D. L. Sitherwood that a tract of land adjacent to US101 four and one-half miles north of Florence be acquired for state park purposes: The Parks Superintendent advised that the property in question consists of 120 acres of land situated in Section 2, Township 18 South, Range 12 West, W. M., Lane County and that it is owned by Mrs. Sitherwood. He also said that the tract is unsuitable for park purposes and he recommended that Mrs. Sitherwood's offer to sell be refused. The Commission approved the recommendation.

12. Proposed development around caretaker's cottage in Armitage State Park near Eugene: The Parks Superintendent advised that when this cottage was constructed, no provision was made for landscaping around it. He requested authority for an expenditure of $500 for this purpose to enable him to cover up pipe lines and do other necessary things to give the place a more orderly appearance. The Commission approved the request unanimously.

13. Improvement of Jenny B. Harris State Park, McKenzie Highway: The Parks Superintendent requested authority to spend about $200 for blading and shaping the roadway and parking space at this park. He said that the obligation to do this work is contained in the deed by which the park was conveyed to the state, and he recommended approval of the improvement. The Commission approved the recommendation.

14. Proposed development in Benson State Park on Columbia River Highway, Multnomah County: The Parks Superintendent requested authority to spend about $1,000 for the development of the area lying between the highway and the railroad, including extension of the water supply line, clearing of the area, and construction of rest rooms. The Commission approved the request unanimously.

15. Request of Denny Logging Company for an extension of its agreement with the Highway Commission for the salvaging of "down" timber in Van Duzer Corridor on the Salmon River Highway: The Parks Superintendent advised that the company has completed in a very satisfactory manner the work contemplated under the original agreement and now wants the agreement extended for a period of about six months to allow for removal of similar material from an adjoining area of state property. Moreover, the company wishes two new entrances to the property in addition to the use of the old road, such roadway use to be for a period of one year. He recommended approval of the request, but that the matter be covered by an entirely new agreement rather than by extending the old one. The Commission unanimously approved the recommendation. (Two agreements, one covering the sale of the"down"timber and the other covering use of the logging road, were signed by the Commission on the following day.)

16. Request of Roscoe Phelps Logging Company for use of an abandoned section of the original Salmon River Highway in Van Duzer Corridor: The Parks Superintendent advised that the Commission at its previous meeting approved this request subject to the condition that Mr. Phelps would not construct any new roadway on the state's property, and that the agreement with him be of one year's duration. Through inadvertence, he said, the agreement was prepared on a two-year basis, and it also provides that Mr. Phelps may perform a certain amount of work along the old highway to make it usable for the purpose intended, but it prohibits construction of any new road. He further stated that the company has signed the agreement and has furnished the required surety bond in connection therewith. He gave as his feeling that it would not be objectionable to let the company use the road for two years rather than one and that what little work the company wishes to perform along the roadway will not adversely affect the Corridor. He recommended approval of the agreement as prepared. The Commission approved the recommendation. (The agreement with Mr. Phelps covering the matter was signed by the Commission on the following day.)

17. Proposed roadway extending to Cape Lookout State Park, Tillamook County: The Parks Superintendent recalled that the Commission at its August meeting denied a request from the Tillamook County Court for the construction of a roadway leading into this park. He also recalled that his budget for 1950 provides for an expenditure of a small sum to open up a roadway so as to give access to the park, none being available at the present time except by trail. He requested authority from the Commission to proceed with the construction of a roadway as was contemplated when the budget was prepared, which he said could be done by bulldozer operation. The Commission approved the request.

Commissioner Reynolds inquired as to the progress that is being made in acquiring the proposed addition to Wallowa Lake State Park, the purchase of which was authorized by the Commission at its previous meeting. He was informed by the Right of Way Engineer, Mr. Cooper, that negotiations are under way.

Commissioner Reynolds suggested that it would be advisable to acquire a small tract at the junction of Starkey Secondary Highway with US30 near Hilgard, Union County, as a wayside picnic area. He said that a small level tract bordering the Grand Ronde River is available at this location and he gave as his feeling that it would be a very simple matter to develop it as a picnic area for the general public's use. In fact, he said, it is now being used by picnickers. The Parks Superintendent was instructed to investigate the matter.

Chairman Chandler inquired as to the status of negotiations for acquisition of a proposed addition to Umpqua Lighthouse State Park, purchase of which from the Menasha Woodenware Company was authorized some time ago. The Right of Way Engineer stated that negotiations are in progress and that the latest information is to the effect that the company is willing to cooperate with the state. He was instructed by the Commission to expedite this matter as much as possible.

Commissioner McIver inquired as to the status of negotiations for the acquisition of the Beulah Moore property at Depoe Bay. The Chief Counsel advised that nothing definite as yet has been accomplished, but he is conferring with parties who are interested and who may be helpful in acquiring the property at a reasonable figure.

The Right of Way Engineer presented a list of options for the acquisition of real property that is needed for various highway improvements throughout the state, and he explained details. After careful consideration of the individual items, the Commission authorized closure of the options at the purchase prices mentioned therein. The attached resolution with regard thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

In its consideration of real property matters, particular attention was given by the Commission to the status of acquisition of properties which are needed as right of way for a proposed highway (T. H. Banfield Expressway) in Sullivan Gulch, Portland. The Right of Way Engineer stated that he is concentrating on acquisition of parcels located on Units 2, 1, and 3, which lie within the city limits of Portland, because it was considered that the most good will be derived if the units are completed in that order, in that the greatest number of people can use finished portions of the highway before the total project is completed as a freeway. He gave details as to the number of parcels of land that are needed for each unit, those that have been acquired, and those remaining to be acquired by negotiation or condemnation. Commissioner McIver gave as his feeling that the proposed order of construction is not in exact conformity with what the Commission had in mind when it started this project. He recalled that the highway is to be a "freeway" for through travel and he pointed out that if the work were stopped before the entire highway is completed, the improvement accomplished would simply benefit local people. He suggested that it would be better to commence construction of this "freeway" at its eastern (Troutdale) end and work toward the city. This matter was discussed at some length and as a result thereof the Engineer was instructed to give it serious thought and report his findings to the Commission at its next regular meeting.

The Chief Counsel requested authority to acquire by condemnation certain parcels of real property that are needed for various highway improvements, which properties he has been unable to acquire by negotiation. He presented a list of these properties, together with the offer that he recommended be made for each tract as follows:

			Recommended Offer
Canyonville-Johns Section of the Pacific Highway			
R 15386	Delbert D. Norlund (Right of Way) 1 acre at $2500.00 per acre 1.64 acre at $100 per acre	$ 2,500.00 164.00 $ 2,664.00	$ 3,000.00
Scholls-Newberg Section of the Hillsboro-Silverton Highway			
R 16050	L. E. Bearce (Quarry Site and Stock Pile Site) 3.38 acres at $275.00 per acre	$ 929.50	$ 1,000.00
Mehama-Mill City Section of the North Santiam Highway			
R 16483	Fenton Groblebe (Right of Way) 7.15 acres at $50.00	$ 357.50	$ 360.00
Sullivan Gulch, Unit 2			
R 15753	Lloyd Corporation, Ltd. (Right of Way)		$10,000.00
Ontario-Nyssa Section of the Old Oregon Trail Highway			
R 16396	Fred J. Kiesel Estate (Gravel Pit and Hauling Road) 8.78 acres (Authorization for condemnation of this property secured at August meeting of the Commission)		$ 2,500.00
North Roseburg-Winchester Section of Pacific Highway			
R 16510	J. D. Meyers (Right of Way) 3410 sq. ft. at $1.50 4460 sq. ft. at $1.00 Service Station Dwelling Store Building Severance Damage	$ 9,575.00 5,000.00 4,500.00 7,500.00 1,000.00 $27,575.00	$30,000.00

(cont.)

Recommendations for Condemnation (cont.)

		Recommended Offer
16543	Minnie Koyl (Ashland, Jackson County) 1.56 acres	$ 1,200.00
16541	Theodore Webb (Cave Junction, Josephine County) 0.23 acre	2,000.00
16610-B	Rak & Roberts Lbr. Co. 2.81 acres	2,000.00
16607	Oran Small House (900 sq. ft.) with lot 69 x 100, Also woodshed.	5,000.00
16606	Joe Barrow 1.93 acres (Take out improved front yard with about 8 large shade trees, lawn shrubbery and comes within 12 ft. of front of house)	5,500.00
16602	Clara B. Smith 0.29 acre with small house	2,500.00

The Commission unanimously approved the offers as recommended and authorized condemnation of the several tracts by the adoption of the attached resolutions relative thereto, marked EXHIBITS "B-1", "B-2", and "B-3", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Right of Way Engineer reported the following sales of miscellaneous properties and requested confirmation of the same by the Commission:

House and bar located on the Pine Street Section of the Pacific Highway in Salem; formerly owned by Chris Perriman, sold to Kris Madson, Salem, for $125.

11-room, 2-story house located on the Barkley Springs-Algoma Section of The Dalles-California Highway; formerly owned by Hans Uhrmann, sold to Charles E. Weaver, Klamath Falls, for $257.50.

House and lot located at 2697 Brooks Street on the Pine Street Section of the Pacific Highway in Salem; formerly owned by Theodore Hauch, house sold to Charles V. Baker, Salem, for $2,787.50, lot sold to Charles V. Baker for $1,350, a total of $4,137.50.

With respect to the property above mentioned sold to Mr. Baker, the Right of Way Engineer explained that this property was advertised for sale pursuant to statutory requirements, three bids being received, that submitted by Mr. Baker

being the highest, and he accepted this offer, which was only slightly under the appraised value of the property. The Commission unanimously confirmed the sales as reported.

The Right of Way Engineer brought up the matter of purchase of property on the northwesterly corner of the intersection of Columbia Boulevard and Union Avenue, near the north city limits of Portland. He presented an option for consideration by the Commission signed by Nancy M. Finke, Right of Way File No. 14531, in the amount of $13,900.00 for 1,400 square feet of property. A map was also presented, showing the area in question. It was explained to the Commission that it is possible to modify the plans to eliminate the necessity for this property, and, while it is a desirable acquisition, the Right of Way Engineer does not feel it is justified, in view of the cost. The State Highway Engineer concurred in the recommendation that the property not be purchased. The Commission approved the recommendation.

The Right of Way Engineer presented an easement agreement with the City of Prineville under the provisions of which the City is allowed to construct, maintain and use a hauling road across the corner of the State Highway Department's cinder pit which is located adjacent to a cinder pit owned by the City. He called attention to the fact that the agreement has been prepared in a revocable form and can be cancelled upon thirty days' written notice. He also pointed out that the form has the approval of the Commission's Chief Counsel. He recommended acceptance by the Commission. The Commission approved the recommendation unanimously. (Agreement was signed on the following day.)

Consideration was given by the Commission to a request from D. T. and Beulah F. Bayley for a change in location of their point of access to the Pacific Highway between Goshen and Creswell. The Right of Way Engineer stated that the change is desirable and will be mutually beneficial to the state and the property owner. He recommended approval of the request. The Commission approved the recommendation (an indenture of access agreement was signed by the Commission on the following day).

The Right of Way Engineer presented a claim from Mrs. Esther Perttunen and her son John Kosloski for reimbursement for construction of a roadway approach from the Oregon Coast Highway to their property located near Young's Bay Bridge, Clatsop County, said claim being in the amount of $500. The Right of Way Engineer explained that the Highway Commission on May 24, 1948 approved the taking of an option from Mrs. Perttunen for a parcel of ground needed as right of way for a proposed revision of the Oregon Coast Highway. At the time, he said, Mr. Kosloski was constructing a house approximately on the center line of the new highway location, but when advised of the Commission's requirements, he stopped construction of his house at that point and actually did build at a point about 500 feet away from any road or approach to his property. Later the Commission changed its plans for the improvement and Mr. Kosloski has asked that he be allowed the sum of $500 to pay for building a roadway to satisfy his needs. Moreover, he has stated a willingness to release the state from any further liability if paid such sum. He recommended settlement with Mr. Kosloski on such basis. The Commission approved the recommendation and so ordered.

The Right of Way Engineer reported a request from the Trent Church of Christ, Lane County, to purchase from the state a stockpile site adjacent to an abandoned section of the former route of the Willamette Highway. He said that the state purchased the property in 1937, paying the sum of $157.50 for it, and the church has offered to pay $200 for the land which, he said, is of no value for state highway purposes because the old road has been relinquished to Lane County since the construction of the new highway. He recommended acceptance of the offer. The Commission approved the recommendation unanimously. (The deed conveying the property to the church was signed by the Commission on the following day.)

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. with the same persons present and participating.

The Chief Counsel presented an out-of-court settlement of the case of the State of Oregon vs. John Mosso, involving acquisition of right of way and a quarry site needed in connection with the improvement of the Old Oregon Trail in Malheur County. He said that when this case was first started it was on the basis of acquiring a quarry site. Later on it was necessary to deal with Mr. Mosso for right of way and the taking included some 290-odd peach trees, which gave the land greater value. Mr. Mosso demanded $11,000 for the land only, he said, but a compromise settlement at $10,903 was finally agreed upon after the property was reappraised, with full value given for peach trees and other small items. He recommended approval of such settlement. The Commission approved the recommendation unanimously.

The Chief Counsel brought up for discussion the state's controversy with the Union Pacific Railroad rising out of the slide that occurred at Oneonta. He pointed out that the claim totaled $134,120.58 and that he had effected a settlement with the company for half of such amount, or $67,060.29. He recommended payment of the claim. In the discussion of this matter the Auditor reported that pursuant to instructions from the Commission at the previous meeting, he had examined the books of the railroad company in Portland and in Omaha and determined that the individual items making up the total of the claim were substantially correct, the questionable amount being so small that it was hardly worth considering. He suggested payment of the full amount of the claim as recommended by the Chief Counsel. The Commission unanimously authorized the payment of $67,060.29 to settle this claim. The Commission also confirmed the execution, as of September 25, 1950, of a form of "Release of All Claims" pertaining to this controversy, and providing for final settlement of the railroad company suit. A voucher in this amount payable to the railroad company was signed by the Commission on the following day.

The Chief Counsel brought up for discussion the claim of the federal government against Denton Construction Company and the claim of the Glens Falls Indemnity Company against Denton Construction Company, both rising out of state highway contracts awarded to Albert W. Denton dba Denton Construction Company. He explained details, summarized as follows: that the Denton Construction Company withheld money from its employees to be turned over to the Internal Revenue Department, but did not remit to the federal officials, which omission was not discovered until the government had made final settlement with Mr. Denton under

another contract that it had with him; the contractor defaulted in connection with his state contracts and the surety took over and completed the work. The Chief Counsel gave as his opinion that the surety is entitled to monies now held by the state arising out of the state jobs. The Internal Revenue Department, he said, has attempted to attach the state funds now owing to Denton Construction Company but in his estimation, it is not entitled to them because the federal claim arises out of a strictly federal project which does not concern the state jobs. The Chief Counsel also pointed out that the Denton Construction Company has assigned to the Glens Falls Indemnity Company all sums owing from the state, which monies the bonding company anticipates using to pay off claims arising out of the state jobs, of which there are considerable on file with the State Highway Commission. In fact, the bonding company has stated a willingness to furnish the state a bond to indemnify the state against loss in the event the federal authorities press their claim in court. As a result of discussion, the Commission instructed the Chief Counsel to obtain a written statement from the bonding company as to the status of payment of the claims that have been filed with the Commission against the state contracts. If it develops that all of the claims have been satisfied, then the amount remaining to be paid Denton Construction Company shall be released pursuant to the provisions of the assignment. If they have not been paid, then a sufficient portion of the amount to be paid the Denton Construction Company shall be retained to take care of the outstanding claims.

The Chief Counsel brought up for discussion his written report to the members of the State Highway Commission, dated September 21, 1950, with respect to penalizing log haulers in Coos and Curry Counties for weight violations, particularly concerning the Moore Mill & Lumber Company, which challenged the authority of the Public Utilities Commissioner and the State Highway Commission to suspend or in any way terminate the permits. In his report, the Chief Counsel advised that the Moore Mill & Lumber Company case was tried in Judge Rex Kimmel's court in Salem on September 15, and in deciding the case Judge Kimmell held that the Public Utilities Commissioner was without authority to issue the order terminating the permits and he also held that the Highway Commission failed to comply with the terms of the statutes because no showing was made that the use of the highways by the log haulers was injurious to the highways and detrimental to the public interests. Moreover, the court held that the action of the Commission in recommending the suspension or termination of the permits must be expressed in a formal filing of facts and a definite recommendation, and that a letter from the Highway Commission's Secretary to the Public Utilities Commissioner is not sufficient and does not conform with the terms of the statute. He recommended that in the future when it is the purpose of the Engineer to bring before the Commission facts showing illegalities, and violations on the part of any log hauler, that he be given copies of those facts and recommendations to enable him to prepare a form of resolution which the law recognizes and in which will be set out the Commission's findings and recommendations. If that is done, he added, then according to the court the Public Utilities Commissioner must follow the recommendation of the Commission and the log hauler is not entitled to notice and hearing as contended by the attorney for the log haulers in the incident case. The matter was discussed at some length during which Mr. W. W. Stiffler, Assistant State Highway Engineer advised that because of the temporary injunction

which was issued allowing log haulers whose permits were suspended to resume operating, over-loading of equipment is being carried on as much as before the permits were cancelled. He also said that the requirement that operators must legalize their loads is doing more good than any penalty that has been tried. As a result of the discussion, the Commission ordered continuance of past procedure and practice in connection with the reporting of violations, with the understanding that should the Commission decide to penalize operators by suspension or cancellation of permits then the procedure to be followed in making recommendation to the Public Utilities Commissioner shall be in conformity with the court's ruling.

The Secretary was authorized and instructed to write and commend the OREGON JOURNAL and the OREGONIAN for the series of articles appearing in their respective newspapers with reference to log hauling on the highways of this state, it being considered by the Commission that these articles are educational and of value to the people of Oregon.

Chairman Chandler inquired concerning the status of recovery of the amount of the bid bond furnished by State Construction Company in connection with its proposal to construct the piers for the Marion Street Bridge in Salem, this company having refused acceptance of the award of contract. The Chief Counsel advised that the company is going to resist payment of this bid bond and has engaged Portland attorneys to protect its interests. He was instructed by the Commission to press this matter to conclusion because of its importance to the State Highway Department.

The Chief Counsel brought to the Commission's attention a controversy that has developed with Mr. Collier H. Buffington, attorney, Gold Beach, relative to some gasoline pumps which have been installed by Mr. John R. Marsh within the sidewalk area on the Oregon Coast Highway in Port Orford. He said that Mr. Marsh has maintained the pumps within the street area for 20 years and was recently requested to set them back so the public could be served off the highway upon completion of the highway improvement now underway in this town; he at first refused to move them, but later reconsidered and placed them in the sidewalk area, where they occupy a position near the center of the sidewalk but near enough to the curbline so the public can be served from the street. The Engineer advised that prior to the awarding of the contract for the present improvement in Port Orford, an agreement was executed with the City wherein the City agreed to remove all obstructions in the street and entirely clear the right of way, but to date the City has done nothing to effect the removal of Mr. Marsh's gasoline pumps. He recalled the long-standing practice of the Commission to require service station operators to place their gasoline pumps a sufficient distance back of the right of way line so they could service cars on their own property. He suggested in view thereof that legal action be instituted to force the removal of Mr. Marsh's pumps from their present location. Otherwise, he said, it will be difficult to enforce the ruling in other places.

Commissioner McIver suggested the adoption of a standard policy, statewide in character, in conformity with the "set-back" rule heretofore in effect requiring operators to so locate their gasoline pumps that the general public can be served entirely off the highway, and that action be taken to remove ex-

isting pumps that are incorrectly located, even though the state might have to pay for the moving. All operators could thus be treated alike with no favoritism shown to anyone, and the policy should be rigidly enforced. The Commission deferred action in the matter for study, with the idea of establishing the policy suggested by Commissioner McIver if that appears advisable when additional facts have been presented by the Engineer. The Engineer was instructed to canvass the state for improperly located gasoline pumps on state highway routes, and to report his findings. He was also instructed to allow existing pumps to remain in their present location until the Commission has definitely decided the issue, but not to allow new installations in prohibited areas.

The Chief Counsel brought to the Commission's attention the claim submitted by Mr. J. H. Bennett, owner and operator of the Sea Lure Cafe on the Oregon Coast Highway south of Yachats, with reference to damage that his property suffered as a result of a severe rainstorm during February, 1949. He said that Mr. Bennett alleges that due to a plugged highway culvert, water from Agate Creek flowed across his property, rendering it unsuitable for development, and he is now asking the state to pay him for his loss, which he estimates at $1800. The Chief Counsel further stated that he had the damage appraised, and the appraisers set the amount of the damage at $800, whereas the Engineer's appraisal of the damage amounted to $370. The Engineer explained further details and suggested in order to dispose of the controversy that the Commission allow a settlement of $500. The Chief Counsel concurred. The Commission approved the recommendation unanimously on the condition that Mr. Bennett shall not be paid any sum over $500. (For details with respect to this controversy, see copy of Engineer's letter to the Oregon State Highway Commission dated September 26, 1950, in General Files.)

The Chief Counsel requested instructions whether or not to institute legal proceedings to collect the sum of $7.20 from Mr. Bob Collins, Brownsville, Oregon, and the sum of $14.40 from Mr. W. M. Kinney, Tillamook, for certain signs which were furnished them for use in connection with log hauling operations. The Commission decided not to institute suit to collect the amounts due, but ordered that signs furnished hereafter shall be paid for cash in advance.

The Commission had under consideration the selection of insurance agents to handle for the Commission insurance matters that must come before the Oregon Insurance Rating Bureau. Commissioner Reynolds recommended appointment of Cole, Clark & Cunningham, Portland, as the Commission's agents to handle such matters, so as to avoid delays incident to the securing of rates, which otherwise might occur. The Commission unanimously approved the recommendation and thereupon instructed the Secretary to sign and forward to Cole, Clark & Cunningham a letter authorizing them to discuss with the Rating Bureau all features of rate making in which the Highway Commission is concerned.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and at 3:00 p.m. Chairman Chandler announced the Commission's decision with respect to each project bid upon, the Commission's action, as shown, being by unanimous vote:

"Construction of a maintenance building at Estacada, Clackamas County. Foothills Construction Company of Oswego submitted the low bid for this project at $8,310. There were five higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Widening the Union Creek Bridge on the Crater Lake Highway near Prospect in Jackson County. The Commission received two bids for this project, the low one being that of the R. & M. Construction Company in the amount of $9,990. The contract has been awarded to the R. & M. Construction Company at its bid price.

"Construction of the Jasper Bridge over Middle Fork of Willamette River on Springfield-Creswell Highway in Lane County. Hamilton & Thoms, Eugene, submitted the low bid for this work at $208,370. There were five higher bids. The contract has been awarded to Hamilton & Thoms, low bidders, at their bid price.

"Construction of the Cascadia State Park Latrine, Linn County. Enoch I. Maerz, Salem, submitted the low bid for this work at $4,975. There were two higher bids. The Commission has awarded the contract to Mr. Maerz at his bid price.

"Surfacing and bituminous macadam on the Sand Station-Washington State Line Section of the Columbia River Highway, east of Umatilla in Umatilla County. A. H. Saxton & Sons, Corvallis, were the low bidders for this work at $118,973.50. There were 11 higher bids. The Commission has awarded this contract to the low bidder, A. H. Saxton & Sons, at their bid price.

"Construction of masonry block maintenance building at Flora, Wallowa County. Stockton & Sons, Gresham, submitted the only bid for this job, at $16,607. The Commission has rejected the bid as being too high.

"Construction of the South Yamhill River Bridge Section of the Three-Mile Lane Secondary Highway, in Yamhill County. The low bid for this work was submitted by O. C. Yocom Co., McMinnville, at $56,450.50, based on the use of asphalt. They submitted no bid based on the use of tar. There were four higher bids. The Commission has awarded the contract to the low bidder at his bid price."

The Engineer brought up for discussion a request from Jefferson County for an exchange of certain county roads in the Federal Aid Secondary Highway system. He recalled that this matter was discussed by the Commission when in Prineville during the progress of its recent inspection trip but action was deferred pending further information. He exhibited a map showing the roads involved in the exchange. He pointed out that the county road which the County Court wishes removed from the system is that which extends northwesterly from the town of Ashwood to a connection with The Dalles-California Highway near Willowdale, and that those which the Court wants added to the system in lieu thereof are:

1. County road which extends northerly and easterly from the Warm Springs Highway at a point about three miles north of Madras through the town of Gateway to a connection with The Dalles-California Highway about three miles southeast of Gateway.

2. County road which commences at the town of Culver and extends westerly and southerly to a connection with The Dalles-California Highway about five miles north of the Deschutes County Line.

3. County road which extends northerly and easterly from a point about one mile west of the town of Culver to a connection with The Dalles-California Highway (old route) near Metolius.

4. Old route of The Dalles-California Highway (now a state secondary highway) southerly from Madras through Metolius and Culver to a connection with the new The Dalles-California Highway at a point about 2½ miles southeast of the town of Culver.

He explained details with respect to the exchange and recommended approval by the Commission. As a result of discussion the Commission unanimously approved the recommendation and authorized the Engineer to present the matter to the Bureau of Public Roads. The attached resolution relative thereto, marked EXHIBIT "N", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

Pursuant to previous instructions from the Commission, the Engineer submitted a supplementary report with respect to a request from the Corvallis Women's Club that the Highway Commission provide additional protection for traffic that uses state highway routes in Corvallis, and particularly concerning the request for warning signs on Sixth Street at its intersections with Harrison Street and with Van Buren Street, calling attention to the railroad on Sixth Street. The Engineer advised that an investigation has been made and it has been determined that these two crossings stand fifteenth and sixteenth, respectively, in the priority listing of unsignallized grade crossings on the state highway system. The accident record for the past fifteen years at these crossings, he said, is very good, only five accidents having occured at the Van Buren Street crossing and one at the Harrison Street crossing. He estimated the cost of installing both signals at $9,000 and recommended against the installations at this time because of the low accident record, the low priority listing, and the further fact that if and when the North Corvallis project is constructed, a grade separation will be provided. The Commission unanimously approved the recommendation.

The Engineer reported that pursuant to authority granted him by the Commission in its resolution of June 28, 1949, he has approved the reclassification of a portion of the Crater Lake Highway from its status as a Group II Highway to the status of a Group I highway, particularly the section that extends from Mile Post 14.54 where a side road leads off to Butte Falls, to Mile Post 21.35 at Shady Cove, such reclassification being effective as of September 19, 1950. He said that his action in the matter is based on test runs

with 60-foot equipment whereby it was ascertained that equipment of such length may be operated over that section of highway without encroaching upon the opposing traffic lane. He asked the Commission to confirm his action in the matter. The Commission unanimously approved the reclassification as reported.

The Engineer reported results of receiving bids in Salem on September 18, 1950, for the purchase of usedequipment and materials stored at Salem, and the result of receiving bids in Salem on September 20 for the purchase of used equipment and materials stored at Klamath Falls. He submitted a list of the high bids received for each item as follows:

USED EQUIPMENT AND MATERIALS IN SALEM

Item No.	Description	High Bidder	High Bid	Engr's. Est.
1.	Ford Sedan, Dept. #40-56	John Schweitzer, Portland	$187.50	$150.00

				$3946.42	$2043.50

In the discussion of this matter, the Engineer advised that E. F. Henker, Aumsville, who submitted the high offer for items 2, 4, 5 and 14 at the September 18 bidding, has written to the effect that it is impossible for him to accept the items awarded to him, because of unforeseen financial conditions

even though it means the forfeit of his deposit. The Engineer recommended, in view thereof, that these particular items be sold to the next high bidder in each instance and that the Commission declare Mr. Henker's bid deposit forfeit in the amount of $87.90. The Engineer also recommended rejection of the offer submitted by Morris Albert for Item No. 44 in that same list, as being too low; and that the successful offer for Items 22, 24, 25 and 26, for which identical bids were received, be decided by the flip of a coin. In the list of bids for materials stored at Klamath Falls, the Engineer recommended rejection of the bid submitted by Sessler, Inc., Klamath Falls, for Item No. 30. He also recommended acceptance of the high offers for the remaining items stored at both Salem and Klamath Falls. The Commission approved the Engineer's recommendations unanimously. A coin was then tossed by the Secretary to determine the successful bidder for the four tie items. Portland Auto Parks Company won the toss for Item 22 and also for Item 24. Donald R. Cairner, Brownsville, won the toss for Item 25. W. H. Hoskins, Salem, won the toss for Item 26.

The Engineer presented a brief review of the Federal Aid Highway Act of 1950, Public Law 769 - 81st Congress. The Commission took no action in this matter. (For details see copy of Engineer's report to the Oregon State Highway Commission dated September 22, 1950 in general files.)

The Engineer also presented a status report on the Salem traffic plan. No action was taken thereupon by the Commission. (For details see copy of report dated September 25, 1950 in general files.)

There was presented for the Commission's consideration a letter from W. H. Lynch, Division Engineer, Bureau of Public Roads, proposing a revision in the mileage and type of work designation on the North Umpqua forest highway projects contained in the forest highway program as presently prepared. The Engineer advised that the original plan was to grade four miles on one of the projects and to perform advance clearing on 2½ miles of the other project, but the Bureau of Public Roads now is inclined to decrease the amount of grading on the first project and to extend the clearing on the other in an amount sufficient to complete the clearing on the entire section. He said that the revised plan will not delay the ultimate completion of the total improvement, and he recommended approval of the proposed revision. The Commission approved the recommendation unanimously and thereupon signed the following joint letter with the Bureau of Public Roads and the U. S. Forest Service, recommending to the Chief of the Forest Service and the Commissioner of Public Roads, Washington, D. C., relative thereto:

Chief, Forest Service
Commissioner of Public Roads
Washington, D. C.

Gentlemen:

Under Oregon Forest Highway Program Letter for 1951 fiscal year, approved by Acting Chief of Forest Service, March 15, 1950, there was included the following projects:

(cont.)

Joint Letter with U. S. Forest Service and Bureau of Public Roads (cont.)

Project No. & Acct. No.	Route Name & Type of Work	Present Length Miles	Program Amount
47-B4 (0341-00)	North Umpqua Highway Grading	4.0	$325,000.00
47-B5 (0342-00)	North Umpqua Highway Grading	2.5	425,000.00

Since the above program, it has been found necessary, in order to effect the most desirable and economical improvement, to shorten the grading of Project 47-B4 to 2.3166 miles, and to add "Advance Clearing" from the end of the grading to the north end of section B, 4.3036 miles, extending the project length of Project 47-B4 to 6.6202 miles.

In order to accomplish all the work proposed under Projects 47-B4 and 47-B5 as originally programmed, it is necessary to increase the mileage on Project 47-B5 from 2.5 miles to 4.3036 miles.

It is, therefore, recommended that the project descriptions and mileages be revised to read as follows:

Project No. & Acct. No.	Route Name & Type of Work	Length Miles	Program Amount
47-B4 (0341-00)	North Umpqua Highway Grading & Advance Clearing	6.6202	$325,000.00
47-B5 (0342-00)	North Umpqua Highway Grading	4.3036	$425,000.00

Very truly yours,

/s/ W. H. Lynch

W. H. Lynch
Division Engineer

U. S. FOREST SERVICE

/s/ R. F. Grefe
Act.Asst. Regional Forester

Attest:

/s/ H. B. Glaisyer
Secretary

OREGON STATE HIGHWAY COMMISSION

/s/ Ben R. Chandler
Chairman

/s/ Chas. H. Reynolds
Commissioner

/s/ M. K. McIver
Commissioner

Recommended for Approval:

/s/ W. C. Williams
Asst. State Highway Engineer

September 28, 1950

The Engineer asked the Commission to confirm the oral authority given him by Commissioner McIver to obligate $2,300 of state highway funds to match a like contribution by the City of Portland to finance construction of a median island on Canyon Road, (Sunset Highway) around the curve westerly from the Vista Avenue Bridge, to eliminate certain hazardous left-turn movements and to prevent the skidding of cars from one traffic lane into the opposing traffic lane when the pavement is icy. He said that many accidents occur at this location and that the median island is a necessity to prevent them. The Commission unanimously approved the expenditure.

The Engineer requested authority to advertise for bids for rock production projects totaling no more than $300,000, provision for which tentatively has been made in the 1951 construction program which is to be presented to the Commission for approval at its November meeting. He recalled that the 1950 budget contained an item of $1,200,000 for such purposes, and that the total amount to be provided in the 1951 budget is $1,000,000. He also stated that he is requesting this advance authorization so as to assure that the material will be available when needed in the spring. The Commission approved the request unanimously.

The Engineer requested confirmation of the telephonic authority given him by the Commission on September 7, 1950, to obligate an expenditure of $2,500 of state highway funds for widening two bridges across irrigation canals near Hermiston. He explained that the Union Pacific Railroad Company is revising its line in this vicinity (commonly known as the Hinkle Line Change) and has included in its plans the raising of these two bridges at no cost to the state. It was his thought that it would be advisable to take advantage of the opportunity to secure the widening of the structures. Due to the fact that such widening is not a responsibility of the railroad company but is solely an improvement to the existing structures, the state will have to pay for the extra expense. The Commission approved the expenditure unanimously.

Consideration was given by the Commission to requests from the City of Oakridge and the local chapter of the International Woodworkers of America, for the construction of a footpath along the Willamette Highway between Oakridge and Willamette City, a distance of 1.17 miles. The Engineer advised that this matter has been investigated and it has been determined that the conditions that now exist on this section create a considerable hazard. During the past few years, he said, there has been a large development along the highway between these two towns, and many pedestrians walk back and forth along the pavement, which is only 20 feet wide and not sufficient to accommodate pedestrians with safety. The average daily vehicular traffic is 3,100 cars and the average daily pedestrian traffic is 106 persons. He estimated the cost to construct a footpath between the two towns at $5,400 and recommended approval of the project. The Commission approved the recommendation.

A petition was presented from numerous residents of the town of Beaver and vicinity, Tillamook County, urging the State Highway Commission to construct a sidewalk on West Creek Bridge on the Oregon Coast Highway at Beaver for the benefit and safety of pedestrians who are obliged to use this structure. The

Engineer advised that a check of the conditions reveals that this bridge is only 20 feet wide, that no accidents have occurred on the bridge since 1946, and there is no record of any accident before that time. He questioned the justification for the sidewalk, which he estimated would cost $650. He suggested, however, that consideration be given to widening the bridge at some future time at an estimated cost of $4,500, it being his belief that the greater hazard at the structure, if any, is to vehicles, by reason of the narrowness of the bridge. The Commission approved the suggestion unanimously.

A letter was presented from Oren L. King, City Manager, Eugene, advising that the City Council has authorized the installation of mercury vapor lights on Franklin Boulevard (Pacific Highway) up to the east city limits of Eugene, and wants the state to install similar lighting on this highway easterly from the city limits to a connection with the lighted highway in the Glenwood District, a distance of about 1,550 feet. The Engineer estimated the cost to illuminate this 1,550-foot section at $6,000. He recommended against the installation, because in his opinion, the need for the illumination is not sufficient at this time to justify the expense. The Commission approved the recommendation.

The Engineer brought up for discussion a proposed agreement with the city of Salem providing for the joint installation of traffic signals on state highway routes within the city. He said that on the section of the one-way street system which is now nearing completion, nine traffic signals will be required, the cost of which is estimated at $25,000, which expense would be shared equally by the city and the state; moreover, the city will assume the obligation to maintain the signals and to furnish electrical energy to operate them. He recommended approval of the expenditure, to make possible the purchase of the signals as soon as the agreement has been executed. The Commission approved the recommendation. In this connection the Engineer advised that in 1951, twenty additional signals will have to be installed to complete the routing of US99E through Salem. He estimated the cost of these installations at $55,000, of which the state's share will be $27,500. He also said that when both of the bridges have been completed across the Willamette River in Salem seven additional signals will be required. He estimated the cost of such signals at $10,000, of which the state's share will be 50%, or $5,000. He recommended approval of the arrangement and requested authority to enter into an agreement with the City of Salem for the cooperative installation of signals as may be required. The Commission approved the project unanimously, instructing the Engineer, however, hereafter to include such expense in the original estimated cost of projects as they are presented to the Commission.

The Engineer reported that the City of McMinnville has requested the installation of a traffic signal at the intersection of Baker Avenue (US99W) and Third Street in McMinnville. This matter, he said, has been investigated and the facts disclosed indicate that a signal at this point is fully justified, based on nationally accepted standards. He recommended approval of the installation, which he estimated would cost $3,000, on the condition that the City of McMinnville will pay one half of the expense. The Commission approved the recommendation.

The Engineer reported on the request of the City of Rockaway for the installation of a traffic signal at the intersection of Highway US101 with Beach Avenue, a short street which extends from the highway to the beach in Rockaway. He said that a traffic study of this intersection reveals some congestion at this point during the heavy resort season, but the overall picture does not warrant a signal. He recommended that the request be denied. The Commission approved the recommendation.

The Engineer also reported the results of an investigation of traffic conditions on the North Santiam Highway at its intersection with Elkhorn Road in the town of Gates. He said that a request was received from the City Street Commissioner for the installation of a signal for the benefit of school children who are obliged to cross the highway at this point, but investigation revealed no justification for the expense, the average daily traffic on the highway being only 1430 cars, and the pedestrian movement being extremely light. He recommended that the request be denied. The Commission approved the recommendation.

The Engineer brought up for discussion the Commission's agreement with the City of Portland providing for the installation of traffic signals on state highway routes in Portland, particularly S. W. Broadway, S. W. Jefferson, and S. W. Columbia Streets. He recalled that the Commission at its meeting on April 24, 1950, authorized a cooperative arrangement with the City providing for these installations at an estimated cost of $20,300, which was to be paid 50% by the City and 50% by the State; however, since that time the City has determined that two additional signals are required, at N. W. Broadway's intersections with N. W. Glisan and N. W. Everett Streets. The City, he said, is not asking the State to obligate any more funds than was originally contemplated. In other words, the State's cooperative share is limited to a maximum of $10,150. He recommended approval of the form of agreement which includes the two extra signals. The Commission approved the recommendation. (The agreement was signed by the Commission on the following day.)

Consideration was given by the Commission to a request from the City of Coquille for the installation of a traffic light at the intersection of Front and Taylor Streets in Coquille, this intersection being a three-way junction of the Oregon Coast Highway and the Coos Bay-Roseburg Highway. A study of the traffic at this point, the Engineer said, reveals an average daily traffic volume of 7,105 cars and an hourly maximum of 525, which is below the nationally accepted warrant. He also said that the accident record does not justify signal installation; however, he gave as his belief that a flashing beacon should be installed at this point, because it is an angle on a state highway route. He estimated the cost of such installation at $400 and recommended approval of such a beacon. The Commission approved the recommendation.

The Engineer reported receipt of a request from the Oregon representative of the Interstate Commerce Commission that the Highway Commission take steps as may be necessary to eliminate the overheight restrictions on the Pacific Highway between Eugene and Goshen so as to provide at least 14 feet vertical clearance, and in order to expedite movements of overheight loads. He said that there are two railroad underpasses on this section where the vertical clearance is limited

to slightly over 12 feet, one of which, near Goshen, cannot be eliminated at reasonable cost. A study of the situation, he said, reveals that there is an existing county road in the Glenwood district which can be improved for about $1,500, so that it will be suitable for overheight trucks, but it involves a grade crossing of the railroad. This grade crossing, he said, is privately owned by Mr. R. E. Glass, who during the last war charged a toll of $3 per truck for the use of this crossing. Due to the fact that the crossing was granted on a private crossing basis, the railroad company objected to its use for public purposes and threatened to revoke Mr. Glass' permit if he continued to let the public use it. The investigation also revealed, he said, that there is no other route presently available to take care of these extremely overheight loads, although they can be taken care of in about a year when the bridge at Jasper is completed. In the meantime, Mr. Glass has indicated a willingness to permit the use of his private crossing, for $600 per year, if the movements are properly certified by military authority. He said that the arrangement is not entirely satisfactory, but it seems to be about the only thing to be done. He recommended, therefore, that the Commission authorize the improvement of the county road at a cost of $1,500 and that Mr. Glass be paid $600 for one year's use of his private crossing. Upon consummation of such an arrangement, he said, the railroad company will be contacted for clearance. As a result of discussion, the Commission authorized the Chief Counsel to negotiate first with Mr. Glass and then with the railroad company. The Engineer was authorized to improve the county road upon conclusion of the arrangements.

The Engineer reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of state tax street funds that accrued to them during the first half of the year 1950, and that the plans for the improvements contemplated with such funds have been examined and found satisfactory:

Barlow	Draperville
Bay City	Monroe
Clatskanie	Riddle
Delake	Umatilla

He recommended approval of the plans by the Commission. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a request from the City of Hermiston for the improvement of certain streets that are highway routes in this town. The Engineer stated that the city not only wants the streets widened, but also wants curbs constructed. He estimated the cost of the widening work at $3,000, and the curbs at $1,100, a total of $4,100. He also mentioned that the widening would require the removal of trees. The Commission unanimously approved both the widening and the curb construction for 1951 undertaking, using state funds, on the condition that the city will assume the responsibility for the removal of the trees at city expense. The Commission ordered the matter covered by written agreement.

The Engineer requested authority to postpone for the time being certain landscaping work that was contemplated in the existing contract for highway improvement at the west end of the Steel Bridge in Portland. He recalled that the contract provides for shaping of landscape areas, providing of top soil, and the paving of approaches to openings in the sea wall to permit the city to dump snow into the river. However, advices have now been received to the effect that the City in the near future intends to construct a new sewer along the sea wall, which would result in the destruction of any landscaping that may have been performed, and the approaches to the openings in the sea wall. In view of the circumstances, he suggested elimination from the present contract of that portion of the work that would be lost by the sewer construction, and performance of such work later on after the sewer is completed. He estimated the cost of the work to be deferred at $3,000, and advised that the existing contract, with the Commission's approval, will be reduced by such amount, although it will be necessary later on to allocate $3,000 to perform the work. The Commission approved this arrangement unanimously.

A letter was presented from the Honorable Robert A. Thompson, Mayor of the City of Klamath Falls, formally requesting the following:

(1) An economic survey for the purpose of studying the city's traffic problem primarily with respect to Highway 97 into and through Klamath Falls;

(2) Installation of a pedestrian push button traffic signal at the intersection of South Sixth Street and Martin Street, opposite a Post Office substation and a drugstore.

(3) Definite designation of the proposed westside bypass for US97 to enable the City to dispose of numerous city-owned lots along this route.

It was recalled that these three projects were requested orally by Mayor Thompson and Mr. Matt Finnigan, City Councilman, on the occasion of their appearance before the Commission at the previous meeting, at which time they were told to present their request in writing. The Engineer advised that the survey requested would cost about $5,000, and he recommended approval of the project as being in conformity with the Commission's established policy. The Commission approved the recommendation. The Commission referred to the Engineer for investigation and report the request for the signal on South Sixth and Martin Streets. The Engineer was authorized by the Commission to stake the right of way limits on the westside bypass route, having it clearly understood, however, that by so doing the Commission makes no commitment whatsoever as to the designation or construction of this project.

The Engineer reported that the City of Forest Grove has again requested that immediate consideration be given by the Commission to the establishment of the one-way street plan heretofore outlined as a solution for the city's traffic and safety problems. In a communication recently received, he said, the City advises that numberous accidents have occurred since the project was initiated and the City is no longer able to cope with the situation. He exhibited a number of pictures showing results of accidents involving loaded log trucks which are forced to make several right-angle turns because of the

circuitous routing through the town. This type of accident, he said, can be reduced by the adoption of the one-way street plan. He estimated the cost of construction of the project, which would be the state's obligation, at $75,000, and the cost of needed right of way, which would be the city's obligation, at about $6,500. He recommended construction of the project immediately so as to insure its completion early in the summer of 1951, subject to the condition that the city will renew its offer to purchase the right of way and will adopt ordinances which may be necessary to make the one-way street plan effective. The Commission approved the recommendation unanimously.

A letter was presented from the Nelscott Improvement Club requesting the illumination of the traffic island on the Oregon Coast Highway at Nelscott as a protection to night travel, especially during the rainy season. It is alleged that the traffic island is on a slight curve and a number of accidents have occurred due to the fact that the island is not lighted and cannot be seen at night time. The Engineer advised that this matter was investigated and it was determined that the illumination of this island is a necessity. To properly illuminate the island, he said, will require the installation of three mercury vapor units, which will cost about $150 each, a total of $450. He recommended approval of the expenditure. The Commission approved the recommendation.

The Engineer reported that pursuant to authority previously granted him by the Commission, he has awarded contracts as follows, bids for which were received at the meeting of August 21-22, 1950, the conditions of the awards having been satisfied.

(1) Paving Locust Street in the city of Oakland, Douglas County. Bids received August 21, contract awarded September 1, to J. C. Compton Company, low bidder.

(2) Grading and paving Pudding River-Silverton Section of Silverton County Road, Marion County. Bids received August 22, Contract awarded August 30, to Warren Northwest Inc., low bidder.

(3) Grading, surfacing and oiling West Fillmore Street in the city of Burns, Harney County. Bids received August 22, contract awarded August 31, to Russell Olson Construction Company, low bidder.

The Commission unanimously confirmed the awards as reported.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

1. Meade & Hobson, Contract No. 3339, for construction of a bridge over Powder River on the Sumpter Valley Secondary Highway, Baker County, requested an extension of time of 45 days, from August 31 to October 15,

(cont.)

1950, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the fact that Powder River was in flood stage until the middle of July and they were unable to start work until after that time. The Engineer confirmed that the water level in Powder River did not drop to its low elevation until mid-July, and he did not insist that the contractor start work during the high water period because the structure could not be used until the adjacent grading work had been completed. He recommended in view of the circumstances that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

2. Harrisburg Sand & Gravel Company, Contract No. 3368 for grading and oil mat surfacing on Seventh Street in Harrisburg, Linn County, requested an extension of time of six days, from September 1 to September 6, 1950, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays incident to the city's moving a three-inch water main along the westerly side of the street. The Engineer advised that the reason given by the contractor for over-running the time limit is correct. He recommended in view of the fact that the delay was not the fault of the contractor, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

3. N. A. Toole Construction Company, Contract 3312 for grading, oil mat surfacing and rock production on the North Powder ("E" Street) and Telocaset Junction-Wingville Junction Section on the Old Oregon Trail and in the town of North Powder in Baker and Union counties, requested an extionsion of time of 60 days from July 31 to September 30, 1950, within which to complete this job. They alleged that high water which covered the gravel pit and hauling road prevented placing of their crushing plant on the job site as soon as planned. The Engineer advised that the contractor had been delayed by high water and recommended that the extension of time be granted as requested, without penalty. The Commission approved the recommendation.

4. George H. Clausen, Contract No. 3192 for guardrail construction on the North Unit, Washington State Line-Flora Junction Section of the Enterprise-Lewiston Highway in Wallowa County, requested an additional extension of time of 60 days from July 1 to August 29, 1950, within which to complete this job. He alleged that difficulty in getting steel guard rail to the job had prevented its completion within the previously extended time limit. The Engineer advised that the contractor did have difficulty in getting steel but the public suffered no inconvenience. He recommended that an additional extension of time up to the actual date of completion, July 19, 1950, be granted without penalty. The Commission approved the recommendation.

5. F. O. Laws, Contract No. 3268 for rock production on the Lincoln County Line-Alsea Mountain Section of the Alsea Highway in Benton and Lincoln counties, requested an additional extension of time of 23 days from

(cont.)

July 20 to August 12, 1950, within which to complete this job. He alleged that an unexpected amount of work in the quarry and breakdowns of machinery had prevented completion of the contract within the limits of the extension of time previously granted him. The Engineer advised that the contractor encountered more difficulty in operating the quarry than was anticipated and his operations were retarded thereby. He advised further that no expense or loss of time was incurred by the State because of the over-run of the contract time, and he recommended that the extension of time as requested, be granted without penalty. The Commission approved the recommendation.

6. Barney B. Helser, Contract 3256 for rock production on the Dixie Summit-Baker County Line Section of the John Day Highway in Grant County, requested an extension of time of 30 days from August 31, 1950, to September 30, 1950, within which to complete this job. He alleged that the rock at the new quarry opened at Rome for his I.O.N. Highway contract broke into very large pieces thereby increasing the time which it would normally have taken to complete that job and delaying the starting of the Dixie Summit project. The Engineer advised that the rock in the Rome quarry broke very badly and as a result thereof, the contractor was unable to commence the Dixie Summit-Baker Line job as soon as anticipated. The State, he said, has not been inconvenienced by the delay, and he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

7. Byers Brothers, Contract No. 3232 for grading and paving the Warrenton (19th Street-Hayes Street) Section of the Warrenton Secondary Highway in Clatsop County, requested an extension of time of 10 days from July 31 to August 10, 1950, within which to complete this job. They alleged that bad weather delayed the sub-contractor, Oregon Asphaltic Company, in completing the oiling of the highway, thereby preventing completion of the job within the specified time limit. The Engineer advised that the contractor's method of operation on this job was not in accordance with good practice inasmuch as they failed to provide proper supervision and made little effort to push the project to completion. In view of these circumstances, he recommended that the extension of time as requested, be granted with the stipulation that engineering costs be assessed as penalty from July 31, 1950, to the date of completion. The Commission approved the recommendation.

8. J. A. Struss, Contract No. 3301 for rock production on the Canyon Creek Summit-Soda Mountain Section of the John Day-Burns Highway in Grant County requested an extension of time of 153 days from July 31, 1950 to January 1, 1951, within which to complete this job. He gave no reason for his failure to complete the job within the specified time-limit other than that he needed more time. The Engineer advised that the contract was awarded on March 2, 1950, but work was not commenced until May 12, 1950, and since that time the work has not been prosecuted with diligence. He recommended that the extension of time as requested be granted with the stipulation that engineering costs be assessed as a penalty from the specified completion date to the actual completion date. The Commission approved the recommendation.

9. Macco Corporation, Contract No. 3009 for construction of a bridge over the Willamette River at Independence on the South River County Road in Marion and Polk Counties, requested an additional extension of time of 91 days from September 1 to November 30, 1950, within which to complete this job. They alleged that they were unable to complete the work within the limits of the previous extension of time because of unseasonal high water which prevented steel erectors from working and also because of the current shortage of reinforcing steel. The Engineer advised that the original completion date had been set for December 31, 1949, and that the Commission at its meeting on December 19, 1949, granted an extension of time up to and including August 31, 1950, without penalty on the condition that the structure would be placed in use on that date, but with the stipulation that should the project over-run that date, all engineering costs incurred subsequent to August 31, 1950, would be assessed as penalty. All structural steel, he stated, was ready for this project shortly after January 1, 1950, but the contractor elected not to start work until July 1, 1950, because of additional costs which might have been incurred. He recommended that the terms of the time extension granted December 19, 1949, be not changed. The Commission approved the recommendation.

10. C. J. Eldon, Contract 3234 for construction of the Tanner Creek Bridge on the Dodson-Bonneville Section of the Columbia River Highway, in Multnomah County, requested an extension of time of 92 days from September 30 to December 31, 1950, within which to complete this job. He alleged that due to blizzards, floods, clean-up, repair of flood damage, road closures between Dodson and Bonneville, and additional excavation that he was required to perform, he lost a total of 92 days time. The Engineer advised that the delays listed by the contractor are approximately correct and he recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

11. E. C. Swaggart, Contract No. 3276, for surfacing and bituminous macadam on the Thomas Creek-Lyons Section of the Albany-Lyons Secondary Highway in Linn County, requested an extension of time of 30 days from August 31 to September 30, 1950, within which to complete this job. The contractor alleged that due to severe conditions in a quarry that he operated as a subcontractor under another highway contract, he was delayed in completing that work and work at Unity, Oregon that he was performing as a prime contractor, all of which prevented completion of the Thomas-Creek-Lyons project within the specified time limit. The Engineer advised that this contract was awarded on February 6, 1950, but the contractor did not commence work until June 7, 1950, although he was requested several times to complete the rock surface during the early spring in order that a satisfactory oil job might be accomplished by early summer. The contractor, he said apparently made no attempt to comply with this request in view of which he recommended that the extension of time be granted as requested, with the provision that the contractor be charged the engineering costs which accrue from August 31, 1950 to the date of completion of the project. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

12. O. C. Yocom Company, Contract 3281 for oil mat surfacing on the Wilson Creek-Spitzenberg Section of the Pittsburg-Scappoose County Road, Columbia County, requested an extension of time of 15 days from August 31 to September 15, 1950, within which to complete this job. They alleged that an excessive amount of dirty material in the quarry plus heavy snow in the spring and rain during the summer months delayed commencement of crushing operations and slowed down crushing operations in general. The Engineer advised that due to an excessive amount of dirty material in the quarry, it was necessary for the contractor to close down operations several times in order to segregate the good stone from the bad. He also said that no inconvenience has been caused the State because of the overrun of the time limit, and he recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

13. Lindstrom Brothers, Inc., Contract No. 3239 for widening of McCord Creek Bridge on the Dodson-Bonneville Section of the Columbia River Highway in Multnomah County, requested an extension of time of 90 days from September 30 to December 29, 1950, within which to complete this job. They alleged that delay in the award of the contract and failure of the contractor on the adjacent road construction to clear working areas at the bridge ends prevented completion of the project within the specified time limit. The Engineer advised that bids for this project were opened on September 19, 1949, but due to difficulties in consummating an agreement with the Railroad Company, the contract was not awarded until October 25, 1949. He also said that the adjacent road contractor was supposed to have made the excavations at the bridge ends before the bridge contractor started work, but due to difficult excavating conditions, this was not done. In view of these circumstances, he recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

14. Lindstrom Brothers, Inc., Contract 3107 for construction of bridges on the Coos Bay-Roseburg Highway in Douglas County, requested an extension of time of 25 days from July 31 to August 25, 1950, within which to complete this job. They alleged that the bridges were completed before expiration of the completion date with the exception of several minor items of concrete patching and site clean-up which were called to their attention by the Engineer on August 3, 1950, and were completed on August 18, 1950, with final inspection and approval accomplished on August 25, 1950. The Engineer advised that all work on this contract other than the small amount of concrete finishing and clean-up was completed prior to the completion date specified in the contract and that the contractor returned to the bridge to complete these small items of work when they were called to his attention. He recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

15. Roy L. Houck, Jr., Contract No. 3034 for grading and bituminous macadam surfacing on the Lost Creek-Lowell Section of the Willamette Highway in Lane County, requested an additional extension of time of 30 days from July 31 to August 31, 1950, within which to complete this job. He alleged that failure to complete the work within the previously extended time limit was due to unavoidable delay in excavating a cut containing wet material which was to be used in embankment, cleaning out slide areas and back-filling with blasted rock on force account, and further delay due to adverse weather conditions in the month of June. The Engineer advised that an extremely wet subgrade and indecision on the part of the Army Engineers regarding a change to be made on the Dexter Dam had delayed the contractor's progress several months, and in addition, the contractor was forced to remove considerable material which was unsuitable for subgrade and also was forced to delay action until the subgrade could be dried out. The contract, he advised, was completed on August 16, 1950. He recommended that the extension of time be granted to August 16, 1950, without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

The Engineer reported a request from the county roadmaster of Multnomah County for the designation of a reduced speed zone on the Mt. Hood Highway from M.P. 5.31 (82nd Avenue, Portland) to M.P. 9.99 (Jenne Road). He said that investigation has been made of the conditions on this section and it has been determined that they are quite hazardous between 82nd Avenue and 125th Avenue, a distance of 1.16 miles, but from 125th Avenue to Jenne Road, conditions are not sufficient to justify any reduction in legal speed. He recommended establishment of a 35-mile per hour speed limit along the 1.16 mile section between 82nd Avenue and 125th Avenue only. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked Exhibit "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported a request from Mr. Ivan F. Phipps, Attorney, Portland, for the designation of a reduced speed zone on north Denver Avenue between Portland north city limits and the intersection of Union and Denver Avenues. He said that the conditions along this section of highway, which is outside of the city of Portland and carries an average daily traffic volume of 15,000 vehicles, have been investigated by the traffic engineer who advises that the accident rate is more than double the average throughout the state. He pointed out that during the year 1949, 123 accidents occurred along this section and that during the last four years, 4 persons have been killed and 123 injured. He recommended the establishment of a 45-mile per hour speed zone from Portland city limits (M.P. 4.98) to the Union Avenue interchange (M.P. 6.10) and the designation of a 35-mile per hour speed zone between Union Avenue interchange and the Washington State line. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked Exhibit "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered and, upon recommendation of the Engineer, denied a request from people residing along the Salem-Dayton Secondary Highway north of West Salem, for the designation of a 35-mile per hour speed zone on this

highway between West Salem and a point two and one-half miles northerly thereof. The Commission could not justify such designation by the facts disclosed in the Engineer's report on the subject.

A petition was presented from residents of Riverdale, Riverwood and Dunthorpe neighborhoods on the Oswego Highway south of Portland. The petitioners requested the designation of a 30-mile per hour speed zone on this highway from a point approximately 200 yards north of the entrance to S. W. Radcliffe Road to a point approximately 200 yards south of the entrance to Dunthorpe. According to the petition, a reduced speed zone is needed as protection for vehicles attempting to enter or leave the highway by using access roads and driveways, and to protect pedestrians who are obliged to walk along or cross the highway, particularly children who attend the Riverdale school. The Engineer advised that this matter was investigated by the traffic engineer who reports that existing conditions do not justify the designation of such speed zone, and who states that the main hazards exist at the private driveways which have been constructed without any provision for sight distance. The engineer also pointed out that the accident record for this section of highway is very good, being thirty percent below the average accident rate on all of the rural primary state highways. He recommended, in view of the findings, that the request be denied. The Commission approved the request unanimously.

The Engineer brought to the Commission's attention a hazardous condition which exists on the Oregon Coast Highway through the community of Langlois, an unincorporated town in Curry County. The highway at this place, he said, is only 60 feet wide and the merchants have constructed sidewalks in front of their business places, leaving only a 16-foot distance from the sidewalks to the edge of the oil surfacing on the highway. He also said that local people park their cars diagonally in front of these business establishments, and due to the narrowness of the space between the sidewalk and the highway pavement, the rear ends of the vehicles protrude onto the traveled roadway creating a very hazardous condition which should not be permitted. He recommended the adoption of an order requiring parallel parking of cars on both sides of the highway through the business district of this place, a distance of 925 feet, to enable the state police to enforce the regulation. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked Exhibit "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In this connection, the engineer also called attention to the fact that a similar condition exists in the unincorporated town of Brookings on the Oregon Coast Highway in Curry County. In this town, he said, the pavement is of sufficient width to accommodate four lanes of moving traffic and there is an 8-foot parking area adjacent to the curb on each side of the street. He also said that parallel parking stalls have been painted along the curb line but people do not pay any attention to the indicated parking and insist on parking their cars diagonally, which renders the outer two lanes practically useless for moving traffic and creates a considerable hazard by reason of the fact that cars backing away from the curb interfere with traffic even in the middle traffic lanes. He recommended adoption of an order by the Commission requiring the parallel parking of cars on both sides of the highway through this town, parti-

cularly between Pacific Avenue (M.P. 387.66) and Wells Street (M.P. 387.98), so that the state police may enforce the ruling which they have no authority to do otherwise. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked Exhibit "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer requested authority for the expenditure of $800 in cooperation with sixteen other states, the District of Columbia and the Territory of Hawaii, to finance a series of model tests to be made at the Taylor Model Basin in Washington, D. C. as a basis for new specifications pertaining to the application of wind forces on bridges. He said that these tests are to be made under the direction of the American Association of State Highway Officials and the results obtained will unquestionably realize savings in bridge construction, particularly on bridges of the girder type constructed of alloy steel. The Commission unanimously approved the request.

The Commission discussed and approved an agreement with the Union Pacific Railroad Company terminating use of an underpass of the Company's tracks near Bridal Veil, which underpass has been in use since 1946 in connection with the hauling of rock, riprap and surfacing materials for construction of the water level route, Columbia River Highway. (The agreement was signed on the following day.)

The Commission had under discussion a request from the State Liquor Commission to rent the fifth floor of the new State Highway Department office building now under construction in Salem. The Engineer advised that the Liquor Commission wants 2,800 square feet of space partitioned off into several rooms, which will cost about $2,630 to provide. It was the feeling of the Commission that it is yet too early to decide whether or not to rent the fifth floor of this building. The Engineer was instructed to inform the Liquor Commission accordingly.

Consideration was given by the Commission to payment of $126.24 to the Bureau of Land Management, U. S. Department of Interior, for government-owned timber that was cut, removed and sold by the state to Leonard Lundgren of Bend. The Engineer advised that this timber was located on a 40-acre quarry site that was being used by the state under special use permit from the U. S. Forest Service. The trees were "high-risk" pine trees infested by pine beetle and because of the fact that the U. S. Forest Service had sold similar infested timber in the same vicinity, arrangements were made by the Department for the sale of the timber on the quarry site, seven trees in all having been removed, with a total stumpage of 15,780 board feet. This material, he said, was sold to Mr. Lundgren at the rate of $8.00 M, total $126.24, and the Bureau of Land Management is now asking the state to pay this money over to the Department of Interior. He recommended that this be done. The Commission approved the recommendation.

A letter was presented from W. L. Bloomquist, State Counselor for the Blind, requesting permission to establish a vending stand for a blind person in the new State Highway Department office building in Salem when completed.

It was the feeling of the Commission that the best public interest would be served were such a vending stand not allowed. Accordingly, the request was denied.

The Engineer reported the posting of the following bridges for five-ton gross weight loads:

1. Santiam River Bridge at Cascadia State Park.
2. Muscot Bridge on the Little Nestucca Secondary Highway.
3. Weed Bridge on the Little Nestucca Secondary Highway.

He said that the Santiam River Bridge at Cascadia State Park was posted for five-ton loads on September 11 and the other two bridges were posted for similar loading on September 25. The Commission unanimously approved the action taken by the Engineer in this matter by the adoption of the attached resolution relative thereto marked Exhibit "I", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Secretary presented a letter from the Baker County Chamber of Commerce relative to the dedication of the Dewey Avenue Underpass on the Baker-Unity Highway in Baker. In this communication, the State Highway Commission and its staff are invited to attend the ceremonies and to furnish a speaker for the occasion, which is scheduled to be held on Thursday, November 9, 1950. It was recalled that the next regular meeting of the Highway Commission is scheduled to be held on the same day, in view of which, the Commission instructed the Engineer to contact the person in charge of the dedication to ascertain whether or not the date for the dedication could be changed. That was done and the Engineer reported that the dedication has been advanced one day, to November 8. The Secretary was instructed to thank the Chairman of the program committee for the invitation and to inform him that the State Highway Commission would be represented on the occasion.

The Commission had under discussion the designation of certain persons to represent the State Highway Department at the annual meeting of the American Association of State Highway Officials in Miami, Florida, December 4-8, 1950. It was unanimously decided that all three members of the Commission, the State Highway Engineer, First Assistant State Highway Engineer, Chief Counsel and the Secretary attend this meeting at state expense, subject to approval by Governor McKay.

The Commission confirmed out-of-state travel expenses in the amount of $185.20 incurred by Malcolm H. Hawke, Auditor, who made a trip to Omaha, Nebraska, to check records of the Union Pacific Railroad Company in connection with the Company's claim for damages arising out of the Oneonta slide on the upper Columbia River Highway. The Commission also approved out-of-state travel expenses of $100 to send Assistant Traffic Engineer, J. L. Head, to Salt Lake City on November 2 and 3 for a meeting with State Highway Planning Engineers and Public Roads Planning Engineers of the eleven Western states. The Commission also authorized Manley F. Robison, Director of the Travel Department, to attend the annual meeting of the Pacific Northwest Travel Association in Spokane, Washington, November 13 and 14, estimated cost $65.

The Engineer reported that 46 State Highway Department employees who are affected by the state retirement act will have to be retired during the calendar year, 1951, unless their period of employment can be extended. He said that the retirement status of 23 of these employees must be considered and decided now because all are affected between December 1, 1950 and July 1, 1951. The remaining 23 are not affected until sometime during the second half of 1951, so it would be advisable to defer consideration of their status because our changing economy is having a marked effect upon the manpower situation. He presented a list of the employees whose retirement status must be acted upon immediately, together with his recommendation with respect to each of these employees as follows:

Employes whose retirement extension expires during the first half of 1951

Name	Classification	Age During 1951	Date Extended to by Hwy. Commission	Extensions Granted By the Retirement Bd.		Recommendations
				Date Extended to	Number of Extension	
Eason, F. D.	Civil Engr. V	69	1-1-51	1-1-51	3rd	Extend to 1-1-52
Chase, Orrin A.	" " IV	69	1-1-51	1-1-51	3rd	Extend to 1-1-52
Heuperman, Lambertus	" " III	70	1-1-51	1-1-51	3rd	Extend to 1-1-52
Kirkwood, A. A.	" " III	66	1-1-51	5-1-51	1st	Extend to 5-1-52
Waller, J. F.	" " III	68	1-1-51	6-1-51	3rd	Extend to 6-1-52
Deuber, Paul	" " I	68	1-1-51	12-1-50	2nd	Extend to 12-1-51
Weber, Joseph	Mechanical Engr.	67	1-1-51	4-1-51	2nd	Extend to 4-1-52
Libby, Hollis W.	Civil Engr. V	71	1-1-51	1-1-51	3rd	Extend to 1-1-52
Skelley, E. A.	" " IV	71	1-1-51	1-1-51	3rd	Extend to 1-1-52
Hutchison, Frank G.	" " III	79	1-1-51	1-1-51	3rd	Retire
Richards, Carl P.	" " II	70	1-1-51	1-1-51	3rd	Retire
Laws, Wendell P.	Section Foreman	67	1-1-51	3-1-51	2nd	Retire

(cont.)

Retirement status of Highway Department employes (cont.)

Employes reaching retirement age during the first half of 1951

Name	Classification	Effective Ret. Date	Recommendations
Long, Cullom C.	Bridge Foreman	2-1-51	Extend to 2-1-52
Miller, Claude S.	Weighmaster I	3-1-51	Retire
Chilson, Sanford	Park Custodian I	5-1-51	Retire
Witte, Geo. J.	" " II	5-1-51	Retire

Werth, Wm. F.	" " " II	2-1-51	Retire
Smith, Chas. A.	Shovel Operator	4-1-51	Retire
Scott, Chas. W.	Truck Driver	3-1-51	Retire
Hutchison, Wm.	Laborer I	5-1-51	Retire
Smith, Jesse A.	Laborer I	4-1-51	Retire
Rathe, Rudolph	Laborer I	1-1-51	Retire

After careful consideration, the Commission unanimously approved the Engineer's recommendations as disclosed in the list. (For further details, see copy of Engineer's report to the State Highway Commission dated September 25, 1950 in general files.)

In this connection, the Chief Counsel requested a further extension of the retirement date of Mr. William J. Minkiewitz who is employed in the Right of Way Department. In discussing this, it was pointed out that Mr. Minkiewitz already has been retired and is not eligible for a full year's extension; however, it would be possible to retain his services on a 600-hour basis after January 1, 1951. The Commission approved arrangements to that effect.

The Commission had under discussion the approval of signs to be erected along state highways indicating the limits of highways that have been designated "through" ways, such signs being a legal requirement according to the provisions of the law which was enacted by the 1947 legislature. The Engineer presented wording for the proposed signs as follows and requested the Commission's approval of same:

1. Signs with the following wording to be used along throughways on which access is not as yet controlled.

(cont.)

Proposed signs (cont.)

N O T I C E

HIGHWAY SUBJECT TO FUTURE ACCESS CONTROL

This highway has been designated a "throughway" by resolution of the Oregon State Highway Commission.

Persons contemplating the making of improvements upon property abutting the right of way of this highway should familiarize themselves with Chapter 226, Oregon Laws 1947, and seek information from the Oregon State Highway Department, Salem.

2. Signs with the following wording to be used on highways where access has been or is being controlled.

N O T I C E

THE RIGHT OF WAY ALONG THIS PORTION OF
THE HIGHWAY (HAS BEEN) PURCHASED WITH
(IS BEING)
CONTROLLED ACCESS.

NO DIRECT ACCESS OTHER THAN THOSE
APPEARING IN DEEDS WILL BE GRANTED.

INVESTIGATE REQUIREMENTS ON ACCESS
BEFORE IMPROVING ABUTTING PROPERTY.

INQUIRE OF
STATE HIGHWAY DEPARTMENT, SALEM.

The Commission by unanimous vote approved the wording of both signs subject to the Chief Counsel's approval of the same.

A communication was presented from residents along the Oregon Coast Highway north of Florence, Lane County, requesting the designation of a reduced speed zone of 35 miles per hour along this highway between Sutton Lake and Florence. The Engineer advised that the section of highway referred to is 5.89 miles in length and extends from M.P. 197.67 at Sutton Lake to M.P. 203.56 at the north city limits of Florence. Investigation by the traffic engineer, he said, indicates that there is no justification for a reduced speed limit on the section between Sutton Lake (M.P. 197.67) and Heceta Beach Junction (M.P. 200.62) but the accident record for the section between the latter mentioned point and the city of Florence indicates that traffic should be slowed down along that

section. He recommended designation of a 45-mile per hour speed zone between M.P. 200.62(Heceta Beach Junction) and M.P. 202.84 and the designation of a 35-mile per hour speed zone between M.P. 202.84 and the north city limits of Florence. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto marked Exhibit "J", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission also discussed a request from residents of the city of Wilbur, Douglas County, for the designation of a 25-mile per hour speed limit on the Pacific Highway through the city of Wilbur. The Engineer advised that investigation by the traffic engineer reveals that there is justification for a reduced speed limit for traffic through this city, but not as slow as 25 miles per hour. He recommended a designation of a 35-mile per hour speed zone between M.P. 190.6 and M.P. 191.3 through this unincorporated town. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto marked Exhibit "K", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A communication was presented from Mr. Collier H. Buffington, attorney, Gold Beach, Oregon, requesting in behalf of clients, that the Commission authorize the granting of over-length permits up to a maximum of 60 feet over-all length for the carriers of logs, poles and piling on the Oregon Coast Highway between Hunters Creek and Coos Bay. The Engineer advised that a current practice limiting to 55 feet the maximum over-all length for carriers of such commodities was established in 1946 as a result of test runs using equipment which measured slightly in excess of 59 feet over-all. This test, he said, conclusively proved that the highway will not safely accommodate a logging truck with a load of that length, because of encroachments in the opposing traffic lane. He recommended that the request be denied and that the loads be limited to 55 feet over-all length as in the past. The Commission approved the recommendation unanimously.

The Commission discussed and approved a form of agreement with Marion County providing for the abandonment,as state highways, of two short sections of the North Santiam Highway (old route) between Stout Creek and Mehama, and acceptance of such sections by Marion County for future maintenance as county roads, upon completion of the North Santiam Highway (new route) between Mehama and Mill City. (The agreement was signed the following day.)

The Commission also discussed and approved, upon recommendation of the Engineer, an agreement with the city of Salem providing for the installation of a 20" sewer line and a 24" water main on Marion Street Bridge now under construction across the Willamette River in Salem. In the discussion of this matter, the Engineer advised that the city has agreed to pay all costs involved in these installations; moreover, the city has already deposited with the Highway Department a check in the amount of $3,900 to cover the placing of angles on the steel spans of this structure. (The agreement was signed on the following day.)

The Engineer presented a written report on the result of an economic analysis of the low pass section of the Siuslaw Highway, Lane County, as previously ordered by the Commission. The Commission ordered the report filed .

The Engineer also presented a written report on the results of reconaissance surveys and economic studies of various highway projects in Clatsop County, particularly the lower Columbia River Highway between Rainier and Astoria, Fish Hawk Falls Secondary Highway between Elsie and Jewel and the Astoria-Glenwood section of the Oregon Coast Highway. The Commission ordered the report filed.

The Commission discussed a report from the Engineer on a request presented by the Hood River Chamber of Commerce in behalf of the Hood River Ski Association and the Alpinese Club of Parkdale, for snow removal on the road leading to Cooper Spur, as an accommodation to winter sports enthusiasts. According to the report, the alignment of the road is very winding and steep with a road bed width of only 16 feet and surface of only 12 feet; also the road in question is a forest road and the section that the group wants kept open is two miles in length. The Engineer stated that it would be necessary to operate a rotary snow plow to keep the road open as desired, which would cost about $1,500 per month or between $4,000 and $5,000 for the whole winter season. Because of existing conditions, he said, it would be very difficult to keep the road open as requested and because of the curves and the narrow width of the road, there is a good chance that the equipment would slide off the grade. He recommended against the operation. The Commission deferred its decision in the matter pending discussion of the subject with a delegation which was scheduled to appear before the Commission on the following day. (See ahead for additional paragraph.)

The Engineer reported that the construction of the Delmar-Coaledo and the Coaledo-Chrome Plant Sections of the Oregon Coast Highway between Coos Bay and Coquille have been completed and that certain portions of the old road no longer are of any value for state highway purposes. He recommended that several of these sections be surrendered to Coos County, pursuant to written agreement heretofore executed between the Highway Commission and the County Court, for future maintenance as county roads and that other sections be allowed to be abandoned to the benefit of abutting property owners. He exhibited maps showing the parcels referred to. As a result of the discussion, the Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked Exhibit "L", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported receipt of notice from the Bureau of Public Roads to the effect that construction of the Timberline Road, which extends from the Mount Hood Highway to Timberline Lodge, is completed and is now ready to be turned over to the state for maintenance pursuant to agreement between the state and the federal government dated August 2, 1949. The Engineer confirmed the agreement and recommended that the road be designated a state secondary highway, to be known as Timberline State Secondary Highway No. 173. After due consideration the Commission approved the recommendation. The attached resolution relative thereto, marked Exhibit "O", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Commission discussed delegations scheduled to be present on the following day, particular attention being given to the matter to be presented by Attorney John Hounsell of Hood River, who is to appear in behalf of a client who alleges that state highway forces have created a hazard by the construction of a ditch and the erection of guard posts in front of his premises on the Mount Hood Highway. The Commission deferred action of all of these matters pending discussion with the delegations.

The meeting adjourned at 5:10 p.m. to reconvene on the following morning in the same room.

Portland, Oregon
September 29, 1950

The State Highway Commission reconvened in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel with the same persons present and participating. Prior to the opening of bids for highway construction, the Secretary, at the request of the Commission, made the following announcement: "In connection with the bids for the Garden Valley Road-Roseburg project, the Highway Commission wishes to point out that a typographical error occurred in listing the number of cubic yards of concrete required for the median strip in that project, the proposal indicating that 480 cubic yards of concrete are required, whereas the correct amount should have been 48 cubic yards. The Commission wishes this error brought to the attention of the contractors who are bidding on this job so if they wish to withdraw their bids for this project, they may do so before the bids for this job are opened." None of the contractors responded to the announcement whereupon bids as follows were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Chandler announced that the awards of contracts would be made at 3:00 p.m. in the same room.

C. J. Eldon, Portland	100,870.00

The Engineer requested authority for an expenditure of $150,000 for construction of a grade for the proposed highway location between Edgewater Street and the Willamette River through West Salem, particularly between the Center Street Bridge and McNary Avenue. He said that the Army Engineers are conducting dredging operations in the Willamette River opposite this location and in connection therewith are depositing materials on the river bank. He gave as his considered opinion that it would be advisable for the state to take advantage of this material and transport it to the highway grade. This operation, he said, would save the state about $50,000 in the construction of the grade, which would be much more expensive were materials obtained from some other source. Moreover, it would help the Army Engineers and would realize a saving for them in the disposal of the materials. He recommended approval of the expenditure and requested, in addition, authority for the Right of Way Department to negotiate needed right of way, which has been estimated to cost about $75,000. The Commission approved the project unanimously.

Commissioner Reynolds brought up for discussion a letter which he received from Mr. Forrest Cooper, attorney of Lakeview, regarding the Sprague River County Road, Klamath County. In his letter Mr. Cooper gave as his understanding that the Congress in its new appropriation bill for road building purposes in Indian reservations has included an item of $75,000 for the improvement of the Sprague River Road, on the condition, however, that this sum be matched by the state; that the bill has passed both Houses of Congress and

indications are that it will be signed by the President. In the discussion of this matter there arose the question of how much will it cost to complete construction of this road, and are there other federal funds available to match the $75,000 Indian allotment so it will not be necessary to use state funds for such matching purposes. The Engineer was instructed to ascertain such information and report to the Commission.

Commissioner Reynolds also brought up for discussion the acquisition of right of way needed for the improvement of the Columbia River Highway through the Celilo Indian Village east of The Dalles. He inquired as to what has been done to acquire this property and was informed by the Right of Way Engineer that application for the right of way had been filed with the Washington authorities who, as yet, have taken no action in the matter.

A delegation from Prineville and Crook County, representing the Prineville-Crook County Chamber of Commerce appeared before the Commission to urge permanent improvement of the Paulina Secondary Highway No. 380 between Prineville and Paulina. The following persons made up the group: J. C. Minson, County Commissioner; Joe D. Thomison, Secretary, Crook County Chamber of Commerce; Robert Lister, stock rancher; Joe Cox, truck operator; M. R. Isted, representing Pine Products Corporation; and A. R. Bowman, Chairman of Highway Committee of Crook County Chamber of Commerce.

Mr. Minson, who acted as spokesman, pointed out that due to the heavy use by cattle, grain and log haulers, the road is becoming extremely rough and dusty. He urged the premanent improvement of the road throughout its entire length. Mr. Thomison presented a petition signed by J. C. Minson in behalf of the County Court, and by A. R. Bowman in behalf of Prineville-Crook County Chamber of Commerce in support of their oral request. He also presented a letter from Henry C. Hughlett, U. S. Forest Supervisor, giving the amount of timber products that have to be hauled over this road; a letter from Robert Lister, representing livestock ranch interests, pointing out the value of improvement to ranchers; a letter from Pine Products Corporation concerning the value of improvement to haulers of logs and lumber; a similar letter from Hudspeth Pine, Inc.; a letter from Dean D. Davis pointing out the expense of car operation due to the rough road and dust; a letter from Owens Freight Lines citing the abnormal wear on tires due to the rough road. Mr. Lister pointed out that the hauling of livestock over this highway is seasonal and that a one-day traffic check might not give a true indication of the amount of traffic on the highway. He also pointed out that the section of road between Prineville and Combs Flat, although it is on good alignment and has a good base, is very rough and dusty. Mr. Minson said that all they are concerned with now is the oiling of the present road, and they are not particularly interested at present in the extension of the road to a connection with the Central Oregon Highway. Chairman Chandler advised that improvement of this highway will be given consideration by the Commission when it formulates its next construction program, but no commitment or promise with regard to it can be made now.

A delegation representing the Hood River Ski Association and the Alpinese Club appeared before the Commission to urge that snow be removed during the winter months from the Cooper Spur Road for a distance of one and one-half

miles from its junction with the Mt. Hood Highway. The Following people were present: Jack Baldwin and Robert Moller, members of North Slope Ski Club, Hood River; Kenneth See, Parkdale Booster Club, Hood River; and R. E. Steele, Manager, Hood River Chamber of Commerce.

Mr. Robert Moller urged that snow be removed from the Cooper Spur Road for a distance of one and one-half miles to allow one-way traffic to the higher ski area. He pointed out that the beginner's slopes are on the lower area near the Mt. Hood Highway but that it is very dangerous to mix expert and novice skiers on the same grounds. It is the plan of the Skiing Associations, he stated, to provide a shuttle service on the one-way section if it is kept open and that participants' cars will be parked in the area at the junction of the two roads. The Engineer explained that this road is very narrow and crooked, that the surfacing is thin and the operation of a heavy rotary snow plow over it might break down the road surface; moreover, there is a possibility that the plow might be lost over the bank. As the result of discussion, the Engineer was instructed to investigate the possibilities of keeping the road open with light-type equipment, it being the feeling of the Commission that the group should be accommodated if that can be done at reasonable cost and without interference with normal snow removal operations on main highways.

A delegation from Eugene composed of the following persons appeared before the Commission in the interest of the Fox Hollow State Secondary Highway No. 221 south of Eugene: Bernard Jarvis, Mrs. Bernard Jarvis, Joe Ankeny, and Paul Belzer, Eugene. Mr. Jarvis, who acted as spokesman for the group, recalled that people living along this highway had previously requested its improvement and that this delegation simply wishes to restate the need for it. He said that the base of the road is solid but the road is in a very rough condition due to the large rocks that protrude, making proper maintenance an impossibility. He urged the oiling of the one and one-half mile section immediately adjoining the section that is now oiled south of the Eugene city limits, as an accommodation to the many people who live along that section. The matter was discussed at some length and as a result thereof, the Engineer was instructed to investigate existing conditions and report his findings, including cost estimates, for the Commission's information and consideration in formulating its next construction program for secondary highway funds.

Messrs. Paul Rynning, County Engineer, Jackson County, and Don Lane, Manager, Jackson County Chamber of Commerce, were present in behalf of the Ashland Chamber of Commerce, Jackson County Chamber of Commerce, and the Jackson County Court, and urged the widening of the Pacific Highway to four lanes of traffic between Central Point and Ashland. Mr. Rynning was principal spokesman. He declared that this section of US99 is the worst of all of the sections yet remaining to be improved and he urged the Commission to start the widening work at the earliest possible time. Mr. Lane endorsed Mr. Rynning's request from the standpoint of increased population, and increased traffic, particularly truck traffic incident to the fruit packing industry in this district. Chairman Chandler advised that the Commission is aware of the conditions along the Pacific Highway and already has authorized the Engineer to conduct necessary surveys; in fact, studies are now being made for proposed improvements in the vicinity of Gold Hill and when they are com-

pleted, similar studies will be made in the Ashland district. Commissioner Reynolds mentioned the fact that the Commission is seriously handicapped in starting new work on many projects due to lack of funds. He requested suggestions from Mr. Rynning and Mr. Lane as to the financing of urgently needed highway construction. Mr. Rynning stated that he could not speak with authority on this matter but in his opinion, the sale of bonds would be justified. It was his feeling that the people of southern Oregon will approve such method of financing if the problem were properly presented to them. This concluded the discussion.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

Mr. Forrest Stewart, Executive Secretary, Oregon State Employees Association, was present and renewed the Association's request that the Commission allow payroll deductions to pay premiums incident to a group life insurance plan as sponsored by the Association. In the discussion that followed it was recalled that the Commission disapproved the previous request mainly because the payroll form did not provide space for additional deductions and because the benefits were limited to Association members. Mr. Stewart advised that the first objection has been eliminated by changing the insurance carrier from West Coast Life Insurance Co. to California-Western States Life Insurance Co., the same carrier with whom the Highway Department now has a contract, so no additional space need be provided on the payroll form. He further advised that no financial advantage will accrue to the Association and that their objective is simply to serve the members of the Association. Chairman Chandler recalled that when the matter was previously before the Commission, the most serious objection was that the plan was limited to Association members. It appears, he said, that this same feature exists in the present arrangement, wherefore the Commission must be very careful in reaching its decision because of the feeling that the benefits should be made available to all highway employees regardless of their affiliation with the Association. The Commission, he said, is open-minded in the matter and will give the matter fair consideration. The Commission referred the matter to the Auditor to investigate carefully from all standpoints and report at the next meeting.

Hon. John P. Hounsell, state representative from Hood River County, appeared before the Commission as attorney for Mr. Elton Stewart, owner of a gas pump installation on the Mt. Hood Highway about 10 miles south of Hood River. He stated that Mr. Stewart for a number of years had operated a gasoline pump at this location and recently started to rebuild it but was stopped by the Highway Commission's representative in that district because of a Commission policy which prohibits the servicing of vehicles on the highway right of way; moreover, after the gasoline pumps were installed, a highway maintenance crew excavated a ditch along Mr. Stewart's frontage and installed guard posts, so Mr. Steward no longer can serve the public as he did in the past. He alleged discrimination because, he said, this is the only place on the Mt. Hood Highway where cars cannot be served on the highway. He said that the ditch is absolutely of no value from the drainage standpoint because there is no water to flow in it, and it only constitutes a hazard to highway travel. He urged the Commission to allow Mr. Stewart to serve the public as he has in the past. The Engineer recalled that

about 15 years ago, a former Highway Commission issued an order prohibiting the use of any part of the highway right of way for commercial purposes. Later, he said, the legislature enacted a law outlining certain things that must be done to secure access to the highway, including the securing of a permit. He also said that he is simply endeavoring to enforce the legal requirements so as to protect pedestrians and highway traffic. He pointed out that the regulations are primarily for the safety of people using the highway and that hundreds of installations have been built in compliance therewith. Mr. L. V. Koons, District Maintenance Superintendent, who was present, advised that he treated this installation as an entirely new one and that Mr. Stewart was notified of the regulations two or three weeks before the cement for the pump installation was poured. In the discussion which followed, Chairman Chandler pointed out that this particular case is only one of a number of similar cases which are before the Commission for action. He also said that the law referred to by the Engineer is a new one and the Commission feels that it is duty bound to enforce it and require compliance with its terms, but in the instant case, the Commission will review the facts and will make its decision after carefully studying them. This concluded the conference. Following Mr. Hounsell's departure, the matter was again discussed by the Commission. As a result thereof, the Engineer was instructed to do whatever is necessary to keep Mr. Stewart from violating the laws, rules and regulations that govern his gasoline pump operations.

The Commission discussed with the Engineer the bids received at the morning session and at 3:00 p.m. Chairman Chandler publicly announced the awards of contracts, as follows, the Commission's decision in each instance being by unanimous vote:

"Construction of a masonry block building at the junction of the Mt. Hood Highway and Timberline Road, in Clackamas County. The Commission received three bids for this project, the low one being that of Stockton and Sons, Gresham, at $60,102. The contract has been awarded to Stockton and Sons, low bidder, at their bid price.

"Construction of a latrine and septic tank in Battlerock State Park at Port Orford on the Oregon Coast Highway in Curry County. No bids were received for this project.

"0.53 mile of grading and paving on the Garden Valley Road-Roseburg Section of the Pacific Highway, in Douglas County. The Commission received two bids for this project, the low one being that of K. F. Jacobsen and Company, Portland, at $134,515.50, using asphalt. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Guardrail construction on the Reedsport-Scottsburg Section of the Umpqua Highway, in Douglas County. Nine bids were received for this project, the low one being submitted by Rich and Sons Nursery, Hillsboro, at $37,600. The Commission has awarded the contract to the low bidder, Rich and Sons Nursery, at their bid price.

"0.27 mile of grading, surfacing and oiling on the Yoncalla Section ("B" Street) in Yoncalla, Douglas County. Western Paving and Construction Company, Albany, submitted the only bid received for this project at $14,716. The Commission has referred the bid to the Engineer with authority to award the contract to this company when certain conditions have been satisfied.

"Furnish and erect structural steel for main river spans of the Marion Street Bridge over the Willamette River at Salem, Marion and Polk Counties. The Commission received only two bids for this project, the low one being that of American Bridge Company, Portland, at $249,026.50. The contract has been awarded to the low bidder, American Bridge Company at its bid price.

"8.77 miles of grading on the Stout Creek-Mill City Section of the North Santiam Secondary Highway near Mill City, in Marion County. The Commission received seven bids for this project, the low bid being submitted by Cosmo Gilo, Prineville, at $284,020. All bids have been referred to the Engineer with authority to award the contract to the low bidder, Cosmo Gilo, when certain conditions have been satisfied.

"Embankment construction on the West Salem Section of the Salem-Dallas Highway in Polk County. Nine bids were received for this project. F. C. Scott Construction Company of Portland submitted the low bid at $13,978.00. The Commission has awarded the contract to the low bidder, F. C. Scott Construction Company, at its bid price.

"Construction of a reinforced concrete bridge over Wilson River on the Wilson River Highway, in Tillamook County. The Commission received six bids for this project, the low one being submitted by Lindstrom Brothers, Portland, at $84,565. The contract has been awarded to the low bidder, Lindstrom Brothers, at their bid price."

The Commission discussed a date for its next regular meeting and unanimously decided to hold such meeting in Portland on Thursday and Friday, November 9 and 10, 1950. The Commission also decided to hold a special meeting in Portland on Thursday, October 26, 1950, to consider a construction program and a working budget for the year 1951. The Commission tentatively set Wednesday and Thursday, December 20 and 21, 1950, as the date for its regular meeting in December. The Secretary was instructed to arrange for the use of the Green Room in the Imperial Hotel for each of these meetings. He was also instructed to ascertain whether or not a public meeting place will be available in the new state office building in Portland, when completed.

Mr. Ralph Watson, Public Relations Consultant, was present and outlined a plan that he has in mind to convey to the public the problems concerning construction and maintenance of state highways. He outlined briefly the plan which contemplates a series of articles which would show the total funds available for highway use, the amount of funds which are allocated to the cities and counties, the increasing cost of maintenance and requirements for right of way, etc. The Commission approved Mr. Watson's outline as presented and ordered that Mr. Watson be furnished information that he needs in the preparation of his articles.

Commissioner Reynolds presented a request from the Union County Sportsmen's Club for a long term lease of state-owned property that it is now occupying at Union, so as to permit improvements, including a new building which will involve a considerable investment. The Club's present lease, he said, expires in six and one-half years, and they wish it extended to fifteen years, which they feel is necessary to justify their expenditure. The Commission referred the matter to the Engineer for investigation and report at the meeting scheduled for October 26.

Commissioner Reynolds reported the progress being made in securing fire insurance coverage for maintenance and construction equipment, including autos, trucks, transits, levels, etc. He recommended the purchase of private insurance in the amount of about $3,000,000 through the State Insurance Agents Association represented by Cole, Clark and Cunningham, insurance agents, Portland, at an annual premium of approximately $7,500. The Commission unanimously approved the recommendation and so ordered.

The Engineer reported that construction of the Garrison Corner Section of the Nyssa-Adrian Secondary Highway No. 450 has been completed and that certain portions of the original right of way are no longer of value for State Highway purposes. He recommended that such portions be abandoned in favor of Malheur County pursuant to previous agreement and understanding with the County. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked Exhibit "M", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission approved and signed agreements, etc. as follows:

Agreement with F. C. Hathaway for logging dead timber on Sunset Highway.

Permit agreement with Dan J. Melton covering logging road construction and operation across Maria C. Jackson State Park.

Encroachment permit to Austinna S. Loudenbeck to occupy small area of right of way on Scott Creek Section, Alsea Highway.

Indenture of Access granting Hammond Lumber Company changes in access points to the North Santiam Highway in town of Detroit.

Deed to correct error in deed executed July 20, 1948, conveying properties to Southern Pacific Company on Oregon City-New Era Section of US99E.

Satisfaction of Mortgage from Fred M. Mallory and O. L. Smith acknowledging payment for land purchased.

Deed conveying to City of Pendleton properties adjacent to Pendleton Airport Road.

Agreement with Lock-Wood, Inc., relative to property being acquired for T. H. Banfield Expressway.

Deed conveying to U. S. Government small parcel adjacent to Pleasant Hill-Lost Creek Section of Willamette Highway.

Agreement with Umatilla County, Oregon; Benton County, Washington; and Washington Toll Bridge Authority with respect to proposed bridge across Columbia River below McNary Dam.

Cooperative agreement with Bureau of Public Roads for maintenance of Pendleton-John Day Highway near Ukiah.

Termination of Lease granted by Southern Pacific Company for use of unloading and oil storage site on railroad property in North Bend.

Quitclaim Deed to Linnie Thayer for a parcel of land in Malheur County, containing 0.25 acre.

There being no further business to be considered at this time, the meeting adjourned at 4:30 p.m.

Chairman

State Highway Engineer

Commissioner

EXHIBITS "A" THROUGH "O"

Minutes of September 28 and 29, 1950

EXHIBIT "A"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisiton of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SULLIVAN GULCH HIGHWAY - UNIT #2

14690 - Frazer, Bertrand E. and Magdalene M. (Johnson)
Right of Way
Option expires April 13, 1951

5,000 sq.ft. at 40¢ per sq.ft. & shrubbery	$ 2,037.00	$
House, two-story with basement 32'x24'& garage	11,274.00	
Amount to be paid owner - chrg to Right of Way		$ 13,311.00

Takes All -

16669 - Siebens, Harold W. and Leona (Johnson)
Right of Way
Option expires March 12, 1951

4925 sq.ft. at 25¢ per sq. ft.	$ 1,231.25
